Tenth. The Bureau of Mines bill, to widen the scope of the Bureau of Mines so that it may be better able to develop methods of preventing accidents in mines and have greater efficiency in rescue work when accidents occur, not only in the coal-mining industry but in the mineral and miscellaneous mines as well.

Eleventh. The dredge workers' eight-hour bill, to remedy a decision of the Supreme Court that men engaged in dredging work in our rivers and harbors are not laborers and mechanics, but seamen, and therefore did not come within the provisions of the general eight-hour law.

Twelfth. An eight-hour provision included in the fortification bill to apply to civilians engaged in the manufacture of ordnance and powder for the Government.

Thirteenth. An eight-hour provision in the Post Office appropriation bill making the eight-hour workday apply to workmen employed under the current appropriations.

Fourteenth. An eight-hour provision in the naval appropriation bill making the eight-hour workday apply to workmen employed under the current appropriations.

Fifteenth. A provision in the Post Office appropriation bill removing from post-office employees the gag rule which has been applied by Executive order, issued by President Roosevelt and broadened by President Taft. This provision would make it possible for postal employees to bring their grievances to Congress without fear of being discharged for doing so.

Sixteenth. The phosphorus-match bill to protect the health of workers in the match industry.

Seventeenth. The bill to extend the provisions of the compensation-for-injury act to the employees of the Bureau of Mines.

Eighteenth. The bill to give to official papers of trades-unions and fraternal organizations second-class mail privileges.

Nineteenth. A provision in the naval appropriation bill requiring all coal purchased for the use of the Navy to be mined on an eight-hour workday.

Twentieth. The masters and mates' bill to reduce the hours of masters and mates, making it impossible to require them to continue on duty for indefinite periods, as has been the case in the past.

Twenty-first. The trades-disputes act, embracing the relation of labor organizations to the antitrust laws of the country; the regulation of the issuance of injunctions and the guaranty of the right of trial by jury for alleged contempts committed out of the presence of the court. An act which determines once and for all that labor is not a commodity.

Mr. Chairman, in addition to these laws, recognized as labor measures, we have passed a number of bills which, while not purely labor measures, were petitioned for by both organized and unorganized labor.

First. A bill providing for the election of United States Senators by a direct vote of the people.

Second. A bill revising the tariff downward from an average of 97 per cent to 26 per cent. This bill, in conjunction with the antitrust bills, is working a great benefit to labor.

Third. A bill providing for a system of parcel post which is already saving to those working for daily, weekly, and monthly wages over $11,000,000 per year. Heretofore this vast sum of money was taken from the wage earners and turned over to the express companies, which enabled these corporations to pay annual dividends as high as 70 per cent.

Fourth. A bill providing a system of currency which takes the control of money out of the hands of Wall Street and makes it impossible for a few commercial vampires to bring on panics, close factories, and throw labor out of employment.

Fifth. An income-tax law which last year lifted a burden of $124,000,000 off the shoulders of working people and placed it on the shoulders of the well-to-do, where it properly belongs.

Sixth. Antitrust laws which will prevent combinations in restraint of trade and will protect the wage earner from the extortion heretofore practiced by giant monopolies and combinations.

Mr. Chairman, under all this good and wholesome legislation labor is more prosperous and more independent than ever before. More men are employed than ever before; more men are paid higher wages than ever before; more men are eating better food than ever before; more men are dressing their families better than ever before; more men are riding in automobiles than ever before, and more workingmen will vote the Democratic ticket this year than ever before. Why should they not do so? Under Republican rule there were two men for each job; under Democratic rule there are two jobs for each man; more than 5,000,000 laboring men have had their wages increased during the last 120 days. The Democratic Party has been the friend of labor and has given to the workingmen all the legislation they asked for—legislation they were denied during 16 years of Republican rule. I assert, Mr. Speaker, that no man can offer a single sane or sensible reason why any laboring man should not vote the Democratic ticket this year. Let me remind you, gentlemen, that our American workmen are intelligent, progressive, and efficient. They are keeping a watchful eye on the work of Congress and will expect full justice from us. They are not only watchful, but they are also appreciative. This is now being demonstrated out in Indiana by laboring men of my State, who are organizing and getting together to push my candidacy for governor, in order that they may show their gratitude for the service I have rendered in their behalf. I am also receiving many letters from labor organizations scattered throughout the country commending my service here and expressing their deep appreciation of my faithfulness to labor. Just a few days ago I received a letter from Mr. A. E. King, general secretary and treasurer of the Grand Lodge of the Brotherhood of Railroad Trainmen, informing me of a resolution passed by their organization at their convention held at Detroit in June of this year. I shall print this letter in the RECORD as a sample of the many letters of this character I am receiving. The letter and resolution read as follows:

GRAND LODGE BROTHERHOOD OF RAILROAD TRAINMEN,
GENERAL OFFICES,
Cleveland, Ohio, June 24, 1916.

Hon. JOHN A. M. ADAIR,
Congressman, State of Indiana,
House of Representatives.

ESTEEMED SIR: Our first triennial convention, held in Detroit in June of this year, passed the following resolution and requested that a copy of the same be sent to you:

"Whereas the Hon. JOHN A. M. ADAIR, Member of Congress, representing the eighth congressional district of Indiana, has rendered valuable assistance in placing upon the statutes many laws beneficial to the railroad employees; and

"Whereas he has on every occasion when labor laws were under consideration shown the true progressive spirit and endeavored to better the condition of humanity. Therefore be it

"*Resolved by the first triennial convention of the Brotherhood of Railroad Trainmen*, That we commend and approve Congressman ADAIR'S achievement; and be it further

"*Resolved*, That a copy of this resolution be sent to Congressman ADAIR as expression of our appreciation of his assistance to us."

Very respectfully, yours,

A. E. KING,
General Secretary and Treasurer.

Mr. Chairman, this resolution shows that labor is keeping in close touch with Congress and that workingmen are grateful to those who recognize and aid them in securing their rights. The Democratic Party has not only been true to labor in the Nation, but has likewise been true in all States of the Union where our party has been in power. In my own State of Indiana the last three Democratic legislatures enacted more laws for the benefit of working people than were enacted by our Republican friends during the entire history of the Republican Party. Here are some of the laws the Democratic Party out in Indiana has given to labor during the past few years:

A law providing for trade and industrial schools in cities.

A law regulating the keeping and sale of cold storage food products.

A law providing for the insulation of electric wires.

A resolution ratifying and adopting on behalf of the State of Indiana the income-tax amendment to the Constitution of the United States.

A law requiring all railroads to establish and operate their trains under a block system, to be approved by the Indiana railroad commission.

A law prohibiting and regulating child labor.

A law providing for the establishment and maintenance of playgrounds in certain cities.

A law abolishing the fellow servant and assumption of risk rules, and making employers liable for injuries to their employees, caused either by the negligence of the employer or his servants, commonly known as the "Employers' liability act."

A law requiring the weekly payment of wages in all manufacturing and mining pursuits.

A law making it a criminal offense to send out of the State claims against citizens of the State for the purpose of attachment and garnishment, and authorizing the recovery of any claims so collected with all costs, damages, and attorneys' fees.

A law providing for the payment of wages of laborers employed on public contracts.

A law establishing the home bureau of inspection and providing for the inspection of buildings, factories, workshops, mines, and boilers, and giving to such bureau the power to compel the establishment of safe and sanitary appliances, buildings, etc.

A law defining dangerous employments and providing for the safety of persons employed therein.

A law giving mechanics a lien for their labor.

A law providing for the inspection of locomotive boilers.

A law requiring railroads to use standard caboose cars.

A law providing for full switching crews.

A law providing for automatic bell ringers on locomotive cabs.
A law regulating the height of overhead bridges and other structures.
A law providing for safety appliances on trains, cars, and locomotives.
A law requiring railroad companies, upon request, to state in writing the cause of an employee's discharge.
A law requiring at least two members of every section crew to be acquainted with the rules of flagging trains.
A law requiring the weekly payment of wages and forbidding the use of store checks.
A law providing for the safety of persons employed in and about coal mines and providing for the examination of miners.
A law providing for safety appliances to be used on steam boilers and inspection of such boilers.
Deckless engine law, regulating the construction and operation of locomotive engines.
Motor-car law, providing for flagmen to accompany trolley or motor cars when being operated over steam railroads.
English-speaking language law: A law prohibiting incompetent employees from running or controlling locomotive engines and railroad trains.
A law to provide for an investigation of the hours and conditions of labor of women.
Automatic-closing fire-door law, for the protection of firemen and engineers and employees of steam railroads.
A law to protect the lives of theatrical performers and theatrical patrons by requiring that counterwighting of scenery shall be done with noncombustible weights carried on steel cables.
Double-header law, which prohibits the practice of placing cars between locomotive engines when double or triple heading.
Pilot law, providing for pilot engineers, motormen, and so forth, when detouring or running over foreign roads.
Water-crane law, providing that water cranes and water spouts used on steam railroads shall be securely locked when not in actual use or operation.
Semimonthly-pay law, requiring corporations to pay their employees their wages twice a month.
Railroad-experience law, requiring that experienced railroad conductors and engineers be in charge of trains.
A law regulating employment agencies.
An arbitration law, to settle disputes between capital and labor.
A home bureau of inspection law, providing for the inspection of buildings, factories, mines, and so forth, for the safety of employees.
A workman's compensation law, for the protection of injured employees.

Mr. Chairman, these and many other laws in the interest of labor have been placed upon the statute books of my State by the Democratic Party, and what has been done for labor in Indiana has also been done in other States where the Democratic Party is in power. Speaking for myself, I want to help bring about a condition where colossal fortunes, built up through the sweat, privation, and worry of men, women, and children of working people, will be impossible; where poverty and want will be unknown, and all those who are willing to work will receive such compensation as will enable them to secure comfortable homes, all the food and clothing they desire, and equal opportunities for themselves and for their children for recreation, rest, and mental development with every other citizen of this Republic. Now, gentlemen, let us pass the pending bill and once more show to the country that the Democratic Party is the real, true friend of labor.

Mr. WEBB. Mr. Chairman, I would ask the other side to use some time.

Mr. VOLSTEAD. Mr. Chairman, I yield such time as he may desire to the gentleman from Massachusetts [Mr. GARDNER].

Mr. GARDNER. Mr. Chairman, I believe that this is a proper line for reform legislation to take. I do not agree with legislation which interferes with the efficiency of labor, but this sort of legislation has my hearty concurrence.

I believe in the theory under which modern workmen's compensation acts are based. I believe that every industry should bear the burden of its own accidents. In fact, I believe that the day is close at hand when we must go further in caring for wage earners disabled by sickness or other causes.

Foreign Governments have gone much further and much faster than the United States in this direction. In this country we are feeling our way with altogether too much precaution. Personally, I think that a minimum-wage law for women, for instance, is a reform far too long delayed.

The expression "social justice" has become a political shibboleth. A partisan discussion is evoked every time that phrase crops up in debate. I confess that I do not like to use the expression "social justice," on account of its controversial character; but every day I become more and more convinced that legislation along the line of "social justice" is imperatively needed in this country.

Mr. VOLSTEAD. Mr. Chairman, I yield the balance of my time to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Chairman, the word is passed back and forth among those who are candidates for reelection that it is not wise to talk about this bill or to oppose it. We often hear such remarks and we often pay more attention to them than we should, because it is an old saying that nobody is so cowardly as one Member of Congress except two Members of Congress. I do not profess to have more courage than the average Member here, but I believe that we should give careful and conscientious consideration to all legislation, regardless of the lobby or the propaganda. This bill, while represented as one for compensation to the employee of the Government in case of injury or disability, is so closely modeled on our invalid-pension laws that I can not differentiate and look upon it as other than a provision for civil pension. If the $12 paid to the widow of a soldier is a pension, then this is a pension. We already have laws upon our statute books which provide compensation for civil employees of the Government engaged in hazardous work. It is compensation in a lump sum. That legislation covers our Lighthouse Service, the navy yards, the Railway Mail Service, and I understand that in the Post Office appropriation bill of this year there is other legislation compensating or insuring the lives of many Government employees.

It is proposed in this bill to repeal all of those compensation laws and bring under a pension system 400,000 employees, without distinction as to the character of their work, whether they are engaged in hazardous work such as that in the navy yards or as clerks in the departments without any other risk than that of the average citizen, the lawyer, banker, merchant. It appears to me that in this legislation Congress is asked to make a great departure from the old relations between the Government and its employees.

Very few Members of Congress have seriously discussed or considered a general civil pension, but this bill, taken in connection with two others that have been favorably reported to the House, fairly launch our Congress upon the pension policy of England, Germany, and other European Governments, with this difference, that we propose to be much more liberal in our pensions than any European Government. We have here a minimum-wage bill providing that the Government shall not pay a wage of less than $3 a day to any of its employees, without regard to the character of the employment. The Government already bases its employment on 30 days to the month, and that bill, unless it has specific restrictions, would raise the minimum salary to $90 per month, or $1,080 per annum, which, coupled with the old regulation of 30 days' leave and 30 days' sick leave each year, makes a much more liberal compensation than is provided, on the average, in any wage scale for any line of employment outside of the Government service.

We then have a bill for the retirement of postal employees at the age of 65 years. That bill has also been favorably reported to the House, and provides a pension of $600 a year for all postal employees, placing railway mail clerks, with their hazardous employment, on the same basis with the clerks in the post office and the rural carriers and the city letter carriers, none of whom face any greater risk than the ordinary citizen, but all retiring on a pension equal to the average annual earning of the farmer and greater than that of the factory employee or the wage earner in steel works and telephone companies.

I have here a bulletin recently issued by the Department of Agriculture giving the annual earning of the farmer at $600, only one-third of which is received in cash. In this bulletin the average wage of street-railway employees is given at $650; of men in iron and steel works, $610; of clergymen, $663; of policemen, $1,052; of Federal employees, $948; of workers on full time in factories, $518; and allowing for unemployment, $460. I have also a bulletin issued by the Department of Labor giving the union scale of wages and hours of labor in the last year in many cities of the country. This covers many lines of employment: Steamfitters, plasterers, marble-setters, carpenters, bricklayers, boiler makers, and so forth. None of these union scales equal the proposed scale of the minimum-wage bill which has been favorably reported to this House, and all range from 8 to 10 hours a day. It is said for this bill, that it provides compensation or gives an insurance against risk to about 400,000 of the civil employees of the Government. That is a large number, and yet it is only 1 per cent of the people engaged in gainful occupations in this country. The census reports show that there are 40,000,000 people earning their

living in this country, and that they are the chief supporters of this Government, which has no resources of its own except the power of taxing the citizen and collecting the revenues which we here so liberally appropriate for all sorts of worthy propositions.

The gentleman from Maine [Mr. McGILLICUDDY] in discussing the revenue bill the other day said:

> This power to tax the people delegated to Congress is the most important and far-reaching in its effects of any power in the Constitution. It reaches every home in the land; it affects every family and fireside in the Nation.

I agree with his statement, and yet in this bill he proposes to tax all the people to pension a small part of the people—1 per cent of those who live in the sweat of their faces. He does not know what this burden may become in the future. It is said that it will not cost more than the present laws for compensation, and that it will not exceed half a million dollars a year. The cost of civil pensions in other countries has mounted up after a few years until it has become very burdensome. In Berlin the civil pension costs the Government 36 per cent as much as the active list; in England, 30 per cent; in France, 17 per cent; and in Austria, 33 per cent.

With a compensation schedule like this, the minimum-wage legislation and a civil pension as liberal as that proposed for the Postal Service extended to all the civil service, as it will be in a few years, our civil establishment will become a very expensive one, and then I fear the great body of the people will ask if Congress had looked after the general welfare of the great majority in organizing a special class to be pensioned out of the earnings of the whole through this important and far-reaching power of taxation.

It is class legislation. You know we are prone to look at the fact that it does not come directly out of your pocket or my pocket or the pocket of the individual citizen, but it comes from the Treasury, which, after all, has to be replenished, but in the last analysis it affects every man, whether he is a capitalist or a laborer, because it is all charged back on labor in the end, say what you please about it. Somebody may be the conduit through whom it is conveyed into the Treasury, but in the end it is all charged, either by direct taxation or what is called indirect taxation, upon the consumer, so that it does after all affect everybody.

The men who are engaged in Uncle Sam's employment, man for man, on an average receives a third more pay—I was going to say one-half, but I want to be conservative—one-third more pay, with all the advantage of leaves of absence, where the law so provides, than men of similar ability receive, and that applies to bookkeepers, clerks, railway people, post-route agents, all along the line. Why are these places sought after? Political revolutions are affected sometimes and start sometimes and are crowned with success sometimes by the desire of the "outs" to come in. Why, we have 43,000 rural-route mail carriers.

Now, just let us be honest with each other. They are worthy people. I know a great many who live in my district. The positions are sought after, and they were sought after when the pay was only $300, and they were more sought after as it advanced to $600, $700, to $800, to $900, and to $1,200, as I believe it is now. Why, the man who works upon a rural route—our fellow citizens; I know many of them are good folks—he is better off than the carpenter, than the bricklayer, than the clerk in the bank, than the clerk in the store. Those places are greatly sought after. Why, bless my soul, you ought to see the eligible list since you came in.

The Post Office bill cares for these post-office employees.

Mr. COX. In that connection, why should these places not be sought after, when 4,320 rural-route carriers average less than four hours per day upon a salary of $1,200 per year, and upward of 10,000 more of them employ themselves less than five hours per day, and 43,000 work on an average of only six hours and 41 minutes per day. Why should they not be sought after?

Mr. DOWELL. Mr. Chairman, I would like to ask a question.

Mr. CANNON. Quick, if it is a question.

Mr. DOWELL. I would like to know if the gentleman from Indiana has a record to substantiate his statement with reference to the time the rural carriers are on the route?

Mr. COX. I have. The statement is made by the rural carriers themselves over their own signatures and in their own handwriting.

Mr. DOWELL. I desire to question the record, but——

Mr. CANNON. I can not yield. It is not about this particular man or that particular man, or this particular class of men or that class of men. I want, if I can, to lift this discussion a little higher up than it is generally approached by the various circulars that all of us get. Whoop la! Do you know, boys, what a round robin is? Did any of you ever get one?

Mr. RAKER. Every day.

Mr. CANNON. Every day. I expect everybody does. It comes from the capitalists and plutocrats, the laboring men, and everybody except the farmer. The farmer is one-third of the population. I do not think I have had a single request from a farmer in my district in this year. He is busy with his crops, you know, and taking care of his stock, and all that kind of thing; but everybody else seems to be organized and pouring the requests in to us. When they come in they very frequently send the circular which begot the request. It was not intended that they should do that, but they do it very frequently; and they call that public sentiment.

People are very accommodating about signing petitions and letters urging this and that upon Congress. Several weeks ago I received a number of letters from constituents protesting against the bill to create a juvenile court for the District of Columbia. They used such vigorous language in denouncing that bill that I thought they had been imposed upon. I therefore mailed to my correspondents a copy of the bill with a request that they mark the objectionable sections, suggest changes, and return the same to me. I promptly received replies admitting that they could find nothing objectionable in the bill and confessing that they had been imposed upon by the propagandists who were working against that measure.

We have lobbies and propagandas claiming to represent the people, and it is at times difficult for the Representative to realize that after all the great body of his constituents are not organized but are looking to him to fairly represent them and consent to no legislation that will discriminate against any of them and recognize a class to be favored by the Government. I have no criticism of those who organize and work for themselves and their class. That is in harmony with the laws of nature. But I have never felt that I owed my election as a Representative to any one class or that I should be unduly influenced by the lobby or propaganda of any particular class seeking legislation for its particular benefit. From a purely agricultural district that which I represent has become a district of many industries, and I now represent many thousand men engaged in transportation, manufacture, and mining, while there are also large commercial interests along with the industries and the agriculture. So I have a constituency that fairly represents the interests of the Republic. My experience has been that the average American citizen, whatever his calling or interest, is fair and sympathetic toward the ambitions and aspirations of all other factors in the community, but he is not willing that the Government should depart from its old ideal of equality of all men before the law or that this Congress shall legislate for one class at the expense of all other classes. So I shall vote against this bill because it is class legislation, giving benefits to one class that must be at the expense of the whole citizenship, which must be taxed for these benefits.

No man seeks employment from the Government at a sacrifice, and I am unable to see why the civil employee of the Government, with shorter hours, better pay, and greater privileges than others engaged in similar private employment, should be pensioned at the expense of those who are not in the employ of the Government. After all, these pensions must be paid by the labor of the country, for the Government has no revenues except those it collects from the masses of the people; and, under the present revenue laws reducing the customs taxes and increasing the internal taxation, this plan of granting pensions to the civil employees of the Government is more clearly at the expense of the fellow employee who has not been favored with a Government job. In saying this I am not finding fault with the men in the civil service who are like all other people seeking to better their condition and better provide for those dependent upon them, but, as a Representative of the 99 per cent of those who are earning their bread in the sweat of their faces, I do not believe I am justified in putting this burden upon them without some reliable information as to how that burden will increase, until, like in other countries where the civil pension has been adopted, it has become too heavy for the taxpayers to bear, especially at a time when the Government is facing new problems of defense which are calling for new and untried methods of taxation.

So I respectfully consider all the round robins I receive, listen to the lobbyists, and, balancing one against another, follow the old plan of judging social justice, as these propagandas are called, by the old rule of the greatest good to the greatest number of the citizens of the Republic.

Now, having said that much, let me go a little further on to the classified-service employee. I say again, conservatively, that he gets one-third more pay than similar service receives in the United States outside. He is in the minority, though seemingly in the majority; but he is in a very great minority—only 1 per cent of the wage earners of the country—and yet, as

an American citizen, he is entitled to due recognition. Now, I want you folks, before I take up another line, to know what the existing law is to these people that are in hazardous service. Recollect that possibly in the fullness of time, if we are afraid of these people—I am not; I think I have their confidence in the main, and I think I could oppose what they want in this matter without serious criticism—if we are fearful about them, recollect you make less comfortable and give less justice to the man who is in the hazardous employment than you will by the passage of this bill.

Now, I will say to you frankly that the Government employee in Washington, who, upon the whole, has a very desirable place, when he comes to Washington loses practically his citizenship at home. Yet he enters on a good salary and keeps the good salary and progresses in the good salary if he is a worthy employee, but it is gotten at the expense of loss of acquaintance and practical loss of citizenship in the country at large. So while sometimes we say these people are overpaid—and they are in comparison with other people throughout the country—yet that matter is true. Now, the employee who is out in the city, out in the country, is a pretty swift citizen. He is a practical fellow. He is somebody. He votes. He is an active sovereign. He is supposed to have much of influence. We all court him. Sometimes we court him for more than he is worth, shutting our eyes, you know, when he is representing to us his influence. I am speaking respectfully of the employees, because, I say again, I have great respect for them.

Now, take this thing of good citizenship and let me discuss that a minute. Do you know the men who are going to occupy these seats 40 years from now, when most of us who are here now will be dead? They are the farmer boy, the son of the laborer, the son of the mechanic, the boy who has to hustle. There is a great deal of talk about child labor. Child labor in a factory and mine that are ill-ventilated and which operate over hours ought to be corrected. But there is child labor on the farm, child labor in the little village, child labor in the small city, where the bright-eyed boy contributes to the support of the family by labor before and after school hours and in vacation, who knows what a dollar is worth by having earned it, and as a rule forges ahead, in the school, of the boy who does not have to hustle. Now, you say, "What has that to do with the bill?" I answer, It has a great deal to do with it, because I am here to tell you that when you by legislation give to Government employees—our fellow citizens not engaged in hazardous employment—one-third more pay, with steady employment, than their neighbors receive for similar ability, you beget a privileged class, especially when you consider that this bill provides for a pension to those not engaged in dangerous employment in the event of accident.

Now, the glory of this Republic is the glory of the citizenship of the United States, and it is to be found in what? In the fact that we are self-reliant. The average citizen, whatever his calling or income, relies upon his own effort not only in caring for his home but in insuring it and insuring his own life to provide for his family after he is gone. Care is taken to provide against accident. There is the insurance policy, the society insurance, savings accounts; homes are acquired in building associations, and all that kind of thing.

"Well, that does not amount to much," says somebody. Let me show you what it does amount to. The latest statistics I have been able to find are compiled in the World's Almanac. In the old-line insurance companies there are 41,204,000 insurance policies in existence. It is about the number of our people engaged in gainful occupations. Do you know how much it covers? It covers $21,000,000,000. And it is constantly increasing from year to year. Those policies represent the savings of the millions, and they increase as the population increases; and unless we pauperize our people, if we can keep the present condition in the United States, they will more and more take care of themselves.

But that is not all. Take the society insurance. There are eight and one-third millions of policies, covering in round numbers $10,000,000,000. You know what the society insurance is—the benefical society insurance. It is cheaper than the regular insurance, and it is substantially good.

But that is not all. Take the personal accident and health insurance. That amounts to $5,000,000,000. Again, take the employers' liability insurance. That amounts to $4,000,000,000. And yet that is not all. Take the savings banks. There are eleven and a quarter million of depositors in the savings banks, with an aggregate deposit of $5,000,000,000, representing purely savings. All these substantially are savings.

But that is not all. Take the building associations in the United States. They represent a billion and a quarter of investment. Take the case in my own little city, the mechanics and the laboring men in my little city of Danville, gaining something like 10,000 inhabitants in a decade. They have in those building associations nearly $7,000,000, and they are paying out money for homes, and they get their homes.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield for a question?

Mr. CANNON. For a question.

Mr. SMITH of Michigan. After the rural carrier, whom the gentleman has mentioned, has provided himself with an automobile, or two horses and the rig, would the gentleman think that $700 or $800 or $900, as the gentleman has mentioned, makes that an especially lucrative position?

Mr. CANNON. The pay is $1,200 per annum. The place is greatly sought after. I know that from the time when the pay was only $300 a year until the present time it has been greatly sought after. But if they ought to have more compensation, give them more. They do not need a guardian. Theirs is not a dangerous occupation or a hazardous occupation any more than is that of the farmer. I am not speaking now of low salaries. However, I am not speaking now of the amount of their salaries, but I am questioning the propriety of enacting this legislation at this time.

Now, just let me make a comparison for a few minutes. Do you know what the average pension of the soldiers of the Union Army of 2,200,000 men has been? All the way from $60 a year to, I believe, since the age pension has been added, $220 or $230.

Mr. ASHBROOK. Three hundred and sixty dollars.

Mr. CANNON. Three hundred and sixty dollars? I think, prehaps, my friend is mistaken. The Commissioner of Pensions in his last report gives the average value of the pension for Civil War veterans at $226.53 in 1915. But, however that may be, mind you, the great mass of them are dead. We have always grown more liberal in military pensions as the boys passed over, and we ought to be, because with age greater helplessness comes.

Do you know what the widow to-day gets if she married her husband before 1890 and can trace the death of her husband to the Army service? Twelve dollars a month. You know that prior to 1890 the widow of a private soldier, if both legs of the soldier were shot off, if both arms were shot off, if he was absolutely helpless, or if he were not helpless and died, had to trace the death to the Army service, and she got $8 a month. My friend from Ohio [Mr. ASHBROOK] nods his head. That is right. That was the rate from the close of the war, or even during the war, down to the year 1890.

You know we passed a bill here the other day for the Spanish-American War soldiers. We passed it unanimously. I do not think there was a vote against it. Later on we passed a bill that gave the widow of a soldier who was married prior to 1890 and was 70 years old $20 a month.

Mr. ASHBROOK. That was 1905.

Mr. CANNON. I am speaking of the $20 widow.

Mr. ASHBROOK. That is the bill we passed the other day.

Mr. CANNON. That gave the widow $20, did it?

Mr. ASHBROOK. Yes.

Mr. CANNON. Well, that is right, and it ought to be so.

Now, so much for the pensions on account of the Mexican War and on account of the Civil War. Let us think a little bit now and take this bill and dissect it. Those bills, it is said, will die in the Senate. I do not know whether they will or not. I hope they will not, but the Senate has them before they become laws.

Mr. ASHBROOK. If the gentleman will allow me to interrupt him——

Mr. CANNON. Yes——

Mr. ASHBROOK. I will say that the Senate Pension Committee has favorably reported the widows' pension bill, and it is now on the calendar, with bright prospects of its passage.

Mr. CANNON. I hope it will pass. If my few broken remarks will aid it in any way, I shall be glad. It is tardy justice if the 70-year-old widow receives $240 a year.

Now, what is our condition? The world is on fire, to quote from the President. Sparks are dropping everywhere. It is a very serious condition, speaking about it soberly. We are trying to increase the Regular Army. We are not making very great headway. The pay of a soldier in the Regular Army is $15 a month.

But the newspapers say that 125,000 men have been drafted into the service of Uncle Sam. A man disputed that. I do not know whether he was right when he disputed it or not. He said, "No; they have not been drafted; the President did not have the nerve to draft them." I do not know whether he did or not, but if they are not in Uncle Sam's service, I suppose, legally, you could not use them in Mexico. I do not know how that may be; but either they are drafted or subject to be drafted. Who are they? They are the bone and sinew of many

cities, towns, and rural communities, members of the National Guard, and when the call came responded without making excuse of any kind. Many of them had to surrender lucrative employment and leave their families to the consideration of neighbors while they went to serve the Nation. We passed through this House a bill caring for their dependent wives and children, and in every county from which they go and in the city of Washington there are some families who are dependent. I do not know what the Senate is going to do with that bill. Is any friend and brother able to tell me? If the Senate should pass the bill and these men should go to this war and be fortunate enough to get back in 12 months, each dependent wife will get, if it costs her that much, $600. They will not all need that. That aid will cease with the discharge of the soldier. Possibly as long as we are going to be liberal, and we depend on these people and may need 100,000 more or half a million more—God knows how many—do you not think, maybe, we had better prepare to take care of them? The pension roll now is $158,000,000 a year. How much more it will be when this legislation is enacted I can not tell.

It is said that the soldier's pension rests upon a different principle from that which we are considering, and that the man in the Army goes into that service for patriotic reasons which can not be compensated for. That argument has been used against adequate pay for the soldier and adequate pension for keep in his old age; and now we have it used to defend this bill. I confess that I can not understand any of these applications of the principle of patriotism. It is the principle on which the pension was first given, because the Government could not compensate the soldier in any other way than by trying to make his old age comfortable. The soldier's pension is the only pension this Government has ever given to a class, and the Democratic Party, under the leadership of Mr. Bryan, declared its opposition to life tenure in the public service; but here by this bill you are adding pensions to life tenure.

Now, Mr. Chairman, how much time have I consumed?

The CHAIRMAN. The gentleman from Illinois has 16 minutes remaining.

Mr. CANNON. In the last day or two I have been looking up the facts about this kind of legislation, and I was much aided by the bulletin issued by Henry Pritchett, whom some of you know and who used to be at the head of the Coast Survey and is now at the head of the Carnegie Foundation for teachers. He discusses it very intelligently. If you have not written to him, I hope you will do so, because I find, on asking him about it, that he would be pleased to mail a copy to any Senator or Representative. He discusses the subject fairly and intelligently, as it seems to me.

Dr. Pritchett gives a history of the pension system from its origin. It is difficult to get away from the definition of Dr. Johnson that a pension is an allowance made to anyone, without an equivalent. It began with the soldier in the time of the Roman Empire, and was then, as now, granted because the soldier had risked his life or, in the case of his dependents, given his life for the country. The civil pension followed more through the power of the sovereign to pension his favorites than from any peculiar public service through personal sacrifice. In Germany this pension system was extended to a large part of the industrial population, but with a marked difference, and that difference is responsible for its success. The industrial pension system of Germany is contributory—the employer, the employee, and the Government combine to create a fund, out of which old age is pensioned. The employee begins his contribution at the age of 17 and continues through his industrial life to the age of 65. This contribution is compulsory. The German Government has the power to enact law to compel such contributions from both employer and employee. The administration is in the hands of the Government. The German system is, in fact, a compulsory life insurance, the Government acting as the agent to collect the premium and pay the principal. It is successful in the same way our insurance companies here are successful.

Other Governments have tried the other plan of pensioning old age, and they have found the burden heavier than the taxpayers are willing to support. The system has been unsatisfactory to the beneficiaries as well as those who supported the system. In England the civil-pension system has been the source of loud complaint as the cause of failure to advance salaries and wages, and therefore forced contributions without the frankness of the German system. In the civil service of France employers contribute about one-third of the pension cost, in Austria about one-tenth. In both countries the pension load has become a serious burden. All real pensions, however, have everywhere been recognized as a class distinction, and it is yet to be determined whether the pension stimulates or demoralizes.

The Carnegie Foundation to pension worthy teachers in colleges was established 10 years ago with an endowment by Mr. Carnegie. After 10 years the trustees have found that they were too liberal, and that all Mr. Carnegie's millions would not care for those who sought the benefit of the foundation, for college professors are human and none have been found, whatever their financial condition, who would not accept a free pension. So, after 10 years, the Carnegie Foundation has had to reconsider the plan and try to get a contributory system.

Dr. Pritchett finds that the pension literature of Europe does not give much help in dealing with the pension problem in a democracy like the United States. The answer which has been given in Europe is the outcome of the social philosophy of the last hundred years, a social philosophy under which the Governments of those countries exercise a paternal supervision quite beyond that to which Americans are accustomed, but toward which they have been rapidly tending in the last 20 years.

From reading Dr. Pritchett's report and that of the Economy Commission I am here to say to you that if we enact this legislation and it is to be a success, I am of the opinion that the beneficiary must contribute a part of it, and possibly the Government a part. It seems to me that if contributions are made by the beneficiary and the Government administers the law, the insurance, whether it is in the form of a death rate or an annuity, will be watched and husbanded by those who are interested in it, and you value more highly a thing toward which you contribute. You say, "Would not these people be grateful?" Oh, yes, I suppose so, but I remember the first hundred dollars that ever I earned. That was a good deal of money for a young fellow to earn on the Wabash. I knew what it cost. Why, I stepped high and felt that I had that much with which to aid my widowed mother so far as she needed it, and I had the right to look anybody in the face. When you get something for nothing, the average tendency is to pauperize.

Do you know what I would do if I had supreme power touching this legislation? I would make it the duty of the best experts who could be found to investigate this whole question; to study the system in Germany; because I find on investigation that in more than one country the system became so burdensome that it had to be modified. And don't you see, there is the danger, when you start too high and on an improper foundation. I would let this commission investigate and report as early as possible; and while they are investigating I would wait to see how much we shall have to pay to these people who, at the peril of life, are now on the border and now in the Regular Army; because this bill distances all pension legislation that ever was enacted. I have read this bill at a hop, skip, and jump. With my other duties it has been impossible to give it very intelligent and thorough consideration. The widow of a man who is killed or dies from injury having no children gets 35 per cent of his salary he was receiving until she dies, unless she marries another fellow. Well, under our law as it is now, what would the widow of a soldier who is now in the service get?

Mr. ASHBROOK. Six dollars a month.

Mr. CANNON. My friend says $6 a month, and under this bill the widow of the civil employee may get six times as much. Considering everything, considering the desirability of these places in the civil service and the fact that they have doubled since 1900, and are likely to double again in the next 10 years; considering also the fact that it is the beginning of a general civil-service pension, considering the great pressure that has been put upon you Democrats, and that if we Republicans should succeed, will be put upon us as well as upon you, for it is not a great while until the 4th of March; considering everything, don't you believe that good legislation and a full understanding of all that is involved requires us to look over the ground and take such steps, either by a commission or by the statistical and economical experts connected with the Government, with careful study to make the earliest practicable report, so that when we come back here and when the war closes we can take it up and handle it intelligently? I think so. That determines my vote. No man has heard me abuse people who are in the service. They are American citizens. I am not blaming them for getting all they can. It is human that we get all that we can, you know, and they are human. [Applause.]

I will reserve the remainder of my time. How much time have I?

The CHAIRMAN. The gentleman from Illinois has 10 minutes remaining.

Mr. VOLSTEAD. Will the gentleman from Ohio use some of his time?

Mr. GARD. How much time remains on this side, may I ask?

The CHAIRMAN. Twenty-four minutes.

Mr. GARD. I yield five minutes to the gentleman from Maine [Mr. McGILLICUDDY].

Mr. McGILLICUDDY. Mr. Chairman, in view of what the gentleman from Illinois [Mr. CANNON] has been saying I think there must be in his mind and perhaps in the minds of others in the House a wrong idea of the principle of this bill.

My friend from Illinois has talked a great deal about the men in the service of the Army and the pay which they receive.

The Army compensation is founded on an altogether different principle from the principle involved in this bill. The man in the Army goes into the service of his country for patriotic reasons, and everybody knows that he does not receive any adequate compensation either for service or for injuries. There is nothing on earth that can compensate him. He offers his life and his all for the defense of his country. There is no adequate compensation for it. It is a service rendered in a most extraordinary emergency in the life of a nation, and is in no way to be compared with the work-a-day service of civil life.

Again, my friend from Illinois says that the wages of the employees in the Government service are one-third greater than those in other similar lines of business and employment. I do not believe this is true. There may be cases in the Government employment where the wages paid are higher than in other similar service, but these are certainly the exception and not the rule. The United States Government demands high qualifications and high-grade service, and, of course, must pay for that kind of service. It is not an unusual thing for Government employees to resign their positions in the Government service, because they can do better and get higher compensation in private life.

But even if what the gentleman from Illinois says were true, that is no logical or reasonable argument against the principle of this bill. At most it could only be considered as an argument against the payment of what he claims to be present excessive wages. It is in no way an argument against compensation for injuries.

Payment of wages for service rendered is an altogether different thing from compensation for injuries received in the course of employment. They are in no way related.

This bill has nothing to do with wages. It concerns only compensation for the unfortunate employee who meets with a loss because of an accident in the course of his employment which his own misconduct did not bring about.

The gentleman from Illinois [Mr. CANNON] objects to the bill because it includes those employees in the nonhazardous classes of employment in the Government service. He seems to think this is in the direction of a dangerous tendency, but in the nonhazardous classes of employment accidents will be but few and compensation small. Of course it is obvious that the less hazardous an occupation the less probability of accident there is, but I submit to the good sense of the gentleman that accidents do happen even in occupations not usually denominated hazardous. If under such circumstances an accident does happen, it is certainly because at that particular time and under those particular conditions there was some hazard.

Mind you always that under the provisions of this bill if the injury was caused by the willful misconduct of the employee, then the Government would not be liable.

The most casual inspection of the present law discloses its injustice. Under its provisions a man may enter the Government service and within 30 days in the course of his employment, without any fault of his whatever, become a cripple for life while in the discharge of his duties, yet he has no remedy and receives no compensation whatever. He, and he alone, must bear the whole burden of that misfortune, for which he was in no way to blame. In no other class of employment in the United States does this occur. In every other employment the employee has remedy either at common law for sole negligence of the employer, or under employers' liability statutes or compensation laws, but the unfortunate victim in the Federal employment is without these remedies. Private individuals, associations, and corporations have to make amends to the employee under some one of these remedies.

Shall the great Government of the United States be less just toward its employees in the hour of misfortune, for which it may be solely to blame, than the private individual, association, or corporation in the States?

But the gentleman from Illinois [Mr. CANNON] appears to oppose this bill on account of its general theory and principle. He is especially theoretical.

Now, the best possible test of any law is its practical application in the business and affairs of life.

This principle of compensation for accidents in employment has been vitalized into law in 32 of the great States of the Union. In every State where it has been tried, I submit to this House that there is not a single State where there is any sentiment for repeal of the law. On the contrary, I believe I am within the limits of the truth in saying that in every State in the Union where it has been tried the sentiment is not only to retain it but to liberalize its provisions and enlarge its scope.

A particularly unusual and significant thing is that it has been satisfactory to employer and employee alike.

What better test do you want of the wisdom of such a law than its practical application in 32 great States of this Union with absolute satisfaction to everybody, employer and employee alike?

My friend Mr. CANNON is from Illinois. In his own State is practically and in principle the same kind of law we are asking to pass here. In his own State the Government employees are included within the compensation law as well as those of the private employer.

I ask the gentleman from Illinois, in all fairness and candor, if he advocates that the United States should be less liberal and just toward its employees in case of accident than is his own State? [Applause.]

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. McGILLICUDDY. Yes.

Mr. SMITH of Michigan. Has the gentleman made any computation, so that he can tell the House what would have been the expense to the Government if this law had been in force during the last fiscal year?

Mr. McGILLICUDDY. Yes. The best estimate we can get from experts who have made a special study of this particular phase of the question is that the expense will be no more than under the present law—at least for a few years. Of course, nobody can tell with accuracy what it will finally develop into. But, so far as we can see now into the immediate future, it will not substantially increase the expense to the Government but it will distribute the compensation for accidents and misfortunes among all of the employees of the Government instead of discriminating against three-fourths of them. [Applause.]

I hold that the present law is unjust, first, because it is discriminatory, and second, because it is totally inadequate as a compensation measure, even so far as it professes to go.

The present law applies to approximately only one-fourth of the Federal employees.

If the compensation idea is sound in principle and economically practical, as has been demonstrated, why should not its benefits be extended to all employees of the Government, and not be confined to a part? To extend its benefits to some and deny them to others is to my mind an utterly unjustifiable discrimination.

Again, the present law, even so far as it goes, is totally inadequate. If the Government is to compensate at all, it should do so in some measure proportionate to the injury received.

I have examined the administration of the present law, and it is positively inconsistent with reason, justice, or common sense.

I wish every Member of this House would examine the bulletins issued by the Federal Bureau of Labor Statistics, and see therefrom to what absurdities the practical application of the present law leads. In a recent issue of a bulletin of the Bureau of Labor Statistics I found that fractures of the arm led to payments of less than $25!

Loss of an eye to amounts varying from $25 to $50!

Loss of right arm, less than $50!

In three cases specified, for the loss of both legs, the average compensation was $377.44!

Think of that, gentlemen of the House.

For the loss of an eye, $25!

For the loss of a right arm, less than $50!

For the loss of both legs, less than $400!

Compensation is positively a misnomer when applied to payments under such conditions.

The great Government of the United States should feel ashamed and humiliated when facing victims of such misfortune in its service.

These conditions of absurdity, injustice, and inadequacy are inherent defects of the present law which this bill is designed to correct.

Let me say to the gentlemen of the House that this bill leads into no new and experimental field of legislation. The bill has been drawn with great care and has passed the wise and judicious scrutiny of the great Judiciary Committee of this House. This committee has twice favorably reported this bill. It is a safe and conservative measure, human in conception, sound in principle, and economically practical. You will make no mistake in its speedy passage. [Applause.]

In conclusion, I simply want to say in reply to the gentleman from Illinois [Mr. CANNON] that the compensation law of his State, the act of 1913, section 4, does include all State em-

ployees, and not only all State employees but every county, town, and city employee.

The language of section 4 of the compensation statute of Illinois reads:

The term "employer," as used in this act, shall be construed to be, first, the State and each county, city, town, township, incorporated village, school district, body politic, or municipal corporation therein.

Mr. CANNON. I am not as familiar, perhaps, if the gentleman will allow me, as I ought to be with my own State legislation, although I would rather take the knowledge that my colleague [Mr. WILLIAM ELZA WILLIAMS] has than to have a single clause of the act. The gentleman may be right. I will examine it and see.

Mr. McGILLICUDDY. I am simply quoting without comment from the statute of Illinois, the gentleman's State. It speaks for itself.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. VOLSTEAD. Mr. Chairman, there is nothing very new or startling about this measure unless it is the matter to which the gentleman from Illinois [Mr. CANNON] has called attention. I have taken some pains to learn as near as I could what the policy has been in other countries and in our States with reference to granting compensation to those not engaged in hazardous employment. I find that in almost every instance compensation is refused to those engaged in occupations that are not hazardous.

The gentleman from Maine [Mr. McGILLICUDDY] called attention to the State of Illinois as providing for compensation in nonhazardous occupations. I think if he will read the law he will find that compulsory compensation is, in that State, confined to those engaged in hazardous employments.

That is the radical change proposed in this bill from the laws now on our statute books. Otherwise, this is not a new departure. This bill consolidates existing laws and extends or liberalizes them.

I am in sympathy with this class of legislation and anticipate developments along this line. This class of legislation did not originate in this country. Germany, I believe, was the first country to pass a law like this, way back in 1884. Austria followed the lead three years later, and Norway enacted a similar statute in 1893. Since then every European country has passed similar laws. In a summary given by the Department of Labor in 1914, it is said that every European country except Turkey has compensation laws. They rest upon this principle, that the industry rather than the individual workman should bear the loss that is incident to carrying on any industry. I am not convinced that such laws should not apply to nonhazardous occupations. If the principle upon which they rest is to be carried out, it seems to me that they ought to apply whether the occupation is hazardous or not. There is one feature of the bill that may be unjust, because not properly guarded. In some instances it may grant more compensation than the actual loss sustained, a question which ought to be carefully considered, because if it does, it imposes an unjust burden upon the rest of the people. It is difficult to see the end of this sort of legislation. It is a very difficult problem to solve. We have to-day about 400,000 employees who will profit under this bill. The gentleman from Maine [Mr. McGILLICUDDY] has just said that it will not increase the present burden upon the Treasury. It seems to me that anyone who will stop and consider the character of this legislation must realize that in years to come it is going to add immensely to that burden. The total charges upon the Treasury will not be known for many years to come. It has been estimated that it will take 40 years before we shall know what it eventually will cost. Each year we shall add new dependents, new people to the list, drawing money from the Treasury. The amount that we pay next year or the year following will not indicate what the eventual burden will be.

While the industry should bear the chief burden, those who profit from this compensation should not be paid so much that it may tend to lessen their interest in their own protection. I do not believe that the amount to be paid under this bill is too large. While I shall vote for this bill, there are things in it that I do not like.

I believe in the principle of compensation, and believe that we may in the near future extend the principle as far as Europe has been compelled to go. The situation there has been different from what it has been here. In this country we have not been driven to carry this policy to its logical conclusion, because here the opportunities to earn a living have been much greater. There they have been compelled to adopt measures to insure against a destitute old age. We may have to do the same some day. As a rule the European countries require the employees to pay the premium on such insurance, and the State guarantees the solvency of the insurance company. I realize that this bill tends to protect against the misfortunes of life, and it seems to me that the time will come when this whole problem of social justice must be studied in earnest. Many municipal corporations, railroads, and other industrial corporations pay old-age pensions to-day. This in a limited way provides pensions. We should be careful that this only grants the relief to which these people are fairly entitled, so that the burden may not be unfairly placed upon the shoulders of those who have to pay. [Applause.]

Mr. WEBB. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. WM. ELZA WILLIAMS].

Mr. WM. ELZA WILLIAMS. Mr. Chairman, I was somewhat surprised at the position taken by my colleague from Illinois [Mr. CANNON], and, so far as I am advised, he is the only Member on the floor who has taken a position against this bill. He intimated that most of the Members who favor the bill do so because of cowardice. He admitted that he was as big a coward as anybody, but asserted that he had the courage to oppose this bill.

This bill provides compensation for employees of the United States who suffer injuries while in the performance of their duties, and it excepts cases where the injury results from the willful misconduct of the employee or by the employee's intention to bring about the injury or death of himself or of another, or if intoxication of the injured employee is the proximate cause of the injury or death. Some complaint has been made or was made by the gentleman from Illinois [Mr. CANNON] that it did not confine liability to hazardous employments.

As was well said by the gentleman from Minnesota [Mr. VOLSTEAD], who has just taken his seat, in cases of injury resulting from employment other than hazardous, the liability, of course, of the Government and the expense would not be very great, and in such cases it would be only rare instances where liability would arise. It does not occur to me that the distinction is important to this bill. In case of hazardous employment as administered in our State courts under State statutes, the questions of assumed risk and contributory negligence oftentimes arise. These questions can not arise under this act. In case of hazardous employment, of course, the liability is greater, and the expenses entailed upon the Government greater, than in cases arising in employment other than hazardous. In the State of Illinois, to which allusion has been made, we have a comparatively new or recent employers' liability act, and under the provisions of that statute the employer is required to answer in damages for injuries, not as provided in this bill, but in amounts named or fixed by statute, or within a range within which the parties may agree, and the employer is required to make compensation as provided by statute, and it has avoided very much litigation growing out of injuries resulting from the employment, hazardous or otherwise.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. WM. ELZA WILLIAMS. Yes.

Mr. CANNON. So far as I have an impression, I think that the State of Illinois does not, by virtue of any statute, compensate any of its employees in the event of injury.

Mr. WM. ELZA WILLIAMS. As far as the State of Illinois is concerned, there is no law creating a State liability, except such claims as may be allowed by the commission, when presented to it, and which the State voluntarily pays. That is my recollection of the law. In any event a liability against the State can not be enforced, because of that provision in the State constitution which provides that the State shall never be made defendant in any court of law or equity.

Mr. CANNON. I think the gentleman is correct, but there is an employers' liability law in Illinois.

Mr. WM. ELZA WILLIAMS. Yes; and that is the act to which I was referring. This bill, of course, does not apply to an employee other than of the United States.

I have observed the course of this debate, and am gratified with the favor with which this bill is received on the part of the Members. My distinguished friend and colleague, Mr. CANNON, seems to be the sole opponent of the bill. The Democratic platform adopted at Baltimore four years ago declared in favor of "adequate compensation for industrial accidents," and that platform was readopted at St. Louis last month, and made one of the pledges which the party is under obligation to redeem. This is about the only remaining plank in the Baltimore platform which has not been redeemed during the four years of this administration, and I congratulate the party and the country on the prospect of a speedy redemption of that plank in the Democratic platform. I am a member of the Committee on the Judiciary, which has had charge of this bill and which unanimously reported the same favorably to this House. It was

a pleasure to support it in committee, and it is a pleasure to support it here. I therefore, Mr. Chairman, shall vote for it.

Mr. WEBB. Mr. Chairman, I yield three minutes to the gentleman from Louisiana [Mr. DUPRÉ].

Mr. DUPRÉ. Mr. Chairman, I have long taken an interest in the question of workmen's compensation in a more or less academic way, but in the Sixty-second Congress as a member of the Committee on the Judiciary, I found myself confronted with the necessity of considering it from the standpoint of a lawmaker, and on further study became absolutely convinced of the justice and wisdom of such legislation.

I accordingly supported the Brantley-Sutherland employees' Federal compensation act and regret that it did not become the law. Believing that when the Government was trying to enact legislation that would apply to employees of corporations engaged in interstate commerce it should itself set an example and evince a willingness to act toward its own employees in a similar way, I joined with my then colleague, Representative Howland, of Ohio, in pressing the measure introduced by him on this subject, which was favorably reported to the House by the Judiciary Committee. When Mr. Howland retired from the House I introduced in the Sixty-third Congress his bill. Finding that my colleague [Mr. MCGILLICUDDY] had introduced a measure much better considered, more scientifically and logically prepared, I abandoned all pride of paternity and gave my assistance and my support to his bill. I believe it would have passed the last Congress but for the fact that overzealous friends of the measure had insisted on including compensation for occupational diseases. That objectionable feature has been eliminated from the present bill, and I trust without much further delay both branches of the Congress will pass it.

There are two aspects in reference to legislation of this character which may be succinctly stated as follows: In the first place, the cost of compensation under these conditions should be regarded as a part of the cost of production, of operation. When a manufacturer finds that a piece of machinery has broken down and a new part has to be substituted, it is debited to the cost of operation. So it should be when a Government employee is injured. Then in the matter of the compensation itself, I say, the question should be viewed from the standpoint, not of fault, but from the standpoint of injury, unless of course it has been caused exclusively by the inexcusable act of the employee himself. It seems to me this is a wise and enlightened piece of legislation, in keeping with laws that have been adopted in many of the States of this Union, including my own State of Louisiana, where, though of recent date, this legislation has worked very satisfactorily. I hope this House will dispose of this measure to-day. The matter brooks of no further delay. [Applause.]

Mr. WEBB. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. TAGGART].

Mr. TAGGART. Mr. Chairman, in the Post Office appropriation bill which was approved in March, 1914, 133,000 employees of the Post Office Department were covered by the section of the bill which provides that in case of a death $2,000 may be paid the widow or family of the deceased employee of the Post Office Department, and in case of disability it provides full pay shall continue for one year and half pay for another year, and then all compensation shall cease. The act that was passed in 1908 to cover hazardous employment covered about 55,000 employees.

Mr. COX. Will the gentleman yield for a question right there?

Mr. TAGGART. I will.

Mr. COX. The gentleman has studied this bill more than I have. What effect will this bill have upon the provision of the Post Office bill in which we had to pay postal employees $2,000?

Mr. TAGGART. It will repeal that bill, and instead of giving a temporary measure of compensation it will give a permanent and continuous compensation.

Mr. COX. Where is the repealing act in this bill now pending?

Mr. TAGGART. The very force of the bill itself will repeal all other acts, and the bill expressly provides for repeal of all other compensation laws. For temporary cases of injury this bill is a measure of economy. It will cost less for slight and temporary injuries than the present law. Ultimately it may cost more each year, as the gentleman from Minnesota [Mr. VOLSTEAD] has said, but for the present it works economy and makes a substantial and absolute provision for life for those who are totally disabled or for the families of those who may lose their lives in the service.

I am astonished that the distinguished gentleman from Illinois [Mr. CANNON], the most distinguished gentleman on the floor of the House, should have the supreme courage to refer to pensions. This is not a pension. This is a part compensation. The gentleman referred to a matter that is not mentioned for the first time in 52 years in the platform of his party.

For 48 years, in 12 consecutive national conventions, the greatest scream of the Republican Party platform was its declaration of generosity to those who saved the Republic. But its patriotism got thin by degrees and beautifully less, and a few days ago they drew a platform that did not mention pensions at all. As an old veteran wrote me the other day in rhyme:

A soldier's belt would need no extension,
Should he get a pension that they mention.

This is not a pension. It is not to be compared with the pay and allowances for the voluntary military service that men render for practically no compensation except spending money. Military service is a national sacrifice, the sacrifice of men, women, and children of the country to attain some great object. This bill represents the recognition of United States service, with a view of bettering that service, with a view of having greater satisfaction in the service, with a view of making those who are in the service better satisfied to make it their life work. I can not agree with the statement that these men are getting more compensation than men of similar ability——

The CHAIRMAN. The time of the gentleman has expired.

Mr. WEBB. I yield the gentleman one minute more.

Mr. TAGGART. Would the gentleman from Illinois or any other gentleman say that the conductor in charge of a passenger train is a man of greater ability than the man who throws mail into the mail car, who must know every post office in half a dozen States, and who is immediately checked if he makes a mistake?

The 18,000 railway postal clerks, taken as a whole and on an average, are the most intelligent body of men of that size in the world, and they are rendering service that is even more hazardous than the ordinary average military service in time of war.

The railway postal clerk is working for a little more than half of the wages that that railroad conductor is receiving. The fact is, that with the present cost of living, the compensation of Government employees is hardly sufficient.

In conclusion, let me say that inasmuch as nearly half of the Government employees are now entitled to compensation in case of injury or death, and the other half are practically all in sedentary occupations, not subject to any great hazards or dangers, the extra cost of putting them in the bill amounts to very little. And our purpose is that if one of them should become totally disabled in the service, or should he lose his life, the people of the United States should not abandon him or his children, but should give him the same consideration that any honest, patriotic, and just employer is willing to give to those who labor for him.

The CHAIRMAN. There are two minutes remaining on each side.

Mr. VOLSTEAD. Mr. Chairman, I yield two minutes to the gentleman from New York [Mr. SIEGEL].

Mr. SIEGEL. Mr. Chairman, I shall vote for this bill, because when in the State of New York a similar act was declared unconstitutional we adopted an amendment to the constitution in order to make such a law effective. I shall vote for it because we passed a bill by which 100,000 employees of the city of New York receive compensation similar to what is provided in this bill.

This act has gone one step further. In our bill it is provided that employees shall stand the first two weeks' loss of compensation, and in this bill Government employees stand the loss for the first three days. This proposed act covers a case that occurred in the city of New York, where a post-office employee was stabbed while performing his work. This bill covers a case where a post-office employee fell through the shaft of one of the elevators in the building of the post office, which was left open by a person visiting the building.

No logical or just reason can be advanced against it. Every newspaper in New York City is in favor of it. Every man who believes in progress and fair dealing with Government employees must raise his voice in its behalf.

Last night's Washington Star had an editorial, which I quote in part:

THE COMPENSATION BILL.

If the routine of the House of Representatives is not disarranged to-morrow, the McGillicuddy bill to establish an effective system of Government compensation for injuries suffered by Federal employees will stand as unfinished business, having been left over from a previous Calendar Wednesday. This bill represents a most careful study of the Government's obligation to care for its workers. It is regarded as a scientific measure and should be passed as it stands.

The United States has been derelict in this matter of providing compensation for its injured workers. It is not as far advanced in this

respect as many of the States. There is a measure of workmen's compensation on the statute books, but it is not fully equitable or effective, and the pending bill is designed to correct it and apply its provisions to all classes of Government workers. Until this new measure is adopted it can be truly said that practically the United States has no workmen's compensation system worthy of the name.

I agree most heartily with what the Star said last night, and I believe I express the sentiment of the people of the State of New York when I say they are in favor of this measure. [Applause.]

Mr. THOMAS. Mr. Chairman, I ask unanimous consent to address the committee for 10 minutes.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to address the committee for 10 minutes, all time except 2 minutes having been consumed under the time for general debate.

Mr. MANN. After we commence to read the bill under the five-minute rule that permission can be granted, but the committee can not extend the time for general debate. Wait until they reach the first section of the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the United States shall pay compensation as hereinafter specified for the disability or death of an employee resulting from a personal injury sustained while in the performance of his duty, but no compensation shall be paid if the injury or death is caused by the willful misconduct of the employee or by the employee's intention to bring about the injury or death of himself or of another, or if intoxication of the injured employee is the proximate cause of the injury or death.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 1, lines 9, 10, and 11, strike out the comma in line 9 and insert in lieu thereof a period, and strike out all of line 9 after the word "another" and all of lines 10 and 11.

Mr. MORGAN of Oklahoma. Mr. Chairman, this is a bill to provide compensation for employees of the United States suffering injuries while in the performance of their duties. The provisions of the bill apply to all the civil employees of the United States. Something like 450,000 persons will be brought within the scope and benefit of this bill if the same should be enacted into law. Section 1 of the bill is as follows:

Be it enacted, etc., That the United States shall pay compensation as hereinafter specified for the disability or death of an employee resulting from a personal injury sustained while in the performance of his duty, but no compensation shall be paid if the injury or death is caused by the willful misconduct of the employee or by the employee's intention to bring about the injury or death of himself or of another, or if intoxication of the injured employee is the proximate cause of the injury or death.

Before discussing the merits of my amendment I wish to say that I am in favor of this bill and shall vote for it. The existing Federal law allowing compensation to injured employees of the Federal Government covers only those engaged in extra hazardous occupations. The law covers only about 100,000 employees. This bill will include about 400,000 civil employees. In passing this bill we are only following the example set by the majority of the States of the Union. Thirty-two of the 48 States have compensation laws. Twenty-one of these allow compensation for injuries regardless of the character of the occupation. We are not only following the States but we are also following the policy of many of our great industries and commercial corporations. In addition to this, most of the nations of Europe have also set an example for us. Many of the European nations long ago provided suitable compensation when their employees had been injured in the line of duty. Legislation of this character is also supported by the highest principles of justice and the best impulses of the human heart. This great and enlightened Government should lead in legislation of this character.

Having thus given my approval to the general principles of the bill, I wish now to discuss the amendment which I have offered. At the beginning of my remarks I quoted the first section of this bill. The section quoted makes three exceptions where no compensation shall be allowed for injury received by a Federal employee while in the performance of his duty. These are, first, where injury or death is caused by the willful misconduct of the employee; second, where injury or death is caused by the employee's intention to bring about the injury; or third, where intoxication is the proximate cause of the injury or death. The amendment which I have offered proposes to strike out the third exception. After some study I have concluded that the Federal Government should not refuse compensation to an employee or his family even though intoxication was the proximate cause of the injury or death. When this bill was before the Judiciary Committee, as a member of that committee I objected to inserting the foregoing clause in the bill. My proposition was voted down in the committee. I there gave notice that I would call the matter to the attention of the House. It is claimed by some that to strike this provision out of the bill would encourage Federal employees to become intoxicated, and that the provision should be allowed to remain to discourage men from using intoxicating liquors. It is asserted that this is a good provision as it will serve as an inducement for men to be sober and temperate in their habits and to entirely refrain from the use of intoxicating liquor. So far as such a provision would have a tendency to promote temperance it would make a strong appeal to me to withdraw my amendment. I doubt, however, that the above provision would have any such effect.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I yield to my colleague from Iowa.

Mr. GREEN of Iowa. In the cases mentioned in the exceptions, the gentleman doubtless believes compensation should be awarded as a matter of right and justice, but does he think it would be a matter of right and justice where the injury was brought about by the man's own intoxication that payment should be made? If payment should be made in such circumstances, even to the family of the party injured, ought it not to be rather as a matter of charity than as a matter of right and justice inaugurated into a policy of the Government?

Mr. MORGAN of Oklahoma. Now, that is what I hoped to convince the members of the committee of.

Mr. HAMILL. Can the gentleman tell us if the compensation laws of the various States where there are compensation laws contain provisions similar to this?

Mr. MORGAN of Oklahoma. My impression is that they generally do, and that was one of the arguments used by the committee in favor of inserting this clause; but, my friend, I have an idea that we should not necessarily copy from the States, because we know that very often these matters go into legislation without proper consideration.

And now is the time and here is the place when this National Government, when this House, ought to decide that question whether an employee of the Government, whether his family, may be denied this compensation simply because the man was intoxicated.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. COX. Mr. Chairman, will the gentleman yield? If his time has expired, I ask that his time be extended five minutes.

Mr. MORGAN of Oklahoma. My time has not expired yet, has it?

The CHAIRMAN. Yes.

Mr. MORGAN of Oklahoma. I ask unanimous consent to proceed for 10 minutes. I have not taken up any time in general debate on this bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

Mr. GARD. The gentleman is a member of the committee, and I ask, Mr. Chairman, that the extension of time be made.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COX. Now, the gentleman is discussing a very interesting point, over which courts and juries have wrestled in this country for many, many years.

Mr. MORGAN of Oklahoma. I hope the gentleman will be brief.

Mr. COX. I will. Let me put this case, however, to the gentleman: Take an employee of the Government who is working upon some dredge work, really dangerous work. He becomes voluntarily intoxicated of his own free will and accord, and as the result of that intoxication he loses his life. Or take one of these men who drive automobiles, collecting mail all over the city of Washington, or in various other cities, who gets drunk of his own free will and accord, and he comes to grief by getting killed. Does the gentleman believe for a moment that this country ought to be taxed in order to pay that man or his relatives anything? There are arguments on both sides of this case.

Mr. MORGAN of Oklahoma. Yes. Let us proceed on this line of argument. One of the exceptions is where an employee attempts to inflict an injury upon himself or upon a fellow employee. Another exception is where he intentionally brings on the injury. Those two exceptions are in the nature of crime. Now, is intoxication, the third exception, a crime?

Mr. HAMILL. Mr. Chairman, will the gentleman yield for a question?

Mr. MORGAN of Oklahoma. Yes.

Mr. HAMILL. I do not understand that intoxication itself bars a man from recovery. It is only when that intoxication has been the moving cause of his injury, the proximate cause.

Mr. MORGAN of Oklahoma. I understand that. But the question goes back, who is responsible for this intoxication? Gentlemen, we know that to some extent this House, this Congress, this Nation, is responsible to some extent for every man who is intoxicated.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes; I yield.

Mr. HUMPHREY of Washington. A man usually gets drunk voluntarily, does he not?

Mr. MORGAN of Oklahoma. Well, I have not had any experience along that line and could not tell the gentleman how that would be. [Laughter.]

I want to propound this question: Where will the Federal Government obtain the money to pay the compensations for the injuries received by its employees under the provisions of this bill? About one-third of all the revenues of this Government for ordinary expenses come from the tax levied upon the liquor business. Say what you may, the Government, in a sense, becomes a partner in the business. The Government must have an interest in any business from which it must derive one-third of its revenues. Somebody must patronize this business or the Government must look elsewhere for its revenue. On principle, how can the Federal Government object to its employees patronizing this business when the Government looks to this business as a source of one-third of its revenue? If somebody must patronize the liquor traffic, is it not illogical for the Government, that authorizes or licenses this business, to object to its own employees patronizing these institutions? Is it not inconsistent for the Federal Government to collect $225,000,000 annually from the tax on intoxicating liquors and then say to an intoxicated employee, "If you are injured in the course of your employment, the Government will not compensate you; or if you are killed in discharging your duty while intoxicated, your family—your widow and your children—shall not be compensated"? If the Federal Government permits these liquor establishments to exist, it can not consistently, logically, or justly refuse compensation to an injured employee or his family, although the injury or death has been the result of intoxication.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Oklahoma yield to the gentleman from Ohio?

Mr. MORGAN of Oklahoma. Yes.

Mr. EMERSON. Do you think if you help this man out who helps this business along, that would not be encouraging the drink habit? [Laughter.]

Mr. MORGAN of Oklahoma. We are encouraging it. For whom are we paying this compensation, after all? For the employee? Certainly not. It is for the widow and children. It is for the family. That is why we are granting this compensation. It is for the family, for the home, the foundation of all our institutions.

The wife, the widow, or the child of an employee of the Government injured while intoxicated above all other persons should be granted compensation. The employee does not drink with the approval of his wife or child. He drinks against their protest; and yet by the provisions of this bill you say to the widow if the employee be killed, or to the wife and the children if the employee be injured, "It is true that the Federal Government gets one-third of its revenue from the taxation of the liquor traffic; it is true that through the patronage that your husband or your father gives to this business you enable the Government to pay pensions to other employees; still, we will allow you nothing." This is not justice; it is not right; it is unworthy a great Government like this. So long as this Government permits the liquor traffic to exist and depends upon it for a large part of its revenue, it ought not, in enacting a great law, supposed to be based upon the highest principles of justice and humanity, to refuse compensation to an injured employee or his family, although intoxication was the proximate cause of the injury.

Mr. MADDEN. Mr. Chairman, I am in favor of this bill, and I am in favor of it because it is humanitarian.

Every employer of labor with humanitarian instincts during all the period of my existence has taken care of his employees in some way or other if they were injured; but every employer, regardless of whether he was humanitarian or not, always proceeded at once to put into repair any machinery that was broken down.

Now, if they could act in that way with a piece of machinery, how much more important is it that they should provide some means by which human beings injured in the course of their employment should be cared for?

The employers' liability law in our State covers everybody, whether they are in hazardous employments or in other employments. The domestics employed in the household are covered by the employers' liability law of Illinois; the clerk in the office is covered by it. And if private employers are required by the laws of their States to provide compensation for injured men and women, why should not the Government of the United States treat its employees with like consideration?

It does not matter whether the employment is hazardous or not. It only matters that the employee is a human being, and that some consideration should be given to the human being as such. It does not matter that it costs the Treasury of the United States something; it only matters that the United States as an employer has at last recognized the humanitarian side of humanity.

Large employers of labor have discovered that since the enactment of the employers' liability laws safeguards have been installed in all workshops which have reduced the injuries almost 90 per cent; so that, as a matter of fact, there are no such numbers of injuries occurring to-day among the working people of America where employers' liability laws are in existence as occurred before these laws were passed. When the liability was imposed upon the employer he found that the way to safeguard the treasury of his company was to safeguard the lives of the men employed by him by placing around all dangerous pieces of machinery the proper safety appliances, and committees have been appointed by all great industrial enterprises to visit factories and point out dangerous places and to put the necessary safeguards around these dangerous situations so as to protect the lives of those who are employed there. [Applause.]

Mr. SHERLEY. Mr. Chairman, perhaps it is not necessary that anyone should now speak in favor of this bill in order to secure its enactment, because the time has gone by when the wisdom of compensation laws can seriously be questioned. But it may not be amiss to state very briefly some of the reasons, both economic as well as humanitarian, why the Government should take this step. In the past the employee of a private employer was left to his rights at law to secure compensation for injury that arose without his fault. That policy, dealing with the individual and taking no contemplation of the law of averages, proved to be one of the most expensive methods of undertaking to do justice ever invented by man. The result of it was that many suits were brought which from the strict standpoint of liability of the employer could not be maintained; and even when suits were brought where there was a liability the cost of litigation was such as to deprive the beneficiary of the real benefit he should have received, while entailing upon society and the employer an expense sufficient, if scientifically spread over all industrial enterprises, to take care of every one who was injured, irrespective of whether he was at fault or not.

Now, the Government can do only one of two things. It can either put itself in the position of an ordinary employer at the common law, giving to the employee the right to sue, with all the resulting loss from such a wasteful system, or it can arrange for a compensation which will be irrespective of whether there has been negligence in the old common-law sense or not, and which will look to the aid of society and deal with units rather than with individuals. This bill is built upon the latter plan. It contemplates compensation for every employee who is injured, unless his injury is the direct result of such a voluntary act of his own as brings about the injury through his own volition, and it serves to distribute the hardships that otherwise would fall upon one or a very few.

Life is so constituted that it happens in the ordinary routine of everyday existence that through accident burdens are placed upon the individual away beyond his capacity to bear, which if distributed do not make an appreciable burden upon society at large, and it is now recognized that it is not right that the individual should bear the burden of what is frequently a misfortune and not a fault in the true sense of the term.

It is for this reason that everybody has come to see the wisdom of workmen's compensation laws, and no man can vote intelligently in favor of compelling the private employer to submit to a liability under compensation laws and not be willing to compel the General Government as an employer to bear the same liability. [Applause.]

Men may differ about details, but the broad basic principle that the Federal Government ought to do what it is prepared to compel the private employer to do can admit of no dispute. I for one only regret that this bill is not to be followed immediately by a bill for a workmen's compensation act touching that field which is within the domain of Congress, of employees engaged in interstate commerce, so that we can get away from the old, antiquated, useless method of private suits in order to determine the equity between employer and employee. [Applause.]

Mr. MANN. Mr. Chairman, I ask unanimous consent that I may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that he may proceed for 10 minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, when I first came to Washington as a Member of this House the Government made no provision at all for compensation on account of anyone injured in the Government service. There was no general law on the subject, and it was not the practice of the Committee on Claims to report any special bills providing for compensation. I believe prior to that time there had been a few bills passed, the most notable case being that of the Ford Theater, used as a bureau office. When that building fell down, right here where the Members of Congress were, there was an act passed making compensation. But it was not the custom. Members introduced bills, but they were never reported.

Some years ago we passed the existing general compensation act, providing for not to exceed a year's pay where people were injured in certain services that were called hazardous services. Not very long after that the question came up as to whether we would provide by special act compensation to a Government employee who was not covered by the general law. I remember I discussed the matter privately with the then chairman of the Committee on Claims, Mr. Prince, of Illinois, and it was finally decided that the Committee on Claims should report at least some of the bills coming before it in favor of those employees who were not covered by the general law, but restricting the compensation to the same amount that they would have received if covered by the general law. A number of such bills were reported. One was an omnibus bill. The House, under the influence of a few inspiring speeches, increased the amount in that bill up to $5,000 in each case, and thereby deprived the claimants from ever receiving anything, because the bill died at the end of that Congress and never was revived.

Since that time also the Committee on Claims has gotten into the habit of reporting bills on account of injuries in the Government service prior to the time when the general compensation law took effect, and we have had bills reported in here 20 years after the injury occurred. I believe there is one case where the committee reported a bill for an injury which occurred over 50 years ago.

Two or three years ago we passed a general provision in the Panama Canal act giving to the President of the United States the power to make regulations for compensation for injuries to employees on the canal, which compensation might exceed that provided by the general law applicable in the United States, and regulations to that effect have been made.

Now we have a bill before us providing for the compensation, generally, for all Government employees. I think it has been the consensus of opinion that the general law now on the statute books, allowing not exceeding one year's pay, is not a sufficient provision to cover the cases which arise. I think the sentiment of Congress has been that that law, even to those whom it affected, was not fair; and that instead of passing a private bill each time some one in the Government service, not covered by the general law, was injured, that we ought to have a general law covering the whole thing. I get tired myself of objecting to special legislation which gives special preference to one person over the general classes, and in many cases, perhaps, to pay one person more because he is not covered by the general law than he would have received if he had been covered by that law.

I am not in favor of private legislation where it can be avoided. I am not in favor of making compensation, which may be deserved, depend upon getting the ear of a Member of Congress and having that Member of Congress leg around the Committee on Claims urging that his bill be reported. If it is right to pay these people compensation, it ought to be paid to them because it is right and not because they kiss some Member of Congress. [Applause.]

I am in favor of this bill. I believe the consensus of public opinion generally throughout the country, rapidly becoming the opinion of the world, is that the Government ought not to leave helpless those who are working for it when accidents happen to them. It is becoming the opinion of the large corporations of the country—they do not leave helpless their employees. Is there a man in this House who has ever had anyone work for him who had an accident or an illness where he did not do more for the person than his contract required? The office of which I used to be a member, a firm in Chicago, as a matter of course, more than once sent employees away for long terms for their health, paid them all their salary and all expenses beside. It is not an unusual thing. Private people do it. If you have a house servant who is ill, you do not throw her into the street. If one of your clerks becomes ill, you do not stop his salary and shut the door upon him. But when we become such great aggregations as large corporations and the Government you can not do the things through individual interest; they must be done through legislation.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MANN. I ask for five minutes more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. MANN. I know of nothing more pitiful anywhere in this world than when a young man—and I call many men young that some people would not—has something happen to him which takes away his earning power, or passes him on to the next world, leaving a widow with young children, with no means of support. The widow as a wife, taking care of her wifely duties in the household, learns no other means of support. Her children are dependent upon her, and I would not have such a person—the wife or the children—go out into the world mere objects of charity. I think it ought to be one of the costs of operation of a corporation or of a government. Somebody has to support these people. I hope they will not starve, although they often may come near it. Somebody has to support them, and it ought to be a charge on the cost of operation.

The other day this House voted by a unanimous-consent vote, with the exception of two gentlemen thinking unfortunately wrong, in favor of paying the family of one of the boys who had gone to the front $50 a month. Times have changed in reference to the amount of pensions. No one would have thought of offering $50 a month 50 years ago, but we have become more prosperous and better able to pay it. The House voted the other day to pay $50 a month to the family of the man who was taken out of private service to go into public service. I think when we have the man in the public service, and he meets with an accident, we should compensate him. I would go further—if he meets with an accident or contracts disease in the service so that he is unable to work, I think the Government can well afford, instead of turning his family out as objects of charity in the world, to make provision by law which will help to keep the wolf from the door. [Applause.]

Mr. GARD. Mr. Chairman, I ask for a vote on the pending amendment.

Mr. McLAUGHLIN rose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken.

Mr. CANNON. Mr. Chairman, the gentleman from Michigan was on his feet demanding recognition.

The CHAIRMAN. Debate on this amendment has been closed. The Chair will recognize the gentleman from Michigan later. The Chair will say that he did not see or hear the gentleman from Michigan. The nays have it, and the amendment is rejected.

Mr. McLAUGHLIN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 1, line 9, strike out all of the section after the word "another" in line 9 and insert the following words: "or if the use of intoxicating liquor by the employee contributes to or is the approximate cause of the injury or death."

Mr. McLAUGHLIN. Mr. Chairman, this is in a way related to the amendment offered by the gentleman from Oklahoma [Mr. MORGAN]. His amendment would provide for the compensation for the employee regardless of the fact that his injury may have been caused directly by the use of intoxicating liquor to excess, resulting in intoxication at the time the injury was received. My idea is to refuse this compensation to an employee altogether if he has indulged in the use of intoxicating liquor to the extent that the injury is the result of such use.

Mr. TAGGART. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. TAGGART. That is substantially provided for in the bill, is it not?

Mr. McLAUGHLIN. I do not understand that it is provided for. I do not know of other words in the bill that relate directly to this matter except the last two lines on page 1—

Or if intoxication of the injured employee is the proximate cause of the injury or death.

I believe fully in the idea involved in this bill, and I indorse heartily the splendid words of approval of the bill just voiced by the gentleman from Illinois [Mr. MANN]. I would do all in the world that can or ought to be done for the employee, but when he has no regard for himself, when he has no regard for his family, when he deliberately indulges to excess in the use of intoxicating liquors and puts himself in such physical and mental condition that he can not take care of himself, and on account of that condition an accident results, he ought

to bear the burden himself. That is my idea of it. I would be as liberal as anyone, but I would not let the man himself disregard all care or caution and deliberately put himself in such a condition that accidents come to him and still pay him.

Mr. HAMILL. The passage of this McGillicuddy bill will mark an important advance in the progress of social justice. It will commit the Government, in dealing with its employees, to a policy similar to that now in force for the employees of private individuals and corporations by the legislation of a large proportion of the States. It is a fitting compliance with the spirit of the times and a great and enlightened forward step in the field of labor legislation.

This bill sets human life above considerations of economy. It is primarily intended to alleviate the plight of employees in the various branches of the Government service who, in the event of injury, are incapable of further earning the wage which is their only means of support. It mitigates their affliction by making provision for the support of themselves and their families during the period of incapacity. In case of death it guards the family against the possibility of destitution.

The amount payable under the bill is two-thirds of the salary earned by the employee at the time of injury or death, although in no case shall the sum exceed $66.66 per month, nor shall it be less than $33.33 per month, unless the employee received a salary of less than this latter amount, in which case compensation shall equal his full monthly salary. The money is paid to the injured employee, or, in the event of death, to his widow or minor children. The bill bears the indorsement of all the leading newspapers and of numerous organizations having in view the welfare of the workingman.

The common laws regulating the relations between employer and employed have long been antiquated. These laws were framed to fit conditions of employment now obsolete. According to common law the workman could not recover on account of an injury if the accident were caused by negligence of a fellow servant or if it was due to certain risks of the employment he was held to have assumed. Other restrictions limited the right of an employee to recover such as, for instance, contributory negligence. Added to these impediments was the delay and expense attendant upon the process of enforcing relief through the courts.

It was to remedy this intolerable situation that compensation laws were enacted in various States. It was recognized that accidents will inevitably happen regardless of precautions, and that the burden of loss should be borne not by the victim of the injury or his family but by the enterprise in which he was engaged. Thirty-two States have up to the present time written compensation laws upon their statute books.

The Federal Government enacted a compensation act in 1908, but it applies to only about one-fourth of the 400,000 Federal employees, and covers only those engaged in hazardous occupations. For an accident happening in an occupation deemed to be nonhazardous there was no way of obtaining relief except by special bill in Congress. In the present Congress alone nearly 300 bills have been presented for private relief.

This distinction between hazardous and nonhazardous occupation is an unjust discrimination. If a clerk in a nonhazardous occupation of the Government gets his hand crushed and is wholly disabled from pursuing his avocation, it is no satisfaction to know that his employment is nonhazardous. His family can not pay the bills with this doctrine, nor can it cure the sufferer.

There is another phase of this question which might be very profitably dwelt upon, and that is the advantage of this bill to the Government. Not only the employee is benefited by this legislation but the Government is the gainer. This measure increases the concord and cooperation between the Government and the Government employee. It creates a warmer loyalty and insures more willing service on the part of the Government workman. It will stimulate to a higher effort those already on the Government employment list, and it will attract a better class of men into the service who will contribute the best that is in them, both of loyalty and labor, to discharge the duties of positions to which compensation is attached in the event of death or injury.

And more than this, it elevates the Government toward the rank of model employer. The prestige the Government thus acquires and the splendid example it sets to the different States is bound to result beneficially to the country at large. This bill is a credit to the present administration and to the authors who framed it. It is a triumph of which both may well feel proud.

Mr. HUMPHREY of Washington. Mr. Chairman, referring to the amendment offered by the gentleman from Michigan [Mr. MCLAUGHLIN], I am opposed to it because I think it is already in the bill. I think the language in lines 10 and 11 cover the particular points that he has raised. I am in favor of legislation of this character, and I have been ever since I have been a Member of this House. I suppose that I had my attention somewhat directed along that line by one or two unfortunate illustrations that came under my notice. A man lived in my city who was working for the Government. He was down in a concrete pit, and while down there molten metal was poured in upon him until his legs were burned and twisted, and he was never able to walk afterwards. Yet that man had no remedy whatever and lived several years without any compensation. Happily he was not an object of charity, because he happened to have a few dollars ahead. I know of another case where a man with whom I am well acquainted worked for the Government, who was hopelessly and helplessly crippled for life. He had no remedy, no hope. His bill has been pending before Congress for the last 10 years, but he has received no compensation. Why should the Government take that attitude that is different from that of a private employer? But beyond that phase of it, I think it is for the best interest of society. I do not believe that it is fair or just that the unfortunate victim should be compelled to bear this burden alone, and in the last analysis society has to bear the burden anyway. The people have to be taken care of—those who receive these injuries—somehow, and I think this is a far better way than to put it in the shape of charity. I think that this legislation from every standpoint is to be commended in its principle. It has worked well in my State. It will work well as a Federal law. It is in the interest of justice and humanity. I do not believe that it will make heavier the burdens of society. It will be but justice, and will bring hope and assistance to the unfortunate.

Mr. GARD. Mr. Chairman, I ask for a vote on the amendment of the gentleman from Michigan [Mr. MCLAUGHLIN] and will say to the committee that it seems to me that there is no substantial dispute between the gentleman's language and that contained in the bill. I hope the amendment of the gentleman from Michigan will not prevail. I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment was rejected.

Mr. BORLAND. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. BORLAND: Page 1, after the word "injury," in line 5, insert the words "or disability."

Mr. BORLAND. Mr. Chairman, I am not sure but what the language of the bill in all of its features is broad enough to cover the purpose of my amendment. I want to say at the beginning that I am very heartily in favor of this compensation law, and there are some reasons why the Government is under greater obligation to provide this means of compensation than a private employer. The Government is not on equal footing with the private employer in its liability before the court. The private employer has the court to adjudicate between him and his employee, subject, unfortunately, to the old obsolete law of fellow servant and assumption of risk which modern humane legislation is abolishing. I believe in workmen's compensation laws as applied to the private employer, and I certainly believe in them as applied to the Federal Government as the employer. Every employer must take into consideration, in the business in which he engages, the wear and tear upon his property, machinery, and plant; but under the harsh rules of common law he did not have to take into consideration the very large amount of wear and tear upon human life. We used to think that the industrial warfare demanded a certain toll of human life. Now we have come to a more reasonable view, that a large number of these industrial accidents are preventable and that legislation is required for the prevention of industrial accidents and occupational diseases. There is no reason, as has been stated here, why all loss and injury growing out of a common enterprise and common activity should fall upon one party to the activity, and he the employee. If a business can justify itself at all as an industrial factor, it can pay the cost of its own operations, and in the long run the commercial world must pay for the output, and part of the cost of that output is the unpreventable toll of human life and limb. It is inhuman, it is uneconomical, it is wrong that the loss by unpreventable accident should fall upon the employee, to the exclusion of the employer.

Mr. TAGGART. Will the gentleman yield for a question?

Mr. BORLAND. I will.

Mr. TAGGART. Is it the purpose of the gentleman's amendment, in putting the word "disability" in there, to cover disability arising from occupational diseases?

Mr. BORLAND. Yes; that is precisely the idea. I believe we not only should give compensation for industrial accidents,

whether they are the actual result of the business or whether they are an accident by the negligence occasioned by a fellow servant. I think we should cover also the occupational diseases arising from that business. There are certain occupational diseases and occupational disabilities unsurmountable in any line of employment. We adopt the broad human policy, the broad view that is now come to command American public attention, that every business that a man follows that is worth having can pay the cost not only of the destruction of property but the destruction of life and limb necessary to get its activities before the people, and that occupational diseases should be included with occupational accidents. I will not say this bill is not broad enough for that purpose; I will not say the committee has not already provided for that purpose; but, in case the language is not broad enough, it seems to me it should be and could be so broadened. We can not say, as has been said here, that the private employer should provide for compensation for accidents occurring in the line of his business unless we say also the Federal Government is willing to assume the same responsibility. We owe a higher duty to the employees of the Government than the private employer, because that employer is amenable to the courts and the Federal Government is not.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKENZIE. Mr. Chairman and gentlemen of the committee, I am glad to be here to-day and to have the privilege of voting for this bill, for, in my judgment, it is founded on the eternal principle of justice as well as sound public policy. I simply want to say while I am on my feet that I have not been a recent convert to this character of legislation. When a member of the Illinois Senate I had to do with the framing of the workman's compensation act of the State of Illinois, which was written for the benefit of the tens of thousands of coal miners and thousands of other men employed in the great industries of that State, and I want to say that the law has been since amended and is in much better form, and I am glad to know that it has not worked injury to a single citizen of the State of Illinois, except perhaps a few lawyers who made it their business to bring suits for those who were injured and then take one-half to two-thirds of the judgment, leaving the injured but little.

I am glad that in the great State of Illinois and in most of the States of this Union we have seen the justice of this character of legislation and made it possible that the unfortunate injured man and his family can obtain justice from the great corporations, public and municipal, without having to hire a lawyer to go into court to fight their battles, where, in the olden days, the defendant would come in with the plea of the old fellow-servant statute or some similar defense, all put on the statute books for no other purpose than to help corporations and those interested in defeating such claims for damages. This character of legislation has resulted in many changes in the industrial world. It has resulted in turning the great manufacturing and industrial plants of our country into places of comparative safety, whereas they used to be, in the olden days, perfect death traps.

We are proceeding under the theory now that when the workman leaves his wife and little ones at the door in the morning to go down to perform his day's work he shall have every possible security thrown around his life, in order that he may come back at night sound in limb and body and go to work the following morning as the breadwinner. And the business men have seen it to be to their advantage to place safety devices around their machinery, in order to protect the lives of the workingmen, and to take out insurance to meet workmen's compensation judgments. The idea is that the whole Government shall stand this loss and not the little family of the workman. I am glad that the Congress of the United States is going further along in this line in the interests of humanity. I am glad to be here as a Member to cast my vote for this bill. [Applause.]

Mr. GARD. Mr. Chairman, referring to the amendment offered by the gentleman from Missouri [Mr. BORLAND], I would inform the committee that a bill containing his provision, which possibly would include occupational diseases, was before the committee and the committee thought it wise to strike out that express phrase of "occupational diseases." The particular amendment of the gentleman from Missouri [Mr. BORLAND], as I understand it, is to add the words "and disability" after the word "injury" in line 5.

Mr. BORLAND. "Or disability."

Mr. GARD. "Or disability." But he is frank enough to say that the words "or disability" would include occupational diseases. Now, as I have said, the committee gave this very careful attention and thought that for the best interests of everyone at this time, for the advancement of this most progressive legislation, this phrase "occupational disease" should not be incorporated in the bill. It was the idea to go ahead in a progressive way to provide benefits for those who are injured in the performance of duty while in Federal employment, and I trust that the gentleman from Missouri [Mr. BORLAND] may see it in that light and will withdraw his amendment.

Mr. BORLAND. Will the gentleman yield?

Mr. GARD. Certainly.

Mr. BORLAND. I concur very heartily with the gentlemen on the committee that this bill is a big gain, and that we all ought to unite upon it and not embarrass it with questions that can be taken up subsequently. I do not feel that the bill ought to be embarrassed by a new feature. And, therefore, while I submit this thing to the House, I am heartily in favor of the bill as it stands, and I hope to get the other later on. I withdraw the amendment on the explanation of the gentleman from Ohio [Mr. GARD].

Mr. MANN. Will the gentleman from Ohio [Mr. GARD] yield for a question in this connection?

Mr. GARD. Very gladly.

Mr. MANN. The bill that was reported last year provided also for compensation for disability and suspension from work of an employee resulting from an occupational disease contracted in the course of his employment. The gentleman has discussed it. Why is that left out now?

Mr. GARD. As I explained——

Mr. MANN. I listened to what the gentleman said, but I did not think it was an explanation.

Mr. GARD. The explanation is that it was considered by the committee, and it was thought advisable to eliminate that particular part in relation to occupational disease.

Mr. MANN. I understand; but why?

Mr. GARD. For the reason that it was limited to compensation for injuries and not to occupational diseases.

Mr. MANN. But the bill last year was not a compensation simply for injuries but for disabilities from injuries and suspension from work. I ask why the committee leaves it out? Is it because of the merits of the proposition or because the committee thought it would be easier to pass the bill without it?

Mr. GARD. It was for this reason: It has been very well said that this is a codification of the present law, and with an extension of benefit where injury has been received in the performance of a duty. That which was included last year in the phrase "occupational disease" is a new proceeding, something the Government has not heretofore recognized; and which it was found difficult to define.

Mr. MANN. I surely would not call this a codification of the existing law. It is not that. It is entirely different from existing law and goes way beyond. And I have never had anyone tell yet why we should not have included a disability from disease as well as disability from accident.

Mr. BORLAND. I think I can enlighten the gentleman. They seem to have gotten this far together in reporting a bill.

Mr. MANN. They got as far as reporting the other bill in the last Congress.

Mr. BORLAND. In this particular stage of the proceeding they have gotten as far as reporting a bill for industrial accidents.

Mr. MANN. They got as far as reporting a bill for occupational diseases in the last Congress. Is this going ahead or backing up?

Mr. VOLSTEAD rose.

Mr. GARD. I yield to the gentleman from Minnesota [Mr. VOLSTEAD].

Mr. VOLSTEAD. Mr. Chairman, I just desire to make a brief statement. We had hearings on this particular question, and in those hearings it developed that there was considerable difficulty in defining the term "occupational disease"; and it was also called to our attention that in quite a number of cases in a number of States the court held this language which we have in the bill would cover occupational diseases in certain cases—at least a number of them—and for that reason I think it was left out, or that was one of the chief reasons why it was left out.

Mr. HILL. Mr. Chairman, I am heartily in favor of this bill and expect to vote for it.

Mr. BORLAND. Mr. Chairman, a point of order.

Mr. HILL. If I am not in order, I will ask permission to have five minutes by unanimous consent.

Mr. BORLAND. If the gentleman will pardon me a minute. I think I withdrew my amendment. If I did not, I intend to do so.

The CHAIRMAN. The Chair so understands.

Mr. HILL. Mr. Chairman, I am heartily in favor of this bill and expect to vote for it. We have a good compensation

act in Connecticut, and we are trying every year to improve it. I heartily approve of the remarks made by the distinguished gentleman from Illinois about the practice and custom of private employers paying their employees their compensation during sickness and in accident, and so forth. I heartily approve of the remarks made by the gentleman from Missouri [Mr. BORLAND] asking for a broad and liberal and generous policy on the part of the Government. But now I want to state to the members of the committee a couple of incidents that have recently occurred which do not seem to me to give an indication of a particularly generous and liberal policy on the part of the Government in the execution and enforcement of another law.

I am aware of an incident that occurred a year ago in an institution in this country where a typewriter operator, a young lady, was sick with a severe cold for three days and in the generosity of their hearts her employers hired a substitute and paid her $10 to do this young lady's work for three days.

When the income-tax inspector came around and inspected their books he reported that that was not a fair charge to an expense account, and this great big Government of ours in its broad, liberal, generous policy disallowed it as an expense and collected 10 cents more as income tax on account of the sickness of that girl, and put it in the Treasury of the United States.

Now, I would like to see all these policies made more liberal and generous. I know of another case where an institution had a sick chair in its directors' room, and bought a new one and paid $8 for it, and charged it to the expense account, as any sensible concern or individual would, and when the inspector of the Internal-Revenue Service came around to examine their books to see if their reports were properly made, he eliminated the $8 and made the concern pay 8 cents more income tax, because of the disability of that chair. [Laughter.]

Now, why not carry this whole proposition into commonsense practice, and provide that wherever expenses of that kind are incurred for charity's sake, for Christianity's sake, and for brotherly love's sake, if it is done honestly and in good faith and charged to the expense account, this Government of ours will not come around with its hat and collect nickels and dimes which it claims have been improperly withheld? [Applause.]

Mr. GARD. Mr. Chairman, there is nothing before the House.

Mr. SABATH. Mr. Chairman, I move to amend by inserting the word "disability." It is virtually the amendment that was withdrawn by the gentleman from Missouri [Mr. BORLAND].

The CHAIRMAN. The gentleman from Illinois [Mr. SABATH] moves to amend by inserting the word "disability."

[Mr. SABATH addressed the committee. See Appendix.]

Mr. COOPER of Ohio. Mr. Chairman and gentlemen of the committee, I have long felt and now feel that this Government ought to provide some kind of compensation for its employees.

In 1912 I had the privilege of being a member of the General Assembly of Ohio, which passed the first workingmen's compensation law in that State, and I know that it has been of great benefit to the workingmen of the State of Ohio. This law compels the employers of labor to provide a compensation for the employees in that State, and I believe that this Government would do well if it would provide some kind of compensation for the men who have devoted their lives to service in the employment of this Government.

But I would like to see this bill go further than it does. I would like to see it provide a compensation for men who have been disabled through sickness while they have been in the service of the Government. I have in my mind at this time the case of one man who resides in the city in which I live, who carried the mail for 20 years, and during that service he contracted a disease which wholly incapacitated him from further service in the employment of the Government. What did the Government do? It turned that man out. He has not a dollar to his name, and to-day he is dependent on charity for a livelihood. It seems to me that the man who contracts a disease while in the employment of the Government is just as worthy of a compensation as the mail clerk who stands in the mail car and gets injured through some accident that may happen on his run.

The private corporations, the railroad companies, do not wait until a man gets his limbs torn off before they give him compensation. After they find out that his health will not permit him to be employed in their service longer they pension him, and some of the railroad companies pension their employees with a very liberal sum.

I am proud to have the opportunity of casting my vote for this measure to-day. I think it is a grand thing that we should take up here the cause of the workingman and provide some compensation for him after he has given the best service of his life to this Government. [Applause.]

But I do wish that the chairman of this committee could see fit to insert some provision in this measure which would also take care of that employee who while in the service of this Government has contracted some disease which incapacitates him for work. [Applause.]

Mr. SABATH. Mr. Chairman, after consulting with the gentleman having charge of this bill I desire to withdraw my amendment, and I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to withdraw the amendment which he offered. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman also asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, I move to strike out the last word.

Mr. GARD. We should like to proceed. I do not want to embarrass anybody——

Mr. TOWNER. I only expect to speak for five minutes.

Mr. GARD. Does the gentleman desire to be recognized now or on the following section?

Mr. TOWNER. Now.

Mr. MANN. I suggest to the gentleman that he get unanimous consent to close debate on this section at the end of five minutes.

Mr. EMERSON. At the end of 10 minutes.

Mr. GARD. I ask unanimous consent that debate on this section and amendments thereto may be closed in five minutes.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that debate on this section and amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, I do not know the reason why gentlemen think it wise not to consider the amendments which have been suggested so as to include disability incurred in service as well as accidental injuries. I certainly would not desire to do anything that would imperil the passage of this act as it stands, because I consider that it is a great advance and a great improvement over existing law, but I will say to gentlemen that it occurs to me that now is a very good time and that this is a very good method to enact legislation which, I think, no member of the committee would object to considering. Diseases incurred in the performance of duty should be provided for, as well as accidents. I know the difficulty that has occurred with regard to the term "occupational diseases," but, gentlemen, if you should accept the amendment first proposed by the gentleman from Missouri [Mr. BORLAND] and if you should say in line 5 that injuries "or disabilities" incurred or sustained while in the performance of duty shall be compensated, you would get away from the difficulty of defining an occupational disease, and the bill would be perfectly safe in that regard. It would limit the recovery to those diseases incurred in the performance of duty while in the employment of the Government.

And gentlemen, has not that just as high a claim for support, upon logical and humanitarian grounds, as an injury received by reason of an accident? You know that many employees of the Government are now compelled to work under insanitary conditions. If while working under those conditions they acquire disease or disability by reason of the indifference and neglect of the Government, is it not right that they be compensated, as well as those injured through accident?

Gentlemen, it seems to me that instead of looking to the States for examples in this legislation the Nation ought to be a model for the States of the Union. We ought to be the example to which they would look and which they would follow in their own legislation. As it is, and has been, the States have set the example for the Federal Government, and we are even now lagging away behind in the enactment of this class of meritorious and almost necessary legislation. And when you come to consider, as this report states, that the total increase that the Government will assume by reason of such action on the part of Congress will only be one-tenth of 1 per cent of the total amount that at present we pay to employees, certainly no man here ought to hesitate if he believes this principle is founded in justice and right. So I say to the committee, I sincerely hope that before the consideration of this bill shall have ceased and it shall be submitted to the House, they will see fit to accept the amendment that has been offered, in order that we may place this bill where it ought to be, in the very forefront of legislation of this character; so that it will not be subject to criticism because it has not gone far enough, but will be an example of right dealing between this great employer of labor and those who serve the Government, and who as we

believe, in spite of some statements to the contrary, in a great many cases receive for their service an inadequate compensation. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARD. I ask the Clerk to proceed with the reading of the bill.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. That if the disability is total the United States shall pay to the disabled employee during such disability a monthly compensation equal to 66⅔ per cent of his monthly pay, except as hereinafter provided.

Mr. WOOD of Indiana. Mr. Chairman, what I think is needed in this country is a better understanding between capital and labor. There should be a better feeling, and a more sympathetic feeling, between the employer and the employee. There should be a more manifest interest on behalf of the employer in the general welfare of his employee. There should be a more manifest interest on the part of the employee in the welfare and prosperity of his employer's business. This estrangement that seems to have grown up between capital and labor within the last few years, occurring perhaps principally within the last 25 years, is, I believe, very largely due to the fact that there is seemingly such a wide difference between the employer and the employee. When the industries of this country were few and the number of employees was not so great, when the employer was closer to the men he employed than he is now, there was a minimum of labor trouble. As our industries expanded, and as the number of employees increased, there was a difference which increased in proportion between the employer and the employee. The bond of sympathy that comes by reason of close touch seems not to obtain because of this growth; and as an unfortunate consequence, the time has come in this country when it is said, with a great deal of truth, that the employer has little interest in the general welfare of the employee and the employee has little interest in the general welfare of his employer's business; that he is willing to quit when his time is up, without reference to what he has accomplished for the man who gives him employment. Upon the other side, criticism has been made, and perhaps with some justice, that the man who employs labor has no sympathy; that he has lost his heart; that he has lost that sense of human touch that should exist between men, no matter whether they be employees or employers.

I believe that the character of legislation which is now proposed will be the connecting link that will bring the employer and employee closer together than any other thing that might happen. I believe when it is known by the masses, who are the employees, that the legislators of this country are providing a way whereby the employer and employees are brought closer together that the employee and employer will have a closer bond of sympathy for each other. When it is known that provision is made whereby out of the earnings of the employer there is going to be compensation to the employee in the event that he is injured, then will there arise the condition that should be between the employer and employee, and the employee will show that he has an interest in the employer's business and his success, and that interest will be mutual.

It is said that this is going to cost somebody something. All good things cost somebody something, and the people in the end will get the benefit of it. It is a question whether or not it is for the best interest of the people of the United States to contribute from their share what it will cost to put the machinery into existence and to maintain it, and whether it is not best. To my mind it is purely an economic question, and every person in the United States who is interested in the welfare of the working people of the United States can afford as an economic measure to contribute their portion of the cost. [Applause.]

Mr. EMERSON. Mr. Chairman and gentleman of the House, I rise in opposition to the amendment, and I rise in opposition to practically any amendment to this bill, although it is possible amendments could be made that would improve the bill.

Mr. GARD. If the gentleman will permit me, there is no amendment pending.

Mr. EMERSON. I thought the gentleman who preceded me moved to strike out the last word. But, anyway, I am speaking against useless amendments. What I want to say is that I have read this bill in a superficial way, and have observed the various provisions in it. It takes care of the children of those who may be injured in Government service, it takes care of their wives, it takes care of their aged parents, and those dependent upon them.

I have taken much interest in this bill, and I believe that the fewer amendments that are offered at this time the better will be the bill. I think the bill should pass. I have a great deal of confidence in the gentleman from Maine [Mr. MCGILLICUDDY], who introduced it. I knew him as a boy in the city of Lewiston, Me., when I was going to school. He was at that time one of the distinguished attorneys of New England. I know that when Mr. MCGILLICUDDY prepared the bill he put the same energy into it, the same knowledge that he always put into the preparation of his cases as an attorney, and into his campaigns as a speaker.

So I feel at this time that if you want a good piece of legislation of this character that will provide for those who will receive injury in the Government employ, and those dependent upon them, you should pass this bill without any amendment, unless they are amendments necessary or important.

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. EMERSON. Yes.

Mr. COOPER of Ohio. Does not the gentleman believe that a man who is disabled in the service of the Government, whether it be an occupational disease or not, is just as much entitled to compensation as a man that gets injured in an accident while in the service of the Government?

Mr. EMERSON. That is true. Every bill, perhaps, could be amended to its betterment, and this bill might be amended as the gentleman from Ohio [Mr. COOPER] suggests so that there would be an improvement in it. Every bill is not perfect, but if you start in to change bills by amendments in this way Congress would never pass any useful legislation, because somebody always has an idea, and he wants to get it into the bill. Therefore, when you get through, if all the amendments were agreed to, you would not recognize the bill and no special good could come from it. The only way to get good legislation is to prepare a bill in the manner in which this bill has been prepared, in a reasonable and substantial way. Safeguard it in all ways and then pass it through the legislative body and let it become a law and try it out. That is the best way to find out whether a bill is a good bill or not. I think the proper way to do is to let the bill be read, let all speak on it who choose to, and then let it finally pass and see what will come of it. After a committee as good as the committee is that has had this bill in charge, works on it as this committee has for several months, you will find it in very good shape.

Mr. DYER. Will the gentleman yield?

Mr. EMERSON. Yes.

Mr. DYER. The gentleman says to let all speak on it who choose. Does the gentleman think that if that happens the bill will pass or become a law during this Congress?

Mr. EMERSON. Oh, no; I think that most of the gentlemen have spoken who desire to; anyway, you can not and ought not prevent anyone from speaking on this bill if he so desires. I would certainly not want to shut off debate on this or any other bill before Congress. I believe in the freest of debate on all measures, and all opportunity possible for amendment, but I do object to nonsensical amendments made merely for delay. This is a humanitarian bill and should pass without delay. It will pass almost unanimously.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. FERRIS having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 16911. An act making an appropriation for the relief and transportation of destitute American citizens in Mexico.

The message also announced that the President had, on July 11, 1916, approved and signed bill and joint resolution of the following titles:

S. 3346. An act conferring jurisdiction on the Court of Claims to adjudicate the claims of the State of Massachusetts; and

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States.

COMPENSATION FOR INJURIES TO FEDERAL EMPLOYEES.

The committee resumed its session.

Mr. GARD. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that all debate on this section and amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. DALLINGER. Mr. Chairman, I desire to state that I am most heartily in favor of this legislation, but I have not yet heard an answer given by the author of the bill or the mem-

bers of the committee to the question asked by the gentleman from Illinois [Mr. MANN] as to why the same language covering occupational diseases was not incorporated in this bill as was incorporated in the bill presented in the last Congress. I fail to see, as the gentleman from Ohio [Mr. COOPER] has stated, why a man, for instance, who works in the Bureau of Engraving and Printing, and because of being poisoned through no fault of his own in handling some of the inks or chemicals used in that establishment, is so affected in his health that he can not continue his work, should not be compensated just as much as a man who breaks his leg. I hope the committee will answer that question.

Now, Mr. Chairman, as an illustration of the need of legislation of this character, I wish to call the attention of the House to a case in which I had the honor to be counsel for the plaintiff in Massachusetts just before the compensation law was passed in that State. I refer to the case of Trim against The Fore River Shipbuilding Co.

A man by the name of James Trim was working as a machinist putting in the engines on the steamer *Creole* for the Fore River Shipbuilding Co. He was working at the bottom of the boiler-room shaft, and without any warning an angle iron 15 feet long and 3 by 4 inches in thickness, weighing about 100 pounds, came down the shaft and hit him in the head. He was conscious for about an hour and a half and then died, leaving a widow absolutely destitute.

It was shown in evidence before a judge and jury in the superior court for Norfolk County that there was nothing overhanging from the wharf that could have fallen onto the vessel. Moreover, there was no other vessel near the vessel on which Trim was working. The *Creole* had been launched and was lying in the stream. There had been some men working above him riveting the smokestack, but they had ceased to work, and at the time the accident happened there was nobody working over him. What probably happened was that an angle iron carelessly left on the upper deck, through the motion of the vessel fell down that hatchway. Both the foreman and the superintendent testified that they did not know why that angle iron was there, and that it had no use on the boat. At the close of the plaintiff's evidence counsel for the defendant corporation brought up the old medieval doctrine of the assumption of obvious risk, and on that ground the case was taken from the jury and a verdict for the defendant company ordered by the court.

An appeal was taken in behalf of the plaintiff, the widow, to the supreme judicial court. Believing that even under the old law she was entitled to compensation, I was glad to pay all of the expenses of taking that appeal that she might have her day in court. When it came before the full bench of the Supreme Court for argument, I was armed with case after case to show that there was no assumption of obvious risk within the meaning of the common law. The counsel for the defendant insurance company, however, changed his tactics and asked the court to throw out the case and deny compensation because we had not, under the doctrine of res ipsa loquitur, eliminated every possible cause that might have caused that angle iron to fall. We had shown that nothing could have come from the shore, or from any other vessel, and that there was nobody working overtime at the time of the accident. Counsel for the defendant insurance company, however, argued that some other workman might have taken that angle iron and thrown it down the hatchway, something absolutely improbable, because it was shown that the man had no enemies and stood well with his fellow workmen. The Supreme Court of Massachusetts held that the point of the counsel for the defendant was well taken and that, as we had not sustained the burden of proof and shown by a preponderance of evidence that the Fore River Shipbuilding Co. was negligent, there was no recovery and no compensation for that widow. It was such cases of hardship as this that brought about the passage of the workmen's compensation act in Massachusetts.

Mr. Chairman, in this great question of workingmen's compensation we in this country have been far behind the countries of Europe, and the United States Government has lagged behind the States. A measure of this character should have been enacted into law long ago. While it is not as comprehensive as I would like to see it, nevertheless, so far as it goes, it is a well-drawn bill. It is a reasonable, just, and humane measure, and one in the interest of the public service. I trust that it will pass the House by a unanimous vote.

The Clerk read as follows:

SEC. 4. That if the disability is partial the United States shall pay to the disabled employee during such disability a monthly compensation equal to 66⅔ per cent of the difference between his monthly pay and his monthly wage-earning capacity after beginning of such partial disability. The commission may, from time to time, require a partially disabled employee to make an affidavit as to the wages which he is then receiving. In such affidavit the employee shall include a statement of the value of housing, board, lodging, and other advantages which are received from the employer as a part of his remuneration and which can be estimated in money. If the employee, when required, fails to make such affidavit, he shall not be entitled to any compensation while such failure continues, and the period of such failure shall be deducted from the period during which compensation is payable to him.

Mr. HASKELL. Mr. Chairman, I move to strike out the last word. I take it, Mr. Chairman, that the principal object of workmen's compensation legislation is to obtain from the employer the exercise of a high degree of care and foresight to prevent accidents, and failing in this, or where accidents inevitably happen, except by drunkenness or the willful act of the employee, to compensate the workman, or in the event of death, those dependent upon him.

Referring to the present Federal compensation law, the law of May, 1908, there are two cases particularly to which I would like to refer, which are now pending before Congress. There is the case of Patrick Burns, for whom I introduced a bill to obtain relief, who lost a leg as the result of an accident occurring April 10, 1899, at the Brooklyn Navy Yard, which was prior to the taking effect of the law of 1908. The committee report, under the bill H. R. 11661, introduced by me for the relief of Patrick Burns, states:

The evidence shows that he was in no wise at fault or negligent, and that the accident in which he was hurt occurred in the proper performance of his duties as a joiner in the Brooklyn Navy Yard.

He was 50 years old and married, no children. The accident occurred April 10, 1899, and he was in the hospital from that date to August 10, 1899, and resumed work November 10, 1899. Mr. Burns and his wife had accumulated savings to the amount of $2,000, all of which was expended for surgical, hospital, medical treatment, and other expenses incidental to his accident. Now, under this present law of 1908 (and under the new bill he receives less), the committee have reported in favor of $1,000 for his relief. Under the New York State law, as in effect to-day, for the loss of a leg he would be entitled to compensation for 288 weeks. Plainly the workmen's compensation law of 1908 or the bill which you propose here does not treat a man too liberally.

Next is the case of Herman Hesterman. He was killed as the result of an accident which occurred on February 28, 1913, in the Brooklyn Navy Yard; and while he was not an employee of the Federal Government, yet the policy of Congress has been where a man is hurt in a Government navy yard to allow his claim as though he were a Federal employee; so for the purposes of this discussion we may consider this case as one of an injury to a man in the Government employ. He was killed February 28, 1913, in the Brooklyn Navy Yard. The committee report on the bill, which I introduced, now pending for the widow's relief, H. R. 11660, recommends $1,248, calculated in accordance with the law of 1908. Under the provisions of this bill the widow would be entitled per annum for life or until she married again to 35 per cent of $1,200, which would be $420 a year. It is three and a half years approximately since the death of Herman Hesterman, or will at least be that before the widow receives even this $1,248. The widow would, therefore, even under this bill, be entitled to $1,470 as compensation for three and one-half years following his death, and thereafter be entitled to $420 per annum until she marries again or dies. Her expectancy of life is still something like six years. The committee report to accompany H. R. 11660 for the relief of Mathilda Hesterman states:

It is significant to state, however, that the New York State employers' liability and workmen's compensation act went into effect shortly after this accident. Under that act the widow would have been entitled to compensation of at least $2,500.

The said committee report further shows that this man was killed by the negligence of two Government employees.

As to the decrease in the number of accidents and the low cost of workmen's compensation, let me quote from John S. Kennedy, Esq., secretary of the Employees' Benefit Fund of the American Telephone & Telegraph Co. and associated companies, known as the Bell system, as follows:

There has been a gratifying decrease in the number of accidents in this and our other companies within the life of our plan, but there is much to be done in the way of accident prevention yet. It has been truly said that accidents happen; they do not occur. Accidents are a tremendous drain upon the people of this country. It is estimated that there were 500,000 preventable ones in the United States last year, and that the loss to the country as a consequence was $250,000,000. Thirty-five thousand persons are killed and 1,590,900 wounded each year in the peaceful industries of the United States. Thirty-five thousand lost! Enough to constitute an entire division of the Army or the whole National Guard of New York State, with every unit recruited to war strength. The number of workmen injured annually is still more appalling, for this number of cripples, if left whole and sound, would constitute a force sufficient to render the United States free from invasion by any nation in the world. It is safe to

say that in the 50 years following the Civil War almost as many have lost their lives in the pursuit of their trade vocations as fell under the four years of hail and lead.

Referring to the low cost of the plan practiced by the American Telephone & Telegraph Co., which includes accident, sickness, and death benefits and pensions, Mr. Kennedy says:

The most amazing part of the whole thing is the low cost of the plan. The present total cost for all the various kinds of relief work, including benefits paid on account of sickness, accident, or death and for pensions, is about one-half of 1 per cent of the gross telephone revenue; or, when considered in connection with the total telephone expense, about three-quarters of 1 per cent; or, when considered in connection with the pay roll, less than 1½ per cent. This extremely low cost speaks volumes for the character and loyalty of our employees.

In conclusion, I desire most heartily to have myself recorded in favor of the workmen's compensation bill now under consideration, and at the same time to express the hope that the time is not far distant when it will be generally recognized that not only is legislation of this nature of mutual benefit to the employer and the employee but that benefits for sickness and retirement pensions properly administered would also be mutually advantageous.

The CHAIRMAN. The time of the gentleman from New York has expired.

By unanimous consent, Mr. HASKELL was granted leave to extend his remarks in the RECORD.

Mr. CULLOP. Mr. Chairman, I listened with a great deal of interest to the narration of the course of the personal-injury lawsuit by the gentleman from Massachusetts [Mr. DALLINGER] as it went its weary way through the courts. The result of that lawsuit was no recovery—a mistrial, a denial of justice—and the case was finally disposed of by the highest court in the State. Just such litigation as that has made legislation of this kind necessary in this country. When the courts adhered to the old, well-settled principle that had been laid down for recoveries in personal-injury suits, there was not a strong demand with the public for legislation of this kind. The injured party knew he would have fair treatment and the consideration his case deserved. But when the courts of the country departed from the well-established principles governing such cases and set up new precedents and laid down new rules which made it almost impossible for a person who had sustained a personal injury to recover in the courts, then the demand for this kind of legislation began to be prevalent all over the country. Laws similar to this exist in 32 of the States of the Union. They have been enacted over stubborn opposition. In most of the States, when the initiative of legislation of this kind was begun, the employers of labor were very hostile to it, but when the legislation was enacted and tried out they found how admirably it worked, producing not only an economy in their business but an improvement of labor conditions, and they have become friendly to the legislation and would not permit it to be repealed in many of the States if a repeal was attempted. This was the condition in Indiana. When the legislation was initiated there the employers of labor resisted the enactment of the legislation, but after it was enacted and the system was tried out it has become popular among the employers of labor and has been found to be an economy to them. I have in mind one illustration of the improvement of the condition of the workingmen of this country and the high standard of efficiency produced to which I desire to call the attention of the committee. Last year the great Pennsylvania Railroad system carried approximately 100,000,000 passengers, and there was not a single passenger killed out of that enormous number on that great system of railroad throughout the entire year. This is a phenomenal record, and demonstrates the great efficiency employed by that company. The history of railroad operation has been changed.

The enactment of legislation of this kind has been beneficial in the way of preparing safer places for the workmen to labor in, better conditions for the public served, and more careful attention is given not only to the preparation of places for workmen but more careful attention is given to the conduct of the business by the employees. It has made labor and capital friendly. It has brought about a better condition for both the employee and the employer, and whenever that condition can be accelerated, whatever we can do to make better the friendly relations existing, we are doing a good not only for the employer and the employee but for the humanity of this country. [Applause.]

Now, Mr. Chairman, the passage of legislation of this kind properly written means much not only to the persons affected by it but to the entire country, and I hope at an early date to see a law enacted applying to the employee and employer engaged in interstate commerce business. It will improve the conditions of both, bring about a nearer and closer relationship between both capital and labor, and improve our industrial conditions. With such a law the employer will see to it that the employee is provided with a safe place to work, the workman will furnish a higher standard of efficiency, a better service, and the result will be that both will profit therefrom. If an employee is injured, the employer knows his liability, and neither will resort to the courts for long and expensive litigation. What they heretofore expended in litigation—wasted—will be saved and better conditions will prevail. The tendency of the times is drifting rapidly to settle disputes without resorting to litigation, applying humanitarian methods which is having an influence for the better all over the land. People are beginning to learn from experience that it is the economical way to handle these differences, and that both sides profit as a result.

It is allaying the hostility which has heretofore existed between labor and capital, bringing closer the relationship of the employer and the employee, and improving our social conditions. It is cheaper to have fixed a known basis of settlement in all such cases, and the money heretofore expended in court costs, in attorneys' fees, and other expenses incidental to litigation saved to both disputants. These expenses would bear the cost of administering the law and paying the liabilities created, and save the money which was required to pay the judgments rendered.

Then, again, the money paid out under a law of this kind goes to the injured party or the family in such a way that benefit will be derived, and it will not be squandered, as has been too frequently the case heretofore. View it from any angle we may, and it will stand the test, resist every reasonable objection, and win the commendation of the public judgment. It has been tried out and found to be beneficial in the best interest of the employer and employee, in private or domestic concerns, and if advantageous in them, there is no good reason why it would not prove equally as meritorious in public employment, and I believe it will, and therefore give it my enthusiastic support. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARD. Mr. Chairman, I ask unanimous consent that at the conclusion of five minutes all debate on this section and amendments thereto be closed.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that at the end of five minutes all debate on this section and all amendments thereto be closed. Is there objection? [After a pause.] The Chair hears none.

Mr. GREEN of Iowa. Mr. Chairman, I desire, if I may, somewhat to supplement the remarks of the gentleman from Illinois [Mr. MANN] with reference to the course of this legislation in this House. When I entered this Congress I was assigned to a position on the Committee on Claims, and it fairly made my heart sick to see the nature of the claims presented to that committee without the possibility of the committee offering any remedy or compensation for the injuries which had been received. I was surprised at that time to find there had never been a bill put through this House allowing compensation for personal injuries, outside of the general compensation act, which applied only to a very small class of Government employees, and the bill that provided compensation for those who were injured when the Ford Theater collapsed a good many years ago and so many Government employees were injured or killed by reason of that accident.

This great Government, as a matter of fact, has been nearly 25 years behind the times in affording relief, and just relief, to persons under circumstances which are provided for in this bill. As soon as I found out what the conditions were I made up my mind that I would prepare a bill somewhat on the lines of the present bill, but upon examining into the question I found the gentleman from Maine [Mr. MCGILLICUDDY] and others had already prepared and introduced bills. At that time I supposed one of those bills would soon come before Congress and be adopted. But the usual delay has taken place. Some four or five years have elapsed and the bill is finally about to be passed.

Five hundred years ago the ordinary laborer was treated somewhat as a machine. If he was injured or disabled and his usefulness ceased, he was thrown aside and some one else found to take his place. But the world grew more humane, its conscience was quickened, its sensibilities aroused until gradually laws were adopted, principles were accepted, so that in case there had been no fault on the part of the employee and the fault was entirely on the part of the employer, compensation could be granted; but it was obvious that this was not sufficient. Yet for hundreds of years this was the only remedy that could be obtained, and no matter how pressing might be the need of the employee, if he entered employment where he knew the conditions that surrounded and the dangers that pertained to it, and he was injured as a result thereof, the

court gave him no relief; and as some gentleman has said here, so far did the courts go in that regard, that even when there was a statute forbidding the employer to permit such conditions to exist and the employee still took the employment under those conditions he was considered to have assumed the risk and therefore no recovery could be obtained for any injuries received. I am glad to say that the day of such laws is practically over, that but few of our States now retain upon their statute books such laws, and that those that still have them will soon abrogate them. The bill that we are about to adopt will remove what has been a disgrace and a scandal to a great Government like this in that it has refused to give that compensation which so many private employers were ready to give of their own initiative, and which almost every State in the Union has provided by special statute. I hope that the bill will pass without a dissenting vote. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 5. That if a partially disabled employee refuses to seek suitable work or refuses or neglects to work after suitable work is offered to, procured by, or secured for him, he shall not be entitled to any compensation.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word for the purpose of obtaining information. I wish to inquire why the committee qualified the character of work that the injured employee might perform as a condition sine qua non to the reduction of compensation under this act?

Mr. GARD. The idea of the committee was that it be extended in the interest of economical adjustment of the law.

Mr. STAFFORD. Why do you qualify by the words "suitable work"? A man, for instance, who is receiving a salary of $2,000 a year, might he be excused from doing some work of a clerical character that would yield him only $50 a month?

Mr. GARD. That is the idea. It was thought that if a man, for instance, was disabled by having his leg broken, of course he could not perform work in the Forestry Service or service requiring exertion of that kind, but he could perform clerical work possibly, and "suitable work" is a phrase applicable to his condition.

Mr. STAFFORD And not applicable to the character of the work which he performed at the time of the injury?

Mr. GARD. Not at all.

Mr. STAFFORD. I withdraw the pro forma amendment, Mr. Chairman.

Mr. HAMILL. Will the gentleman yield?

Mr. GARD. Certainly.

Mr. HAMILL. Does that phrase, "suitable work," mean work in the Government service or work that could be obtained for him elsewhere?

Mr. GARD. Elsewhere. Wherever they could find suitable work for him to do.

Mr. BUTLER. In case of partial disability, the employee will be compensated according to a certain rule; so much money will be paid him each month. Suppose the work found for him does not equal in pay that to which he would be entitled under the law?

Mr. GARD. Then he gets the difference under the compensation law.

The Clerk read as follows:

SEC. 6. That the monthly compensation for total disability shall not be more than $66.67 nor less than $33.33, unless the employee's monthly pay is less than $33.33, in which case his monthly compensation shall be the full amount of his monthly pay. The monthly compensation for partial disability shall not be more than $66.67. In the case of persons who at the time of the injury were minors or employed in a learner's capacity, and who were not physically or mentally defective, the commission shall, on any review after the time when the monthly wage-earning capacity of such persons would probably, but for the injury, have increased, award compensation based on such probable monthly wage-earning capacity. The commission may, on any review after the time when the monthly wage-earning capacity of the disabled employee would probably, irrespective of the injury, have decreased on account of old age, award compensation based on such probable monthly wage-earning capacity.

Mr. REILLY. Mr. Chairman, I desire to congratulate the Judiciary Committee on the splendid workingmen's compensation bill that it has presented to this House for consideration. I trust the measure will be speedily passed without a single vote registered against it.

Workingmen's compensation legislation has passed the stage of discussion, and the only real problem for consideration in enacting such legislation to-day is the one involved in formulating the exact terms and provisions of the measure.

While the passage of the present bill by this House will mark an important epoch in the movement toward social justice, it will be but a tardy recognition on the part of the National Government of the rights of all of its employees to receive compensation for injuries suffered in the course of their employment.

The United States Government is the largest single, individual employer of labor not only in this country but in the whole world. Between four and five hundred thousand men and women are on the pay roll of Uncle Sam, and these people are looking to this Congress to give them and those who are dependent upon them the same protection in case of injury received in the course of their employment that the employees of private industries receive in many of the States of the Union.

Thirty-four States have enacted workingmen's compensation legislation, and I am pleased to be able to say that in the list can be found the name of the State which I have the honor in part to represent on the floor of this House.

The Wisconsin compensation act is one of the best laws of its kind on the statute book of any State in the Union. When the Wisconsin law was passed it met with fierce opposition from many of the employers of labor, who believed the law to be a species of obnoxious and unjustifiable class legislation that would put an unjust and unbearable burden upon the industries of the State, but the history of the law since its passage has demonstrated the wisdom of its enactment, and to-day there are very few, if any, employers of labor in Wisconsin who would ask for a repeal of the Wisconsin workingmen's compensation statute.

The Wisconsin workingmen's compensation statute is not a perfect law, but it is being amended at every session of the legislature and is becoming a broader and more just law.

The employer of labor has learned that it is to his interest that a harmonious feeling exist between him and his employee and that any legislation tending to break down the barriers that exist between the employer and employee will result beneficially to both.

Under the old system which enabled the employer to hide behind the various defenses of contributory negligence, assumption of risk and of the negligence of fellow servants, there had developed a feeling of antagonism between the employer and employee. Hundreds of thousands of dollars were spent annually by the employer defeating litigation instituted for the purpose of securing for the injured employee just compensation for his injuries, and in a great many cases the injured were denied redress in the courts of law and society was burdened with the care of many of the maimed and injured victims of our industrial system.

The world is moving forward. We are living in a day and age of progress. Legislation recognized to-day as necessary at this period of our industrial development a decade or so ago would have been condemned as visionary, socialistic, and tyrannical.

Wise and humane legislators are recognizing that new industrial and social conditions demand new legislation and that it is the duty of the State and Nation to keep pace with the advancing stages of our industrial development.

I regret very much that the distinguished gentleman from Illinois [Mr. CANNON], whom we all honor for his long services in this body, can not move forward with the rest of the world. The gentleman from Illinois, who saw fit to make an attack upon this bill, evidently has his eyes turned toward the setting and not the rising economic sun.

The spirit of this day and age approves of the principle embodied in this bill. Workingmen's compensation legislation proclaims the doctrine of the brotherhood of man, and for this Congress to do otherwise than to grant the employees of Uncle Sam the same rights and privileges guaranteed to the toiling masses of many of the States of this Union would be to write itself down as a standpat, reactionary body of lawmakers, unworthy of the age in which we live.

It is gratifying to note that many of the large corporations and industrial units of the country are providing for the pensioning of their employees when they have reached a certain age and are unable longer to render services. This is a movement in the right direction and speaks well for the humanitarian spirit that dominates a great many of the big men in our industrial world to-day.

Workingmen's compensation legislation can not in any way be termed, as the gentleman from Illinois [Mr. CANNON] would term it, pension legislation. There is nothing in the nature of a pension about compensation legislation. Without such legislation, certain employees of the Government have at the present time a right to be compensated for injury received in the course of their employment, and likewise workingmen everywhere, whether in the employ of the Government or private individuals, have a right to receive compensation for injuries received in the course of their employment, under certain conditions. And by the passing of this bill Congress will give to all the employees of the Government, no matter whether their employment is hazardous or not, the right to receive compensation for injuries

received in the course of their employment. This bill simply provides a better and more humane method for taking care of the injured employees of the Government, and is in keeping with the idea that Uncle Sam should be a model employer of labor, and set an example for the legislatures of the various States of the Union.

The industrial world of to-day is a real battle field that every year claims its enormous toll of dead, maimed, and injured victims; and it is just as much the duty of society to see that the countless victims of our industrial strife are cared for and, in case of their death, their dependent ones looked after as it is the duty of society to take care of the victims of real wars between nations and peoples.

Men who go out every day into the mines, fields, and factories of our land, and who take their places in the great industrial army of our country, are just as much soldiers and are just as essential to the industrial and economic life of their country as the men who go forth to do and die upon the field of battle in defense of their country's flag, and should receive every possible consideration at the hands of their Government.

Under the terms of this bill the injured employee will receive not to exceed two-thirds of the salary he was receiving at the time of injury, although in no case shall the amount exceed $66⅔ per month, nor shall it be less than $33⅓ per month unless the employee shall receive less salary than $33⅓ per month, in which event the compensation shall be equal to the full monthly salary. The money is to be paid to the injured employee or to those who are dependent upon him in case of his death monthly, and not in a lump sum, and payment is to continue during the disability of the employee in case of injury and during the widowhood of his widow, in case he should leave one surviving him.

I regret very much the bill under consideration does not provide compensation for disability to render services as a result of occupational diseases. I can see no reason why the National Government should not come to the aid and assistance of the employee who loses his earning power from the contraction of an occupational disease while in the service of the Government. The employee who has lost his earning power because of disease is just as much an object of pity and as worthy of the assistance of the Government as though he lost his earning power as a result of accident.

The pending measure is indorsed by the public generally, by the great newspapers and publications of the land, and by the army of thinking men and women who are devoting their lives to the solving of the industrial problem of this country and is in keeping with other legislation passed by this House during the past five years, all of which has been designed to better the condition of the toiling masses.

Since the Democratic Party came into full control of this House, in the Sixty-second Congress, more good laws, having for their aim the bettering of the conditions of the working men and women of this country have been passed than in 50 years prior to that time.

In the list of legislative enactments passed by the Sixty-second and Sixty-third Congresses and in the first session of the Sixty-fourth Congress of vital interest to the toiling masses are the following:

First. A law creating the Department of Labor, having for its head a Secretary who became a member of the President's Cabinet.

President Wilson showed his sympathy with this legislative enactment of his party by appointing as the first Secretary of Labor the Hon. William Wilson, of Blossburg, Pa., who by his own industry rose from a mine worker at the age of 11 to represent his district in Congress for several years, which position he held at the time he was invited by President Wilson to become a member of his Cabinet.

Second. An eight-hour law, extending operations of the eight-hour law to work done for the Government as well as work done by the Government.

Third. A children's bureau law, to promote the welfare of children and to devise means whereby the necessity of the parent can not be used to retard the development of children.

Fourth. An eight-hour provision included in the fortifications bill, to apply to civilians engaged in the manufacture of ordnance and powder for the Government.

Fifth. An industrial commission law, to investigate the entire subject of industrial relations between the employer and employee. This commission has already made its report, and it constitutes one of the most valuable contributions to the discussion of the entire industrial problem that has been issued in years.

Sixth. The Bureau of Mines act, amended and strengthened, the object of the amendment being the development of better methods for preventing accidents in mines and for increasing the efficiency in rescue work when accidents occur.

Seventh. An eight-hour law for post-office clerks and carriers.

Eighth. A phosphorus-match bill, to protect the health of the workers in the match industry.

Ninth. An eight-hour provision as to the mining of coal to be used by the Navy.

Tenth. An eight-hour law applying to certain female employees in the District of Columbia, over which Congress has jurisdiction.

Eleventh. A provision in the Post Office appropriation bill removing from post-office employees the gag rule, which had been applied by an Executive order issued by President Roosevelt and broadened by President Taft. This provision made it impossible for post-office employees to bring their grievances to Congress without fear of being discharged for doing so.

Twelfth. The prohibition of the importation of articles from foreign countries made by convicts, paupers, or detained labor.

Thirteenth. A law creating a bureau of safety devices in the Department of Labor. This important piece of legislation provides for the study of the whole field of safety devices so as to reduce the appalling number of accidents that occur to-day in the industrial world.

Fourteenth. A convict-labor bill requiring the sale of convict-made goods to conform to the laws relative to convict-made goods in the State in which they are sold.

Fifteenth. A child-labor bill, which prohibits the shipment in interstate commerce of products of any mine or quarry produced in part or in whole by children under 16 years of age, and the products of mills, canneries, workshops, or manufacturing establishments produced in part or in whole by children under 14 years of age.

Sixteenth. The seaman's bill, designed to improve the condition of seamen and to promote safety of travel at sea.

Seventeenth. A law providing for a board of mediation and conciliation. This board has successfully adjusted many wage and hours-of-labor disputes between the employees and the management of the various railroads of the country.

Eighteenth. A bill giving official papers of trade-unions second-class mail privileges.

Nineteenth. A law permitting an appeal to the United States Supreme Court from the decision of State courts declaring labor statutes unconstitutional. As the law formerly stood, the friends of labor legislation could not appeal from the State court to the United States court from a decision of the State court holding such legislation unconstitutional, while the opponents of the said legislation could appeal from the decision of a State court upholding the constitutionality of such legislation.

Twentieth. An act amending and extending the act entitled "An act to promote safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," to cover the entire locomotive and tender.

Twenty-first. As a result of amendment to boiler-inspection law, rule by Interstate Commerce Commission requiring railroads engaged in interstate traffic to equip their locomotives with high-power headlights.

Twenty-second. The hours-of-service law, amended to provide for a minimum penalty of $100 for violation thereof.

Twenty-third. The Clayton antitrust law. This law contains several provisions of vital importance to labor. It exempts labor organizations from the provisions of the Sherman antitrust law. In other words, it decides that labor is not a commodity to be measured and sold like wheat, coal, and corn, but a human attribute that is not to be governed by the same kind of legislation as ordinary commodities of commerce.

Of course, it was never intended by the original framers of the Sherman antitrust law that its provisions should extend to labor organizations. But not a few of our Federal judges construed the Sherman antitrust law as applying to labor organizations, and at the time of the passage of the said Clayton Act every labor organization in the country was illegal and existed by the will of the legal department of the United States.

The Clayton Act also limits the injunctive power of the courts in labor disputes. Heretofore some of our United States judges were disposed to exercise their injunctive power in controversies where labor disputes were involved when they would not exercise that power in like controversies where there was no labor dispute involved.

Hereafter under the provisions of the said Clayton Antitrust Act injunctions will be issued in controversies where labor

troubles are involved only when a writ would be issued in such controversies providing no labor troubles were involved, thus making the application of the injunctive powers of the courts uniform and in no way dependent for its exercise upon the absence or presence of a labor dispute in a situation calling for the exercise of the injunctive power of the court.

The Clayton Act also gives to labor leaders or others who may violate the injunctional order of the court a right to trial by jury in contempt cases where the act complained of was committed outside the presence or hearing of the court. Heretofore courts were privileged to punish summarily all violations of their injunctional orders, no matter whether they were committed in the presence or hearing of the court or without the presence and hearing of the court.

This provision of the Clayton Antitrust Act does not interfere with the rights of the power of the courts to enforce their rules and orders, but it does require that when a citizen is called into court for violation of the order of the court, said violation not being committed in the presence or hearing of the court, he is entitled to a hearing and trial by jury before being punished.

To the foregoing list of enactments should be added, of course, the Federal workingmen's compensation act, which this House will undoubtedly pass to-day.

A few of the measures enumerated above have as yet only passed this House, but it is safe to say that all of the foregoing legislation will be written into the statute book of this country before the close of this Congress.

The Hon. DAVID J. LEWIS, of Maryland, chairman of the Labor Committee of this House, and himself a former mine worker in the mines of his State, has the following to say regarding the Clayton antitrust law:

It is no exaggeration to say that the above law is the greatest single piece of legislation ever passed for the legal protection of laboring people on the American Continent. At a single stroke it adjusts all the perversions of ex parte court procedure that have arisen by the confessed misuse of the injunction so frequently occurring, grants the constitutional right of trial before an open-minded jury, and corrects the juridical mistake as to the intent of Congress in passing the Sherman law. It is not too much to say, I repeat, that by this single stroke of the legislative hand more is being done in our country to rectify the judicial status of the great toiling masses than has ever been accomplished in our history before. Nor does this mean violent or radical treatment of the relations of labor and capital.

Section 7 of the Clayton bill, taken with its complementary sections, places the American workman where the British workman was placed by Parliament in 1906. The British experience shows that property will be as safe and the rights of employers will be as secure with this measure enacted into a law, a measure which I predict will become known as the Magna Charta of American workmen.

In view of the legislative record of the Democratic Party in passing laws for the benefit of the working men and women of our country and in meeting the legislative requirements of our new social, economic, and industrial conditions, it is no wonder that the Hon. Samuel Gompers, president of the American Federation of Labor, should write in the July, 1916, number of the Federationist, under the heading "Promises and performances," the following:

PROMISES AND PERFORMANCES.

Thus the workers have before them the platform declarations of the Republican, Democratic, and Progressive Parties upon the subjects which most directly affect them. Now the workers must make up their minds as to which of these political parties is most likely, if intrusted with power, to carry their declarations into effect, and to the adequacy of the response which each party made to labor's demands. For 30 years wage earners had vainly endeavored to secure the amendment of the Sherman antitrust law, so as to place voluntary organizations of toilers outside the pale of antitrust legislation that they should not be regarded in the same category as trusts and organizations organized for profit. For 30 years organized labor had been vainly knocking at the door of Congress to secure relief from the injunction abuse and to have restored the right of trial by jury in contempt cases. For 30 years the workers of America had vainly asked Congress to relieve the seamen from the position of bondmen, and all this occurred under the domination of Congress and the Presidency by the Republican Party. The Democratic Congress passed and President Wilson signed the Clayton antitrust law. * * * The Democratic Congress passed the seamen's act and President Wilson signed the act.

The legislative acts which I have enumerated herein were not passed because the Democratic Party desired to favor the working men and women of this country over any other class of our citizens, because if there is anything that is abhorrent to the Democratic Party it is class legislation. These laws were favored and passed by the Democratic Party because in its judgment legislation along these lines would not only be for the best interest of the working men and women of this country, but also for the best interest of the people of the country as a whole.

The welfare of the toilers of our country is so intimately interwoven with the welfare of the whole country that legislation for the benefit of those who toil must necessarily inure to the benefit of all our people.

The wonderful legislative record of the Democratic Party since its restoration to power in this House in the Sixty-second Congress, and of the present administration in writing legislation in the interest of the workingmen and women of the country, which record evinces an earnest determination to meet and solve the problems of our industrial and social life through necessary legislative adjustments, does not mean that the Democratic Party has been one-sided in its legislation and that its work has been concerning any single class of our citizens.

The welfare of the farmer, the banker, merchant, manufacturer, the laboring man, professional man, in fact, workers in every field of human activity has been the controlling factor in the broad constructive legislative program that the Democratic Party has been responsible for since its coming into power in this House in the Sixty-second Congress.

In addition to the constructive labor and human welfare legislation enumerated herein we now have as a result of Democratic rule in Washington: United States Senators elected by the direct vote of the people; a national income tax that puts an equitable share of the burdens of government on the wealth of the country; a parcels post that has saved millions to the people in transportation charges; a tariff law written in the interest of the people and not in the interest of monopoly; a corrupt-practices act, controlling expenditures in national elections; a banking and currency law that has destroyed the power of the Money Trust and set business free from the thralldom of Wall Street, which law, though viciously fought during its consideration by Congress, is to-day recognized by all fair-minded men as the greatest single legislative enactment passed by Congress in half a century; a Federal Trades Commission having supervision of big business and designed to eliminate unfair methods and practices in the business world; an antitrust law that will make the business world more free from the blighting influence of monopoly; a rural-credits law that will help the farmer; the Alaskan railway law that will result in retaining for the use of all the people of the country the greatest unlocked storehouse of natural resources in the world; conservation legislation for the purpose of conserving the natural resources of our country for the use and benefit of all our people; the Shackleford good-roads bill; the Lever agricultural extension act; the grain-grading bill; the warehouse act; the cotton-futures act, all of the said last five measures being of vital importance to the producing and consuming masses of our people; and the Sherwood pension bill, the most liberal and just pension legislation ever passed by Congress.

The foregoing enumeration comprises the most important legislative enactments for which the Democratic Party is responsible, touching all phases of our industrial, social, and economic life, making a record for the present administration unparalleled in the legislative history of our country.

The most remarkable and gratifying feature of this legislative achievement is the fact that all of these measures were so good as to command liberal support from the Republican Members of this House. To be able to legislate upon a given subject so as to meet the united approval of a party is an achievement of considerable merit, but to be able to legislate upon various subjects so as to receive the approval not only of the members of the party writing the legislation but also of a large element of the party of the opposition is a triumph seldom accorded to a political party.

Mr. CANNON. Mr. Chairman, I have listened to the remarks of the gentleman from Wisconsin [Mr. REILLY]. I had the honor to talk about 40 minutes touching this bill. I have nothing to take back of what I said. I was unfortunate, indeed, if I did not bring my remarks within the gentleman's comprehension. I hope he may read them when they appear in the RECORD, when possibly he may understand my position. I am not opposed to the Government rendering equitable and just compensation to its employees who are injured in the line of duty. I think the future will show, possibly not in my life but probably within the lifetime of the gentlemen who keep step, as he claims, with the progress of the country, that a pension—and this is nothing but a pension, although you call it compensation, though "a rose by any other name would smell as sweet"—should be paid according to the injury. He should contribute, in my judgment—and the experience of Great Britain and the experience of the world elsewhere is coming and has come to that conclusion, that where there is no contribution from the employees it becomes so burdensome that it is being modified in some instances and repealed in others.

Mr. REILLY. Mr. Chairman, will the gentleman yield?

Mr. CANNON. Oh, certainly.

Mr. REILLY. Would the gentleman wipe out the legislation of his own State on this question?

Mr. MANN. Oh, I will ask, Is the legislation of my State perfect?

Mr. REILLY. There is no contributory compensation feature in it.

Mr. CANNON. The gentleman says there is no contributory feature in our State law, no contribution by the employee. I believe there ought to be contribution by the employee to help make a fund from which payment can be made in case of injury.

I represent very largely an agricultural constituency, where the pay of the employee and the return to the small farmer is much less than to the Government employee, especially in nonhazardous occupations. The farmers constitute about one-third of our people in this country. But I am satisfied to say to the gentleman that there are more accidents on the farm and more accidents connected with farming, according to our population, than there is in the nonhazardous Government service.

Now, I suppose the gentleman may criticize me. He has perfect permission to do all the criticizing that he wishes to indulge in. But time will tell whether or not this legislation ought not to have been framed along different lines.

Mr. TRIBBLE and Mr. DYER rose.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] is recognized.

Mr. GARD. Mr. Chairman——

Mr. STAFFORD. I hope the gentleman from Ohio will not prefer any unanimous-consent request. I want to discuss some of the provisions of the section.

Mr. DYER. Mr. Chairman, I would like to know if the debate has not been exhausted on this amendment.

The CHAIRMAN (Mr. ADAIR). When the present occupant of the chair was called to the chair he was not informed that any amendment was pending except the pro forma amendment.

Mr. DYER. To strike out the last word. There was one from the gentleman from Wisconsin [Mr. REILLY] and one from the gentleman from Illinois [Mr. CANNON]. I ask, Mr. Chairman, that the Clerk may read. I make the point of order that the Clerk should proceed to read. There is no amendment pending before the House.

The CHAIRMAN. Does the gentleman from Georgia [Mr. TRIBBLE] make a motion?

Mr. TRIBBLE. Mr. Chairman, I have been recognized by the Chair. I do not propose to be taken off the floor by anybody else.

Mr. MANN. Let the gentleman move to strike out.

Mr. TRIBBLE. I move, Mr. Chairman, to strike out the last three words.

The CHAIRMAN. The gentleman from Georgia moves to strike out the last three words.

Mr. TRIBBLE. Mr. Chairman, I realize the fact that a man who speaks for economy on the floor of this House gets no applause. I believe employees should have a tribunal to pass upon their claims for injuries received while engaged in the Government service, and therefore I shall support this bill, although I am conscious of the fact that the bill should be amended. The Government should not lose sight of her citizens not engaged in Government service, and who pay the taxes, while providing just and humane laws for her employees. When Congress is passing and piling up bills requiring increased taxes it behooves somebody to speak out and inquire where we are going, in what direction we are traveling, and who will furnish the money. [Applause.] During my service on the Naval Committee I have rendered myself somewhat unpopular at times with naval officers and persons interested by undertaking to investigate the details of salaries, perquisites, and so on; but, Mr. Chairman, the people who pay the taxes have rights—and I represent them—as well as the Navy Department; and so long as I remain in Congress I intend to stand by the rights of the people, who pay the taxes, as well as represent justly those who draw the salaries.

I was investigating the matter of the pay of high naval officers, and disclosed the fact that the commandant at the New York Navy Yard was receiving $8,000 as salary, and also gets perquisites footing up in the aggregate $9,175 in addition, giving him the total salary of $17,175. Now, this House does not know that legislation of that kind passed in years gone by, giving these officers perquisites. This naval officer draws more pay than the Cabinet officers. The following is an extract from the hearings:

Mr. TRIBBLE. Admiral, I want to get this matter in the hearing in such a way that we can bring it before the House in such shape that it can be acted upon. I will ask you now to tell me what is the average salary of these men.

Admiral STANFORD. That, of course, is variable, dependent upon the rank of the officer who happens to be in command. Sometimes a commandant has the rank of captain at a particular yard; at other times he may have the rank of rear admiral.

Mr. TRIBBLE. Take a rear admiral; what is the salary of a rear admiral?

Admiral STANFORD. A rear admiral may have either one of two salaries: If he is an admiral of the junior nine, he has a salary of $6,000; if he is an admiral of the senior nine, he has a salary of $8,000; if he is at Mare Island or at Annapolis, he also has an addition to that by special provision of law; if he is a captain, he has a salary of $5,000 a year.

I will also submit, in tabular form, the information regarding payments made to commandants at Portsmouth, Boston, Newport, New York, Mare Island, and Pearl Harbor, in accordance with request made several days ago by you.

Mr. STEPHENS. Payments made to whom?

Admiral STANFORD. Commandants.

Mr. STEPHENS. For what purpose?

Admiral STANFORD. Salary, heat and light, quarters, and similar items.

(The statement referred to is in part as follows:)

Annual expenditure for commandant.

	Portsmouth.	Boston.	Newport.	New York.
Rank	Captain.	Captain.	{Rear admiral, 1st nine.	Rear admiral, 1st nine.
Pay	$5,000	$5,000	$8,000	$8,000
Heat and light	206	202	236	236
Mess outfits	200	200	200	200
Quarters	752	2,016	1,892	2,498
Quarters	7	636	262	552
Carriages	1,200	1,600	1,400	2,741
Grounds	600	600	600	600
Mess attendants	2,020	2,020	2,020	2,020
Rations	328	328	328	328
Total annual cost	10,313	12,602	14,938	17,175

Mr. Chairman, the evidence disclosed that this officer has five servants paid by the Government. In season and out of season I have contested unnecessary naval luxuries and official perquisites.

Mr. BENNET. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. BENNET. Those are the expenses incident to the office of commandant, are they not?

Mr. TRIBBLE. Yes; those are the expenses of the officer which under the law he is entitled to receive. He gets a salary of $8,000 and he ought to be able to live on it and not expect the Government to furnish him with an automobile or a carriage and five servants, including one to work in his garden, as this man does. I say an officer should have a fixed salary and pay his own expenses, as other citizens do.

Mr. BENNET. These items are not the expenditures of any one particular officer, exclusive of others?

Mr. TRIBBLE. They are expenses of any officer who is located at the New York Navy Yard. Another officer when he fills that same position will get the same emoluments.

Mr. BENNET. It is no reflection on any particular officer?

Mr. TRIBBLE. No. He is perhaps as good an officer as there is in the Navy. It is not the officer, but it is this vicious system to which I object.

Mr. Chairman, in this connection I desire to call attention to a naval bill providing for reserve officers of the Navy soon to come before this House. The bill is an effort to reestablish a system of retirement very much on the order of the plucking board, repealed last session. The naval officers are not satisfied because promotions to the high positions are not secured so rapidly with numerous officers ready and anxious for promotion. The new bill provides for a reserve force of officers in the Navy which is nothing more nor less than retiring them at the age of 45. In other words, at the age of 45 those not selected for promotion are placed on the reserve list, with salary of 75 per cent of the active officers in the same grade. This means a large life salary and render no service whatever to the Government paying the salary. I trust the Member will investigate this bill and help me defeat it. If I am not retired from Congress I shall be ready to give you all the facts and fight it with the same vigor I assailed the plucking board.

Mr. Chairman, in the last 15 years 2,005 boys have graduated at the Naval Academy. Out of that number there are now serving 1,005. I am perfectly willing to pay naval officers proper compensation, but I am opposed to unreasonable extravagance, and the system of educating officers by the Government to be retired on salary. The United States pays $29,000,000 more to officers and men in salaries than Germany. Therefore, I say, while we give the Government employees just and fair treatment we should not forget the Treasury, and we should also correct such evils by legislation as I have mentioned.

Mr. DYER. Mr. Chairman, I made a point of order a while ago against debate upon an amendment, for the purpose of seeing if it is not possible to hasten the consideration of this bill. It is practically agreed by the greater part of the membership of this House, and I believe by the greater part of the people of the country, that this legislation should be enacted into law. I know that is the sentiment of the portion of the country from which the most of the money will come to make the payments under this bill if it becomes a law. I represent in part a great industrial center, and I know the people there, both employers

and employees, are in favor of this legislation. But it is evident, Mr. Chairman, that unless this bill passes this House to-day it will not become a law during this Congress. It will have to begin again in the Judiciary Committee——

Mr. MANN. I make the point of order that the gentlemen is not discussing the point of order.

Mr. DYER. I am not discussing any point of order.

Mr. MANN. The gentleman was not recognized for any other purpose.

Mr. DYER. I beg the gentleman's pardon.

Mr. MANN. The gentleman made the point of order that the discussion was exhausted and then proceeded to discuss it.

Mr. DYER. The gentleman from Georgia [Mr. TRIBBLE] made a motion to strike out the last three words, at the suggestion of the gentleman from Illinois.

Mr. MANN. Sure.

Mr. DYER. And I rose in opposition to the gentleman's amendment.

Mr. MANN. I beg the gentleman's pardon. He said he rose to a point of order.

Mr. DYER. The gentleman is mistaken. If he had been giving his usual attention to the business of the House he would not have been misinformed. I made the statement that a while ago I made the point of order because I wanted to see if I could hasten consideration of this bill.

Mr. WINGO. Does the gentleman wish to expedite the passage of the bill?

Mr. DYER. I do. I am a member of the Committee on the Judiciary and have not at any time during the consideration of this bill taken any time of the House, simply because I believed that the membership were generally in favor of the bill and that they wanted it passed, and I only rise now to urge Members not to take up the time in speaking in favor of the bill, because substantially all of us are in favor of it. Let us proceed to pass it and see if it can not become a law. It is something that is demanded and greatly needed, and we ought to hasten the consideration of it. [Applause.]

Mr. STAFFORD. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: On page 3, line 5, after the word "ability," insert "in case the employee is married or has a family dependent upon him," and after the numbers "$66.67" insert "and not more than $45 in case the employee has no family dependent upon him," and after the word "less" insert "in any case."

Mr. STAFFORD. Mr. Chairman, this amendment purposes to restrict the maximum amount of monthly compensation in case of total disability that can be paid to a person who has no family dependent upon him to $45, and leaves the amount as it is in the bill in case he is married or has a family dependent upon him. The whole bill is predicated upon the idea that some additional compensation should be given to a man in case he is married or has a family dependent upon him, and if that is the case some reduction should be made in the case of an unmarried man who has no family dependent upon him.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. STAFFORD. I have only five minutes.

Mr. COOPER of Wisconsin. What would the gentleman do in the case of an unmarried man who had a helpless invalid mother dependent upon him?

Mr. STAFFORD. As the gentleman knows, under the decisions of our own State, he would be considered as having a family dependent upon him. There are decisions in Wisconsin to that effect. I assume that under the phraseology of the bill every person who is to-day receiving $1,200 or more will receive under all circumstances in case of total disability $66.67.

Mr. GARD. Not to exceed that.

Mr. STAFFORD. Who will determine it?

Mr. GARD. The commission which has charge of the matter.

Mr. STAFFORD. Is not the commission limited by the provisions of section 3, which says:

That if the disability is total the United States shall pay to the disabled employee during such disability a monthly compensation equal to 66⅔ per cent of his monthly pay, except as hereinafter provided.

And here you state that the monthly compensation for disability shall not be more than $66.67. Then, further in subsection K you provide that in computing compensation under this section the monthly pay shall be considered to be not more than $100 nor less than $50.

Mr. GARD. Yes.

Mr. STAFFORD. Now, I wanted to obtain the view of the committee before offering the amendment, but debate on the pro forma amendment had been exhausted, and I was perforce obliged to offer this amendment to get recognition. Do I understand that if a person is totally disabled who has received $1,200 a year, it is still within the discretion of the commission to cut down the maximum allowance below $66.67?

Mr. GARD. No. If he is totally disabled, he obtains the maximum of $66.67 per month.

Mr. STAFFORD. Then does not the gentleman believe that there should be some differentiation between the case of a married man or a man who has a family dependent upon him and a man who is not married and has only himself to support?

Mr. GARD. No; I do not think so. I do not think there has been any such distinction made in any law between a man married and unmarried. The compensation is to the man for injuries which he has received.

Mr. STAFFORD. That compensation is predicated upon the idea of giving him sufficient to support himself during his disability. Of course there is not so much needed in the case of an unmarried man to support himself as a married man or a man who has a family dependent upon him.

Mr. GARD. I suspect that is true, but as the gentleman's colleague [Mr. COOPER of Wisconsin] suggests, an unmarried man may have other persons dependent upon him. He may have a dependent mother or sister.

Mr. STAFFORD. The gentleman knows, because he is very familiar with this bill, that provision is made for persons having dependent families.

Mr. GARD. The other provision would apply in case of death.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. GARD. The other provisions apply to the death claims. This $66.67 per month is the maximum for total disability.

Mr. STAFFORD. Mr. Chairman, I think the chairman of the committee has admitted sufficiently to confirm the position that some distinction should be made in the amount of compensation paid the married man and the man with the family dependent upon him and the single man who has no dependent family.

Mr. TAGGART. Will the gentleman yield?

Mr. STAFFORD. I can not yield in the minute and a half that I have remaining. I should be glad to yield to the gentleman if I had the time. In this bill we make provision in case of widows that they shall receive 35 per cent, and in case that they have minor children 10 per cent more. To carry out the principle that runs through this comprehensive bill—and I want to compliment the committee in bringing in such a comprehensive measure—I think we should make the distinction of paying $21 less in case of a single man who has no family dependent upon him than in the case of one who is married.

Mr. COOPER of Wisconsin. Mr. Chairman, in view of what was said by the gentleman from Georgia about economy I want to narrate an incident which illustrates how the Government has been treating employees injured while on duty in its service. A few years ago a Scandinavian constituent of mine, whom I never before had seen, came to me and told of an injury he had received while employed at the Rock Island Arsenal in the service of the Government. I introduced a bill for him in the House and also a resolution referring the bill to the Court of Claims. The Court of Claims in due time unanimously reported its findings of fact that this man had, under the direction of his superior fellow-employee of the Government, walked out on a scaffold 40 feet from the ground; that the planks which the Government had put into this scaffold were defective; that in obedience to orders he and another employee were carrying planks out on the scaffold which broke, letting this laborer fall 40 feet; that he struck on the edge of a mortar box, breaking several of his ribs, breaking his hip, breaking his leg, breaking his arm, and badly injuring his head. He was picked up supposedly dying; subsequently he was reported dead. He was unconscious for many hours.

The Court of Claims reported that the sum, $5,000, named in the bill was not too great an amount properly to compensate the man for the injury he had received. The court further found that he was not guilty of contributory negligence—the assistant attorney general who attended to the case having in his brief specifically said that the man was not guilty of contributory negligence.

The findings of the court were sent to the House and referred to the Committee on Claims, and that committee brought in a

bill awarding the man the munificent sum of $730. The committee did this because of a statute which gave an employee only one year's wages to compensate for an injury of that kind—$730 for a man terribly injured for life!

That case, I presume, the gentleman from Georgia would consider an example of practical economy. Yes; it was economical, but it was also shamefully unjust.

This is not a question of economy. It is a question of doing justice—a question of whether the Government of the United States, incomparably the richest of all of the nations, shall do justice to employees injured in its service.

I am very glad that public sentiment has at last forced Congress into taking up this very important subject with every prospect of the early enactment of appropriate legislation.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. HAMILTON of Michigan. This proposed law will not be retroactive, so that the man in the case the gentleman speaks of can get further compensation?

Mr. COOPER of Wisconsin. That is a very pertinent inquiry, Mr. Chairman. At the time the report was brought in for $730 I rose and narrated the facts to the House, and the House evinced the spirit just displayed by the gentleman from Michigan [Mr. HAMILTON], and promptly voted the man $5,000, the amount mentioned by the Court of Claims.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. COOPER of Wisconsin. The bill went to the Senate, but was not acted upon, and the injured man got nothing. In a subsequent Congress I introduced another bill to give him $5,000. Finally the committee recommended $1,500, and this man, crippled for life through no fault of his own but solely through the negligence of a fellow employee of the Government, under whose control and orders he was acting, received that amount, $1,500, nor has the Government ever paid him any more.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma and Mr. TRIBBLE were given leave to extend remarks in the RECORD.

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 7. That as long as the employee is in receipt of compensation under this act, or, if he has been paid a lump sum in commutation of installment payments, until the expiration of the period during which such installment payments would have continued, he shall not receive from the United States any salary, pay, or remuneration whatsoever except in return for services actually performed, and except pensions, for service in the Army or Navy of the United States.

Mr. GARD. Mr. Chairman, in order to perfect the meaning of the text I offer the following amendment.

The Clerk read as follows:

Strike out the comma after the word "pensions" in line 4, page 4.

Mr. STAFFORD. Will the gentleman advise the committee of the reason why when a pensioner is injured the amount of the pension received from the Government shall not be considered as a part of the compensation for his support?

Mr. GARD. It was thought that the two were entirely separate and different; one was for service in the Army and the Navy and the other for service in civil employment. It was thought that we could not bring together the pension for service in the Army and the Navy and the compensation for the injury received while one is in the performance of a civic employment.

Mr. STAFFORD. The gentleman will agree that a person totally disabled receiving the $66 for life is receiving a pension?

Mr. GARD. I do not agree that it is a pension at all. It is compensation.

Mr. STAFFORD. Oh, whatever you may call it. Of course, you may say that it is compensation, but the effect of it is just the same, a pension. I would like to further inquire of the gentleman as to one other phase of the bill, and that is this, whether the committee considered the paying of this compensation to widows and children of deceased employees in case those widows and children were not actually dependent.

I know of some instance of persons who have been killed in the Government service, where they left considerable estates in their own name, and were in nowise dependent for support. Has the gentleman's committee considered the phase of allowing those persons compensation at the same rates as are provided in the bill?

Mr. GARD. Yes; the committee did consider that. The committee thought the case suggested would be must unusual. It is a situation which might arise with equal force in any State of the United States, and the gentleman's idea is not embodied in any workmen's compensation law in any State in the United States. The allowance to the widow is necessarily fixed. There has to be some arbitrary rule of allowance. In some instances it may be that it would be too much and in other instances too little, but there must be some fixed sum, and, therefore, the committee considered that, and has sent the bill to the House in the language which was just reported.

Mr. STAFFORD. So it is the purpose under the provisions of this bill to pay the widow or the children of the deceased whether the deceased leaves ample funds for their maintenance or not?

Mr. GARD. If such an unusual condition is ever presented, I suspect it would be covered by the bill.

Mr. STAFFORD. It is not difficult to contemplate a person who is receiving $1,500 or $2,000 or $2,500 a year meeting with an accident in the Government service, and leaving behind him a considerable estate, quite ample, in the form of life insurance or other estates, to provide for his widow and children.

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

(L) If any person entitled to compensation under this section, whose compensation by the terms of this section ceases upon his marriage, accepts any payments of compensation after his marriage he shall be punished by a fine of not more than $2,000 or by imprisonment for not more than one year, or by both such fine and imprisonment.

Mr. BARKLEY. Mr. Chairman, as the consideration of this bill has somewhat assumed the proportions of a Methodist experience meeting, I desire to give testimony to my feelings upon the provisions of the bill. When I first became a candidate for Congress four years ago, one of the things which I advocated before the people was a general workmen's compensation law with respect to all employees of all corporations or individuals engaged in interstate commerce, a subject over which Congress has control.

I regret, Mr. Chairman, that I am not permitted to vote at this time for a bill that carries in it the provisions which I believe ought to be incorporated in a general compensation bill whereby the employees of railroads and other corporations engaged in interstate commerce might be given compensation for injuries without the necessity of expensive lawsuits; but we are only called on at this time to vote for a bill in relation to Government employees, and, as it is in harmony with the idea which I think ought to be embodied in a law with respect to all employees, I shall give it my support. Yet, at the same time, I have a good deal of sympathy for the position taken by the gentleman from Illinois [Mr. CANNON], because it looks like where a bill seeks to make a special preparation for the coming of a rainy day or an accident on the part of a Government employee, if there was any possible or practical way by which others in like or similar circumstances might be protected by society, it ought to be done, because I do not regard it as an uncontrovertible statement of fact that society owes any more to a Government employee than society owes to any other employee who is subject to the ordinary hazards of life.

I do not believe that society, which in its organized form is known as the government, owes any greater duty to a carrier of mail or to an employee in a navy yard than it owes to a blacksmith or a carpenter or any other man who is subject to the hazards of employment and of the vicissitudes of life. But we are not called upon to pass on those questions.

The bill which has been presented by the committee has one or two features in it that I think ought to be changed. For instance, there is a provision in sections 26 and 27 that where an injury is brought about on account of circumstances that would make some third person liable in damages for the injury, in that case the Government has the right to require the injured employee to assign his right of action against the corporation or individual over to the Government or to prosecute it in his own name. Whether he prosecutes it in his own name, or whether the commission prosecutes it in his behalf, and a recovery is had, then the commission has the right to apply such of the amount recovered as may be necessary to reimburse the Government for what compensation it may have paid him up to that time and apply the balance of it, if any is left over, to any future compensation that the Government might be called upon to pay to the employee. Suppose an employee is injured in such a manner as to make it a permanent injury, or a permanent disfigurement of the body. Suppose he is injured in the face, has an ear taken off, or a great scar is dug out of his cheek, which might disable him for six months in his

employment with the Government. He may have a right of recovery against the corporation that produced that injury, and yet the element of damages might not be confined to the question of loss of time, because punitive damages might be allowed to him by the jury, or damages brought about by reason of mental pain and suffering.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. BARKLEY. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BARKLEY. Now, if the employee under circumstances of that sort should recover $5,000, based upon the destruction of his power to earn money, or upon the loss of his ear, or based upon a permanent lifelong scar upon his face, and based in part upon his mental pain and suffering, I do not believe any amount that he was given on account of these things ought to be charged up against him and given as a credit to the Government as against any compensation that he might be entitled to in the future, especially if the future compensation should be for a subsequent injury.

Now, in the language of this bill, this would apply to any injury he might receive at any time in the future. If he was injured to-day by reason of the negligence of anybody else, and he recovered, or the commission recovered for him, I think there ought to be taken out of the amount recovered by him a sufficient amount to compensate the Government for the actual compensation given him while disabled on account of that injury, but if there is surplus left, I believe it ought to be his, and if he is injured afterwards I do not believe that any part of the first recovery ought to be held as a fund out of which to compensate the Government for compensation paid him on account of injuries received subsequent to that time.

Mr. IGOE. Is not that all the law provides for?

Mr. BARKLEY. Oh, no; the law does not limit it, but sets this fund aside for a credit against any future compensation if he should be injured. It may go on for 10 years, and if he were injured at any time while employed by the Government under a strict construction of this language this amount over and above the compensation already paid to him would be credited against any compensation for injuries received in the future.

Mr. IGOE. But the gentleman does not want to give two compensations?

Mr. BARKLEY. Not for the same injury; but suppose he is injured subsequently?

Mr. IGOE. It can only be where he is injured while in the service of the Government, and there may be cases where there is a case against a private employer and a claim against the Government at the same time, and——

Mr. BARKLEY. I think in that case the same man ought not to receive compensation from two sources, but suppose the recovery is twice as much as the compensation he receives from the Government for that particular injury?

Mr. IGOE. Then he gets the benefit of all over what he receives from the Government.

Mr. BARKLEY. But the provisions of this bill say that it shall be credited against any future compensation by the Government.

Mr. IGOE. It holds out——

Mr. BARKLEY. Of course.

Mr. IGOE. He does not get compensation until that compensation would reach the figure he would obtain from the private employer.

Mr. BARKLEY. Suppose he should afterwards be injured, say, five years after that. Every injury ought to stand on its own bottom. If he can recover $5,000 against a wrongdoer for a particular injury, ought any part of that to be held as a credit against the Government for any future injury he might receive or compensation he might receive from the Government by reason of those injuries?

It ought to be assumed that all over and above the compensation that the Government may pay him for a particular injury, if he recovered it from a private corporation, ought to be his when other things are taken into consideration in the recovery of a verdict besides mere loss of time. There may be something the man is entitled to recover besides loss of time if he is compelled to go through life disfigured, with one ear gone or one eye out or one toe cut off, where he may not have been permanently disabled, but might be able to go back into the service of the Government and still perform his duties; and he ought not to have that sort of a sword of Damocles always hanging over him for fear that if he became injured again under independent circumstances he might not be entitled to compensation on account of the subsequent injury, because a part of the former recovery is credited upon any future compensation to which he might be entitled. I shall offer amendments when we reach those sections which I hope will cure the defects to which I have alluded.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. TREADWAY. Mr. Chairman, the gentleman from Kentucky [Mr. BARKLEY] has just referred to one particular feature that he dislikes in this bill and points to the fact that it was not broad enough or rather did not include compensation to employees of interstate carriers. I would submit that it would be advisable for us, the Government, being the greatest employer of labor in the country, to take care of our own force and see that a good workman's compensation act is provided for the employees of the Government itself, and then we can rightly expect that the large corporations over which we have control can be brought under a similar act.

Another objection made was by the gentleman from Georgia, who referred to the expense of this bill. I submit the expense is a very modest item according to the report wherein it says that the consulting actuary of New York estimates that for the first year it would be one-tenth of 1 per cent of the Government's pay roll, and at no time when it reached its maximum within 30 years will it exceed one-half of 1 per cent of the pay roll. I myself have not the figures whereby I could estimate the actual amount in dollars and cents, but whatever the amount may be it is a comparatively small amount when we consider the benefits provided by placing these funds in the hands of dependent persons of those who may be injured in the employ of the Government. If our friends on the other side had been as careful in their former legislation not to run into extravagant appropriations as the committee evidently has been in this case, we would not be called upon to make such enormous provisions for revenues as we have been doing in the last few days.

I submit that this estimate is very small, very modest, and certainly not unfair to the Treasury of the United States. My object in speaking at all in favor of the bill comes from the fact that it is with very great pride I state that the State of Massachusetts, which I have the honor in part to represent on this floor, was one of the first, if not the first, State to put upon its statute books a comprehensive workingmen's compensation act. I believe the State of New Jersey preceded the State of Massachusetts by a very short period. During the five years that the workingmen's compensation act has been in existence in Massachusetts it has been very widely extended, so that to-day not only all forms of corporate employment but likewise the employees of the State, the employees of cities, counties, towns, if those units desire, shall be provided for under the comprehensive act on the statute books of Massachusetts. I am also very glad that the committee, in its judgment in framing this bill under consideration, gave such careful attention to the operation of the statute that we have in Massachusetts. I think I am within my rights in saying that the bill which we are considering here is very largely framed on the Massachusetts act and the experience of the Massachusetts board that has been conducting the affairs in behalf of that legislation. So I for one, from the experience of our State and from the justice of the cause for which this bill is framed, am heartily in favor of its passage. [Applause.]

The CHAIRMAN. Without objection, the pro forma amendment offered by the gentleman from Kentucky [Mr. BARKLEY] will be withdrawn.

There was no objection.

Mr. MANN. Mr. Chairman, I move to strike out the last two words. The gentleman from Massachusetts has referred to what the bill may cost. I understood the gentleman from Maine [Mr. MCGILLICUDDY] and some other gentlemen who have talked this afternoon say that they think the provisions of this bill would cost the Government less than the provisions of existing law. Now, I never try to delude myself about the facts. If anyone votes for this bill on the supposition that it is not going to cost anything, then what on earth is the object in passing the bill? If this bill, if enacted into law, will not cost the Government any more than the existing compensation law, I am not for the bill.

Mr. GARD. Will the gentleman permit an interruption?

Mr. MANN. Certainly.

Mr. GARD. I think that which those gentlemen who spoke had in mind was the expense for the first year of the bill.

Mr. MANN. I have no doubt but that was what they confined themselves to. It is very likely that under the operation of this bill the Government will not pay any more the first year than it pays now, though that is doubtful. But it is perfectly certain it will pay a great deal more as years go on.

The statement in the report in reference to the actuary only shows that this particular actuary, whom I know nothing about. does not know enough to pound sand into a rat hole. He says that the operation of this bill would cost the Government only one-tenth of 1 per cent the first year, and that at the end of 30 years it would only cost the Government one-half of 1 per cent of the amount paid in salaries, and so forth. Yet this bill proposes to appropriate for the first year $500,000. One-tenth of 1 per cent would make the salaries of the Government amount to $500,000,000. Anybody that dreams that we pay that much now for civil salaries has been smoking opium. It is impossible to ascertain some facts as to what the compensation law now on the statute books costs. The committee that reported the bill does not know, or, if they do, they do not convey the information in their report.

Mr. TAGGART. Will the gentleman yield there?

Mr. MANN. I yield.

Mr. TAGGART. There is no way of estimating the number of accidents that are to happen, as the gentleman says. There may be some way of ascertaining what has been paid. Of course, that is plain; but we can not make any calculation on future wrecks.

Mr. MANN. I did not say you could.

Mr. TAGGART. No actuary, no matter how much he knows, can give any information on that subject.

Mr. MANN. I can give a good deal more information on the subject than the committee did, or the committee has, myself.

Mr. GARD. I am in full accord with the idea of the gentleman. The price of this is rather uncertain, but the information which we have is that the existing compensation laws for the last year or two have cost $400,000 or $450,000 a year.

Mr. MANN. I doubt if my friend has any information of the cost for the last year or last two years. If he had, he did not put it in the report, because he copied exactly, word for word on that subject, the report made two years ago.

Mr. GARD. That is a fact.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MANN. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. That is not recent information. I have searched the report of the Secretary of Labor, which ought to contain the information. I have searched the report of the Bureau of Labor Statistics, which ought to contain the information, and they will tell you how many claims have been filed and how many claims have been allowed, but the important information as to how much money has been allowed they conceal. Nobody knows to-day what the present compensation law is costing the Government. Nobody knows——

Mr. IGOE. In the hearing of the committee, published January 28, there is an estimate of the cost under date of February 1, 1916, which is furnished by the Department of Labor, and it gives the number of accidents from 1909–10 to——

Mr. MANN. Does that say how much was paid out during the last fiscal year?

Mr. IGOE. No; it does not.

Mr. MANN. I did not suppose it did. That is what I am saying. You can not get the information. You would suppose that a bureau that was allowing such money would know what it had allowed, but they do not. If they did, I do not believe they would tell us. Now, that is no argument against this bill. Do not misunderstand me. I am for the passage of this bill, but I am not going to vote for it on the assumption that it is not going to cost anything. The $400,000 or $500,000 which the committee two years ago estimated the existing law cost the Government did not include the Panama Canal. The present law covers only 25 per cent of the persons in the employ of the Government. While it is true that those are of the most hazardous employments, it is not true that all the accidents occurred in those employments.

Now, the committee in its report and gentlemen on the floor have said this bill will not cost as much the first year. My stars alive! that is no argument. It possibly will not cost as much the first year, because now, under the existing law, we pay a year's salary. Under this we propose to pay only 66⅔ per cent of the salary and keep the salary down to a $100-a-month basis, so that it is very likely that the first year it will not cost as much. But the person who is injured to-day and is drawing salary to-day will be drawing a salary 10 or 20 or 30, and some of them 40, years from now, and it will be the same amount.

Mr. TAGGART. Mr. Chairman, will the gentleman yield there?

Mr. MANN. No. And the widow who goes on the salary list to-day will be a widow drawing a salary for years to come, and the children under 16 years of age will continue to draw their portion until they reach the age of 16.

That is no argument against the passage of the bill, but it is an argument against its passage on the supposition that it is not going to cost anything. If there is any place where people ought not to delude themselves, it is in a body of statesmen—and that is what we are supposed to be. [Applause.] We ought to pass the bill knowing that somebody will have to pay the taxes with which to support it, and pass it because we believe it is now a righteous measure, not because it is not going to cost anything. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

The cause of action when assigned to the United States may be prosecuted or compromised by the commission, and if the commission realizes upon such cause of action, it shall apply the money or other property so received in the following manner: After deducting the amount of any compensation already paid to the beneficiary and the expenses of such realization or collection, which sum shall be placed to the credit of the employees' compensation fund, the surplus, if any, shall be paid to the beneficiary and credited upon any future payments of compensation payable to him.

Mr. BARKLEY. Mr. Chairman, I offer an amendment to perfect the text.

The CHAIRMAN. The gentleman from Kentucky offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BARKLEY: Page 15, line 17, after the word "him," insert the words "on account of such particular injury."

Mr. BARKLEY. Mr. Chairman, I desire to suggest a change in the amendment there. Instead of its reading, "on account of such particular injury," I want it to read, "on account of the same injury."

Mr. STAFFORD. The gentleman can withdraw his amendment and offer a new one.

Mr. BARKLEY. I withdraw the amendment, Mr. Chairman, and offer a new one. At the end of line 17, page 15, following the word "him," insert the words "on account of the same injury."

The CHAIRMAN. Without objection, the first amendment will be withdrawn and the Clerk will report the new amendment.

The Clerk read as follows:

Amend, page 15, line 17, by inserting after the word "him" the words "on account of the same injury."

Mr. GARD. Mr. Chairman, the committee does not deem the amendment very material, but if it tends to clarify the section we have no objection thereto. In the same connection, Mr. Chairman, there are other places where, if this amendment is to be put in the bill, it should be likewise placed.

Mr. BARKLEY. On page 16, line 9, and on page 16, line 15; and the period should be stricken out.

Mr. GARD. I also suggest that on line 17, page 15, the period should be stricken out, and the amendment offered by the gentleman from Kentucky should then follow.

Mr. VAN DYKE rose.

Mr. BARKLEY. I yield to the gentleman.

Mr. MANN. Let us have the amendment reported again.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 15, line 17, after the word "him," strike out the period and insert the words "on account of the same injury."

Mr. VAN DYKE. I would like to ask the gentleman a question as to just what his amendment will mean to the original section. What added effect will it have?

Mr. BARKLEY. Well, as I explained a little while ago, in the language as it appears in the bill the court might construe that to mean that any surplus that was left after paying the compensation up to that time or for that particular injury might be credited against any future compensation for subsequent injuries that might occur, and I wanted it to be made plain that the language applies only to the injuries for which the compensation is received and for which the verdict is rendered in any particular case.

Mr. VAN DYKE. The idea is to prevent duplication for time lost?

Mr. BARKLEY. Yes; or for making any surplus for any particular injury hold over and be credited against any compensation for an injury that might be received by the employee subsequently.

Mr. GARD. For any other or different injury?

Mr. BARKLEY. Yes.

Mr. GARD. We have no objection to the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] moves to strike out the last word.

Mr. BORLAND. Mr. Chairman, I notice that this section requires the beneficiary, or gives the commission the power to require the beneficiary, to assign to the United States any right of action he may have to enforce such liability for damages by reason of death or injury. I assume, as a matter of law, that they can only require that assignment as the alternative of receiving the money.

Mr. GARD. That is true.

Mr. BORLAND. They could not require the assignment of the right to pursue the damages against somebody else if that right were more valuable than the right to claim the damages for compensation from the Federal Government?

Mr. GARD. That is true.

Mr. BORLAND. And so in the case of my own State, where the Campbell Act gives a penalty of $5,000 for negligence and death, if the party preferred to retain that right of action he could do so?

Mr. GARD. They have the right to take the compensation or pursue their own independent remedy for damages.

Mr. BORLAND. That occurred to me. Now, as to the scope of circumstances creating a legal liability upon some person other than the United States to pay damages, suppose the employee had by his own contract procured accident insurance or fraternal benefit insurance of some kind, which became payable to him or to his beneficiary, growing out of this particular injury or death. Is it intended that accident insurance, fraternal contributions that might be given to him, which he has paid for and which have accrued by reason of his payments, must be sacrificed in order to receive these benefits?

Mr. GARD. Oh, no; if he has any insurance contracts or accident contracts, those belong to him. They are his personal property.

Mr. BORLAND. That would depend upon the meaning of the words "pay damages therefor." This language is pretty broad. It says—

Creating a legal liability upon some person other than the United States to pay damages therefor.

Mr. GARD. An insurance contract would not be a liability for damages.

Mr. BORLAND. Of course it would not be strictly in tort. It would be a contractual liability.

Mr. GARD. Yes.

Mr. BORLAND. I would ask the gentleman whether the committee have considered that matter, whether there is any danger of losing any of these rights.

Mr. GARD. All of these matters have been given consideration by the committee.

Mr. Chairman, I ask the Clerk to read.

The Clerk read as follows:

SEC. 27. That if an injury or death for which compensation is payable under this act is caused under circumstances creating a legal liability in some person other than the United States to pay damages therefor, and a beneficiary entitled to compensation from the United States for such injury or death receives, as a result of a suit brought by him or on his behalf, or as a result of a settlement made by him or on his behalf, any money or other property in satisfaction of the liability of such other person, such beneficiary shall, after deducting the costs of suit and a reasonable attorney's fee, apply the money or other property so received in the following manner:

(A) If his compensation has been paid in whole or in part, he shall refund to the United States the amount of compensation which has been paid by the United States and credit any surplus upon future payments of compensation payable to him. Any amount so refunded to the United States shall be placed to the credit of the employees' compensation fund.

(B) If no compensation has been paid to him by the United States, he shall credit the money or other property so received upon any compensation payable to him by the United States.

Mr. GARD. Mr. Chairman, in order to perfect the text as amended by the amendment offered by the gentleman from Kentucky [Mr. BARKLEY], I offer the following amendment to section 27.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Committee amendment: Page 16, line 4, after the word "him," insert "on account of the same injury."

The amendment was agreed to.

Mr. GARD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 16, line 15, after the word "States," insert the words "on account of the same injury."

The amendment was agreed to.

Mr. VAN DYKE. Mr. Chairman, I should like to ask the gentleman a question. Who is authorized to bring suit in case of an accident to a Government employee? Do the commission handle all suits?

Mr. GARD. Only on assignment. The man may bring suit himself. He has an independent right to bring it. In the event that he desires, the commission may bring it under assignment by him. Otherwise there would be no right in the commission or anyone else to bring suit.

Mr. VAN DYKE. The only point I wanted to bring out was whether the commission, that I presume is to be appointed under the provisions of this bill, will have authority either to bring suit or to settle all claims?

Mr. GARD. Only if the man injured wants to come within the compensation law.

Mr. VAN DYKE. If he elects to come within the provisions of the compensation law, then he has to relinquish all right he may have to bring suit to recover, and this puts in the hands of one commission the authority to bring suits against every railroad company in the country and to handle all suits?

Mr. GARD. It is just a matter of assignment. He would assign to the commission the claim for damages, and they would proceed to collect it according to law.

Mr. VAN DYKE. Of course, I can not admit that such an assignment can be made. Under the law of our State an assignment of that kind can not be made. I want to find out whether or not this commission will have authority to settle, in case the employee desires to have suit brought to recover damages?

Mr. GARD. Yes; after assignment, I would say the commission would have the authority to prosecute the case, or settle it, in its discretion.

Mr. VAN DYKE. That is what I wanted to know, whether the full power would be placed in the hands of the commission or not.

Mr. CULLOP. I should like to ask the gentleman in charge of the bill a question.

Mr. GARD. I shall be very glad to answer it.

Mr. CULLOP. In most jurisdictions a claim for personal injury is not assignable.

Mr. GARD. That is very true.

Mr. CULLOP. Now, are you creating such a right by statute here?

Mr. GARD. Under this statute we are.

Mr. CULLOP. And that is for the purpose of subrogating to the Government the rights of the employee—is that the purpose of it?

Mr. GARD. Yes; in States where it can be assigned it was the idea that if the claim should be assigned the Government should prosecute the claim and apply it as compensation, according to the provisions of this law.

Mr. CULLOP. I understand that at the common law the right to bring suit for a personal injury is not assignable.

Mr. GARD. That is true.

Mr. CULLOP. But if made assignable at all, it must be by some statute, and this is in order that the party who pays may have the right of subrogation?

Mr. GARD. Yes.

Mr. CULLOP. And that is the object of this?

Mr. GARD. That is the object of the bill.

Mr. CULLOP. I am very much in sympathy with it.

Mr. KINCHELOE. In some States, where the injury results in death, the cause of action does not survive. For instance, in Kentucky the cause of action for assault and battery, when it results in death, does not survive to the administrator. Would the law of the State govern?

Mr. GARD. Of course in case of death resulting from injury the law of the State would control.

Mr. KINCHELOE. Suppose under the law of a State the cause of action would not survive to the administrator?

Mr. GARD. Then there would not be anything to assign.

Mr. KINCHELOE. Then the Federal Government could not be subrogated?

Mr. GARD. No.

Mr. McGILLICUDDY. The point would not come up at all.

Mr. GARD. No.

The Clerk read as follows:

SEC. 28. That a commission is hereby created, to be known as the United States Employees' Compensation Commission, and to be composed of three commissioners appointed by the President, by and with the advice and consent of the Senate, one of whom shall be designated by the President as chairman. No commissioner shall hold any other

office or position under the United States. No more than two of said commissioners shall be members of the same political party. One of said commissioners shall be appointed for a term of two years, one for a term of four years, and one for a term of six years, and at the expiration of each of said terms the commissioner then appointed shall be appointed for a period of six years. Each commissioner shall receive a salary of $5,000 a year. The principal office of said commission shall be in Washington, D. C., but the said commission is authorized to perform its work at any place deemed necessary by said commission, subject to the restrictions and limitations of this act.

Mr. MANN. Mr. Chairman, on page 17, line 5, I move to strike out "$5,000" and to insert "$4,000."

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 17, line 5, strike out "$5,000" and insert in lieu thereof "$4,000."

Mr. MANN. Mr. Chairman, this bill provides a very extravagant method of handling these compensation cases, in my opinion, though I have not proposed to change that method.

We have now a Commissioner of Pensions, who receives a salary of $5,000 a year. We have a Deputy Commissioner of Pensions, who receives a salary of $3,600 a year. These people have the responsibility for the disbursement of over $150,000,000. It is proposed by this bill to pay three gentlemen $5,000 apiece to disburse what the committee says will be less than a half a million dollars the first year, and not much more thereafter, although to that I do not agree. There is no reason why we should pay these three commissioners more compensation than we pay the Deputy Commisssioner of Pensions, or pay three commissioners $5,000 a year, the same amount the Commissioner of Pensions now receives. One man performs the duty in the Pension Office that these three will perform. I have no doubt that some of the people interested in the passage of this bill, outside of the House, who hope to hold the offices, would like to have it $5,000 or $7,500. We pay the Civil Service Commissioners, I think, $3,500 a year.

While they have always complained and wanted more, none of them, so far as I know, has ever resigned on that account. If they have they have got equally competent men to take their places. There ought to be some sense of proportion; if you insist on having three commissioners they ought to have no more pay than one commissioner and one deputy commissioner. Four thousand dollars a year is enough. Most of the three commissioners when they have been appointed will be traveling over the country a greater part of the time and receiving a per diem of $5 to $8 a day in addition to their salary. I think $4,000 is enough.

Mr. GARD. Mr. Chairman, I hope, and I am sure every Member of the House likewise hopes, that when this commission is appointed, it will be made up of capable and representative men, and while the amount carried by the bill is the sum of $5,000, I do not view it as a salary in excess of what would be called reasonable compensation for the character of the work to be done.

This commission, when it is appointed, will have a great work to do. I believe, as the gentleman from Illinois has well said, that the work of this commission will increase as the years go on. It is idle for anyone to say that the expense of this bill will not be increased over the existing law, because the bill under consideration is to take care of 400,000 employees, while the present compensation law takes care of possibly one-quarter of that number. With that extension in number, and the direction of the commission in all injuries, and the study to prevent injuries, because that is one of the great things that I think the commission should do, look into the governmental institutions and especially so as to surround the men with the best environment possible to keep down the rate of injuries, this with the semijudicial quality of the work which these commissioners must necessarily perform seems to me calls on the appointing power to select men of very high grade for this commission. While neither I nor any member of the committee is particularly committed to the sum of $5,000, or any other sum, it would seem to me, as it has seemed to the committee, that the sum of $5,000 for each commissioner would not be an unreasonable sum.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MANN) there were 39 ayes and 22 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 34. That for the fiscal year ending June 30, 1917, there is hereby authorized to be appropriated, from any money in the Treasury not otherwise appropriated, the sum of $50,000 for the work of the commission, including salaries of the commissioners and of such assistants, clerks, and other employees as the commission may deem necessary, and for traveling expenses, expenses of medical examinations under sections 21 and 22, reasonable traveling and other expenses and loss of wages payable to employees under section 21, rent and equipment of offices, purchase of books, stationery, and other supplies, printing and binding to be done at the Government Printing Office, and other necessary expenses.

Mr. GARD. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 18, line 12, strike out the words "authorized to be."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 35. That there is hereby authorized to be appropriated, from any money in the Treasury not otherwise appropriated, the sum of $500,000, to be set aside as a separate fund in the Treasury, to be known as the employees' compensation fund. To this fund there shall be added such sums as Congress may from time to time appropriate for the purpose. Such fund, including all additions that may be made to it, is hereby authorized to be permanently appropriated for the payment of the compensation provided by this act, including the medical, surgical, and hospital services and supplies provided by section 9 and the transportation and burial expenses provided by sections 9 and 11. The commission shall submit annually to the Secretary of the Treasury estimates of the appropriations necessary for the maintenance of the fund.

Mr. GARD. Mr. Chairman, I offer the following committee amendments.

The Clerk read as follows:

Page 18, line 24, strike out the words "authorized to be." Page 19, line 6, strike out the words "authorized to be."

The committee amendments were agreed to.

Mr. MANN. Mr. Chairman, do I understand that we have voted to strike out the words "authorized to be"?

Mr. GARD. Yes, once in the preceding section, then also on page 18, line 12, and in line 24 of the same page and in line 6 of the following page.

Mr. MANN. Why does the gentleman strike out those words?

Mr. GARD. So as to make an appropriation instead of an authorization.

Mr. MANN. Mr. Chairman, that ought not to be done. It is easy enough to report a deficiency appropriation, which should be done. It is almost impossible to keep track of appropriations made by Congress if you place appropriations in legislative bills. There is no difficulty about getting the money. Congress can pass a deficiency appropriation bill in a day's time. There is no failure or lack of appropriation where we authorize the provision.

Mr. GARD. It was thought better so as to dispense with the necessity of a separate appropriation bill.

Mr. MANN. Yes, and then when we want to know how much is appropriated we have to look up this bill to find out, whereas people who keep track of appropriations would look under appropriation bills, and would know. Of course everybody does not do that, but some of us do, and we have made it a practice almost invariably to have appropriations carried in appropriation bills.

Mr. GARD. Mr. Chairman, I am very glad to have the gentleman's assistance in writing the bill properly, and if he thinks it should be carried in the language as originally written I shall be very glad to withdraw the amendment.

Mr. MANN. I think it should be carried in the language in which it is written originally. There will be no trouble about getting the money.

Mr. GARD. Then, Mr. Chairman, I ask unanimous consent to vacate the votes by which the amendments heretofore ordered to Sections 34 and 35 have been adopted.

The CHAIRMAN. Without objection it will be so ordered.

There was no objection.

The Clerk read as follows:

SEC. 40. That wherever used in this Act—

The singular includes the plural and the masculine includes the feminine.

The term "employee" includes all civil employees of the United States and the Panama Railroad Co.

The term "commission" shall be taken to refer to the United States Employees' Compensation Commission provided for in section twenty-eight.

The term "physician" includes surgeons.

The term "monthly pay" shall be taken to refer to the monthly pay at the time of the injury.

Mr. LONDON. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LONDON: Page 21, line 2, after the word "injury," insert the following:

"The term 'personal injury' shall include an injury resulting from any occupational disease."

Mr. LONDON. Mr. Chairman, I desire to hurry along the passage of the bill, and therefore I will not take up the time of the committee in arguing in support of my amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken.

Mr. LONDON. Mr. Chairman, I demand a division.

Mr. BUCHANAN of Illinois. Mr. Chairman, would it be in order for me to make a few remarks in regard to this at this time?

If I may be permitted, I would like to state to the Members of the House that compensation for occupational diseases is much more required than compensation for accidents, for the reason that oftentimes there is a loss of time on account of these occupational diseases, and they result in impairing the efficiency of the employee. Not only that but he is subject to a great deal of expense in the way of doctor's bills that he would not otherwise incur, and, in my opinion, it is more important to pay employees compensation for occupational diseases than it is to pay them compensation for injury by accident. Therefore it seems to me that if the Members of the House will give this matter the proper thought and consideration they will approve the amendment offered by the gentleman from New York [Mr. LONDON].

The CHAIRMAN. The gentleman from New York demands a division.

The committee divided; and there were—ayes 17, noes 52.

So the amendment was rejected.

Mr. LOBECK. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. On page 21 I find the language:

The term "monthly pay" shall be taken to refer to the monthly pay at the time of the injury.

How often is it intended that this payment shall be made?

Mr. GARD. Monthly.

Mr. LOBECK. How often?

Mr. GARD. Twelve times a year.

Mr. LOBECK. In the Pension Bureau the Civil War veterans are asking that they be paid monthly, but it is said that it is too expensive, that it takes too much time, and would need a larger force of clerks to pay monthly.

Mr. GARD. When I said monthly I presumed it would be under the control of the commissioners when appointed.

Mr. LOBECK. We pay the pensioners four times a year—every three months—and I think some provision of that kind ought to be made so as to keep cost of administration less and therefore be able to be more liberal with the injured.

Mr. GARD. I had no definite information when I said monthly, but that was the idea of the bill, that they would be paid monthly, because the compensation follows the ordinary monthly payment.

Mr. LOBECK. That means a good deal of extra expense.

Mr. GARD. I do not think so.

Mr. LOBECK. The facts are, to my mind, Mr. Chairman, that if this law is properly administered it is going to be a good measure, but if its provisions are not carried out better than under the administration we have been having for many years and in some of the departments at the present time, where accidents to employees are being considered, it will not be of much help.

Incidents have been recited here to-day where men have been injured, but because of the action of departmental officials they have not received any compensation therefor. The cases have been referred finally to some solicitor, to some civil-service clerk, and the injured are often unfairly treated, regardless of proof presented. I have in mind a railway-mail employee who served for 38 years west of the Missouri River as a railway-mail clerk, never lost any time, and on the 6th day of December, 1914, that man when on duty accidentally fell out of the car because the bar that should have been in front of the car door was out of place through no fault of his. Ever since that time there have been examinations and reports by clerks and inspectors, by chiefs of divisions, and then a solicitor had the case under consideration for 6 months, evidently to see if the department could escape from assisting this worthy employee, yet nothing has been done so far, and for 17 months that man has been confined to his room, suffering from his injuries, and has never received one cent of remuneration, even that he would be ordinarily entitled to. It is not a credit to the department, and if these commissioners, to whom the Government is to pay each $4,000 salary and allow $50,000 for the expenses of examination in these cases, do not do any better than has been done in the past it will not be of the benefit that we hope for. I am in favor of a little more humanity being exercised in injury cases, and I am opposed to the idea that searching for technicalities to avoid assisting injured employees is the best policy. I shall gladly vote for this measure, hoping that the commissioners and those that shall have charge will use some good common sense in administering this law, so it will be of real benefit to the injured.

Mr. FESS. Mr. Chairman and members of the committee, I think that this sort of legislation, designed to secure workmen against the natural results of accident, is a proper function of government. A great many of the laws that we pass are economic, for the industrial side, and as a rule not very much of it is on the humanitarian side. In fact, a good many people think that that sort of legislation has no place whatever in a legislative body, but I am convinced that while we have built up a great industrialism in the country, and while we have come to have a factory, or better an industrial problem, that we ought also to look more carefully to the bettering of the conditions for the worker that grow out of those problems, and for that reason I believe that we ought to pass legislation of this sort. In a word, while we urge that constructive measures should occupy our time, remedial legislation should and will occupy some attention. I am not a recent convert to this conviction. As an officer of the Ohio constitutional convention of 1912, I stood for a humanitarian program, a part of which was the workman's compensation law, even including the provision of occupational diseases. We did not limit its application to State employment. However, I think that phrase "occupational diseases" opens a wonderfully wide door, and without limitation it might be abused. I think the good from this legislation is not to be confined simply to the workmen, but I believe that this will have the influence of causing the employers ultimately, while this bill is limited to the Government—at least it will have the influence of causing employers—to take greater care in sanitation and also what will probably produce a penalty upon them if better conditions are not obtained. Such legislation will compel more care on the part of the employer, and it will likewise compel a better class of labor. It will aid sobriety. For that reason I think that this is a legitimate function of legislation for the bettering not only of labor conditions from the standpoint of the worker but that it will better the employer as well. I shall vote for the bill without any hesitation whatever. [Applause.]

The CHAIRMAN. Without objection the pro forma amendment is withdrawn.

The Clerk read as follows:

In the case of compensation to employees of the Panama Canal or of the Panama Railroad Co. for temporary disability, either total or partial, the President may authorize the governor of the Panama Canal to waive, at his discretion, the making of the claim required by section 18. In the case of alien employees of the Panama Canal or of the Panama Railroad Co., or of any class or classes of them, the President may remove or modify the minimum limit established by section 6 on the monthly compensation for disability and the minimum limit established by clause (K) of section 10 on the monthly pay on which death compensation is to be computed. The President may authorize the governor of the Panama Canal and the chairman of the Alaskan Engineering Commission to pay the compensation provided by this act, including the medical, surgical, and hospital services and supplies provided by section 9 and the transportation and burial expenses provided by sections 9 and 11, out of the appropriations for the Panama Canal and for the Alaskan Engineering Commission, such appropriations to be reimbursed for such payments by the transfer of funds from the employees' compensation fund.

Mr. HULL of Iowa. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

SEC. 43. That this act shall take effect from and after its passage.

Mr. MANN. Mr. Chairman, I move to strike out section 43.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 23, strike out lines 12 and 13.

Mr. MANN. Mr. Chairman, it is one of the mysteries of life to me, after long service in the House, why gentlemen insist upon putting in at the end of a bill the provision, "this act shall take effect from and after its passage."

Mr. GARD. Mr. Chairman, I have no objection to its being stricken out.

The question was taken, and the amendment was agreed to.

By unanimous consent, Mr. IGOE, Mr. TAGGART, Mr. BUCHANAN of Illinois, Mr. FERRIS, Mr. FOSTER, Mr. TAGUE, Mr. LOBECK, Mr. MCGILLICUDDY, Mr. LONDON, Mr. EVANS, Mr. DYER, and Mr. TAVENNER were granted leave to extend their remarks in the RECORD.

Mr. DYER. Mr. Chairman, I ask unanimous consent that those who have spoken on the bill have leave to extend their remarks in the RECORD for five legislative days.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that all those who have spoken on the bill may have five legislative days in which to extend their remarks in the RECORD. Is there objection?

Mr. MANN. What is the request?

Mr. DYER. That all those who have spoken on the bill have leave to extend their remarks in the RECORD for five legislative days.

Mr. MANN. The committee can not give such consent.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] suggests a point of order, which, of course, will be sustained.

Mr. GARD. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SIMS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes, and had instructed him to report the same to the House with certain amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any of the amendments?

Mr. MANN. Did the gentleman move the previous question on the bill?

Mr. WEBB. Mr. Speaker, I move the previous question on the bill.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. WINGO. Division, Mr. Speaker.

The SPEAKER. The gentleman from Arkansas demands a division on ordering the previous question.

The House divided; and there were—ayes 118, noes 2.

Mr. WINGO. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The gentleman from Arkansas makes the point of no quorum, and evidently there is none.

Mr. WEBB. Mr. Speaker, I move a call of the House.

The SPEAKER. The gentleman does not have to do that. It is automatic.

Mr. SHERLEY. I move that the House do now adjourn.

The motion was rejected.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. The vote is on ordering the previous question.

The question was taken; and there were—yeas 288, nays 6, answered "present" 3, not voting 137, as follows:

YEAS—288.

So the previous question was ordered.

The Clerk announced the following pairs:

For the session:

Mr. DEWALT with Mr. MCFADDEN.

Mr. CANTRILL with Mr. LANGLEY.

Mr. GARNER with Mr. BARCHFELD.

Until further notice:

Mr. STEELE of Iowa with Mr. HOWELL.

Mr. POU with Mr. BEALES.

Mr. HEFLIN with Mr. GRIEST.

Mr. FIELDS with Mr. GRAY of New Jersey.

Mr. BURGESS with Mr. Moss of West Virginia.

Mr. RAYBURN with Mr. KAHN.

Mr. HOUSTON with Mr. GUERNSEY.

Mr. GLASS with Mr. SLEMP.

Mr. WEBB with Mr. MILLER of Pennsylvania.

Mr. FINLEY with Mr. NORTH.

Mr. HAY with Mr. COPLEY.

Mr. SLAYDEN with Mr. MCKINLEY.

Mr. KEY of Ohio with Mr. LAFEAN.

Mr. MORRISON with Mr. PORTER.

Mr. WILSON of Florida with Mr. GRAHAM.

Mr. CLINE with Mr. PARKER of New York.

Mr. SHERWOOD with Mr. DUNN.

Mr. SHOUSE with Mr. HUSTED.

Mr. OGLESBY with Mr. HAMILTON of New York.

Mr. GALLAGHER with Mr. MOONEY.

Mr. LEVER with Mr. HAWLEY.

Mr. CRISP with Mr. HINDS.

Mr. RAINEY with Mr. PLATT.

Mr. DRISCOLL with Mr. TILSON.

Mr. HENSLEY with Mr. LONGWORTH.

Mr. GREGG with Mr. LEHLBACH.

Mr. BARNHART with Mr. TILSON.

Mr. BLACK with Mr. ANTHONY.
Mr. EAGLE with Mr. COSTELLO.
Mr. CLARK of Florida with Mr. BUTLER.
Mr. DOREMUS with Mr. ROWLAND.
Mr. BURGESS with Mr. MUDD.
Mr. CARTER of Oklahoma with Mr. CAPSTICK.
Mr. CARLIN with Mr. BACHARACH.
Mr. BYRNES of South Carolina with Mr. PAIGE of Massachusetts.
Mr. RAGSDALE with Mr. BROWNE.
Mr. FARLEY with Mr. MILLER of Minnesota.
Mr. LINTHICUM with Mr. MARTIN.
Mr. KITCHIN with Mr. HAUGEN.
Mr. FITZGERALD with Mr. ROWLAND.
Mr. PATTEN with Mr. NELSON.
Mr. PRICE with Mr. POWERS.
Mr. HUMPHREYS of Mississippi with Mr. LOUD.
Mr. GARRETT with Mr. KELLEY.
Mr. MURRAY with Mr. ROBERTS of Massachusetts.
Mr. LEE with Mr. KIESS of Pennsylvania.
Mr. HULL of Tennessee with Mr. GOOD.
Mr. GOODWIN of Arkansas with Mr. FREEMAN.
Mr. HART with Mr. MOTT.
Mr. HARRISON with Mr. MCLAUGHLIN.
Mr. MCANDREWS with Mr. GLYNN.
Mr. LOFT with Mr. HUTCHINSON.
Mr. WHALEY with Mr. SCOTT of Pennsylvania.
Mr. SHACKLEFORD with Mr. TOWNER.
Mr. ROUSE with Mr. VARE.
Mr. STOUT with Mr. WINSLOW.
Mr. STEPHENS of Nebraska with Mr. WILSON of Illinois.
Mr. SCULLY with Mr. SNYDER.
Mr. SAUNDERS with Mr. WASON.
Mr. STEELE of Pennsylvania with Mr. SUTHERLAND.
Mr. SMITH of Texas with Mr. SELLS.
Until July 15:
Mr. MCDERMOTT with Mr. CHARLES.
Until July 17:
Mr. SABATH with Mr. KEARNS.
Mr. BAILEY with Mr. FAIRCHILD.
Until July 22:
Mr. CALLAWAY with Mr. PETERS.

Mr. WEBB. Mr. Speaker, I would like to withdraw my vote of "aye" and vote "present." I am paired with Mr. MILLER of Pennsylvania.

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. WEBB, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is, Shall the bill pass?

Mr. MANN. On that, Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Illinois demands the yeas and nays.

The yeas and nays were ordered.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted, as follows:

To Mr. GOODWIN of Arkansas, until Monday, on account of important business.

To Mr. GOOD, indefinitely, on account of the serious illness of his father.

To Mr. STEPHENS of California, indefinitely, on account of important business.

COMPENSATION FOR INJURIES TO FEDERAL EMPLOYEES.

The SPEAKER. The question is on the passage of the bill. Those in favor of passing the bill will, when their names are called, answer "yea." Those opposed will answer "nay."

The question was taken; and there were—yeas 287, nays 3, answered "present" 5, not voting 140, as follows:

YEAS—287.

So the bill was passed.

The Clerk announced the following additional pairs:
Until further notice:
Mr. SISSON with Mr. BUTLER.
Mr. MOON with Mr. COSTELLO.
Mr. BUCHANAN of Illinois with Mr. HUSTED.
Mr. NICHOLLS of South Carolina with Mr. SNYDER.
Mr. FLOOD with Mr. ROWLAND.
Mr. PATTEN with Mr. KREIDER.
On this vote:
Mr. SHOUSE (for bill) with Mr. STEPHENS of Mississippi (against).

Mr. CRISP. Mr. Speaker, I am paired with the gentleman from Maine [Mr. HINDS]. Inadvertently I voted "yea." I ask that my vote be changed from "yea" to "present."

The result of the vote was announced as above recorded.

LEAVE TO PRINT.

Mr. GARD. Mr. Speaker, I ask unanimous consent that Members who have spoken on this bill may have five days in which to extend their remarks in the RECORD.

Mr. MANN. I suggest to the gentleman that we give everybody the right to print on the bill for five days.

Mr. GARD. That all gentlemen have five legislative days.

The SPEAKER. The gentleman from Ohio asks unanimous consent that all Members have the right for five legislative days to extend their remarks in the RECORD on this bill. Is there objection?

There was no objection.

Mr. CONRY. Mr. Speaker, I ask unanimous consent to insert in the RECORD a speech delivered by my colleague, the gentleman from New York [Mr. FITZGERALD], at a meeting held in Madison Square Garden recently to commemorate the sacrifices made by those patriots who dedicated their lives to the cause of human liberty in Ireland.

The SPEAKER. The gentleman from New York [Mr. CONRY] asks unanimous consent to extend his remarks in the RECORD by printing a speech made by Representative JOHN J. FITZGERALD recently in Madison Square Garden touching the revolution in Ireland. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bill of the following title:

H. R. 6057. An act to amend section 14 of the reclamation extension act, approved August 13, 1914.

The message also announced that the Senate had insisted upon its amendments to bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, had agreed to the conference asked by the House, and had appointed Mr. CHILTON, Mr. SHEPPARD, and Mr. LA FOLLETTE as the conferees on the part of the Senate.

The message also announced that the President had approved and signed bills of the following titles:

On July 10, 1916:

S. 1388. An act to authorize the Secretary of the Interior to furnish hot water from the hot springs on the Hot Springs Reservation for drinking and bathing purposes free of cost to the Leo N. Levi Memorial Hospital Association, and

S. 1843. An act to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex.

ORDER OF BUSINESS TO-MORROW.

Mr. MANN. Mr. Speaker, I ask for a minute.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for not to exceed a minute. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, to-morrow the general dam bill comes up as the unfinished business, followed by the campaign publicity bill, both as privileged bills. A large number of the Members of the House desire to go to Baltimore to-morrow to attend a meeting of the Order of Elks. I suggest that we make an agreement that if the dam bill and the campaign publicity bill reach the stage of a final vote, the final vote be taken Friday, immediately after the reading of the Journal.

Mr. GALLIVAN. Mr. Speaker, reserving the right to object—and I will not object—I am profoundly grateful to the Republican leader that he has recognized the best order in the world, the Order of Elks. I do not have to make this statement on the floor of the American Congress to prove its truth. There are so many of my colleagues on both sides of the aisle who belong to this magnificent order, which places the flag of our country first and the women of our country next, that I do not need to make any speech. The Elks are the greatest order in all the world. [Applause.]

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that, for the reason which he states, if on to-morrow the dam bill reaches the stage where a final vote is to be taken upon it, and if the corrupt-practices bill reaches a final vote, both of them go over until Friday, just after the reading of the Journal and the clearing up of the Speaker's table. Is there objection?

Mr. ADAMSON. Reserving the right to object, unless the suggestion is based on the idea that some absent Member might wish a roll call, we might not have any difficulty in disposing of the dam bill on the final vote without a roll call.

Mr. MANN. That may be, but I am told—I am not a member of the order myself—that a number of the gentleman who wish to be absent want to feel that there will be no roll call on these bills to-morrow, and the only way to make sure of that is by a unanimous-consent agreement.

Mr. FITZGERALD. I hope the gentleman from Georgia will let his dam bill go over until to-morrow.

Mr. ADAMSON. Mr. Speaker, being one of those beautiful animals myself, I shall not object.

The SPEAKER. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Reserving the right to object, for the sake of literary accuracy, I want to correct the statement that the B. P. O. E. are "the best people in the world"; they are "the best people on earth." [Laughter.]

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that on July 11, 1916, they had presented to the President of the United States, for his approval, the following joint resolution and bills:

H. J. Res. 257. Joint resolution permitting the use of certain hospital facilities belonging to the United States;

H. R. 16641. An act granting the consent of Congress to Julian B. McCurry, A. G. McCurry, P. W. Walton, and J. J. Fretwell to construct a bridge across the Savannah River; and

H. R. 16287. An act granting the consent of Congress to the county of Sumter or to the county of Dooly, both of the State of Georgia, acting jointly or separately, and their successors and assigns, to construct a bridge across the Flint River.

MARINE HOSPITAL, CLEVELAND, OHIO.

Mr. GORDON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 2845, and consider the same in the House as in Committee of the Whole. It is a bill providing for the sale of the marine-hospital property in Cleveland.

The SPEAKER. The gentleman from Ohio asks unanimous consent to take from the Speaker's table the bill (S. 2845) for the sale of the marine-hospital property in Cleveland, Ohio, and consider it in the House as in Committee of the Whole. Is there objection?

Mr. MANN. Let the bill be reported.

The Clerk read as follows:

A bill (S. 2845) authorizing the sale of the marine-hospital reservation in Cleveland, Ohio.

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to have the present marine-hospital reservation in Cleveland, Ohio, and the improvements thereon, except so much of said reservation and the improvements thereon as he may deem it advisable to retain for the use of any branch of the public service, appraised by competent appraisers, paying therefor the customary rate of compensation for such service, and then, in his discretion and after due advertisement, to sell said appraised land and improvements, or any portion thereof, to the highest bidder therefor, upon such terms and at such times as the Secretary of the Treasury may deem for the best interests of the United States, for an aggregate price of not less than what he deems the value of said property after considering said appraisements, or the appropriate proportionate part of said value for such part of said land or improvements as may be sold separately; and to convey said land and improvements, or any part thereof, to the respective purchasers thereof by the usual quitclaim deed.

That the proceeds of the sale of so much of said reservation and the improvements thereon as is sold under the foregoing authorization are hereby appropriated and made immediately available for the provision of a new marine hospital at Cleveland, Ohio, and the acquisition of a suitable site therefor, for the acquisition of suitable sites and the erection of hospitals thereon at such points as may be hereafter designated by Congress, for new marine hospitals at stations where the present buildings are old and obselete, and for rehabilitating, repairing, altering, remodeling, reconstructing, and improving other marine hospitals and the grounds thereof, and for the requisite furniture, equipment, and appliances, etc., necessary for the proper preparation and fitting out of all such establishments better to enable their satisfactory operation for hospital purposes.

That $1,000 is hereby appropriated and made immediately available for the compensation of the appraisers above mentioned and such other expenses incident to the said sale as the Secretary of the Treasury may deem proper and specially order in writing.

Mr. ADAMSON. Reserving the right to object——

Mr. GORDON. I would like to say to the gentleman that I intend to offer an amendment.

Mr. ADAMSON. Reserving the right to object, I was going to say that although this bill has not gone to the Committee on Interstate and Foreign Commerce, which has undoubted jurisdiction over the subject and which has constructed all of these marine hospitals in the past, yet while the members of the committee have had no opportunity to consider it, I and my associates feel such great responsibility for it that the former chairman of the committee, the gentleman from Illinois, and I have gotten together and considered the bill and decided that we ought not to object if the beneficial purposes are sufficiently explained to the House so that the public may have knowledge of it. I have reserved objection in order that the gentleman from Ohio may explain it to the House.

Mr. STAFFORD. I want to say that I reserve the right to object.

Mr. GORDON. Mr. Speaker, this property was purchased by the United States Government in 1837 for $12,000. Its present value is estimated to be between a million and a million and a half dollars. The marine hospital was constructed on this site in 1852, and has since been maintained as such. The Public Health Service of the United States strongly recommends the passage of this bill. They have urged it for several years and appeared before the committee which considered the bill.

The objection to the bill that has been raised is that it puts too large authority in the executive department to dispose of and reinvest the fund, and I am prepared to offer an amendment simply authorizing the construction of a new hospital, to cost not exceeding $400,000, including site, building, and equipment, and the balance to go into the general fund of the Treasury.

Mr. STAFFORD. Will the gentleman yield?

Mr. GORDON. Yes.

Mr. STAFFORD. Upon what does the gentleman base the estimate that $400,000 will be adequate to provide a site and a new hospital building?

Mr. GORDON. It is estimated that this sum will be adequate. The reason for selling it is that it is surrounded by railroads and factories and wholly unsuitable for hospital purposes.

Mr. EMERSON. Will the gentleman yield?

Mr. GORDON. Yes.

Mr. EMERSON. Is it not a fact that the new union depot and the public buildings are grouped around this present hospital, and that it is absolutely necessary to dispose of the property before they can go ahead and build a new one?

Mr. GORDON. The suggestion of the gentleman from Ohio is a local matter and is the principal reason why the people of Cleveland are urging the grant of authority to sell.

Mr. FITZGERALD. I want to say to the gentleman that a proposition to dispose of property valued at a million or a million and a half dollars is not a local matter when I am around.

Mr. GORDON. Well, I would not ask the House to dispose of it for local reasons. The lowland adjoining the hospital has been occupied by railroad companies running in and out of Cleveland for 50 or 60 years as a right of way under a license from the Federal Government. The Public Health Service of the United States strongly urges the sale of the property because it is surrounded by railroads and factories and wholly unsuitable for the site of a hospital, and it is their purpose to purchase a site and construct a new hospital away from the noise, smoke, and dust which surround the present one.

Last year in agreeing upon the group plan there the public officials of Cleveland entered into an agreement with the railroads by which they agreed to build a monumental depot as part of the group plan, and the Cleveland officials agreed to exert every proper influence to induce the Government to sell so much of this property at its true value in money as the railroads are using, so that the railroads might purchase their right of way, which they now occupy under license from the United States Government. That is the local interest in it.

Mr. MANN. Mr. Speaker, will the gentleman yield to me?

Mr. GORDON. Yes.

Mr. MANN. Mr. Speaker, as the gentleman stated, the Government purchased this property many, many years ago for a small price. It is said to be worth now a million dollars or more. The city of Cleveland has made an arrangement with the railroads providing for the building of a union station. The city is very anxious to carry through the arrangement. Probably the property is worth more to sell to the railroads at this time to construct a union station than it would be for any other purpose. This bill would authorize the sale, and unless the authority is given soon I am informed by the city officials and by Members from Cleveland that the arrangement might fall through. It is no proper place for a hospital.

Mr. EMERSON. It is surrounded by railroads, shops, and such things.

Mr. MANN. If we can sell the property for a million dollars or whatever more value may be put upon it, it seems to me that it will be a very wise thing to do. As the bill passed the Senate it provided that the money should not be covered into the Treasury of the United States as miscellaneous receipts, but might be used by the Public Health Service and spent anywhere it pleased in the United States in connection with the reconstruction or furnishing of marine hospitals. The gentleman from Ohio [Mr. GORDON] has agreed to offer an amendment striking that out, authorizing the use of not to exceed $400,000 for the construction of a new marine hospital on a site to be purchased, the department estimating it should be $550,000, but cutting it down to $400,000, the balance of the money to be covered into the Treasury as miscellaneous receipts. I think we are making a very profitable arrangement if we put it through.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. GORDON. Yes.

Mr. ASHBROOK. I would like to say to the House, as a member of the Committee on Public Buildings and Grounds, that this proposition has been before this committee for a long time. The committee is in favor of it, and I made several attempts to get the bill reported out of the committee as an individual measure, but the committee decided to hold it up with the understanding that it would be included in the omnibus bill. This bill having passed the Senate and come to the House, in my judgment, should not now meet with opposition.

Mr. MANN. As a matter of fact, while the Committee on Public Buildings and Grounds had the House bill before it the proper jurisdiction of the bill was with the Committee on Interstate and Foreign Commerce.

Mr. ADAMSON. Mr. Speaker, will the gentleman yield?

Mr. GORDON. Yes.

Mr. ADAMSON. I will ask the gentleman if the present purpose of constructing a union station is not probably the best opportunity and the most favorable opportunity you will have to secure so good a price?

Mr. GORDON. Unquestionably that is true, and the sale of this property is necessary to consummate that arrangement.

Mr. WEBB. Mr. Speaker, will the gentleman yield?

Mr. GORDON. Yes.

Mr. WEBB. Is this sale to be made by private negotiation?

Mr. GORDON. It is to be made by the Secretary of the Treasury after due appraisement.

Mr. WEBB. Not at public auction?

Mr. CROSSER. It is to be sold to the highest bidder.

Mr. WEBB. Is there an upset price?

Mr. GORDON. No; there is not.

Mr. WEBB. Does the gentleman not think it best to place an upset price upon it?

Mr. GORDON. We have a scientific method of appraisal in the city of Cleveland which obtains in some other cities, by which the actual value in money of any property in a business district can be determined with mathematical accuracy.

Mr. FITZGERALD. Does the gentleman propose it shall not be sold for less than the appraised value?

Mr. GORDON. The bill as written provides it shall be first appraised.

Mr. FITZGERALD. Yes; it may be appraised, and then if there is no limitation on the price to be paid, the appraisal will not be of any value.

Mr. GORDON. As it has not been appraised we can not put a limit upon the price because we do not know what it is actually worth.

Mr. FITZGERALD. There can be a provision put in the bill that it shall not be sold for less than the appraised value.

Mr. WEBB. As an upset price.

Mr. FITZGERALD. And it must be put in or there will be no unanimous consent given.

Mr. EMERSON. Your good Democratic Secretary of the Treasury will see to that.

Mr. FITZGERALD. I do not care anything about the Secretary of the Treasury protecting the Government when I have an opportunity to do it myself.

Mr. EMERSON. This property was purchased for $10,000.

Mr. FITZGERALD. I know it was purchased cheaply, and so was this Capitol property; but that is no reason why we should give it to a plutocrat for nothing.

Mr. EMERSON. We need the Capitol and we do not need the hospital and can not use it.

Mr. FITZGERALD. I know about this hospital. It was closed some time because it could not be used, but that is no reason why this valuable piece of property should be sold for less than its appraised value.

Mr. EMERSON. I agree with the gentleman.

Mr. FITZGERALD. And unless there is provision in here that it shall not be sold for less than the appraised value, I shall object to the consideration of the bill.

Mr. MANN. Will the gentleman yield? I do not know whether this will be sufficient. It gives authority to the Secretary to sell the property "at not less than what he deems the value of said property after considering said appraisements."

Mr. FITZGERALD. Oh, no; it ought to be "at not less than the appraised value."

Mr. GORDON. I will accept an amendment to that effect.

Mr. FITZGERALD. The Secretary should not be given authority to fix the value other than the appraised value.

Mr. MANN. That can be provided by inserting, after the word "appraisement," in line 3, page 2, the words "at not less than the appraised value."

Mr. FITZGERALD. That would be all right.

Mr. GORDON. That is satisfactory.

Mr. WEBB. Who makes the appraisement?

Mr. GORDON. It is made by an appraisal company. Usually the department directs the appraisement. The gentleman will understand that the appraisement of real estate in cities is a much more scientific performance than it is in rural communities.

Mr. WEBB. Do I understand that the Treasury Department is to accept the appraisement of some private appraisement company?

Mr. GORDON. The bill does not require it.

Mr. WEBB. Is it the gentleman's idea that the appraisement company shall be the only one to appraise this property or that the Secretary will send an appraising board there?

Mr. GORDON. He will appraise the property the best way that can be done, I presume.

Mr. EMERSON. He will take the advice of the people who know in regard to the value of the property.

Mr. MANN. The bill provides that the Secretary of the Treasury shall cause the property to be appraised by competent appraisers.

Mr. FITZGERALD. That part is all right.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I move, first, to insert, after the word "appraisements," in line 3, page 2, the words "at not less than the appraised value thereof."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 3, after the word "appraisements," insert the words "at not less than the appraised value thereof."

The question was taken, and the amendment was agreed to.

Mr. GORDON. Mr. Speaker, I offer the following amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, strike out all of lines 8 to line 21, inclusive, and substitute therefor the following:

"That the proceeds of the sale of so much of said reservation and the improvements thereon as is sold under the foregoing authorization are hereby appropriated and made immediately available for the provision of a new marine hospital at Cleveland, Ohio, including furnishing and the acquisition of a suitable site therefor, within a limit of cost of $400,000, and the balance of the proceeds of the sale shall be paid into the Treasury as miscellaneous receipts."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. GORDON, a motion to reconsider the vote by which the bill was passed was laid on the table.

EXTENSION OF REMARKS.

Mr. HULBERT. Mr. Speaker, I ask leave to extend my remarks in the RECORD by printing a speech of my colleague [Mr. SHALLENBERGER] in New York on the Fourth of July, a patriotic address.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks by printing a speech of the gentleman from Nebraska [Mr. SHALLENBERGER] in New York on the Fourth of July. Is there objection? [After a pause.] The Chair hears none.

Mr. SIMS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an article from the Chattanooga News, of July 8, a paper published at Chattanooga, Tenn., giving a letter of Mr. C. A. Dagley, secretary of the Progressive Party committee of Tennessee, to my colleague Hon. JOHN A. MOON.

Mr. MCARTHUR. Mr. Speaker, reserving the right to object, was not permission given to print that this morning?

The SPEAKER. No; objection was made.

The gentleman from Tennessee [Mr. SIMS] asks unanimous consent to extend his remarks in the RECORD by printing a letter of Mr. Dagley, secretary of the Progressive Party of Tennessee, to the Hon. JOHN A. MOON. Is there objection?

Mr. MANN. Reserving the right to object, I assume, if the permission is granted, the gentleman will comply with the ordinary practice of the House and insert this at the end of the RECORD. I notice, however, that yesterday one of the Members of the House, having obtained leave to address the House for one minute, inserted a long speech in the current place in the RECORD, interlarded with applause.

Mr. SIMS. I hope the gentleman does not think that of me.

Mr. BLACKMON. Reserving the right to object, what does the article refer to?

The SPEAKER. The gentleman from Tennessee [Mr. SIMS] asks unanimous consent to extend his remarks by printing a letter from the Chattanooga News, from Mr. Dagley, the secretary of the Progressive Party in Tennessee, to the Hon. JOHN A. MOON.

Mr. SIMS. My colleague.

The SPEAKER. We do not know what is in it.

Mr. SIMS. I would be glad to read it if I had the time.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee? [After a pause.] The Chair hears none.

STANDARDIZATION OF LIME BARRELS.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that the bill S. 5425——

Mr. STAFFORD. Mr. Speaker, I make the point that there is no quorum present.

Mr. WEBB. Mr. Speaker, I move that the House do now adjourn.

Mr. ASHBROOK. All I want is to have conferees named on the bill.

Mr. STAFFORD. This is a late hour.

Mr. MOORE of Pennsylvania. Will the gentleman withhold until I make a request to correct the RECORD?

Mr. STAFFORD. Do I understand that the gentleman from Ohio [Mr. ASHBROOK] is not to be present to-morrow?

Mr. ASHBROOK. No, sir; I will be here to-morrow. The bill has been on the Speaker's table for some time, but I have been absent, and it has been impossible to call it up before this time.

The SPEAKER. The gentleman from Wisconsin——

Mr. STAFFORD. I withdraw the point for the time being.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that the bill S. 5425, an act to standardize lime barrels, be taken from the Speaker's table and the conferees appointed.

The SPEAKER. The gentleman asks unanimous consent to take from the Speaker's table the lime-barrel bill——

Mr. ASHBROOK. This is a Senate bill that came over to the House and passed with House amendments. I understand the Senate has appointed conferees.

Mr. MANN. The gentleman wants to insist on the House amendments and ask for a conference.

The SPEAKER. The gentleman asks to take the bill from the Speaker's table and insist on the House amendments and agree to the conference asked for by the Senate.

The Clerk will report the title.

The Clerk read as follows:

A bill (S. 5425) to standardize lime barrels.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER announced the following conferees: Mr. ASHBROOK, Mr. ABERCROMBIE, and Mr. REAVIS.

EXTENSION OF REMARKS.

Mr. HELVERING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the grain-grading act.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. AYRES. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from Kansas [Mr. AYRES] makes the same request. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. WEBB. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 16 minutes p. m.) the House adjourned until to-morrow, Thursday, July 13, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Assistant Secretary of War, submitting in accordance with law the claim of A. Jefferson, of Washington, D. C., against the United States (H. Doc. No. 1280); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting supplemental estimate of appropriations required by the United States Public Health Service for the fiscal year ending June 30, 1917 (H. Doc. No. 1282); to the Committee on Appropriations, and ordered to be printed.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on reexamination of Pawtucket River, R. I. (H. Doc. No. 1283); to the Committee on Rivers and Harbors, and ordered to be printed with illustrations.

4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Youghiogheny River, up to West Newton (H. Doc. No. 1284); to the Committee on Rivers and Harbors, and ordered to be printed.

5. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Interior, submitting an estimate of appropriation for the fiscal year ending June 30, 1917, under the title of improvement of Mukuntuweap National Monument, Utah (H. Doc. 1285); to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. TINKHAM, from the Committee on the District of Columbia, to which was referred the bill (H. R. 15460) to provide for the payment of assessments for benefits for the opening of streets, avenues, roads, and alleys in the District of Columbia, and for other purposes, reported the same without amendment, accompanied by a report (No. 943), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Nebraska, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 3069) to amend an act entitled "An act to amend an act entitled 'An act to amend an act entitled "An act to regulate commerce,"' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved March 4, 1915, reported the same without amendment, accompanied by a report (No. 944), which said bill and report were referred to the House Calendar.

Mr. CROSSER, from the Committee on the District of Columbia, to which was referred the bill (H. R. 13840) to amend an act approved May 29, 1908, entitled "An act to amend an act entitled 'An act to authorize the Baltimore & Washington Transit Co. of Maryland to enter the District of Columbia,' approved June 8, 1896," reported the same with amendment, accompanied by a report (No. 945), which said bill and report were referred to the House Calendar.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 16070) to dispose of unclaimed bank deposits in the District of Columbia, and for other purposes, reported the same with an amendment, accompanied by a report (No. 948), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 7591) to amend an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes," approved March 4, 1913, reported the same without amendment, accompanied by a report (No. 949), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 12712) to amend an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes," reported the same without amendment, accompanied by a report (No. 950), which said bill and report were referred to the House Calendar.

Mr. CROSSER, from the Committee on the District of Columbia, to which was referred the bill (H. R. 9219) to provide for the acquisition, ownership, and operation by the Commissioners of the District of Columbia of all the street railroads located in the District of Columbia, reported the same without amendment, accompanied by a report (No. 952), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. SMITH of Idaho, from the Committee on the Public Lands, to which was referred the bill (S. 3617) for the relief of Elizabeth Davis, reported the same without amendment, accompanied by a report (No. 946), which said bill and report were referred to the Private Calendar.

Mr. HILLIARD, from the Committee on the District of Columbia, to which was referred the bill (S. 5172) to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C., reported the same with amendment, accompanied by a report (No. 947), which said bill and report were referred to the Private Calendar.

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (H. R. 16719) for the relief of John P. Sutton, reported the same without amendment, accompanied by a report (No. 951), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. HUGHES: A bill (H. R. 16940) to provide for the purchase of a site upon which to erect a post-office building in the city of Fort Valley, in the State of Georgia; to the Committee on Public Buildings and Grounds.

By Mr. RANDALL: A bill (H. R. 16941) to relieve distress and starvation of destitute people in Mexico; to the Committee on Appropriations.

By Mr. MORRISON: A bill (H. R. 16942) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

By Mr. HICKS: A bill (H. R. 16943) authorizing the Secretary of War to deliver to the Port Washington Business Men's Association one condemned bronze or brass cannon or fieldpiece; to the Committee on Military Affairs.

By Mr. WARD: A bill (H. R. 16944) authorizing the Secretary of War to donate to the village of Monticello, Sullivan County, N. Y., a brass or bronze cannon or fieldpiece; to the Committee on Military Affairs.

Also, a bill (H. R. 16945) authorizing the Secretary of War to donate to the village of Grahamsville, Sullivan County, N. Y., a brass or bronze cannon or fieldpiece; to the Committee on Military Affairs.

By Mr. CLARK of Missouri: A bill (H. R. 16946) providing for the purchase of a site and erection of a public building at Bowling Green, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. FARR: A bill (H. R. 16947) to provide for enlarging the United States building at Scranton, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. RICKETTS: Joint resolution (H. J. Res. 263) for the purpose of procuring for the citizens of Lancaster, Fairfield County, Ohio, for patriotic and educational purposes, one large-size Lisle life-saving gun; to the Committee on Naval Affairs.

By Mr. PARKER of New Jersey: Resolution (H. Res. 301) to amend the rules of the House of Representatives; to the Committee on Rules.

By Mr. CULLOP: Resolution (H. Res. 302) for the consideration of H. R. 9216 and H. R. 15950; to the Committee on Rules.

By Mr. SMITH of New York: Resolution (H. Res. 303) to inquire into the failure to provide adequate facilities for transporting the National Guard of New York to the Mexican border; to the Committee on Interstate and Foreign Commerce.

By Mr. KREIDER: Resolution (H. Res. 304) authorizing and directing the Committee on the Judiciary to investigate and report relative to the rise in the price of paper; to the Committee on Rules.

By Mr. TAGUE: Concurrent resolution (H. Con. Res. 47) directing the inspection of food supplies issued to the National Guard; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ALMON: A bill (H. R. 16948) for the relief of Elizabeth R. Howell, Anna R. Wells, Mary Barnes Richardson, Sarah R. Tatum, and William Richardson, as heirs of William Richardson, deceased; to the Committee on Claims.

By Mr. ANTHONY: A bill (H. R. 16949) for the relief of former enlisted men of Companies B, C, and D, Twenty-fifth United States Infantry; to the Committee on Military Affairs.

By Mr. ASHBROOK: A bill (H. R. 16950) granting an increase of pension to Jacob G. Frederick; to the Committee on Invalid Pensions.

By Mr. BOOHER: A bill (H. R. 16951) for the relief of George Welty; to the Committee on Claims.

By Mr. BOWERS: A bill (H. R. 16952) granting an increase of pension to Daniel W. Thurston; to the Committee on Invalid Pensions.

By Mr. CALDWELL: A bill (H. R. 16953) granting a pension to George V. Deacon; to the Committee on Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 16954) for the relief of E. F. Mathews; to the Committee on War Claims.

By Mr. DOOLITTLE: A bill (H. R. 16955) granting a pension to Dyantha E. Smith; to the Committee on Invalid Pensions.

By Mr. HINDS: A bill (H. R. 16956) for the relief of John J. Callan; to the Committee on Claims.

By Mr. LAFEAN: A bill (H. R. 16957) granting an increase of pension to Annie Gingerich; to the Committee on Invalid Pensions.

By Mr. MORRISON: A bill (H. R. 16958) granting a pension to Reinhard Anschutz, alias Charles Reinhard; to the Committee on Pensions.

By Mr. NORTH: A bill (H. R. 16959) for the relief of David P. Morrison; to the Committee on Military Affairs.

Also, a bill (H. R. 16960) granting an increase of pension to Jacob Barger; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 16961) granting an increase of pension to Marcia J. Baker; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 16962) for the relief of R. W. Earnheart; to the Committee on Claims.

By Mr. POWERS: A bill (H. R. 16963) granting a pension to N. Ellen Peters and George N. Peters; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16964) granting an increase of pension to Alexander Kelly; to the Committee on Pensions.

By Mr. PRATT: A bill (H. R. 16965) granting an increase of pension to Alanson Tilden; to the Committee on Invalid Pensions.

By Mr. PRICE: A bill (H. R. 16966) for the relief of O. P. Gibson & Co.; to the Committee on Claims.

By Mr. RICKETTS: A bill (H. R. 16967) granting an increase of pension to Augustus Scherr; to the Committee on Invalid Pensions.

By Mr. SIMS: A bill (H. R. 16968) granting a pension to John W. Scott; to the Committee on Pensions.

By Mr. SWITZER: A bill (H. R. 16969) granting an increase of pension to George W. Bradshaw; to the Committee on Invalid Pensions.

By Mr. VAN DYKE: A bill (H. R. 16970) granting a pension to Guy W. Atherton; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BRUCKNER: Petition of John C. Beilharz, of Bronx, New York City, N. Y., favoring passage of House bill 14666, relative to copyrighting designs; to the Committee on Patents.

By Mr. CURRY: Petition by Rev. W. O. Grunow, pastor of St. Jacob's Evangelical Lutheran Church, of Newman, Cal., and secretary of the Evangelical Lutheran Pastoral Conference of the Northern District of California, and 161 residents of the third California district, protesting against the enactment of House bills 6468 or 491; to the Committee on the Post Office and Post Roads.

By Mr. DALE of New York: Petition of members of Flint, Mich., branch of the Congressional Union for Woman Suffrage, favoring woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of New York State Association Opposed to Woman Suffrage, relative to suffrage plank in Republican and Democratic platforms; to the Committee on the Judiciary.

Also, petition of Chicago Liquor Dealers' Protective Association, relative to tax on land values; to the Committee on Ways and Means.

By Mr. DAVIS of Texas: Petition of J. A. Jones, of Texas, favoring passage of the John N. Tillman pension bill, House bill 478; to the Committee on Invalid Pensions.

By Mr. DUNN: Petition of Schlegel Manufacturing Co., of Rochester, N. Y., favoring bill to protect dyestuff; to the Committee on Ways and Means.

By Mr. ELSTON: Petition of W. O. Grunow and others, of Alameda County, Cal., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. GOODWIN of Arkansas: Papers to accompany House bill 16689; to the Committee on Invalid Pensions.

By Mr. HERNANDEZ: Papers to accompany House bill 16923, to correct the military record of Epigmenio Ramirez; to the Committee on Military Affairs.

By Mr. KENNEDY of Rhode Island: Petitions of sundry women of the State of Rhode Island, favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. NOLAN: Memorial of Nelson A. Miles Camp, No. 10, United Spanish War Veterans, of San Francisco, Cal., favoring passage of House bill 11876, minimum-wage bill; to the Committee on Labor.

By Mr. SMITH of Michigan: Petition of Mrs. Ida Mitchell and 25 other citizens of Batavia, Mich., and vicinity, favoring the Webb-Smith national prohibition resolutions, H. J. Res. 84 and 85; to the Committee on the Judiciary.

By Mr. STEPHENS of California: Communications from D. H. Croutchey and 21 other citizens, all of Los Angeles, Cal., favoring an eight-hour day for the railroad brotherhoods; to the Committee on Labor.

Also, letter from Woman's Peace Party, Northern California Branch, Palo Alto, Cal., indorsing House joint resolution 112, to investigate certain matters relating to the matériel of the Army and Navy; to the Committee on Military Affairs.

Also, letter from Exposition Preservation League, of San Francisco, Cal., favoring House joint resolution 56, extending the permit to retain the palace of fine arts; to the Committee on Industrial Arts and Expositions.

Also, communications from Owen Newcomb and Ernest S. Ford, of Los Angeles, Cal., favoring Senate concurrent resolution 12, requesting the President of the United States to designate a day on which funds may be raised for the relief of the Armenians; to the Committee on Foreign Affairs.

Also, letter from Friends Church of Whittier, Cal., protesting against universal military training; to the Committee on Military Affairs.

Also, resolution of Chamber of Commerce, Redlands, Cal., indorsing the establishment of an aviation base at North Island, San Diego, Cal.; to the Committee on Naval Affairs.

Also, resolutions from office of county clerk, Eureka, Cal., against Federal inheritance tax; to the Committee on Ways and Means.

Also, petitions of Walter C. Strickler and 3 other citizens, all of Los Angeles, Cal., favoring the Warren bill; to the Committee on Military Affairs.

Also, resolutions of the Rotary Club of Los Angeles, Cal., favoring military protection for Los Angeles, Cal.; to the Committee on Military Affairs.

Also, petition of Giles Otis Pearce and others, Soldiers' Home, Cal., praying for a change in the rules; to the Committee on Rules.

By Mr. STINESS: Petition of Sarah E. Briggs, of Apponang, R. I.; Jeanne H. Guy, Harriet J. Roworth, Harriet A. Kilton, Mrs. Alice F. Porter, of Providence, R. I.; and Mrs. Grace L. Cross and Marguerite Cross Edgren, of Wickford, R. I., favoring the Susan B. Anthony amendment; to the Committee on the Judiciary.

SENATE.

THURSDAY, *July 13, 1916.*

(Legislative day of Friday, July 7, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Nelson	Smoot
Beckham	Gronna	Norris	Swanson
Brandegee	Hollis	Overman	Thompson
Broussard	Husting	Owen	Tillman
Bryan	Johnson, S. Dak.	Pittman	Underwood
Catron	Jones	Pomerene	Vardaman
Chamberlain	Kenyon	Ransdell	Wadsworth
Chilton	Kern	Sheppard	Williams
Clarke, Ark.	La Follette	Simmons	Works
Culberson	Lodge	Smith, Ga.	
Curtis	McCumber	Smith, S. C.	

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. He is paired with the junior Senator from Vermont [Mr. PAGE]. This announcement will stand for the day.

Mr. HOLLIS. I wish to announce that the senior Senator from Montana [Mr. MYERS] is detained from the Chamber by illness. This announcement will stand for the day.

Mr. POMERENE. I desire to announce the unavoidable absence of my colleague [Mr. HARDING], and I will allow this announcement to stand for the day.

Mr. CHAMBERLAIN. I desire to announce for the day that my colleague [Mr. LANE] is detained from the Senate by illness.

Mr. SWANSON. I suggest that the Secretary call the names of the absentees.

The VICE PRESIDENT. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. TOWNSEND and Mr. WALSH answered to their names when called.

Mr. BANKHEAD, Mr. SMITH of Arizona, Mr. STERLING, Mr. LEE of Maryland, Mr. OLIVER, and Mr. JAMES entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present. The Chair lays before the Senate House bill 15947, the unfinished business.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. TILLMAN. Mr. President, before we proceed with the consideration of this bill I wish to make a brief statement, and also to make an appeal to my brother Senators.

It is readily seen by those who have examined the bill that the Senate Naval Committee has added very largely to the building program and also, imitating the House, has incorporated much legislation of a general character. The welfare of the Navy seems to vitally demand certain reforms in the personnel, and most of the suggested changes in the general law regarding personnel have been urgently pressed on the committee by the Navy Department itself. The letters of the Secretary of the Navy will explain the department's point of view and the reasons for the increases, promotions, and changes in the personnel; and my friend the Senator from Virginia [Mr. SWANSON] who has charge of the bill for me will take pleasure in explaining more fully any point that is raised by anyone.

I want to ask this of Senators. My health, as everyone knows, is much better than it has been for a long while, but I have been here since December and I am tired out and want to go home and rest. I therefore appeal to you, Senators, to discuss the bill as fully as you please but let us be prompt and pass it in the Senate, because it will take a good while, I expect, for the conferees of the two bodies to come to an agreement. We may have to send it back to the respective bodies for instructions. I anticipate this on some points; but let us not consume any more time in discussing it than is absolutely necessary to elucidate obscure points or make necessary explanations.

Mr. SWANSON. Mr. President, I wish to make a short address in behalf of the bill. I ask to be permitted to conclude my remarks without interruption, and then I will be glad to answer any question any Senator may suggest.

Mr. President, to my mind the most important question before this Congress is an adequate increase of our Navy. I believe this of more vital importance and of more far-reaching consequences to this Nation than any other matter pending. A mistake made in this matter now would be most difficult to correct in the future, would be fraught with great danger, and might in the coming years culminate in great national disaster. Our future safety, progress, and prosperity may be determined by the deliberations of this Congress. Our decision upon this matter may determine far in the future whether our pathway shall be one of peace and power or fraught with turmoil, wars, difficulties, defeats, and humiliations. I deeply feel that the fate of this Republic, the preservation of our institutions and the maintenance of our well-defined foreign policies are dependent upon the strength and success of our Navy. America and her Navy, for weal or for woe, are united in indissoluble wedlock.

The history of the world teaches one sure lesson—that naval supremacy ultimately means national preeminence and triumph. More than ever before sea power is the best and strongest military power. The rise and fall of nations and empires teach the same lesson—that national safety and national success are inseparable from naval strength and power. The destruction of the Spanish Armada in the English Channel was the first and controlling cause in the bloody drama which ended a few years ago when the flag of crimson and gold was banished from the Western World and Spain closed her glittering career. Waterloo was but the aftermath of Trafalgar.

All the vast power, the amazing genius and energy of Napoleon could not escape the doom inflicted by Lord Nelson's fleet. The heroic valor, the superb military genius, the splendid victories of the Confederacy during the late Civil War all faded before Federal naval supremacy. The shadows of southern doom rose slowly but surely from the pitiless sea. The stupendous superstructure of Russian power and military strength all crumbled at the triumph of Admiral Togo's fleet. Dewey's guns at Manila proclaimed alike the liberation of the Philippines, Cuba, and Porto Rico. The Italian Navy was the strong hand which seized Tripoli from the grasp of Turkey. It has been the great navy of Britain that has enabled her to carry her rule, civilization, and commerce to every continent, in every clime, and among every people. It enabled her to wrest from France the territory of Canada, with vast possessions stretching to the North Pole. It has given her colonies in the far waters of the Pacific exceeding in territory and richness any domain ever ruled by the Cæsars. It enabled her to conquer and rule the mighty empire of India, which had resisted the arms and thwarted the triumphs of Alexander. It has given her Egypt, the most ancient of nations, and brought to her the greater part of Africa, with its immense territory and vast riches. The naval supremacy of Great Britain has given her one-sixth of the habitable globe, which receives as law her will. The great war now raging in Europe is further emphasizing the advantages accruing to Great Britain from her naval power. It has enabled her to conquer all the colonial possessions of Germany. She has driven from the seas all the trade and commerce of Germany, Austria, and Turkey, while hers and that of her allies proceed practically uninterrupted, as in times of peace.

The iron grasp of the British Navy consigns the central powers and their allies to starvation and submission unless their internal resources are sufficient to stand the heavy exactions and tremendous burdens of this war. It has enabled Great Britain to transport millions of troops from her possessions, scattered all over the world, safely to the various scenes of conflict. Britain's Navy enabled Russia to transport troops to France and make more secure there important lines of defense. It has enabled her and France to carry troops to Greece and the Balkans to prevent complete military disaster in that section. It has exposed Turkey to such dangers as to make it impossible for her to render any substantial assistance to her allies. It has enabled Britain and her allies to receive military supplies from all parts of the world, and thus be able to withstand the terrific assaults and great military strength of the central powers. Britain naval supremacy enabled Russia to obtain military equipment for her shattered and defeated armies of last year, thus making it possible for her to succeed in her recent aggressive and successful campaign. British naval supremacy constitutes the chief dependence of the allies for their success over the central powers. The defeat of Great Britain on the seas would be the severest blow the allies could receive. The uncertainties of war are such that there is no capital on the continent of Europe safe now. Paris may fall, Berlin may fall, Petrograd may fall, Rome may fall, Vienna and Constantinople may fall, but London, protected by the great British fleet, is safe and secure. Entirely surrounded by water, with a fleet sufficient to maintain supremacy on the seas, Britain, serene and safe at home, is a menace and a dangerous antagonist to anyone who

dares challenge her power. This great world war emphasizes more than anything else the importance of sea power.

We are far more fortunately situated than England to depend upon a Navy for national defense. England is not many miles from the continent of Europe, where there has existed for years a dangerous and the most effective military system the world has ever devised. More than 3,000 miles of ocean separate us from any enemy that can seriously threaten or attack us. In a few hours, if conditions permitted, troops could be landed in England. Many days of travel and peril are required before troops could be landed upon our shores. Thus, if naval power is effective for offensive and defensive warfare by England, it would be doubly more effective if possessed by us. Surprises on account of the short distances to England's coast may bring her disaster, but if we had a sufficient and efficient Navy and aircraft no surprises can bring to us defeat. England has safely and securely builded on her naval power. The United States can with greater safety and security build on this power. Our Navy should constitute our first and chief line of defense. Our Navy should be such that no enemy's shells should ever fall on America's shores.

Mr. President, the best defense we can have for our immense lines of coast is a Navy. It is impossible to build forts and fortifications that can give adequate protection to our great stretches of coast. Forts can only give protection to a very limited area. Besides, forts and fortifications are stationary and must await the attack of an enemy, and if they are strong the enemy never approaches them. Forts and fortifications have never yet been decisive in warfare. A battleship as effective in destructive power as a fort can be carried where needed. It seeks and does not await the enemy. It goes where defense and protection are needed. America's safety from attack lies far more in an adequate Navy than in fortifications.

Mr. President, the necessity for an adequate Navy for us is greater to-day than ever before in our history. The time has passed in the history of the world when any nation can successfully lead an isolated life. All parts of the habitable globe in times of peace are closely connected by fast steamers. These exchange the product of one country with another. Even in remote villages in times of peace can now be obtained the products of almost all foreign countries. The development and prosperity of every nation is largely dependent upon its foreign commerce. For any civilized nation to be denied access to the seas for the sale and purchase of commodities would mean its financial bankruptcy and ruin. Especially is this true of the United States, whose exports exceed those of any nation. Our great crops of tobacco, cotton, wheat, and corn would find no profitable sale unless we had access to the seas to sell them in foreign markets. Our vast meat products would spoil on our hands but for foreign trade. Our immense manufacturing and mining industries would languish except for the great outlet found in foreign countries for our surplus. Thus the prosperity of mine, farm, forest, and factory is inseparably interwoven with our foreign commerce. The cessation of our foreign commerce for many months occasioned by the world-wide war, followed by frightful business stagnation, taught us more clearly than ever that our national prosperity is dependent upon our foreign trade. The revival of our foreign commerce on account of the world-wide demand for our goods immediately brought us an amazing business revival and prosperity. With a foreign commerce far exceeding that of any other nation, we, above all other nations, need an adequate Navy to give this proper protection. There is not a citizen in this Republic whose material prosperity is not more or less dependent upon our Navy.

The unjust restrictions that Great Britain has imposed upon our commerce during the progress of this war further emphasizes to us the necessity of having a Navy large enough to demand and enforce our rights. In modern commerce, with its varied trade complexities, the nation that is helpless upon the seas is the prey of all marauders and has its future destiny directed by others. The American people demand of us that we shall give them a navy sufficiently large that the vast products of their various industries and enterprises shall have access to the seas for sale in all the markets of the world as a matter of right and not as a favor conceded by others.

This great war vastly increased our foreign trade and reviving our home industries, has given us wealth almost unspeakable. When this war is concluded this Nation will be rich beyond the wildest dream of avarice. If we have naval and military strength we will be able to hold our wealth, power, and prestige. If we are weak in this respect the day of our despoilment will inevitably come. The Nation and individual weak and rich have ever been the prey of the strong. When this great war in Europe is concluded the nations will seek somewhere to recover the great losses they have sustained. The Western Hemisphere, where peace reigns and wealth grows, offers a profitable field for such plundering adventurers. Only here can wealth be garnered, and wisdom demands that we should be strong enough to successfully resist such attempts. When peace is made in Europe among the conflicting nations, many of the existing enmities and jealousies will subside, and we, as the richest Nation in the world, will become the subject of their jealousy and be the object of their aggression. The leading powers of Europe were able to keep peace for years, as long as they had something to divide among themselves.

A few years prior to this recent war the first-class powers of Europe had partitioned among themselves all the continent of Africa except the petty nations of Liberia and Abyssinia; all the rest of Africa had become subject to European domination. Never before in the history of the world had such a vast continent been so rapidly and ruthlessly seized and divided. Nearly all the islands of the seas were put under European dominion. All of Asia except Japan had been placed under the control of the European powers. Japan has maintained her independence and her wishes are respected on account of her naval and military strength. The few years preceding this great war marked the most tremendous territorial aggressions by the first-class powers of Europe that have ever occurred in the history of the world. The Central and South American States have not been the subject of spoliation by European powers only because the United States has maintained as its declared foreign policy the great Monroe doctrine, which protects these from European aggression, and because the United States at that time, in comparison with existing naval conditions, and on account of the mutual mistrust of other nations, had naval power sufficient to enforce this doctrine if challenged. Before the shadows of this impending war arose our Navy was safely the second in the world, and we were respected and feared. Are we foolish enough to suppose that this aggressive spirit of the European powers has been satiated and will cease at the termination of this war? This war was occasioned by this spirit of aggression and territorial ambition. With increased armies, armament, and navies these powers will seek new fields of despoilment when favorable opportunity offers. Is there anything in the past history of any of these nations to justify us in believing, if they have the power and opportunity, they will restrain their lust for dominion and commerce and use their power unselfishly for the betterment of the world?

Are we foolish enough to believe that this Nation, which, with its vast wealth and unsurpassed possibilities—the object of envy and jealousy of other nations—can be safe if we permit ourselves to become a fourth or fifth rate naval power? Are we simple-minded enough to risk our national safety to the chances of their mutual jealousies and enmities? Could this restrain each of them when the destruction of our Navy would mean the overthrow of the Monroe doctrine and the opening up to them of Central and South America for the purpose of exploitation and spoliation? Has not one of these nations disputed the Monroe doctrine, and only needed a sufficient navy to challenge it? Have we not an aggressive eastern neighbor who looks with covetous eyes upon our Philippine possessions? Are we weak-minded enough to imagine that we can control the Panama Canal for our own advantage and profit unless we have a Navy sufficient to fully protect it? Are we going to permit the $300,000,000 we expended in this great enterprise to be appropriated by other nations with superior naval strength?

Mr. President, there are those among us to-day who are foolish enough to trust all of this Nation's rights, our national safety and independence to treaties and arbitrational tribunals. Recent history has clearly shown that nations when self-interest demands treat treaties as simple paper parchment to be disregarded. The ink was scarcely dry which fixed the signature of Russia and Japan to The Hague arbitration treaty before they were in a terrific war to see which should be the successful despoiler of large Provinces belonging to the Chinese Empire. Italy was not restrained by her solemn pledge of peace and arbitration made to Turkey from seeking to enrich herself by the acquisition of Tripoli. No pledge made by Russia and Great Britain to Persia in this treaty, restrained them from dividing among themselves this helpless nation.

Germany had pledged to Belgium by treaty integrity of territory and neutrality, but this did not save her from flagrant invasion. The allied powers had guaranteed to Greece neutrality, but this did not prevent them, when military advantages demanded, to seize her territory and use it for their military activities. Treaties and justice have ceased to be barriers against military aggression and ambition. I hope the day will come when peace will dominate the world and na-

tional disputes will be determined by principles of equity and justice, promulgated by a properly constituted tribunal. But, sir, that day is far distant.

Mr. President, we had as well realize that all of our rights, the preservation of our institutions, the possession of our wealth, and the enjoyment of our foreign commerce, and the continuation of the Monroe doctrine, and the ownership of the Panama Canal are dependent upon our own strong arm, manifested and exercised through our Navy. The future of this mighty Republic lies upon the seas. Failure there means national decadence and disgrace. Success there means national supremacy, power, and progress. The best guaranty we have for peace and the peace of the world is a strong American Navy. It is the best insurance we can provide against future loss and disaster. For this great Nation, rich in all material wealth and far richer in future possibilities, to risk all to the hazards of wars and to become the prey of weaker nations merely for the lack of a sufficient naval strength is to my mind the supreme of national folly.

Mr. President, our best and most effective defense against those nations which have great military establishments, with compulsory military service, is not to raise, like these nations, standing armies of millions of men and impose heavy financial burdens on our industries and threaten our institutions, but to create a Navy so much superior that their military power will be absolutely powerless to hurt us. This is far safer, far cheaper. Hence I have consistently advocated that the United States should be the second naval power in the world. We have no occasion to apprehend danger from Great Britain as from other nations. Before the recent war Great Britain had no compulsory military service with a large standing army. While she had a navy that could greatly injure our commerce, she possessed no army that could threaten or dare attempt an invasion of our country under any circumstances. With twice the population and greater wealth we could raise and equip a larger standing army, and more quickly, than she could. Hence, having no army which could ever be a menace to us, the necessity of having a Navy superior to her is not as great as it would be with those nations who possess large standing armies. If at the conclusion of this war England should abandon this policy and establish a large standing army, in order to save ourselves we would have to have a standing army equally as large or have a Navy equal to hers. I believe that England will adhere to her past policy and rely for national defense and military power, as formerly, upon her navy. Besides, Great Britain has on this continent hostages, which would prevent her from making any aggression here. In addition, ties of blood and the still stronger ties of self-interest involved in mutual profitable trade and commerce almost insure the future peace of this Nation and Great Britain.

Mr. President, I believe we are safe under present conditions of the world's affairs if we will become and remain without question the world's second naval power. Our national honor, prestige, and safety will not permit of less. If those nations who are competing with us for this position increase their navies, we must equally increase ours. With our vast and varied interests, with our great responsibilities, with the present political complications in the world, we can not with safety afford to be less than the world's second naval power. If we remain less than this, our vast foreign commercial interests, inseparable from our prosperity, will be jeopardized. Our Philippine possessions will be the prey of superior naval power. Our foreign policies and intercourse will necessarily become timid and vacillating. The great affairs of the world affecting our interests will be regulated without consultation with us. We will then become suppliants, pleading for rights instead of boldly and courageously demanding them. It will mean the surrender of our great prestige. It will mean a distinct loss to the world of the great power possessed by this Nation for peace, justice, and liberty. The Monroe doctrine would be challenged and our control of the Panama Canal disputed. It would mean that this mighty young Republic has retreated and has ceased to advance along the pathway that was leading her to a higher and nobler destiny.

Mr. President, several years ago when this Nation was the acknowledged second naval power in the world, in a speech addressed to the Senate when the naval bill was pending, I urged the necessity of increasing our naval program in order to retain this desirable position. Much I say to-day is a repetition of what I then stated. I then pointed out that unless we did this, in 1914 Germany would pass us and take our position as the second naval power. This occured earlier than I predicted. Realizing the vital importance of this Nation occupying the position of second naval power, the committee has prepared this bill and recommends its passage. We believe if the policy of increase herein proposed is adopted that the day is not far distant when this Nation will regain its position as the second naval power. It is conceded that this is the best and most progressive naval bill ever presented to Congress in the history of this Nation. The Naval Committee have examined the immediate and pressing needs of the Navy and have sought to properly provide for them. This bill contains the conclusions reached by the committee after consultation with the President, the Secretary of the Navy, and capable and experienced naval officers and after a thorough examination conducted by its members. It is presented to the Senate with practically the unanimous approval of the Naval Committee.

The first problem confronting us was to reach a decision as to what increase in naval ships we should recommend. The General Board at the request of the Secretary of the Navy had prepared a five-year program for naval construction to cost on an average of $100,000,000 a year. This program had been prepared with the utmost care by the General Board, which is composed of the most experienced officers in the Navy. It took into consideration the entire needs of the Navy for every type of ship.

The General Board proposed to give us at the completion of the program a well-balanced and efficient Navy in every respect. After the most careful consideration and thought, the committee reached the conclusion that it could not do better than follow the recommendations of the General Board in the construction of the various types of ships. This General Board had investigated the matter most thoroughly and made their recommendations most carefully. Higher authority on naval matters than the General Board does not exist in this country. We have taken their five-year program and shortened it, making it a three-year program, practically adhering to the various types of ships recommended. The yearly construction of this three-year program has been divided and arranged by the most experienced and efficient naval officers to satisfy the needs of the fleet. We believed that the necessity for an increase of the Navy was so immediate and urgent that we could not afford to wait longer than three years for the completion of the program. We did not feel, with the grave responsibility imposed upon us, that we would be safe in recommending a delay greater than three years. We also thought it wise to construct during the first year as many of the ships recommended as could be reasonably accomplished. The President of the United States and the Secretary of the Navy had recommended to Congress an annual building program of five years. The conventions of the three political parties in this country had indorsed an annual building program extending for several years. This policy gives us a safe, well-balanced, and progressive increase of the Navy.

Another great need of our Navy is aircraft for scouting and other purposes. We are sadly and dangerously deficient in this respect. A fleet without sufficient aircraft is liable at any time to be surprised and encounter disaster. To-day a fleet without aircraft is almost as helpless as a man without eyes. Both may have great strength which they can not use intelligently and effectively. The bill carries ample appropriation to provide suitable aircraft. It also carries an appropriation for the further development of aeronautics.

Realizing that ships are helpless unless they are well equipped with guns and have an abundance of ammunition, the bill materially increases the appropriation for this purpose. The great war raging in Europe has emphasized most strongly the necessity of a nation having at the beginning of a war a large supply of ammunition and an abundance of large guns. Danger confronts any fleet or nation that is deficient in these. In order to provide for sufficient large guns for our Navy the bill makes an appropriation to greatly enlarge our gun factory located at the Washington Navy Yard, where our best and largest guns are made. An appropriation is also made for a projectile factory where the Government can manufacture better projectiles and more cheaply than those now obtained. We thought that in as vital a matter as projectiles the Government should not be absolutely dependent upon outside manufacturers.

The bill appropriates $11,000,000, which the Senate had previously passed, for the erection or purchase of an armor-plate plant. This will save the Government from the excessive exactions of the notorious armor-plate monopoly.

The Navy Department has made a most careful survey of our merchant marine to ascertain which of these vessels can in time of war be utilized as a part of our Navy. This survey indicates what alterations are necessary for each vessel and the batteries required to properly equip them for naval uses. The navy yards where these alterations can be promptly made have also been designated, and the yards furnished with the details of the alterations required. So, in case of war, these vessels can without delay be altered and made an efficient part of our

Navy. We believe that prudence demands we should at once manufacture the batteries needed for these auxiliaries and an appropriation is contained in the bill for this purpose. It would be fatal to delay manufacturing these batteries until the need for them should arise. Thus, in increase of ships and aircraft, in supplying ordnance, guns, armament, and ammunition, the bill presents careful and efficient plans and makes proper appropriations. We believe if this is approved by Congress that this Nation will have in a reasonable time an adequate and efficient fleet, capable of asserting our rights and defending us against aggression. We also direct that the ships appropriated for in this bill shall be commenced within six months after the approval of the bill. This insures prompt and early construction. Also, in order to hasten construction we authorize the Secretary of the Navy to pay an increase not to exceed 20 per cent of the appropriations contained in the bill to accomplish this purpose. We believe that an early Navy is as important as a strong one. The great amount of work in the shipyards of the country and the various industries that supply materials for ships necessitates this provision.

Mr. President, after creating an adequate fleet and properly equipping it, the next question confronting the committee was to make proper and ample provision for the personnel. A fleet is but a dead mass of wood and metal unless efficiently and fully manned. It is the officers and enlisted men that give a fleet life and soul and make possible its tremendous power. The present law authorizes about 54,000 enlisted men for our fleet. This is not sufficient to keep many of our battleships and battle cruisers in commission. Besides, it leaves too small a complement of men for the ships that are in reserve. The General Board recommended that the enlisted men of our fleet should be increased to about 74,000. We adopted this recommendation and include in the bill legislation and appropriations to accomplish this purpose. This increase of enlisted men will immediately enable us to put many of our battleships and armored cruisers in commission with a full complement of men and allow 50 per cent of the full complement for those in reserve. This is considered sufficient at this time for our Navy on a peace basis. The bill also contains a provision authorizing the President in case of an emergency or war to increase the enlisted men of the Navy to about 87,000, which will furnish a full complement of men for all of our naval vessels. We earnestly believe the power should be given the President, if occasion should arise, to put our Navy on a war basis.

The Marine Corps is one of the most efficient parts of our Navy. It can, when occasion demands, act equally with the Army or Navy. Its services in the past have been most splendid and its record is one of great achievement. This Government has heretofore followed the policy of having the enlisted men in the Marine Corps number 20 per cent of those in the Navy. This has been a wise policy, and it is continued in this bill. We have increased the Marine Corps 20 per cent of the increase made in the enlisted men of the Navy. Thus, the bill contains ample provision for the efficient manning of our fleet.

Mr. President, having furnished sufficient enlisted men for our present Navy, the next question for the committee to determine in order to have an efficient fleet was to provide sufficient commissioned officers to direct and command the fleet. An increase in the number of enlisted men necessarily requires an increase in the various ranks of commissioned officers. To the committee it appeared logical that the number of officers required should be based on the number of enlisted men—in other words, bear a certain percentage to the number of enlisted men. This percentage can readily be determined from the experience of past years in manning the ships of the Navy, and once fixed will work automatically under the direct control of Congress. In reaching a conclusion as to what this percentage should be, it is well to take the average that has existed for the last 20 years. Twenty years ago the percentage of commissioned officers to enlisted men was 5.3 per cent. During that time the percentage has gradually fallen below that number, owing to the fact that the increase of enlisted men for the new ships has been proportionately greater than the increase of officers.

At present the percentage of commissioned officers is 3.85. It is acknowledged that the Navy is very short of officers. The average for the last 20-year period has been 4.75. The committee has included in this bill an amendment providing that the commissioned officers of the Navy should be 4 per cent of the enlisted men. This is less than the average has been for the last 20 years, and appears to be most conservative. The number of officers thus provided for is fairly and justly distributed by certain percentage between the line and various staff corps. It is also justly and fairly divided by certain percentage between the higher and lower ranks so as to create a well-balanced and efficient corps of officers. The enactment of this legislation is of the utmost importance in order to give us capable officers to command our fleet. The amendment provides that promotions in the line of the Navy above the grade of commander shall be made by selection and not, as heretofore, by seniority; the appointment of captain and all higher grades to be made upon the recommendation of nine flag officers of the line of the Navy and to be based upon the fitness of the officer for sea command in the grade to which the promotion is to be made. The committee believed that this method of promotion would secure the best and most capable officers for the command of our ships and the control of our fleet. The method of selection is such that it can be controlled neither by favoritism nor partisan politics. This method will keep in places of grave responsibility the most capable and efficient officers.

In the future high command will come to officers not on account of age but on account of merit. It will stimulate officers and make them worthy of high rank. High rank, when thus possessed, will carry with it indisputable testimony of great merit. Genius is given an opportunity to advance over mediocrity. We consider this one of the most important provisions contained in the bill. The Marine Corps is given the same percentage of officers to enlisted men and also has given it a fair distribution of high and low ranks. This increase of officers is much needed, and will give younger men greater opportunities for advancement in the Navy and prevent the numerous resignations now occurring. It furnishes a continuous plan of promotions, which is absolutely necessary in the Navy in order to have young and capable men in high command. We will, if this provision becomes law, have rear admirals to command the fleets for years, and not be promoted to this high rank and then promptly retired. The bill also gives long-delayed relief and proper promotions to warrant and other petty officers. It also provides that 25 enlisted men, after examination, can be appointed to the Naval Academy. This will give us a higher grade of enlisted men, because every enlisted man will be given an opportunity through work and merit to become rear admirals if found worthy. Thus, Mr. President, is recommended legislation covering the entire personnel of the Navy, which we believe, if enacted into law, will be one of the most potential factors in increasing the efficiency of our Navy.

Having amply provided for the active personnel of the Navy, the next question presented to us was to recommend legislation that would give us a good and sufficient naval reserve. The naval powers of the world in time of peace keep many of their ships in reserve. It is too expensive to keep all of them in commission and on a war basis. If a nation has an ample and efficient naval reserve, it can safely keep a large part of its fleet in reserve with a small complement of men. England at the beginning of the present war had a percentage of trained naval-reserve men to active men of 43 per cent, Germany 104 per cent, and Japan 55 per cent. This number of trained naval-reserve men enabled these nations in a few days after the declaration of war to have their fleets fully equipped on a war basis and ready for immediate action. The rapidity with which this was done by each nation was most astounding and emphasizes the importance of having a large and well-trained naval reserve. To-day our naval reserve, including our Naval Militia, is about 11 per cent of our active enlisted men. One of the greatest needs of our Navy is a trained naval reserve. It will be impossible for us to ever have a well-equipped and efficient Navy that can promptly respond to all the demands made upon it until we have such a reserve. The bill contains well-considered legislation, which we firmly believe if passed will give us such a reserve. The legislation is sufficient to induce trained men of the Navy when they are retired to enter this reserve so they can be called upon whenever needed for naval purposes. We have also recommended legislation which extends to the Naval Militia the same privileges in each of the ranks that the recent Army legislation gave the National Guards. We believe that this is necessary in order to increase our Naval Militia. Under this amendment we require the Naval Militia to drill and prepare themselves equally as the National Guards. When needed they can be called out immediately by the President and be made a part of our Naval Establishment.

The bill also creates a naval flying corps, which will train for us capable officers and efficient men for our aircraft. As the Coast Guards and the Lighthouse Service has been made in time of emergency or war a part of our Navy, we present amendments to provide that these promptly become a part of our Naval Establishment when this contingency arises.

Mr. President, having provided for our fleet afloat the next question for us to consider was the equipment of our navy yards so that the fleet could be promptly supplied and repaired. With-

out efficient navy yards the fleet will quickly deteriorate and ultimately become helpless. Our various navy yards have been much neglected and many of them allowed to greatly deteriorate. Our docking facilities for large ships is deplorably deficient. Our shop equipment for good and economical work is most defective. Few of our yards are equipped for naval construction; only two of them for the construction of capital battleships. This bill makes appropriations to supply these great needs and give us navy yards that can properly take care of our fleet. We consider the navy-yard matters contained in the bill as of as much vital importance as any other of its provisions.

Mr. President, this is a short summary of the most important matters contained in this bill. We believe its enactment will give new life, new vigor to every part of our Naval Establishment. We have sought to give the Navy as a whole greater strength, greater efficiency. We believe the passage of this bill will mark a new era in the history of the American Navy.

Sirs, the American Navy has ever been the pride of our people. They have ever felt that it was their surest and safest defense. We gratefully remember how many difficulties and disasters we have averted in the past by our naval successes. Our debt of national gratitude to the Navy is great and lasting. In times of peace it surveys and charts the trackless sea; discovers and marks the dangers in the routes of commerce; makes researches for science and learning; stands as sentinels on the outposts of civilization; opens up for commerce new and hostile countries; and in every part of the world, by its activity and courage, it redresses American wrongs and asserts American rights. It is the best guardian of the interests of this great commercial people. In every country, in every clime, amid the frozen fields and ices of the North, under the blazing suns of the Tropics, naval officers and men have served and many died, unselfishly contributing to the prestige of this Nation and the glory and renown of its flag. In America's galaxy of greatness no names shine with more sparkling splendor than those of her naval heroes. It can be rightly said that the history of our Navy from the beginning has been "one blaze of glory without a single blot of shame." Sirs, if this Nation is to attain the summit of her possible usefulness and greatness, it must come through her Navy—its power, its triumph, and its success. Prudence and wisdom demand that this Nation should have a great Navy properly to perform its responsible duties and successfully to achieve its great work. I rejoice at this Nation's proud and glorious past, but I rejoice still more at the cloudless future which beckons us on to a still greater greatness and a richer and deeper glory. With strong arms and brave hearts let us fearlessly face our great and responsible future. Let us not be deterred from our duty and destiny by those of our brethren who are frightened by our own prodigious shadow projecting in the world's affairs, and who hesitate and shudder "through craven fear of being great."

Mr. LODGE. Mr. President, for me to attempt to describe the vital importance of sea power and the needs of the American Navy after the admirable exposition made by the Senator from Virginia would be a work of supererogation, but as I had some share in framing the bill there are one or two points which I desire briefly to emphasize.

I may say what everyone understands, I am sure, that in making this bill there was no party line drawn anywhere. The bill in its important provisions comes with the unanimous support both of the subcommittee and the full committee. It is to my mind a bill of the greatest value and the greatest importance. If this bill in its essential features is carried out as it is proposed to the Senate and passes into law in that form, as it ought, it will be of more value to our peace than all the diplomatic notes that can ever be written.

Mr. President, if there be any nations, either in the west or in the east, which have hostile feelings toward this country or cherish, as I hope they do not, sinister designs, they will take notice of the authorizations contained in this bill, of the program for three years herein adopted, and I think the law containing them will have a more soothing effect and do more to promote kindly feeling on the part of those nations than the most lavish employment of the resources of the English language.

I am aware that it is a large bill. I am aware that the total amount appropriated is very large. Mr. President, money spent on the American Navy, in my opinion, is the most economical expenditure which will be made by this Congress. The American people may very well resent some of the expenditures cast with liberal hand about the country for the promotion of local interests, but I do not believe there is an American of any party who grudges sufficient money to build up and maintain the American Navy. It can not be cheaply done. To attempt to do it cheaply would be the falsest kind of economy.

We have in fact a very great task before us in order to make the American Navy what it should be. This bill goes far to make up for some stinted and ill-balanced appropriations and authorizations from which we have suffered in the last five or six years. The authorizations here are well balanced as they come from your committee.

But it is well to remember that the problem before us is to create a Navy, which is our first and most essential line of defense, as we lie between two oceans, strong enough to protect the country, both the Atlantic and the Pacific coasts. We can not rely upon the canal to transfer the Navy from one ocean to another. I do not mean by that that we are in danger of landslides, but the fact that the canal in its very nature is vulnerable. No matter how you fortify or guard it, one desperate man, one intelligent spy, who can make his way within the Canal Zone and put a bomb in the right place at one of the locks will clog your canal for weeks, and it may be for months. In other words, we must make up our minds to have one fleet for the Pacific and another fleet for the Atlantic.

Now, the first steps toward making the Navy what it should be and giving this country the naval defense which it ought to have have been taken in this bill. We have made an increase of men, raising the House provision from 68,000 to 74,000, with power to the President to increase it to 87,000 in time of national emergency. Germany had 79,000 men at the outbreak of the present war, according to the official returns, which gives some idea of what this proposed increase means, and it is far from excessive. By getting those 74,000 men at once, we can bring into commission a large number of vessels, not perhaps of the latest type but valuable fighting ships, battleships and dreadnaughts which are now lying useless at the wharves in the navy yards. We have not enough men to man them, and we ought to have every ship capable of taking a place in the first line at sea, with a full complement of men. A ship is injured by being tied up, and the organization of the crew, of the body of men necessary to make the ship an efficient engine of war, ought to be always prepared.

Therefore from the proposed increase of men we shall get an immediate addition to our Navy in being, and as we add new ships and the oldest ships are laid aside we have the men trained and ready for the new vessels as they come into service.

The authorizations of the Senate committee bill are for 8 capital ships, as they are called, and 58 other vessels—torpedo destroyers, submarines, scout cruisers, fuel and oil ships, and so forth, of different types—making in all 66 vessels to be built at once under the authorizations of this act.

The House provided for five battle cruisers. The need of battle cruisers in the American Navy is a crying one. We ought to have authorized them long ago, but I am sorry to say that authorizations for the Navy as made by Congress, though occasionally generous and frequently the reverse, have almost always been made haphazard and without any regard to proportion in the various branches of the fleet.

It is essential not only to have a large Navy but a well-proportioned Navy. We absolutely need battle cruisers. The House provided for five, a large authorization, but they provided for no dreadnaughts, and the result was an ill-proportioned, one-sided authorization.

Very recently in the present war it has been demonstrated that the theory upon which all nations have acted, that the dreadnaught, the heavy armored fighting ship, is the backbone of the Navy, is sound, and that whatever we do in adding to our Navy we must keep the great central fighting force always up to the highest level which we seek to attain.

Therefore the Senate committee cut down the House authorization of battle cruisers by one, leaving four battle cruisers, which constitute a squadron, and added four dreadnaughts or superdreadnaughts, which balances and proportions the capital ships. It is a large authorization, but we have lost time to make up and it is absolutely needed. I hope that the committee will here receive the solid and undivided support of the Senate in standing by that part of the authorization which will give us eight capital ships.

Mr. President, in addition we have made a program. We took the program of the General Board of the Navy, of which Admiral Dewey is the head, one which they made for five years under the limitations imposed by the department when asking for a program of $100,000,000 a year to be spent annually for a period of five successive years. For a period of five years that program is far too small if we wish to put the Navy, as I believe we do, in the position which it must occupy if our safety is to be consulted and our peace maintained.

But the program which was too small for five years is adequate for three years, and the committee has changed the period of the General Board's program to three years, adopting the various ships and the proportion of ships proposed by the General Board, which is, of course, the highest authority. I think that the program is second only in value to the authorization. Moreover, the reduction of time makes the proportions of the program accord with the authorizations of this year.

There are very many other features of the bill which have been entirely covered by the Senator from Virginia which are of great importance and which, I am sure, will receive the support of the Senate. I will advert to only one or two.

The House put in the bill provisions for a naval reserve, which are substantially the same as the bill for a naval reserve reported unanimously from your committee and now, I believe, on the calendar. With some trifling verbal amendments the committee have adopted the House provision, but they have added to it, as constituting part of the naval reserve of the country, provisions for the Naval Militia, following the bill which has been reported from the House committee and which places the Naval Militia on the same footing as the National Guard.

There is also one other comparatively small item in the bill which the Senate committee has added. I do not recall whether or not the Senator from Virginia mentioned it, but I desire to allude to it, because it seems to me to show the foresight which, I think, characterizes this measure. We have provisions for auxiliary ships in the naval reserve. We know that in any event we shall requisition merchant ships if, unfortunately, we should be forced into a naval war; but we have hitherto had no provision for arming such ships. This bill carries an appropriation of $1,650,000 to provide batteries for auxiliary ships when they are requisitioned. That is half of what is needed.

The next bill will carry the balance, making in all $3,300,000. By that simple and not very expensive provision we are going to put ourselves in such a condition that if war should come we can take the merchant vessels, which we can make useful as auxiliaries, and arm them at once so that there will be no delay.

Mr. President, I have nothing but praise for all the main features of this bill; but there are certain defects in our naval situation which ought not to be overlooked, which it is not in the power of Congress to cure. Our ships are deficient in speed. Congress demands in all these bills the highest practicable speed, and there is no reason in the world that I can see why, with our liberal appropriations, we should not get as high speed in our battleships—I am not speaking of battle cruisers, for we have built none—but in our battleships, as do other nations. I have here in the Navy Year Book a statement as to our two last ships, the *Oklahoma*, of 27,500 tons, with a speed of 20.5 knots; the *Pennsylvania*, which is 31,400 tons, with a maximum speed of 21.5 knots.

Mr. SWANSON. From what page of the Navy Year Book is the Senator from Massachusetts reading?

Mr. LODGE. I take these figures from pages 504 and 505 of the Navy Year Book.

The maximum average speed of the *Nevada* is, in round numbers, 20½ knots; of the *Oklahoma*, 20.5; and of the *Pennsylvania*, 21.5. Those are the actual averages of maximum speed. The last authorization of English dreadnaughts, including the series of vessels which are all in active service now and which comprise the *Queen Elizabeth*, the *Warspite*, the *Barham*, the *Valiant*, and the *Malaya*, the largest of which are 27,500-ton ships, as against the *Pennsylvania* with 31,400 tons. They have, however, a speed of 25 knots, being 4 knots more per hour than the speed of the *Pennsylvania*.

I can not see why we should not get equal speed in the same type of ship. The *Pennsylvania* is larger. I can only speak of what was known before the war; I can not tell what ships have been built since; but the *Pennsylvania* when built was larger than any ship in any other navy. She is powerfully armed. Ships of the same type, which will undoubtedly be built under the authorization of this bill, will carry, probably, guns of 16-inch caliber. There is nothing left to be desired in the power, the strength, or the armor in those ships; and yet they are 4 knots slower than the English ships.

The highest speed of the last three German ships of the dreadnaught type, which do not register 28,000 tons, is 23 knots—2 knots faster than the *Pennsylvania*.

This, Mr. President, is something which Congress can not cure by legislation. It rests with our constructors.

Here, in Ship Data of United States Naval Vessels, January 1, 1916, are stated the trial speeds of all our most recent ships. The highest speed reached was 22 knots by the *Florida* on her trial. None of the others got substantially beyond 21 knots.

Mr. VARDAMAN. Mr. President, will the Senator from Massachusetts, if he knows, give us the explanation or excuse which the naval constructors or officers responsible for that deficiency in our Navy make for that defect in our ships?

Mr. LODGE. I have never been able to get an explanation. What I can not comprehend is why we have gone behind in speed. We can build as well as other nations; we have as good engines as they can possibly build; and yet we fall short in speed.

Mr. VARDAMAN. Does it cost more to give a ship additional speed?

Mr. LODGE. Speed is very expensive; indeed, it is the most expensive thing in the ship. That is the reason why the battle cruiser, which is a lightly armored battleship, is so much more expensive than is the heavily armored dreadnaught. It is speed which constitutes the additional expense.

Mr. SWANSON. Mr. President, if the Senator will permit me, in talking with naval constructors I have ascertained that in order to get speed additional machinery must be put in, and that can only be done at the sacrifice of the number of guns carried. A vessel can only carry so much weight. It is also true that the effort is to keep the speed of the various units of a fleet as nearly alike as possible, because unless the whole fleet, or a large portion of it, can travel at the same rate of speed it loses in effectiveness, and to secure speed at the expense of guns would not be a wise solution of the matter.

Mr. VARDAMAN. How does the armament of the English ships and the German ships with greater speed than ours compare with the armament on American naval vessels?

Mr. LODGE. I think they have about the same weight of guns.

Mr. SWANSON. I say that, as a general proposition, in order to obtain speed you have to sacrifice guns to machinery; you have to lessen the number of guns or other weight that the ship has to carry.

Mr. VARDAMAN. The Senator from Massachusetts says that the foreign ships and our ships carry about the same number of guns.

Mr. LODGE. The English ships of which I spoke, the 25-knot ships, are 4,000 tons smaller than the *Pennsylvania*, and they carry eight 15-inch guns as against, I think, twelve 14-inch guns by the *Pennsylvania*. I suppose the weight does not differ materially. I merely mention this, because I hope our builders and constructors will address themselves to this matter. The Congress will not begrudge the money for the necessary speed; and it is incomprehensible to me that we should not be able to get it.

Now I come to another point, Mr. President, concerning which I wish to say a few words, and to remedy which I think the committee in this bill has done something. We have suffered very much from slowness of construction. I went myself over the list of vessels under construction or authorized, and ascertained the date of authorization and the percentage of completion on June 1, 1916. I will call attention to the battleships: The *Arizona*, which was authorized on March 4, 1913, on the 1st of June last was 91 per cent completed—that is over three years; the *Idaho*, which was authorized on the 30th of June, 1914, two years ago, is 60 per cent completed; the *New Mexico*, which was authorized on the same date, is 30 per cent completed; the *Mississippi*, authorized on the same date, June 30, 1914, is 45 per cent completed; and the *Oklahoma*, which was completed on May 2, 1916, was authorized on the 4th of March, 1911.

Mr. SMITH of Arizona. Five years ago.

Mr. LODGE. Five years ago.

Mr. VARDAMAN. How then does the committee expect to complete the program which they have authorized in this bill in three years?

Mr. LODGE. I am coming to what the committee has done. I think we have done something in that direction. The *Pennsylvania* was authorized on the 22d of August, 1912, and was completed on the 12th of June, 1916, practically four years. I will not go over the others in detail, but I will ask permission to print the table as a part of my remarks. It covers every submarine and all other vessel authorized for the Navy. I will not weary the Senate by going over them, but it is hard to see why a submarine authorized on the 13th of May, 1908, is not yet completed.

Mr. LIPPITT. What year?

Mr. LODGE. In 1908. The *G–2* was authorized on May 13, 1908, and was 92 per cent completed on the 1st of June, 1916. The *G–3* was authorized March 3, 1909, and is 89 per cent completed. I ask permission at this point to insert in the RECORD the table to which I have referred.

The VICE PRESIDENT. Without objection, it is so ordered. The table referred to is as follows:

Vessels under construction or authorized.

	Date of authorization.	Per cent of completion June 1, 1916.
BATTLESHIPS.		
Arizona	Mar. 4, 1913	91.6
Idaho	June 30, 1914	60.6

Mr. LODGE. The time is not lost in the actual building so far as I can make out, although it may be in some cases. The English build a battleship in from two years and two months to two years and a half, or a little over. We come pretty near that in the actual building. Our actual building is not slow, but undoubtedly it can be expedited. There is, however, an amount of time wasted in getting ready to build, which causes our ships to lag behind. On the 3d of March, 1915, we authorized the *Tennessee* and the *California*, known as No. 43 and No. 44. That was a year and nearly six months ago, and not one stroke of work has been done on either. The Secretary——

Mr. SWANSON. Mr. President, if the Senator will permit me, the reason why nothing was done was because it was impossible to get bids from contractors within the appropriation.

Mr. LODGE. I am going to explain how it happened. The Secretary, unwilling to accept, very probably for good reasons, the bids of the contractors, put those two ships into the Mare Island and the New York Navy Yards, the only navy yards we have to-day with ways on which we can build a battleship, and those ways were occupied by other ships, and those other ships will not be off the ways before September at the earliest.

Mr. SWANSON. Mr. President, if the Senator will permit me, does he not think it is proper to state that the Secretary tried to get contractors to undertake the building of those ships for the amounts authorized by Congress, but they would not do so? The bids were in excess of the amount which Congress authorized for those ships, and consequently the Secretary could not accept them.

Mr. LODGE. I was not criticizing what was done. I have no doubt that it was unavoidable. I am pointing out the trouble. The trouble was that when we could not get the contractors to undertake the work, the Secretary had no navy yard in which to build the ships.

I have here a letter from Admiral Dewey, written last September and addressed to Mr. GARDNER, in the House of Representatives. Admiral Dewey's letter is as follows:

OFFICE OF THE ADMIRAL OF THE NAVY,
Washington, December 24, 1915.

Mr. A. P. GARDNER,
House of Representatives, City.

DEAR SIR: I beg to acknowledge receipt of your letter of the 22d instant, requesting a reply to the following questions:

"1. How many ways capable of being occupied by battleships and battle cruisers are now available in all our shipbuilding yards, public and private?"

Including the building slips now occupied by vessels in the course of construction, the following are at present available capable of being occupied by battleships and battle cruisers:

New York Navy Yard	1
Mare Island Navy Yard	1
Cramp's Shipbuilding Co	2
Newport News Shipbuilding Co	2
New York Shipbuilding Co	2
Fore River Shipbuilding Co	2
Total	10

"2. How many additional ways could be constructed and how long would it take to construct them?"

The shipbuilding industry of the country would be capable of expansion to meet almost any demand that might reasonably be made upon it. It would be impossible to state the total number of slips that could be made ready in a short time, but additional slips could at least be installed at the following places:

Union Iron Works, San Francisco.
Maryland Steel Co.
New York Navy Yard.
Philadelphia Navy Yard.
Norfolk Navy Yard.
Puget Sound (Bremerton) Navy Yard.

Sincerely, yours, GEORGE DEWEY.

Thus it will be seen that we now could build 10 battleships; but with little trouble, adding Boston to the list, could build 16 at once.

One fertile cause of delay has been the lack of ways and slips in our own navy yards; and this bill, Mr. President, provides for that. That is what I meant, in part, when I said that this bill dealt, so far as Congress could deal, with the promotion of greater quickness of construction. We provide a lump-sum appropriation of $6,000,000, which is to be used for putting in ways for building capital ships at, I think, Boston, Norfolk, Philadelphia, and Puget Sound, and ways for smaller ships at Charleston and New Orleans. I think that is all. This is very important, and it will prevent the recurrence of the situation, for which I blame nobody, but which exists, for we shall have waited over 18 months before beginning the battleships authorized last year, because we had no slips in our own navy yards on which we could put them.

Mr. BRANDEGEE. Mr. President, let me ask the Senator if that involves the purchase of more land at the navy yards?

Mr. LODGE. No; it does not involve the purchase of a foot of land; it simply is to put in ways.

Mr. LIPPITT. Mr. President, does the Senator object to having me ask him a question?

Mr. LODGE. Not in the least. I shall be very glad to have the Senator do so.

Mr. LIPPITT. The Senator was speaking a few moments ago about the difficulty of getting speed.

Mr. LODGE. Would the Senator object to my completing what I have to say in regard to slowness of construction? Then I shall be very glad to have him interrupt me.

Mr. LIPPITT. Certainly.

Mr. LODGE. Mr. President, the committee has done something else to remedy slowness of construction, and I think it is one of the wisest things in the bill, and it met with the approval of the entire committee. It was framed by Admiral Taylor, the head of the Bureau of Construction, who said it was entirely practicable to comply with it. The clause provides that every ship authorized—not the ships of the program, of course, but every ship authorized under this law—shall be contracted for or be begun in a navy yard prior to January 1, 1917. The

officer in the department charged with construction says that can be done, and all he asked of the committee was that they should give him an ample force of draftsmen, so as to make the plans as rapidly as possible, and, of course, the committee have done that. It is a comparatively small expense.

Mr. President, I think that to remedy these two defects—and there is no use in blinking at the defects which exist—to remedy the defects of insufficient speed, which is a matter that must lie wholly with the Navy Department, and the other defect of slowness in construction, are things to which both the Navy Department and the Congress must address themselves. I think it is one of the merits of this bill that we have gone as far as it is possible for law to go to remedy the great difficulty of slowness of construction.

I now yield to the Senator from Rhode Island.

Mr. LIPPITT. I was only going to ask the Senator, in reference to the lack of speed, whether any of that difficulty was due to the method in which the appropriations were made for these vessels? I notice, on page 170 of the bill, that 10 first-class battleships are authorized, carrying as heavy armor and as powerful armament as any vessels of their class, and to have the highest practicable speed and greatest desirable radius of action, but at a cost not to exceed $11,500,000 each. Now, I do not know how the committee arrives at the cost that has been allowed for these vessels, but the Senator of course knows that there is nothing in shipbuilding that is so expensive as speed.

Mr. LODGE. I know that.

Mr. LIPPITT. The great passenger steamers like the *Mauretania* and the *Lusitania* ran into an enormous cost largely on account of the great speed which was provided for those vessels. The Senator rather intimated that there was some cause that he had not been able to discover that prevented these ships from having the desired speed. It is a matter that has come into my thought a great many times, whether or not this method of appropriating money for battleships and specifying a limit of cost for each vessel was not in itself a matter that so hampered the men who finally had the execution of the provision that they were obliged to sacrifice something.

May I add that I think our method of appropriating for the Navy is not followed by any other nation, if I am correctly informed in regard to the matter.

Mr. LODGE. Mr. President, the language used—"the highest practicable speed," and so on—is the language which has been used in all the appropriation acts. Where Congress has tried to fix a speed it has usually fixed it so far above any possibility of being reached that the ship has not been built.

Mr. TILLMAN. That language has not been changed since I have been in the Senate.

Mr. LODGE. No; it is always the same language; but once or twice we have tried it. We tried it on getting speed for a submarine, and we put it so far beyond anything that any submarine has ever reached, or apparently could reach, that the submarine, of course, remained unbuilt and we had to repeal the provision. I do not think that Congress can undertake to fix speed in the appropriation.

Now, as to the amount, I have not heard it suggested from the department that it was insufficient in any way. We have taken the figures which they gave us. We have not attempted to estimate what a battleship of the highest practicable speed would cost. "Highest practicable speed" means, of course, the highest speed any battleship or dreadnaught of the same type has reached at the very least.

Mr. LIPPITT. It would also mean——

Mr. LODGE. And it might mean more. Now, never has there been—and I think the Senator from Virginia will bear me out in that statement—any suggestion which I have heard, from any of the experts or builders of the department, that we did not give them enough. We have taken their own figures. We have added a million and a half to each battleship in this bill; and $11,500,000 is the cost of the ship without her equipment.

Mr. LIPPITT. I am glad to hear that statement on the part of the Senator, that there has been a million and a half dollars added to the estimated cost of each of these vessels—I suppose as a matter of leeway in the construction. Of course, the Senator remembers there were two ships—two battleships, I think—which were not begun by the present Secretary of the Navy, because he stated that the bids made for them by private contractors exceeded the authorized limit.

Mr. LODGE. I have just been stating that case.

Mr. LIPPITT. So that in that particular case, certainly celerity was sacrificed. Whether anything else was or not, on account of the limit of cost, I do not know.

Mr. LODGE. In that case, as I understand it, the contractors bid more than the amount appropriated by Congress, and the Secretary had no choice. He had to put them into the yards where they could be built within the amount. At least, so it is stated; but they were put into navy yards where there were no ways on which to build them.

Mr. WEEKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to his colleague?

Mr. LODGE. I do.

Mr. WEEKS. It seems to me that the Senator from Rhode Island, with his usual good business judgment, has put his finger on one of the great weaknesses in our method of making appropriations for the matériel of the Navy. I have always felt, and I have not seen any reason to change my judgment, that Congress is not competent to determine what particular craft should be built or what particular type should be built. The reason for this extraordinary bill which the Senate is now considering is because the judgment of the General Board of the Navy has not been followed in the past.

Mr. LODGE. I hope the Senator realizes that there is not a ship in this bill that does not come from the General Board.

Mr. WEEKS. I am not criticizing this bill; I commend the bill; but I am saying that the reason why it is so large is because the judgment of the General Board has not been followed.

Mr. LODGE. That is perfectly true.

Mr. WEEKS. And if Congress, in its wisdom, could adjust its policy so that it would make a lump appropriation for the building of new craft and leave to the General Board or to the Navy the disposition of that appropriation, we would have a more homogeneous and in every way a better Navy than we have to-day or will have if we follow the present practice.

Mr. LIPPITT. Mr. President, I should like to ask the Senator from Massachusetts if the method he suggests is not substantially the method that is adopted by all the other great navy-building nations of the world—by England, Germany, Japan, and France? I think it is almost exactly the policy of other nations.

Mr. LODGE. The ships authorized in this bill are every one of them ships recommended by the General Board. There is not a single recommendation there that does not come from experts. There is not a thing put in by the committee itself; not one thing. The money, the price, the number of each class of ships is all from the board of experts. I have always fought for this system, and I believe in it.

Mr. WEEKS. Mr. President, I commend this bill in that respect. I think, with perhaps one exception, it is the first Navy bill that has ever been presented to Congress which does carry out the recommendations of the General Board. So that the general criticism which I am just making does not apply to this bill at all, but does apply to what I think should be a general policy.

Mr. LODGE. I quite agree with what my colleague says, only I did not want it to be understood that it applied to this bill, for I do not think it does. It applies to building bills in the past. I have already said, when I began to speak, that this bill went some distance in remedying the haphazard, ill-balanced, often stinted, and ill-proportioned recommendations of Congress, made by committees and compromises, and all that, without any system.

Mr. WEEKS. Mr. President, so long as the thread of the discussion of my colleague has been broken——

Mr. LODGE. I have finished.

Mr. WEEKS. I want to make one inquiry on the subject to which he has just alluded, relating to the building of ways in navy yards, so that battleships may be constructed in other yards. I understand that this bill, as I recall it, provides for the construction of ways in three additional navy yards.

Mr. LODGE. No; five.

Mr. WEEKS. Five additional navy yards?

Mr. LODGE. Well, for battleships in four, and for vessels of smaller tonnage in two.

Mr. WEEKS. I want to say, Mr. President, that in my judgment the committee is taking exactly the wrong course in doing what it is doing in that respect. We are going to have a great construction department in every navy yard, very much of which will be idle most of the time. The only real reason why the Government should construct its own ships is to prevent the possibility of collusion among outside builders, and the charging of a higher price for the building of ships than the facts warrant. The Government should be in position to build one or two ships annually, if necessary, in order to prevent this collusion; but for the Government to establish great construction departments for the building of battleships in seven navy yards is, in my judgment, a mistaken policy. It will tie up a great amount of money in those plants, and it will necessarily mean that in order to keep them employed, instead

of giving construction to private builders in future, it will very largely, if not entirely, be done at the navy yards.

I do not know anyone who has given this subject serious consideration who believes that a ship can be constructed as cheaply in a navy yard as it can be constructed under contract. My judgment is that the additional cost is not very far from 10 per cent in every case; and while I agree that we ought to be in position to prevent the Government being imposed upon, I do think it is a distinctly wrong policy to establish these great construction departments in all of our navy yards.

Mr. LODGE. Mr. President, I am entirely at one with my colleague on that matter. I think the private yards ought to and will build most of our ships, and will build them faster, and will build them in the long run cheaper.

Mr. CLAPP. And better.

Mr. LODGE. No; not better. The work is no better; but they will build them cheaper, and they will build them faster. I know that navy yards are slow. But there is no escape apparently from the fact that when the private yards found that there *was not* a Government yard with unoccupied ways they put on prices which went beyond the appropriations authorized by Congress, and they lost the ships and the country lost the time, which is far more important. It is not all on one side.

I believe it is just as important to encourage the shipbuilding industry of this country in the private yards as it is to have sufficient navy yards; but I also think that the shipbuilders should show a readiness to come forward on the Government work and meet us at least halfway. If, as is stated, they had not taken advantage of a situation where the only ways the Government had were shut up—which has resulted, as I say, in delaying two of our ships 18 months—if they had not come forward in that situation with bids in excess of anything the Secretary could accept, as I understand it, under the law, there would not have been an appropriation here to fit other yards with ways. If that appropriation is made to fit these other yards with ways, the shipbuilders have brought it on themselves. They are able business men, but apparently they brought it on themselves.

Mr. LIPPITT. Mr. President, before the Senator takes his seat, he has referred to the fact that this program is to be completed within three years, as I understand.

Mr. LODGE. The program is for three years.

Mr. LIPPITT. What assurances are there that it will be completed in three years? When the Senator says it is to be completed in three years, does that mean that there is some place in the bill where it says that it shall be completed in three years, or is there any forfeiture if it is not completed in three years? How is that to be accomplished?

Mr. LODGE. The bill provides a program which Congress is to carry out, and Congress can carry it out or not, as it pleases. The program simply means that Congress in the next three years will authorize 16 capital ships. That is all that the program means.

Mr. LIPPITT. That they will authorize them—not that those, or any part of them, will necessarily be completed in that time?

Mr. LODGE. Well, it is the intention of the Government, of course, to build them. It is the intention of Congress to have them built. We appropriate the money. We compel all authorized this year to be begun before the 1st of January, 1917. We have abundant slips in this country. We can build 10 battleships at once to-day without adding to the Government navy yards at all.

Mr. LIPPITT. Mr. President, the Senator only a minute ago was reading a list of vessels which had taken three, four, five, and in some cases eight years to build.

Mr. LODGE. Yes, Mr. President; and some of those were in these private yards.

Mr. LIPPITT. I am not responsible for what yards they are in. I was only wondering and trying to obtain from the Senator for my own information a knowledge of what security or guaranty, or what probability, if I may put it that way, there was of the completion of some part of this program within this definite date. Of course I understand what the Senator says about Congress appropriating money. I understand that Congress can dictate the date at which any enterprise shall be begun; but what I was really trying to arrive at was what the probabilities were as to the date of its being completed.

Mr. LODGE. I will answer that as well as I can. I will take the authorization of this year, which, if the Senate committee's program for this year prevails, as I hope and believe it will, will require the construction of 8 capital ships—I will confine myself to them—and 58 other ships. We have appropriated the money. The money is all there. We have also provided that the ships shall all be contracted for or be begun in the navy yards before the 1st of January, 1917, and I have no doubt they will be.

Of course it is beyond the power of Congress—it is beyond the power of any human being—to say whether all those contracts will be fulfilled or that no accidents will occur. I think that we have done all that any reasonable men of common sense can do. We can not build them ourselves with our own hands; we have got to contract for them or build them in our yards, and that we have provided for.

Mr. LIPPITT. Does the Senator think that with reasonable diligence it is possible to complete them within that time? I am asking for information.

Mr. LODGE. I believe it is. We authorize 66 ships this year, and they can be completed within three years. I am speaking of capital ships. I believe they can be perfectly completed and afloat in three years. I think there is no reason in the world why they should not be. If, as required by this bill, they are contracted for and the construction begun before January 1, 1917, they can be built inside of three years. There is no lack of speed either in our navy yards or in private yards when they get started.

Mr. LIPPITT. I should like to ask, for my own information, whether in the Senator's opinion there is any way of accelerating the construction of these vessels, either by working with two shifts or by offering a bonus for speed, as is sometimes done?

Mr. LODGE. We have provided in the bill for all that matter of bonuses and premiums.

Mr. LIPPITT. For additional speed?

Mr. LODGE. Yes.

Mr. LIPPITT. That only applies, I suppose, to private yards?

Mr. LODGE. It would only apply to private yards.

Mr. LIPPITT. So there is no premium for speed in Government yards?

Mr. LODGE. Of course in a Government yard we can double or treble the shifts at any time.

Mr. LIPPITT. I suppose the theory is that the vessels will be constructed with one shift, and that is eight hours' work, and not with two shifts.

Mr. LODGE. You mean on the basis of three vessels inside of three years?

Mr. LIPPITT. Yes.

Mr. LODGE. That is on the eight-hour basis.

Mr. LIPPITT. Has the Senator looked into the question whether it would be possible to work two shifts?

Mr. LODGE. That is perfectly possible.

Mr. LIPPITT. And if so what would be the additional cost?

Mr. LODGE. Of course that would add to the expenditure?

Mr. LIPPITT. About what is the shortest time in which a vessel could be delivered?

Mr. LODGE. I do not know how much it would reduce it. That has not been considered.

Mr. LIPPITT. Does the Senator know how much would be the increased cost?

Mr. LODGE. That has not been considered. We have gone on the basis of an eight-hour day.

Mr. OVERMAN. How are we going to get the armor? We are going to build an armor plant.

Mr. LODGE. That is provided for.

Mr. OVERMAN. Does the Senator think that we could do it in three years?

Mr. LODGE. We shall get the armor. There are armor-plate plants now that are going to supply us with every pound of armor we need. There is no trouble about that.

Mr. OVERMAN. We can not get it from our own armor factory.

Mr. LODGE. No armor-plate factory can be constructed in the three years.

Mr. OVERMAN. It will take three years to complete it.

Mr. LODGE. Fully.

Mr. OVERMAN. Then we shall have to buy it by contract?

Mr. LODGE. We shall have to buy it from private contractors. I regard the armor plant as a pure waste of money. I have no more to say about that.

Mr. WEEKS. The Senator understands that we can buy armor, the best in the world, at the lowest market price?

Mr. LODGE. Yes; now, at the lowest price in the world.

Mr. WEEKS. So there is no need for anxiety.

Mr. LODGE. We can get plenty of armor. The delay will not come there.

Mr. McCUMBER. Mr. President, I was called out during a portion of the address by the Senator from Massachusetts. I have also been absent for nearly two months from the Senate, and during that time there has been considerable discussion concerning this bill. I have not had the benefit of that discussion nor of what has been written concerning it while it

was being considered by the two committees. However, I notice that the House provided for no battleships whatever, and that the bill as reported provides for 10 battleships, 4 of which are to be begun as soon as practicable.

Mr. LODGE. Of course, if the Senator will allow me, so as to get it straight, the House adopted no program at all, so that column in the program has no bearing on the bill as it passed the House because they adopted no program. There is nothing to compare with it. All you can compare is their authorization with our authorization. We propose to authorize four dreadnaughts and they authorized none.

Mr. McCUMBER. That is, we authorized four dreadnaughts at the present time and they authorized none at the present time, and we provide for 10 in due time. To the average person it would seem rather peculiar that great committees such as the Committee on Naval Affairs of the House and the Committee on Naval Affairs of the Senate should disagree to such an extent that one committee receiving its information from the same source should provide for no battleships and the other committee of Congress should provide for 10, to be constructed in the near future. I should like to secure such information as I may, and I know the Senator can give it to me as well as anyone, as to the reason for this great divergence of views with reference to the necessity of battleships.

Mr. LODGE. Mr. President, I can not possibly explain what was operating in the mind of the House committee and of the House in authorizing five battle cruisers and nothing else. It was not in conformity with the recommendation of any board or of the Navy Department or of anybody who is best fitted to speak on the subject. Why they did it I do not know. It resembles many of our past bills which have been made without any regard, as I have said and as my colleague has said, to the recommendations of the experts and of the General Board of the Navy Department, in a perfectly haphazard way by the committees here. Why the committee of the House did it I can not understand. Our authorization is based on the recommendation of the General Board, which is supported by the Navy Department in every branch, and I can not help thinking that it is the correct balance. I have no doubt whatever myself that it is.

Mr. McCUMBER. We have been following for years a program of two battleships of the dreadnaught type each year. It is something strange to me that we should suddenly drop them entirely from a program in a bill that passed the House. I have not read the arguments; I have not read the reasons. I assume that some reasons were given in the House why we should not build any more dreadnaughts, and whatever those reasons were, whether they were valid or otherwise, it would be very agreeable to me if I could find out from any member of the committee.

Mr. LODGE. I wish I could, but, I am sorry to say, I can not inform the Senator of the reasons of the House committee. I can think of none myself. There ought to be some sound reason, but what their reasons were I do not know.

Mr. NORRIS. Mr. President, the greatest disgrace of the present century is that war between civilized nations is still a possibility. That such a barbarous condition should exist in the civilized world is painful to every lover of humanity and to every believer in the great brotherhood of man.

Every civilized country of the world requires its subjects to submit their differences and disputes to tribunals and courts that have been organized under the forms of law for their settlement, and yet these same nations violate the principle of the law which they compel their subjects to obey. The citizen must maintain his rights and settle his grievances before tribunals organized according to law upon principles of justice and of right. Kings and rulers settle their disputes upon the field of battle without regard to right, without regard to justice, and upon the erroneous and barbarous theory that might makes right. It is to be regretted that the great advance that has been made from barbarism by the different nations of the world by which the disputes and controversies arising within each nation are settled according to forms of law and upon the principles of justice and equality has not extended to the settlement of disputes between the nations themselves. Why is it that rulers who are able to settle all controversies within the countries they control are not able to settle controversies between those countries?

A sentiment for a universal peace has been growing rapidly for many years. This is because the great common people of the world who have been compelled to fight the battles of the kings and rulers have realized from their own experience and their own observation the unreasonableness and criminal folly of going to war. The citizen who bears the burden and endures the suffering is the one who has finally awakened, and he will eventually make his voice heard all over the civilized world. This sentiment has grown gradually, but steadily and firmly. Instead of coming down from the throne it has come up from the common people to the ruling classes. The rulers of the world have been the last to really grasp and understand the situation. The public sentiment of the civilized world is crying for international arbitration and a world's peace.

In every civilized Government public sentiment is the great moving force that will ultimately and finally be victorious. Statesmen do not always know it, rulers do not always recognize it, but in the end it will always prevail. It is more powerful in its influence than the combined armies and navies of the world. Before its silent tread the relics of barbarism and oppression must disappear and vanish in the retreating mists of an ignorant and superstitious past. This sentiment that comes up from the common people will finally reach the rulers and make its influence felt upon thrones. It will not cease in its onward march until all the rulers and lawmakers of the earth recognize and realize that the same principle which settles disputes between individuals will with equal justice settle all the controversies that can arise between nations.

The great world struggle now going on has been a sad disappointment to all of the participants. They all see even now that whatever the outcome may be the burden and the suffering can not be shifted from one to the other. They all realize now that military preparation is not a safeguard of peace, and when exhaustion takes place, as soon it must, and the end comes, as come it will, there can be no shout of victory from any source. They know now that ruin, desolation, suffering, and bankruptcy will enshroud the world like a pall. The entire civilized world will know then, as it is beginning to see now, that might does not make right; that war is not only wrong and useless, but that it brings misery to the victor as well as to the vanquished. It is a practical demonstration to all the world of the uselessness of armies and navies in any effort to maintain international peace and the absolute necessity of some international agreement between the civilized nations of the world to maintain a peace that can not be maintained by armament, and is not only desirable but necessary for the future happiness and preservation of the human race. The greatest war of history has followed close upon the world's greatest military expansion, professedly done in every case for the preservation of peace. From untold numbers of ruined firesides, from the broken hearts of millions of widows, from the sufferings of unnumbered thousands of fatherless children, from hundreds of battlefields strewn with dead and dying, writhing in human blood, surrounded by dismembered bodies of innocent human beings that once were fathers and sons in pleasant homes; from every honest, loving heart all over the civilized world goes up a wailing, despondent cry demanding peace.

The time has come when all the people from the peasant to the king are in favor of international peace. The difficult question is to agree upon some practical method for its attainment. Modern inventions for the transportation of people, property, and intelligence have made the world much smaller. Whether we wish it or not the fact remains that the modern commercial business world has brought the people of every country into close and intimate relations with the people of every other country. Business and commerce pay but little heed to national boundaries, and nations, wherever located, are next-door neighbors. International communication is now not only of daily occurrence, but of daily necessity. Upon closer acquaintance civilized man is found to be about the same regardless of his geographical location or his nationality. Closer intercourse dissolves the jealousies that were barriers in the distance. The fundamental principles of equity and justice which form the foundation of all civilized Governments are the same the world over. When we are brought into this close relationship the scales fall from the eyes, prejudice flees from the heart, and we realize that humanity is the same everywhere.

The love, the hate, and the passions of men are the same on both sides of the great Atlantic. When by war's cruel hand the husband, the father, and the protector of the home and the fireside is taken away, the suffering and the misery which follow is not measured by nationality. The human heart is the same, whether it is carried in the breast of an Englishman, a Frenchman, a German, or an American. Humanity is broader than nationality and embraces within its scope the entire world. The measure of human happiness will not be full, the heights of national glory will not be reached until we can look over the world and in the words of the Scripture, truthfully say of every citizen of every civilized nation, "Is he not, after all, my brother?"

Why, then, should there be war? I know that it can truthfully be claimed that this cruel and heartless demon has settled

many questions of world-wide importance, but it never settled one on any principle of equity, morality, or justice. In modern times its decree has been more often right than wrong, because the great spirit of public sentiment when once aroused has not only furnished money and men for the right, but it has thoroughly imbued the hearts of its soldiers with a determination and a bravery that has done much to place the victory where it properly belonged. But what a sacrifice of human life and treasure. I do not want to be understood as claiming that all the wars of history were wrong or could have been avoided. Some of them were carried on for liberty, some were waged for mercy, and some were fought for humanity. The soldier, not only of our own land, but of other countries as well, is entitled to all the consideration and all the honor and glory that humanity can give or bestow. I am, however, proclaiming against the conditions existing in modern civilization that make war not only sometimes necessary, but at any time possible.

But the question recurs again, What is a practical way to solve the difficulty? We have advanced to such a state that all civilized countries of the world are in favor of peace. Who shall take the first step? Who can take the first step with the assurance that beneficial results will follow? What nation to-day occupies such a unique position in civilization that it can step out into the open and say to all the civilized world, "We are willing to submit to peaceful arbitration every international dispute, every international controversy, not only of the present but of the future as well"? What nation, in assuming this position, can command not only the respect and belief of other nations in the integrity and the honesty of its purpose, but can also receive the respect and approval of humanity's peace-loving sentiment that will go far toward impelling the balance of the civilized world to accept the proffered hand of universal brotherhood?

If we study the history of European nations, we will find a trace, at least, of jealousy between them that has come down from the days of barbarism. In ancient times the king, who was then supposed to possess, and is still suspicioned to have, some attributes of Divinity, ruled only over such territory as he was able to hold in subjection. He broke no law of nations if, without notice, cause, or provocation, he made war upon his neighbor in an attempt to conquer and subdue additional territory. He violated no principle of government if in carrying out his purpose he resorted to trickery, chicanery, and dishonesty. The result was that every ruler was suspicious of every other ruler. This suspicion and lack of confidence anciently existing between kings, and permeating the framework of every European nation, has, in a lessening and decreasing degree, come down to the present day. It exists now—unconsciously perhaps—but exists nevertheless, and must be taken into consideration whenever any European nation makes a proposition to other European nations for the settlement of any great international question. This condition was well paraphrased by a great European statesman in comparing European conditions with those of America, when he referred to it as "American boldness and European suspiciousness."

In the New World, where our Government's leadership and controlling influence are recognized and acknowledged by all the world, these conditions do not obtain. Here the divine right of kings has never been recognized. We have not only disclaimed the right of conquest ourselves, but we have refused to recognize it in others. We have not only refused to recognize this right in the strong nation, but we have protected the weak nation against it. Moreover, we have shown to the world our unselfish devotion to that principle to the extent of sacrificing life and treasure in the defense of the weak against the strong—the protection of the downtrodden and oppressed against oppression. Our entire national life has been emblematic of an unselfish respect for the right of other nations and is not tainted with that suspiciousness which has come down to others from ancient times. Our position among the nations of the world in this respect was well illustrated by what happened in the recent war between Russia and Japan. When these great nations had each other by the throats and were struggling in mortal combat the entire world was aroused to admiration by the action of America's great President. Neither one of the warring nations had expressed any desire for peace. Neither one had shown any disposition to cease the conflict. Neither one had asked for any intercession, and yet, in the midst of the bloody conflict, when America's voice was heard, they both halted, they both ceased, they both followed, they both obeyed. It was because they knew—all the world knew—that in the voice which called them from the battle field to reason's court there was no taint of selfishness; that in that call there was no suspicion of an ulterior or dishonorable motive, but that in the heart of that great statesman, whose voice they heeded, there was only the purity of a humane effort to bring about the welfare of all. From the very nature of the development of other nations from the barbarism of ancient times it is quite apparent that no other ruler of the civilized world could have made that proposition with the same successful results. In response to the friendly intervention of the American Government Russia and Japan appointed commissioners to agree upon terms of peace.

While these commissioners were in session on American soil a notable assemblage for the advancement of international arbitration was in session at Brussels, the capital of Belgium. At this meeting of the Interparliamentary Union there were representatives from practically every civilized country in the world except Russia and Japan. We watched with hopeful anxiety the reports which the cable brought us of the progress that was being made by these peace commissioners at Portsmouth. In that assemblage, composed of representatives from two continents, there was a unanimous wish, a united hope, a fervent prayer that America's intervention would prove successful. As a fitting close of that great international conference, the representatives of Belgium invited all the delegates to a reception held in that historic building where the cohorts of Napoleon were assembled in revelry on the eve of Waterloo. The rooms were decorated with the colors of all nations.

The finest band in Belgium was playing her national air. In the midst of it the music suddenly ceased. All eyes were turned to the rostrum. We saw the leader of the band seize from the decorations of the hall the American flag, and using it as a baton, he waved it over the heads of the musicians, and in answer to his action, there burst forth the rapturous strains of the Star-Spangled Banner. For a moment, and a moment only, there was silence, and then there burst forth a roar of applause which clearly indicated that every one there understood that beneath the fathomless deep the electric spark had brought the welcome news that on the shores of America an agreement for peace had been signed. On the occasion of nearly 100 years before the revelry was interrupted by the booming of cannon, but on this occasion it was the joyous message that under the leadership of America the peace of the world had been established. That was an occasion, my countrymen, when it was greater to be an American citizen than to wear a crown.

Students of history will not find it difficult to see that there is but one Government in the world which occupies such a position among the nations that without arousing any suspicion or jealously, can take the step—can make the move that will make war practically an impossibility in the future, and bring about the establishment in its stead of international arbitration. The world is anxious for permanent peace. At the close of the present struggle, Europe will be ready for it. All civilization and humanity are praying for it and the eternal hand of Fate is beckoning for America to take the lead. At the close of the present war, our President, having been duly authorized by Congress, should propose to the belligerent nations that we desire to enter with them into the treaty of peace, and that we are anxious to provide in such treaty for the settlement of all future international disputes and controversies through the establishment of a permanent court of arbitration. We should also propose that the treaty of peace shall provide for the limitation of armaments both on land and sea, with a provision for the establishment and maintenance of an international navy.

Civilization is ready for this step. The present great contest is a demonstration that the method of the past of settling disputes between nations is a failure. Instead of justice, it brings misery and suffering, not only to one belligerent, but to all. It demonstrates that militarism will neither preserve international peace nor settle any international dispute with justice. Even before its termination, while the result is not yet known, all honest men agree that the peace and happiness of mankind would be safeguarded if by an agreement between nations, war could be made impossible. Our Government occupies a position that will enable it to take this great step for the benefit of humanity. Even though we may not believe we can obtain all that is desirable in such a treaty, there is no reason why we should not at least make the effort. Even if we feel that such an effort would be a failure, we ought not permit an opportunity such as this to pass by without making the effort. But, Mr. President, we will not fail. If in good faith we make this effort, there is every reason to believe that all of the belligerent nations will welcome our suggestion and will be willing to provide in the treaty of peace as nearly as possible against any contingency that will bring war in the future. If we make this effort, good will result from it. In my judgment, the nations will receive such a proposition with joy. They will welcome any honest attempt to better the conditions of the past. It is perfectly evident to all men that all the belligerent nations are wearied of the present contest

and that they will all realize when exhaustion brings the end there can be gain for none, but that the sufferings brought on by the war must be shared by all.

No money payment can compensate for the suffering it has entailed and even if it were possible to demand an indemnity there will be no nation financially able to pay it. The time will then be ripe for an international peace, and the American Government is the one nation in all the world that can take the first step to bring it about.

But in making this proposition we must be free from any hidden purpose to gain an advantage. We must make it clear that we have no selfish interest to be gained. We must express a willingness to bring to this arbitration court every international controversy that the unknown future has in store. With clean hands, a pure heart, and a clear conscience must we approach the great altar of international justice.

Will there not be reason to question our motive if while we are negotiating with the balance of the civilized world to take this important step for a permanent peace we are at the same time engaged in the greatest military expansion program that we have undertaken in our history? The present bill appropriates more money for the expansion of our Navy than has ever been appropriated by any nation in the history of the world in time of peace. Can it be said that we are acting in good faith when we extend one hand in brotherly love to the balance of the civilized world while with the other we are building up a bigger Navy and a larger Army than we have ever maintained in time of peace? If we desire a world's peace and are willing to make the attempt to get it and desire to impress the balance of the world with our sincerity and honesty, will it not be better that we give to the world an illustration of our sincerity by staying the hand of military preparation at least until we have made an honest attempt to perpetuate peace? If we ourselves are engaged in a mad race to build up the biggest Navy and organize the largest Army of the world, can we expect other nations to place full confidence in our professions when we are asking that the building of huge monsters of human destruction should cease? Can we even satisfy ourselves that we are doing all that can be done to bring about international arbitration when in time of profound peace we are making the greatest preparation for war that has ever been made in the history of the world? Would it not be said to us that we ought to first take the beam out of our own eye in order that we may see clearly to take the mote out of our brother's eye? Can we not at least wait until the present struggle shall end before we embark on this enormous military building program?

With the exception of the American Government, all the leading nations of the world are engaged in the present conflict. No one doubts but a treaty such as I have outlined, signed by our Government and these belligerent nations, would bring about the abolishment of war between the nations. In fact, such a treaty, signed by nations that can be numbered on the fingers of one hand, would insure the lasting and permanent peace of the entire world. My own idea is that if such a treaty were entered into, even the international navy would soon become unnecessary. I doubt very much whether such a navy would ever be called upon to enforce the decree of the permanent international court. While it would perhaps be wise to provide for such a navy, it would, in my judgment, soon become evident that we could trust to the honor of the nations and to the enlightened public sentiment of the civilized world for the honest enforcement in good faith, of every judgment and decree. This has been frequently demonstrated in the past. In all the history of the world there has never been an instance where an offending nation has failed to carry out in good faith the judgment of an international court.

Heretofore one of the greatest obstacles to the peaceful settlement of international difficulties and to the submission of such controversies to arbitration has been that the offense has been committed or the controversy has arisen before any rule for its settlement has been provided or any tribunal for its determination has been selected. This ex post facto machinery for the settlement of differences is not only unreasonable and illogical, but it has been guarded against by all the civilized nations of the earth in the regulation and management of their own internal affairs. When disagreeing nations are aroused to anger by the excitement and the prejudice of the people on account of real or imaginary wrong, it is a poor time, indeed, to attempt to agree upon a fair method of settlement or to exercise that calm deliberation which should be invoked in the selection of the arbitrators.

The treaty of arbitration should be general and apply to all disputes. It should be negotiated in time of profound peace and not with reference to any particular controversy. Its judges should be selected in time of peace and their terms of office should be permanent. In order that they might be removed from and uninfluenced by any bias or prejudice they should be appointed for a long term of years, and while holding this great international commission they should be prohibited from accepting or holding any other office or emolument from any government.

It would not be necessary that all of these arbitrators so selected should sit in judgment upon every case brought before the court. In case of any dispute between nations that could not be settled by diplomacy the contending parties would ordinarily have no difficulty in selecting a tribunal from this list of the international court; but in case of any such dispute, it would be easy to provide that members of this court should themselves select the arbitrators to pass upon the contention.

This would give us an international court that would command the absolute respect of all mankind and the confidence of all civilization. Its judges would be free from any bias, prejudice, or excitement that might exist in either one or both contending nations. Instead of representing one government as against the other they would, in fact, represent without partiality and with equal justice both of the contending parties. Their life work would be the study of international questions. They would become learned—yea, experts—in international law and the administration of international justice. The world would have a list—a school—of international jurists devoting their time, their energies, and their lives to the study of international questions and the settlement of international disputes. In the hands of these men the peace of the civilized world would be safe and secure. The judges of this court occupying this dignified, exalted, and unparalleled position before the world, would be further removed from bias and prejudice than any court that has ever been instituted in the history of mankind. Its decisions would become precedents for future action. It would not be long until we would have a line of decisions that would eliminate the uncertainty of international law which has existed in the past. A question once determined by this great court would be accepted by the world as the law for the future, and the result would be that we would not only have an international tribunal for the peaceful settlement and determination of all international questions, but that their decisions would become the beacon lights of peace for future generations, whose rays of wisdom and of reason would light up the dark waters of international jurisprudence, mark out the course of safety for every ship of state, and warn her mariners of the shoals of disaster.

The size of an army and navy to be maintained by any nation in time of peace is always a relative one. It always depends to a great extent upon the size of the army and navy of other nations, particularly of those other nations located in close proximity. If Canada were building forts along our northern boundary and filling them with armed men, it would perhaps be necessary for us to likewise build forts on our side of the line and to increase our standing Army. The building of huge forts by both France and Germany along their common boundary illustrates this principle. Every time one of these nations built a fort the other nation felt bound to duplicate it on her side of the line. Men and corporations, lured by the desire of financial gain, have often exaggerated the building of forts and battleships and the increasing of armament. There was reliable evidence to show that prior to the present war a great firm engaged in the manufacture of arms procured the publication of a false news item in a Paris paper announcing the purchase by France of a large number of guns of a certain type. This item was reproduced as a matter of news in Germany. It resulted in the German Government purchasing a large additional supply of arms, and when this fact was published in the papers it meant another order placed with this same firm by the French Government. And so, starting with nothing, they succeeded in having two great Governments purchase a large supply of the goods which they had manufactured. It is idle for us to suppose that we can announce a naval program by which in a certain number of years we shall have the largest or the second largest navy in the world. For every battleship which we build, for every military expansion program that we announce, there will be an added stimulus for military expansion on the part of the balance of the world. When we announce that we are about to enter a mad race to build up a huge military program of expansion we must not forget that it is a race in which all other nations can enter as well as we. We must not forget that by our very action we are compelling other nations to enter the same race. With such an announcement on our lips, we can not consistently ask the balance of the world to disarm or to agree upon the settlement of international disputes by arbitration, unless we couple with our proposition the willingness on our part not only to cease in our program of military expansion but that we will disband the increase of our Army

and agree to turn the proposed addition to our Navy over to an international tribunal to be used for the preservation of a world's peace and for the enforcement of the decrees of an international court.

The world has for a few years been witnessing the spectacle, which would be humorous if it were not so expensive and serious, of seeing the leading nations of the world in a mad race to see which could build the largest battleship. The world is startled by the announcement that one great nation is building a monster of destruction that will outclass and outshine anything that the world has ever seen. The excitement has hardly quieted before the next nation has made arrangements to duplicate this mistress of the seas. The third nation begins the task of building a pair of them. The fourth, not to be outdone, lays the plans for one larger than any of the others, and so on around the circle. And when we have reached the point of the beginning it is found that the first ship, supreme and invincible in her day, is outclassed, out of date, fit only for the scrap pile or for a target for other vessels to play with. If this race keeps up, it will not be long until the nations will have to begin to remodel and deepen their harbors to make a landing place for their battleships.

Ever since the beginning of the present war there has been the most wonderful propaganda in our country for increased armament that our civilization has ever seen. Under the cry of "preparedness" there has been an organized effort from one end of the country to the other demanding the increase of our Army and Navy. Newspapers everywhere have been filled with accounts of the impending dangers of attacks from foreign foes and the conquest and subjugation of our country by foreign enemies. From the rostrum, from the theater, from moving-picture films, from editorial columns of great newspapers, from magazine articles, from fascinating books published upon the subject, even from the pulpit, and also from ex-Presidents and from the present occupant of the White House have come gloomy prophecies, forebodings, and warnings that in a day or an hour we may be overridden, subjected to conquest, and made the subjects and vassals of some conquering military host. Most of these dire prophecies are coupled with the most lurid descriptions of the helplessness and the incompetency of our own Army and Navy. In some way these alarmists feel that at the close of the terrible, gigantic struggle the wounded cripples of surviving armies, backed up by bankrupt nations, are going to cross the great Atlantic, and perhaps the Pacific, and trample our flag in the dust, destroy our cities, ruin our homes, and make us all the unwilling slaves of hard-hearted and cruel monarchs. Just how much this organized effort to create public sentiment in favor of military expansion has been influenced and created by men and corporations who have already made billions out of profits from the manufacture of war materials, and who fear that at the close of the present war they will find themselves, like Othello, without occupation, may be a question of honest dispute, but that material assistance has been given to this propaganda by these interests will not, I think, be denied. It is one of the noticeable features of this great campaign that most of the men and corporations who are backing it up look with holy horror upon any proposition that will eliminate private profit from the manufacture of war materials, and they are therefore, with some notable exceptions, opposed to Government instrumentality in this line of business. We ought to take private profit out of "preparedness," and if this could be done there would be a change come over the spirit of the dreams of many of our friends who are advocating this great preparation for human slaughter.

I know the size of an army and navy is a question upon which honest citizens may honestly differ, and by no means do I desire to charge a lack of wisdom or a lack of patriotism against any man or set of men because they believe in great military expansion. I know that millions of our people are perfectly honest in this belief. To judge from the display and the noise made one would think that they were nearly unanimous. What I do believe is that this great propaganda, 90 per cent of which, in my judgment, is founded upon fallacy, has, nevertheless, been instrumental in misleading not only thousands of ordinary citizens but some of our greatest leaders and statesmen. We are confronted now with the greatest naval program that has ever been presented to Congress in our history. Every thinking man must realize that there must come an end to this military expansion, otherwise we will bankrupt ourselves even though war never comes. The danger is that when we are thus prepared and feel that we are invincible the perfectly natural thing will happen, and that is that we will become boastful of our supremacy and be lead into a war that we otherwise would have avoided. A program of "preparedness" carried to extremes will ruin us whether war comes or not. It eventually means exhaustion. In either case it means the enrichment of the few and the pauperizing of the many.

The wasting of our sustenance for things that can bring no economic return, whether in time of war or in time of peace, will, if carried to the extreme, eventually bankrupt and ruin any nation that is engaged in it. War and the preparation for war in time of peace always means the increase of the cost of living. This will not perceptibly affect the man of immense income, but it is a serious proposition to be faced by the poor man who is already taxed to his utmost to support himself and family. The increase of the cost of living falls upon the poor as well as the rich. War and the preparation for war makes the rich richer and the poor poorer, and when this increased cost is added to the burden of the man whose meager income is already scarcely sufficient to feed and clothe those dependent upon him, it means for this class an economic slavery that will not long be tolerated by the American citizen. I want to warn my countrymen that if this unreasonable program for "preparedness" is continued and carried on the civilization of our age will not be able to bear the burden, and revolution will be the inevitable end.

The power of taxation is a necessary attribute of government. Government sometimes uses this power to tax out of existence some evil thing or ruinous product injurious to life and health, but we ought to be reminded that this same power can be used to tax the poor out of their homes; to tax the ordinary citizen and commercial enterprise into bankruptcy. And when our citizens realize that for every dollar that is raised by the Federal Government by taxation the largest portion of it is demanded as a tribute to the bloodthirsty demon of war, there will come a revulsion on the part of the citizenship that will make its influence felt throughout the country. When the people realize that the present bill is such a terrible increase over the enormous appropriations of the past and that this bill is only a step toward higher and greater appropriations, we will find that the cry for international arbitration is coming not only from those who are moved by the idea of philanthropy, mercy, and humanity, but that these ranks are joined by and intermingled with all of the ordinary commercial interests and moderate taxpayers of the country. The people of the civilized world are taxing themselves to death in order that the survivors may kill each other according to the most modern methods of warfare, with the most modern weapons of human destruction.

As startling as the financial conditions are, they do not tell one-half the story. Human life can not be measured in dollars and cents; broken hearts can not be healed by the appropriation of money; human suffering and misery can not be alleviated by financial consideration; and humanity stands helpless in the face of death and destruction. At the fireside of practically every home in Christendom there is a vacant chair, made so by war. For every vacant chair there is a ruined hearthstone; for every hearthstone there is a sorrowing widow; and for every widow there is a fatherless child. For every penny spent for war there is a sigh of grief; for every shilling there is a tear of sorrow; and for every dollar there is a broken heart. The amount expended on this account in the civilized world in one year would give a shelter to every pauper, a home to every unfortunate, and an education to every child. At the present rate of increasing expense it will not be long until this great chain will break of its own weight; until every nation will become bankrupt and every moderate taxpayer will become a pauper. As this time approaches the forces of international peace will become more numerous and more powerful. Humanity will shake off the shackles of barbarism and defy the god of war upon his throne. In this battle of reason, that tyrant of oppression, that ruler of ignorance, that demon of superstition, in whose decree there is no mercy, in whose judgment there is no justice, will be driven from his throne and relegated beyond the portals of a universal peace, to be remembered only as a horrible nightmare of an unholy and unrighteous past.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). The Secretary will read the bill.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Naval Affairs was, under the subhead "Pay, miscellaneous," on page 2, line 21, after the words "religious books," to strike out "expenses of purchasing paymasters' offices, including clerks, furniture, fuel, stationery, and incidental expenses," and on page 3, line 8, after the word "exceeding," to strike out "$30,000" and insert "$50,000," so as to read:

For commissions and interests; transportation of funds; exchange; mileage to officers while traveling under orders in the United States, and for actual personal expenses of officers while traveling abroad under orders, and for traveling expenses of civilian employees, and for actual and necessary traveling expenses of midshipmen while proceeding from their homes to the Naval Academy for examination and appointment as

midshipmen; for actual traveling expenses of female nurses; actual expenses of officers while on shore patrol duty; hire of launches or other small boats in Asiatic waters; for rent of buildings and offices not in navy yards, including the rental of offices in the District of Columbia; expenses of courts-martial, prisoners and prisons, and courts of inquiry, boards of inspection, examining boards, with clerks' and witnesses' fees, and traveling expenses and costs; expenses of naval defense districts; stationery and recording; religious books; newspapers and periodicals for the naval service; all advertising for the Navy Department and its bureaus (except advertising for recruits for the Bureau of Navigation); copying; ferriage; tolls; costs of suits; commissions, warrants, diplomas, and discharges; relief of vessels in distress; recovery of valuables from shipwrecks; quarantine expenses; reports; professional investigation; cost of special instruction at home and abroad, including maintenance of students and attachés; information from abroad and at home, not exceeding $50,000, and the collection and classification thereof; all charges pertaining to the Navy Department and its bureaus for ice for the cooling of drinking water on shore (except at naval hospitals), telephone rentals and tolls, telegrams, cablegrams, and postage, foreign and domestic, and post-office box rentals; and other necessary and incidental expenses.

The amendment was agreed to.

The next amendment was, on page 3, line 19, after the word "exceed," to strike out "$310,000" and insert "$190,000, and for necessary expenses for the interned persons and prisoners of war under the jurisdiction of the Navy Department, including funeral expenses for such interned persons or prisoners of war as may die while under such jurisdiction," and on page 4, line 1, after the words "in all," to strike out "$1,050,000" and insert "$915,000," so as to make the proviso read:

Provided, That the sum to be paid out of the appropriation, under the direction of the Secretary of the Navy, for clerical, inspection, and messenger service in navy yards, naval stations, and purchasing pay offices for the fiscal year ending June 30, 1917, shall not exceed $190,000, and for necessary expenses for the interned persons and prisoners of war under the jurisdiction of the Navy Department, including funeral expenses for such interned persons or prisoners of war as may die while under such jurisdiction; in all, $915,000: *Provided*, That hereafter expenditures from the appropriation for obtaining information from abroad and at home shall be accounted for specifically if, in the judgment of the Secretary of the Navy, they may be made public, and he shall make a certificate of the amount of such expenditures as he may think it advisable not to specify, and every such certificate shall be deemed a sufficient voucher for the sum therein expressed to have been expended.

The amendment was agreed to.

The next amendment was, on page 4, after line 22, to insert:

For the purpose of expediting the transaction of the necessary departmental business in connection with the construction of new vessels herein and heretofore authorized and the increases in personnel, the Secretary of the Navy is authorized to employ, in accordance with the provisions of the civil-service act of January 16, 1883 (22 Stats. L., p. 403), during the fiscal year ending June 30, 1917, such civilian civil-service employees, in addition to those authorized in the legislative, executive, and judicial appropriation act approved May 10, 1916, as may be necessary to carry on the work of the Navy Department and its various bureaus and offices, and the sum of $250,000 is hereby appropriated for the pay of such additional employees, the total of such expenditures not to exceed for: Office of the Secretary, $10,000; Office of Chief of Naval Operations, $5,000; Office of Solicitor, $4,000; Office of Judge Advocate General, $6,000; Bureau of Navigation, including one chief of division, at $2,250, $18,000; Office of Naval Intelligence, $5,000; Bureau of Steam Engineering, $31,000; Bureau of Construction and Repair, $41,000; Bureau of Ordnance, $10,000; Bureau of Supplies and Accounts, $30,000; Bureau of Medicine and Surgery, $10,000; Bureau of Yards and Docks, $75,000; and Office of Naval Militia, $5,000: *Provided*, That a report shall be submitted to Congress at the beginning of its next regular session showing in detail the number of persons so employed, their duties, and the compensation paid to each: *And provided further*, That the sum of $25,000 is hereby appropriated for the purchase of such stationery, drawing materials, and furniture as may be required by the various bureaus and offices of the Navy Department to carry out the duties imposed upon them.

Mr. LA FOLLETTE. Mr. President, I desire to make an inquiry before the committee amendment, beginning with line 23, on page 4, and extending over to line 8, on page 6, is acted upon, which is, as I gather from the reading, an increase over the House appropriation of some $250,000.

Mr. SWANSON. It is not an increase, if the Senator will permit me. We have increased the personnel of the Navy by some 20,000 men and also the personnel of the Marine Corps. We have likewise increased the authorizations for construction. The legislative bill, which was passed long before the pending bill was reported, did not make any provision for the additional positions required in connection with drafting and other things. Heretofore a lump sum has been allowed for these purposes out of the amount appropriated for construction; but there is no specified limit as to what the department might do; they could spend a million dollars or one million and a half dollars or $300,000. We thought it was wiser to specify what they should have. Therefore we have changed the general appropriation usually carried, to meet the increased expenditure, on account of the additional construction provided for, and have specified where the additional assistance shall be available. We thought that was the better plan.

Mr. LA FOLLETTE. Am I to understand the Senator to mean by his explanation that the $250,000 provided here is simply to meet expenses or obligations already incurred under legislative acts already passed?

Mr. SWANSON. No; not already passed, but such as will occur on the passage of this bill; for instance, increased construction.

Mr. LA FOLLETTE. Ah, yes. For instance, if the increases in this bill recommended by the committee are adopted by the Senate and become a law, then this is necessary?

Mr. SWANSON. This is absolutely necessary. If the House provisions were retained——

Mr. LA FOLLETTE. Mr. President, I am going to ask, then, that this amendment be passed over until the amendments are considered which, if adopted, will make necessary this expenditure.

Mr. SWANSON. If the Senator will permit me, the House provisions for five battle cruisers, and for the increase of the personnel by 15,061 men, and for the increase in the Marine Corps, and other increases, would necessitate a large increase—possibly three-fourths of this. It is limited simply to 1917. There is no clerk hire provided for longer than the fiscal year 1917. It is all for immediate work.

Mr. LA FOLLETTE. I understand that at least a portion of the appropriation which it is proposed that the Senate shall now adopt as in Committee in the Whole is contingent upon whether amendments which have not yet been considered by the Senate are adopted.

Mr. SWANSON. I will say to the Senator that if those amendments are not adopted I will recur to this one and give an opportunity to have the action on it reconsidered.

Mr. LA FOLLETTE. Why would it not be just as well, I will ask the Senator, to pass over this amendment until those have been acted upon?

Mr. SWANSON. I would prefer acting on this one now. It would take too much time to go back and recur to matters like this. It seems to me better to dispose of them as we go along.

Mr. LA FOLLETTE. I do not believe it will expedite matters to proceed in that way.

Mr. SWANSON. If the Senator insists on it, I will ask that it be passed over.

The PRESIDING OFFICER. The amendment will be passed over, without objection.

The reading of the bill was resumed.

The next amendment was, on page 6, after line 8, to insert:

Hereafter interned persons and prisoners of war, under the jurisdiction of the Navy Department, who are or may become insane, shall be entitled to admission for treatment to the Government Hospital for the Insane.

The amendment was agreed to.

The next amendment was, on page 6, line 18, after the word "allowances," to strike out: "All orders issued by the Chief of Naval Operations in performing the duties assigned him shall be performed under the authority of the Secretary of the Navy, and his orders shall be considered as emanating from the Secretary, and shall have full force and effect as such," and on page 7, line 2, after the words "Marine Corps," to insert:

Provided, That hereafter the Chief of Naval Operations shall, under the direction of the Secretary of the Navy, be charged with the operations of the fleet with the preparation and readiness of plans for its use in war. This shall include the direction of the Naval War College, the Office of Naval Intelligence, the office of Target Practice and Engineering Competitions, the operation of the Radio Service and of other systems of communication, the operations of the Aeronautic Service, of Mines and Mining, of the naval-defense districts, Naval Militia, and of the Coast Guard when operating with the Navy; the direction of all strategic and tactical matters, organization, maneuvers, target practice, drills and exercises, and of the training of the fleet for war; and the preparation, revision, and enforcement of all tactics, drill books, signal codes, and cipher codes. The orders issued by the Chief of Naval Operations in the performance of the duties enumerated in this paragraph shall be considered as emanating from the Secretary of the Navy when authorized or countersigned by him, and shall have full force and effest as such. The Chief of Naval Operations shall be charged with the preparation, revision, and record of Regulations for the Government of the Navy, Naval Instructions, and General Orders. He shall advise the Secretary concerning the movements and operations of vessels of the Navy and prepare all orders issued by the Secretary in regard thereto, and shall keep the records of service of all fleets, squadrons, and ships. He shall advise the Secretary in regard to the military features of all new ships and as to any proposed extensive alterations of a ship which will affect her military value, and all features which affect the military value of dry docks, including their location; also as to matters pertaining to fuel reservations and depots, the location of radio stations, reserves of ordnance and ammunition, fuel, stores, and other supplies of whatsoever nature, with a view to meeting effectively the demands of the fleet. In preparing and maintaining in readiness plans for the use of the fleet in war he shall freely consult with and have the advice and assistance of the various bureaus, boards, and offices of the department, including the Marine Corps headquarters, in matters coming under their cognizance. After the approval of any given war plans by the Secretary it shall be the duty of the Chief of Naval Operations to assign to the bureaus, boards, and offices such parts thereof as may be needed for the intelligent carrying out of their respective duties in regard to such plans. The Chief of Naval Operations shall from time to time witness the operations of the fleet as an observer. He shall ex officio be a member of the General Board.

So as to make the clause read:

Hereafter the Chief of Naval Operations, while so serving as such Chief of Naval Operations, shall have the rank and title of admiral, to take rank next after the Admiral of the Navy, and shall, while so serving as Chief of Naval Operations, receive the pay of $10,000 per annum and no allowances. To assist the Chief of Naval Operations in performing the duties of his office there shall be assigned for this exclusive duty not less than 15 officers of and above the rank of lieutenant commander of the Navy or major of the Marine Corps: *Provided*, That hereafter the Chief of Naval Operations shall, under the direction of the Secretary of the Navy, be charged with the operations of the fleet with the preparation and readiness of plans for its use in war. This shall include the direction of the Naval War College, the Office of Naval Intelligence, the Office of Target Practice and Engineering Competitions, the operation of the Radio Service and of other systems of communication, the operations of the Aeronautic Service, of Mines and Mining, of the Naval Defense Districts, Naval Militia, and of the Coast Guard when operating with the Navy; the direction of all strategic and tactical matters, organization, maneuvers, target practice, drills and exercises, and of the training of the fleet for war; and the preparation, revision, and enforcement of all tactics, drill books, signal codes, and cipher codes. The orders issued by the Chief of Naval Operations in the performance of the duties enumerated in this paragraph shall be considered as emanating from the Secretary of the Navy when authorized or countersigned by him, and shall have full force and effect as such. The Chief of Naval Operations shall be charged with the preparation, revision, and record of Regulations for the Government of the Navy, Naval Instructions, and General Orders. He shall advise the Secretary concerning the movements and operations of vessels of the Navy and prepare all orders issued by the Secretary in regard thereto, and shall keep the records of service of all fleets, squadrons, and ships. He shall advise the Secretary in regard to the military features of all new ships and as to any proposed extensive alterations of a ship which will affect her military value, and all features which affect the military value of dry docks, including their location; also as to matters pertaining to fuel reservations and depots, the location of radio stations, reserves of ordnance and ammunition, fuel, stores, and other supplies of whatsoever nature, with a view to meeting effectively the demands of the fleet. In preparing and maintaining in readiness plans for the use of the fleet in war he shall freely consult with and have the advice and assistance of the various bureaus, boards, and offices of the department, including the Marine Corps headquarters, in matters coming under their cognizance. After the approval of any given war plans by the Secretary it shall be the duty of the Chief of Naval Operations to assign to the bureaus, boards, and offices such parts thereof as may be needed for the intelligent carrying out of their respective duties in regard to such plans. The Chief of Naval Operations shall from time to time witness the operations of the fleet as an observer. He shall ex officio be a member of the General Board: *Provided further*, That if an officer of the grade of captain be appointed Chief of Naval Operations he shall have the rank and title of admiral, as above provided, while holding that position: *Provided further*, That should an officer, while serving as Chief of Naval Operations, be retired from active service he shall be retired with the lineal rank and the retired pay to which he would be entitled had he not been serving as Chief of Naval Operations.

Mr. WADSWORTH. Mr. President, I do not rise in any spirit of hostility to this amendment at all. Will the Senator from Virginia state, by way of explanation, what the relations of the Chief of Operations will be to the General Board of the Navy under this very much enlarged control, practically as deputy commander in chief, as it were, of the Navy?

Mr. SWANSON. This is not an enlargement at all. This is simply putting in the form of law the present regulations in connection with the Chief of Operations. These regulations have been promulgated, and we want to make the Chief of Operations stronger, more efficient, and more permanent, and so the regulations at present existing in the Navy have been put into law.

Mr. LODGE. There is nothing new in it at all.

Mr. TILLMAN. It is already in the regulations.

The PRESIDING OFFICER (Mr. THOMPSON in the chair). The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 9, after line 9, to insert:

An officer of the Corps of Civil Engineers may be detailed as assistant to the Chief of the Bureau of Yards and Docks and an officer of the Corps of Naval Constructors as assistant to the Chief of Bureau of Construction and Repair; and, in case of death, resignation, absence, or sickness of the chief of bureau, shall, unless otherwise directed by the President, as provided by section 179 of the Revised Statutes, perform the duties of such chief until his successor is appointed or such absence or sickness shall cease.

The amendment was agreed to.

The next amendment was, on page 9, after line 19, to insert:

That hereafter such amount may be expended annually for pay of drafting, technical, and inspection force, from the several lump-sum appropriations in which the specific authority for such expenditure is given, as the Secretary of the Navy may deem necessary; and the Secretary of the Navy shall each year, in the annual estimates, report to Congress the number of persons so employed, their duties, and the amount paid to each.

The amendment was agreed to.

The next amendment was, on page 10, after line 11, to insert:

Fuel oil: For an investigation of fuel oil and gasoline adapted to naval requirements, including the question of supply and storage, and for the purchase of necessary instruments and appliances and the extension of the naval fuel-oil equipment plant at the navy yard, Philadelphia, Pa., and the employment of civilian fuel-oil experts and assistants, $60,000.

Mr. NORRIS. Mr. President, I should like to inquire of the Senator whether the committee made any investigation on its own account of this oil proposition?

Mr. SWANSON. I will say to the Senator that since 1908 all of our destroyers have used oil, and since 1911 all of our battleships have used oil. Unless we can get a good low-grade oil that can be utilized and that is efficient it is very expensive. This is to make an experiment in our own navy yard at Philadelphia for the purpose of ascertaining the cheapest and most efficient low-grade oil we can get. By experiments and discoveries we can save a great deal of money in this way.

Mr. NORRIS. What kind of oil do these vessels use now? Can they use crude oil in their engines?

Mr. SWANSON. They use crude oil—the lowest grades of oil.

Mr. NORRIS. Where is the supply secured?

Mr. SWANSON. They get some of it from Oklahoma, some of it from California, and some from other places, wherever it is offered by the lowest bidder.

Mr. NORRIS. Has the Navy Department undertaken to develop any oil wells?

Mr. SWANSON. We have a fight now in the Senate in connection with some oil lands that have been set aside for the naval reserve, which they are trying to take from us, and we are opposing that course.

Mr. NORRIS. The Senator refers to a bill pending before the Public Lands Committee; but the particular information I wanted to get, if I could, from the Senator, was whether or not the Navy Department has so far actually drilled any oil wells.

Mr. SWANSON. It has not. Some money was appropriated last year to make some experiments, but what the results have been I do not know. But we have not been able to use the lands that have been set aside, because we have not the pipe lines, and the title to them is involved; and until that is fixed up nothing can be done.

Mr. NORRIS. The title is only involved in part. It is conceded that these lands set aside, according to a law passed by Congress, as a reserve for a supply of oil for the Navy belong to the United States; but there are other people, private parties, who claim title to a large number of tracts within the reserve.

Mr. SWANSON. At the last session of Congress the Naval Affairs Committee recommended and Congress made an appropriation to make experiments and investigations in connection with these oil lands, and to employ counsel to defend the title, which is being done; and this is simply to make some experiments as to the kind of fuel which can be best used in the Navy economically and efficiently.

Mr. NORRIS. What is the intention of the Navy Department in regard to that proposition? Is it the intention that the Navy Department will drill oil wells in these reserves and supply itself from the oil fields belonging to the Government?

Mr. SWANSON. If the Senator will permit me, this $60,000 does not appertain to that at all. This $60,000 appropriation is to make experiments to ascertain the best grades of fuel oil to use; to get experts to ascertain what kind of fuel oil, whether bought or used out of our own oil wells, is best adapted to our purposes. There is a very long letter here from the Secretary of the Navy showing the urgent necessity of that in order to find the most economical use of oil for these ships.

Mr. NORRIS. I will say to the Senator that I am not moved to ask my question by any opposition to this amendment. I am not opposed to the amendment; I am in favor of it.

Mr. SWANSON. I think the purpose of the Navy is to do all it can to get possession of these oil lands that have been set aside as a naval reserve.

Mr. LODGE. That is not covered by this appropriation at all. This appropriation has nothing whatever to do with the oil lands.

Mr. NORRIS. I should think it might be used for that purpose. It says:

For an investigation of fuel oil and gasoline adapted to naval requirements, including the question of supply and storage.

Mr. LODGE. If the Senator will allow me, it will take some time, but I will read the reasons for this appropriation. I mean, we have a most elaborate statement of it. It was not projected into the bill in ignorance. I have the full statement here.

Mr. NORRIS. I will not ask the Senator to read that unless he wants to do so——

Mr. LODGE. It is a page of fine print.

Mr. NORRIS. Because I am in favor of this amendment. I want it done. The Senator from Massachusetts, and also the Senator from Virginia, seem to be laboring under the impression that I am opposed to it. I wanted to find out—and I thought this amendment was a good place to find out—if the Senator knew just exactly what the intention of the department was and what success it had had in regard to the supply of fuel oil.

Mr. SWANSON. If the Senator will permit me, the Secretary of the Navy has written to the chairman of the committee asking him to do everything he can, to me asking me to do all that I can, and also to Senator LODGE, asking him to do all that he can, to protect and take care of the naval reserves that have been set aside for the Navy. We will soon require about 5,000,000 barrels of oil a year to take care of our Navy.

Mr. BORAH. You are not trying to do that in this bill?

Mr. SWANSON. No; it is not in this bill.

Mr. BORAH. It will take some time to do that.

Mr. LODGE. It is not touched in this bill.

Mr. NORRIS. I heard the Secretary of the Navy on the stand before the Committee on Public Lands; and I agreed with him, and do agree with him, in the main, on that point. I want to help him accomplish what he is trying to do. It was the Secretary's idea that this naval reserve was itself to be used as a great storage supply of oil for the Navy, unless the Government loses the suits in which the title to quite a large number of tracts included within this reservation is involved. In that case the private parties, by sinking wells on their land, might perhaps drain the public land. I thought an investigation of that question would be included in this item, because it says, "including the question of supply."

Mr. PHELAN. Mr. President, the Senator from Nebraska possibly has in mind the action of the Attorney General in prosecuting the suits in naval reserve No. 2 in California. An appropriation of $50,000 was made by the last Congress for the prosecution of those suits, which was again repeated this year. While the Assistant Attorney General was on the stand before the Public Lands Committee I asked if, in the prosecution of those suits, any money was used which had been set aside for the Navy, such as this item for the investigation of oil lands. I must confess that I did not receive a satisfactory answer, and I believe the intimation was very clear that the money appropriated in the naval bill for the purpose of investigating the sources of oil supply, storage, etc., was diverted for the purpose of paying counsel and other expenses of the prosecution of litigation.

I judge that in the Senator's mind there is that confusion—what part of the money is used for litigation and what part of the money is used legitimately for the investigation of the subject, so that the Navy Department may be informed on this subject. That department is indeed in need of information because it has recently raised a hue and cry that the oil resources of the United States were being appropriated by private parties to the detriment of the Navy, whereas the facts are that the only matter in dispute between the Navy and the oil operators relates to naval reserve No. 2 in California, consisting of 30,000 acres, 20,000 acres of which, two-thirds, are patented lands, or lands clear listed for patent; and there is only a matter, with other deductions, according to the estimates, of from four to seven thousand acres of land that is capable of any further diversion from private ownership. Hence this naval-oil reserve, this so-called naval reserve No. 2, which is involved in so much controversy, is owned to the extent of two-thirds of its area by private operators, acquired under then existing law, held by unassailable title.

Hence, the Navy Department was not justified in misleading many good people into believing that the oil operators in California were without warrant either disposed or in a position to interfere in any way with the use of oil by the Navy.

They are simply taking care of their own oil, and the oil is available for the Navy just as soon as the Navy is ready to pay for it. There is no way of dispossessing those two-thirds owners, held of unassailable title, except by compensation. Not certainly by confiscation. The litigation which is now being prosecuted, while no doubt zealously conducted, has in many cases been conducted in a spirit of hostility to men who may be likened to the pioneers of this country, who went into the hard and difficult places, as the western Senators understand, and who have, by their enterprise and industry, developed natural resources which otherwise never would have been known.

It has been asked by the Senator from Nebraska if it is the intention of the Navy Department to drill wells. The Government has never drilled a well. The Government, as such, has never done anything to develop the land, because it has been the policy of this Government from the beginning to offer inducements and encouragement to the pioneer to develop its mineral resources; and that this is to-day a country rich in minerals is due simply to the wisdom of the policy of the law, and not because the Government itself has done any pioneering, any work of development.

I may say, in this connection, that had the Government spent out of the Federal Treasury, as is so frequently done now, large sums of money for the purposes of development, the cost would have exceeded the value of the output, because we all know in the West that the pioneer has, in the greater number of instances, failed in his enterprise, and it is only the few who have succeeded. They, in the minds of men, are the most conspicuous, however, until the impression has gone abroad that private individuals have profited by the neglect of the Government in developing, on its own account, mineral lands; whereas it is a fact that were the mineral lands developed by the Government, the Government would have been, in a money sense, the loser, and the great West possibly would not have been opened by an enterprising and intelligent population of men and women, who are the glory of their common country.

I do not wish to delay in any way the proper discussion of this measure; but I must say here and now that the Navy Department has created a false impression as to interference in any way by the men of California and the West with the oil supply, so called, of the Navy. It is well to remind the Senate at this time that the presidential withdrawal of these lands in September, 1909, was in the nature of an exercise of usurped power. The Constitution provides that only Congress, having exclusive jurisdiction, shall dispose of the public lands; and the President, in spite of that provision of the Constitution, withdrew these lands in California. The Supreme Court has decided by a divided court that because Congress has not disaffirmed the unauthorized act of the President, it has, by some unknown principle or process of jurisprudence, become a valid act. Because Congress failed to disaffirm an unauthorized act of the Executive, it became a valid act!

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Colorado?

Mr. PHELAN. I yield.

Mr. THOMAS. If the Senator will permit me, I think the Supreme Court in that case decided that power usurped becomes legitimate if frequently exercised.

Mr. PHELAN. I am very glad that the Senator from Colorado, so eminent an attorney, reinforces and affirms my understanding of that decision. There was a very able dissenting opinion in that case, which, in the estimation of many lawyers, is regarded as a very sound interpretation of the law. But what we are doing in the contemplated legislation is an appeal from the law to the lawmaker. Hence it is not necessary to criticize the opinion of the court, except in some measure to justify those men who went in after the presidential withdrawal and whose lands I do not refer to. But I say that two-thirds of that area in California is held by unassailable title by the men who went in before the presidential withdrawal, and that others, having been advised by learned counsel that the presidential withdrawal was unauthorized, and who established rights prior to the act of Congress of June, 1910, which did authorize subsequent withdrawals, were safe in making their investment and employing their labor. These men, victims of a questionable interpretation of the law, now ask preferential treatment in leasing on a one-eighth royalty the lands on which they have spent their time and money. This is the essence of the matter which so alarmed the Navy.

Mr. CLARK of Wyoming. Mr. President, I am glad to hear the remarks of the Senator from California, because, clear and explicit as they are, they tend to clear up a situation that has been greatly misunderstood over the country, not only in regard to oil but in regard to our other natural resources. I want to say, however, that I am very glad indeed that the committee has seen fit to insert this amendment in the bill providing for a real investigation of the oil supply and of the danger that threatens it, if there be any, because it seems that from direct governmental action we can get no unity of opinion.

At the present time, in regard to the California situation and in regard to the oil situation in other States of the West, on the one hand, a drastic course is demanded by one department of the Government, upon the theory and upon the avowed statement that unless such a course is taken we might as well quit building battleships that shall use oil as fuel. In other words, it is asserted that the whole idea of oil as a fuel for the Navy is threatened unless the Government at once goes in and takes possession of all these oil fields. On the other hand, the head of the department which has these matters directly in charge says, in private and in statements in the newspapers, that there is no danger to the oil situation of the country so far as the Navy is concerned.

I for one will be glad to have some commission or some committee that will act in an unbiased way and report to Congress

what is the exact situation in regard to our oil supply, because I am satisfied that if an unbiased report is made there will at once go out an invitation to people all over this country to go and make proper use of these supplies which the good Lord has put underground in the United States and to use them for the benefit of the whole country.

Mr. PHELAN. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from California?

Mr. CLARK of Wyoming. Certainly.

Mr. PHELAN. For the purpose of the RECORD, it may be stated that whereas the Senator from Virginia stated that 5,000,000 barrels of oil were necessary for the Navy annually, as a matter of fact only about 600,000 barrels of oil are being consumed to-day, but that the increase of the Navy in the course of five, six, or seven years will probably require the amount of 5,000,000 barrels annually. Now, in the 3,000,000 acres of Government oil land there is estimated to be 175,000,000 barrels of oil, as against a yearly consumption to-day of 600,000 barrels. So the experts are of the opinion that the Navy is not justified, as the Senator has said, in informing the country that the oil supply is about to be depleted, and that oil-burning ships will have to be abandoned unless some remedy is given on the part of the Government.

Mr. CLARK of Wyoming. It is exactly the same cry that has been made year after year whenever the natural resources of this country have been sought to be touched and made available. Less than five years ago it was asserted by the head of a scientific bureau of the Government that unless steps were taken to stop the indiscriminate mining of coal and to acquire coal lands we had not more than enough coal to last this country 50 years, when, as a matter of fact, everybody who has investigated the subject knows that we have enough to last this country 50,000 years at the present rate of consumption, and the rate of consumption is annually decreasing every year by the use of additional fuels.

Mr. PHELAN. I hope it will not be understood from what I have said that I oppose this item. I am heartily in favor of it; indeed I would be in favor of increasing it on the theory that the Navy is entitled to information which it does not now possess.

Mr. WALSH. Mr. President, I wish to supplement what has been said on this matter by remarking that I learned with very great regret from the statement of the Senator having charge of the bill that this item bears no relation whatever to the matter of deposits of oil within the naval reserve. Were we not so advised from so authoritative a source I would say that it must of necessity refer to that source of supply. The expenditure is to be made for the purpose of investigating among other things the question of supply and storage of fuel oil for the use of the Navy. It would seem to me that that language is not only sufficiently comprehensive to embrace an inquiry of that character, but it could hardly be given any other interpretation.

The Senator advises us that he, as well as the distinguished ranking Republican member of the committee, have been requested by the Navy Department to do everything that they can to preserve intact these naval reserves. I should be glad to lend whatever feeble support I may be able to contribute to that policy if upon an investigation of the matter it seems economically desirable to do so, having in mind the necessities and the requirements of the Navy.

But, Mr. President, I am perfectly satisfied that neither of the distinguished members of the Naval Committee nor the Navy Department itself is in possession of any information of such a character as ought to govern and influence this body or the coordinate branch in reference to legislation upon this subject. Among other things, for instance, here is a very considerable tract of land set apart as a naval reserve—tens of thousands of acres. That looks as if it were a great body of land available as oil land, but the truth about the matter is that a very considerable area of that reserve has passed out of the hands of the Government and is now owned by private individuals whose title is not open to question and whose title has not been questioned by anyone. That eliminates so much from the reserve. Then title to another very considerable portion of the reserve has passed out of the hands of the Government. The right of the party to whom it has gone is challenged by the Government and suits are now in progress to reinvest the Government with the title to the lands with which it has thus parted. Just exactly how much land is thus involved in those lawsuits and what the prospects are of recovering in those lawsuits is a matter concerning which the information that has been given to us is not particularly definite or satisfying. We shall not be able to know much, if anything, about the extent of our resources here until we have some information along that line.

But more important than that, Mr. President, are two other considerations. It is insisted quite strenuously and apparently with much persuasive force that the lands thus held in private ownership are interspersed among the entire body of lands included within the naval reserve, and that the owners of the private lands are entitled to sink their wells and pump dry the whole pool beneath the lands held by the public as well as those held in private ownership, and that unless the Government goes to work and pumps as well as the private owners the private owners will soon exhaust the entire pool or, at least, will exhaust the pool in the course of time. On the other hand, it is disputed that the geological conditions are such as to permit the depletion of the lands in that way. Of course, if that contention is sound, it would be the height of folly to preserve these lands as a part of a naval reserve unless the Government goes to work at once to prospect the lands which it owns and engages in the work of exhausting the pool in competition with the private interests, and if that is sound we must then either abandon the naval reserve or we must immediately make provision for pumping the lands held in public ownership and storing the product for future use.

Then, Mr. President, that involves another consideration. These reserves are far inland. The California reserve is away off in the desert, in the southeastern part of the State. The reserve in the State of Wyoming is something over a thousand, possibly fifteen hundred miles from the seaboard. If we are going to utilize them, evidently transportation facilities must be provided so that the product of the operations, if the Government is going to carry on any mining operations, may be transported to the seaboard, where it may be utilized for fuel purposes. Consequently the question addresses itself as to the advisability and the economy of constructing transportation systems for the purpose of making this supply available.

Then, Mr. President, beyond all that, of course anybody who knows anything about this business recognizes that it is not profitable, that it is not economical, to take oil out of the ground which contains valuable gasoline and other high-priced products of that character and use it for fuel purposes, and that in order to handle this thing economically gasoline and other high-priced products must be extracted and the refuse used for fuel purposes only. In other words, there is a refining proposition that is included in the general matter of the utilization of these naval reserves.

Bear in mind I do not mean to assert that it is not a wise policy for the Government to reserve these great deposits of oil for the use of the Navy; but, Mr. President, the question whether they ought to be reserved as is proposed or ought to be allowed to be appropriated by legitimate laws applicable to the case, as has been done in the past, is a question of the most profound importance, and with respect to many features of which we have not the information that we need in order to guide us to a proper conclusion as to what ought to be done with these reserves.

Now, I have very great respect for the judgment of the distinguished Senator from Virginia who has charge of this bill, but I do not think that he has any more definite information on this matter than I have. I should hesitate a long time to say that it is a good thing to let these reserves stay just exactly as they are, and I should hesitate a very long time to say that they ought to be turned over the same as all other public lands for exploitation by private individuals.

Accordingly, Mr. President, if the language of the amendment is not broad enough to authorize a thorough investigation by the Navy Department into the advisability of preserving those naval reserves and to investigate how available they are or may be made for the purpose of supplying the needs of the Navy, I shall tender an amendment to enlarge the scope of the amendment. My judgment about it is that the language is ample, but in view of the statement made by the Senator in charge of the bill, if the parliamentary situation will permit, I will offer the following: After the word "storage," in line 14, on page 10, I move to insert:

And the availability, economically and otherwise, of such supply as may be afforded by the naval reserves on the public domain.

Mr. SWANSON. I accept that amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SHEPPARD. I offer an amendment to the pending bill, which I ask may lie on the table.

The PRESIDING OFFICER. The amendment will lie on the table and be printed.

The next amendment was, on page 10, line 22, after the word "aircraft," to insert "including dirigibles," so as to make the clause read:

Aviation: For aviation, to be expended under the direction of the Secretary of the Navy for procuring, producing, constructing, operating, preserving, storing, and handling aircraft, including dirigibles, and appurtenances, maintenance of aircraft stations and experimental work in development of aviation for naval purposes, $3,500,000: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for drafting, clerical, inspection, and messenger service for aircraft stations shall not exceed $25,000.

Mr. SWANSON. I move, in line 22, to insert the word "rigid" before "dirigibles."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 11, after line 2, to strike out "Advisory committee for aeronautics: For traveling expenses of members and employees, $2,000; 2 technical assistants, at $2,500 each; 1 clerk, at $1,500; 1 clerk, at $1,000; 1 draftsman, at $2,000; 1 draftsman, at $1,000; 2 laborers, at $660 each; 3 mechanics, at $1,200 each; rent of office, $1,200; supplies, $7,800; special reports, $5,000; movable combination field office, machine shop, dynamometer shed, hangar, and power plant, $15,000; dynamometer carriage and truck, $18,000; aeroplane, including motor, $10,000; transmission dynamometer, $1,000; ripograph, $1,000; stabilizer, $1,500; anemometers, barographs, inclinometers, incidence indicators, $1,500; miscellaneous supplies, spare parts for operation of field plant, $5,580; in all, $85,000"; and insert:

Advisory committee for aeronautics: For traveling expenses of members and employees; 2 technical assistants, 2 clerks, 2 draftsmen, 2 laborers, 3 mechanics; rent of office in the District of Columbia, and rent of a site for shop, hangar, and experimental work under direction of the committee; supplies; special reports; movable combination field office, machine shop, dynamometer shed, hangar, and power plant; dynamometer carriage and truck; aeroplane, including motor; transmission dynamometer, ripograph, stabilizer; anemometers, barographs, inclinometers, incidence indicators; miscellaneous supplies, spare parts for operation of field plant; in all, $85,000.

Mr. SMOOT. Mr. President, this amendment provides "for traveling expenses of members and employees; two technical assistants, two clerks, two draftsmen, two laborers, three mechanics; rent of office in the District of Columbia," and so forth. There is no other appropriation bill that I know of which passes Congress without some limitation as to what you are going to pay draftsmen, laborers, mechanics, and so forth. As to the clerks, it does not state of what grade they are to be. Under this provision they can pay clerks $1,800; they may all be classed as fourth-class clerks. They may be classed as clerks of class 1, at $1,200. No definite rate of pay is provided in the amendment, but it appropriates a lump sum. There is no limitation as to the amount that shall be paid to laborers, clerks, and so forth.

Mr. SWANSON. If the Senator will permit me, if he will read the House provision for which this is offered as a substitute, it is there definitely stated——

Mr. SMOOT. I will ask the Senator——

Mr. SWANSON. If the Senator will permit me, the Smithsonian Institution, through a member of its advisory committee, stated that it was impossible for them to state definitely at what rate they could get experts. They did not ask to increase the appropriation at all, but to give some latitude until the clerks could be obtained and the difference in cost ascertained between the pay of a clerk and an expert. It requires some experts. They wrote us a letter stating that it would be better to have the same appropriation but to give them in the organization some latitude as to the salaries to be paid this year. After that is done they expect to have it fixed definitely. They are to organize this office with $85,000, and we thought we could fix some specific sums for experts, but they did not know at what amount they could get the persons they especially desired.

Mr. SMOOT. I wish to say to the Senator that there is not a head of a department who would not prefer a lump-sum appropriation. They then can use it in any way they wish; they could pay to any employee any salary they wish. If the salary is fixed by this advisory committee I will promise the Senator that it will be a very hard matter to change the salary fixed when we come to provide for the salaries in the legislative, executive, and judicial appropriation bill.

Mr. SWANSON. I fully agree with the Senator as to the necessity of having salaries fixed by Congress, but this department is being organized, they have no idea what they will have to pay, some of those employed will be ex-scientific experts, and they thought it was much better to give them this latitude at the time of the organization.

Mr. LODGE. If the Senator will allow me, I happen to be one of the Regents of the Smithsonian. This advisory committee on aeronautics was formed at the Smithsonian and was provided for by Congress. It is composed entirely of scientific men. The one who will have the expenditure of the sum is Dr. Walcott, the Secretary of the Smithsonian. He is not trying to load clerks on the Government, but it is impossible for him to tell about the cost of these scientific persons, and he has to have latitude. He does not want to pay the men highly. But if I were the Senator in charge of the bill, I would withdraw this amendment rather than waste time on it.

Mr. SMOOT. I have not asked the Senator to withdraw the amendment, but I would very much prefer to have the amendment withdrawn than to have clerks, draftsmen, laborers, and mechanics paid from a lump sum, with no amount specified, as Congress appropriates millions of dollars for the payment of the same kind of laborers and clerks, draftsmen, and mechanics, and if the salary at which these may be employed by the advisory committee on aeronautics is different from the salary paid in all the other departments, then the next year there will be a demand made from every department of the Government for increases, if the positions named in the proposed amendment is an increase over the regular salaries paid for the same positions in other departments.

Mr. SWANSON. If the Senator will permit me, one of the objects they desire to accomplish in investigating this matter is to get a good aeroplane. They are anxious to have a lump-sum appropriation, not an increased appropriation. They want to get the best experts they can to standardize our motors and our aircraft. They thought it was better to have this done without increasing the appropriation, but if the Senator from Utah wants me to do so to save time, I will withdraw the amendment.

Mr. SMOOT. I am not asking that the amendment be withdrawn.

The amendment was rejected.

The next amendment was, on page 12, line 19, after the words "Secretary of the Navy," to strike out "$387,737.73" and insert "and for retainer pay of officers and enlisted men, and traveling and other necessary expenses of the Naval Militia and National Naval Volunteers herein authorized, $1,270,737.73," so as to make the clause read:

Arming and equipping Naval Militia: For the pay, subsistence, and transportation of such portion of the Naval Militia as shall engage in actual service or instruction afloat or on shore, and for pay, transportation, and subsistence of any part of the Naval Militia as shall participate in any cruise, maneuvers, field instruction, or encampment of any part of the Regular Navy afloat or on shore; for prizes, trophies, and badges for excellence in gunnery exercises and target practice of the Naval Militia; for the purpose of providing for issue to the Naval Militia any stores and supplies or publications which are supplied to the Navy by any department for the actual and necessary traveling expenses, together with a per diem not to exceed $10 to be established by the Secretary of the Navy, of the Naval Militia Board appointed by the Secretary of the Navy; and for the necessary clerical and office expenses of the Division of Naval Militia Affairs in the office of the Secretary of the Navy, and for retainer pay of officers and enlisted men and traveling and other necessary expenses of the Naval Militia and national naval volunteers herein authorized, $1,270,737.73.

The amendment was agreed to.

The next amendment was, on page 12, line 24, after the words "Naval Militia of Illinois," to strike out "$100,000" and insert "$125,000"; in line 26, after the word "Minnesota," to strike out "$150,000" and insert "$165,000"; and, in the same line, after the words "in all," to strike out "$250,000" and insert "$290,000," so as to make the clause read:

For the purchase, repair, and alteration of a ship for the Naval Militia of Illinois, $125,000; for the repair of the U. S. S. *Topeka* for the Naval Militia of Minnesota, $165,000; in all, $290,000.

The amendment was agreed to.

The next amendment was, on page 13, after line 13, to insert:

Lease of naval lands: That authority be, and is hereby, given to the Secretary of the Navy, when in his discretion it will be for the public good, to lease for a period not exceeding five years, and revocable at any time, such property of the United States under his control as may not for the time being be required for public use and for the leasing of which there is no authority under existing law, and such leases shall be reported annually to Congress: *Provided*, That the authority herein granted shall not be held to apply to oil, mineral, or phosphate lands.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Navigation," on page 14, line 11, after the word "transportation," to strike out "$882,940" and insert "$1,010,524," so as to make the clause read:

Transportation: For travel allowance of enlisted men discharged on account of expiration of enlistment; transportation of enlisted men and apprentice seamen and applicants for enlistment at home and abroad, with subsistence and transfers en route, or cash in lieu thereof; transportation to their homes, if residents of the United States, of enlisted men and apprentice seamen discharged on medical survey, with subsistence and transfers en route, or cash in lieu thereof; transportation of sick or insane enlisted men and apprentice seamen to hospitals, with subsistence and transfers en route, or cash in lieu

thereof; apprehension and delivery of deserters and stragglers, and for railway guides and other expenses incident to transportation, $1,010,524.

The amendment was agreed to.

The next amendment was, on page 14, line 16, after the word "parties," to strike out "$184,477" and insert "$244,228.84"; in line 18, after the word "Navy," to insert "or Marine Corps"; and, on page 15, line 1, after the word "enlistment," to insert "*And provided further*, That the President is authorized in his discretion to utilize the services of postmasters of the second, third, and fourth classes in procuring the enlistment of recruits for the Navy and the Marine Corps, and for each recruit accepted for enlistment in the Navy or the Marine Corps the postmaster procuring his enlistment shall receive the sum of $5," so as to make the clause read:

Recruiting: Expenses of recruiting for the naval service; rent of rendezvous and expenses of maintaining the same; advertising for and obtaining men and apprentice seamen; actual and necessary expenses in lieu of mileage to officers on duty with traveling recruiting parties, $244,228.84: *Provided*, That any person who may hereafter enlist in the Navy or Marine Corps for the first time shall, in time of peace, if he so elects, receive discharge therefrom without cost to himself during the month of June or December, respectively, following the completion of one year's service at sea. An honorable discharge may be granted under this provision; but when so granted shall not entitle the holder, in case of reenlistment, to the benefits of an honorable discharge granted upon completion of an enlistment: *And provided further*, That the President is authorized in his discretion to utilize the services of postmasters of the second, third, and fourth classes in procuring the enlistment of recruits for the Navy and the Marine Corps, and for each recruit accepted for enlistment in the Navy or the Marine Corps, the postmaster procuring his enlistment shall receive the sum of $5.

The amendment was agreed to.

The next amendment was, on page 15, after line 17, to strike out:

Gunnery exercises: Prizes, trophies, and badges for excellence in gunnery exercises and target practice; for the establishment and maintenance of shooting galleries, target houses, targets, and ranges; for hiring established ranges, and for transportation of civilian assistants and equipment to and from ranges, $132,000.

The amendment was agreed to.

The next amendment was, on page 15, after line 23, to strike out:

Steaming exercises: Prizes, trophies, and badges for excellence in steaming exercises, to be awarded to the ships in commission for general efficiency and for economy in coal consumption, under such rules as the Secretary of the Navy may formulate, and for the purpose of classifying, compiling, and publishing the results of the competition, $3,000.

The amendment was agreed to.

The next amendment was, on page 16, after line 4, to insert:

Gunnery and engineering exercises: Prizes, trophies, and badges for excellence in gunnery and engineering exercises, to be awarded to ships in commission, under such rules as the Secretary of the Navy may formulate; for the purpose of printing, recording, classifying, compiling, and publishing the rules and results; for the establishment and maintenance of shooting galleries, target houses, targets, and ranges; for hiring established ranges, and for transporting civilian assistants and equipment to and from ranges, $135,000.

The amendment was agreed to.

The next amendment was, on page 16, line 17, after the word "each," to strike out "$1,428,000" and insert "$2,065,920," so as to make the clause read:

Outfits on first enlistment: Outfits for all enlisted men and apprentice seamen of the Navy on first enlistment, at not to exceed $60 each, $2,065,920.

The amendment was agreed to.

The next amendment was, on page 16, line 22, after the word "appropriations," to strike out "$950,000" and insert "$1,069,460," so as to make the clause read:

Maintenance of naval auxiliaries: Pay, transportation, shipping, and subsistence of civilian officers and crews of naval auxiliaries, and all expenses connected with naval auxiliaries employed in emergencies which can not be paid from other appropriations, $1,069,460.

The amendment was agreed to.

The next amendment was, on page 17, line 13, after the word "materials," to strike out "$270,000" and insert "$350,000," so as to make the clause read:

Instruments and supplies: Supplies for seamen's quarters; and for the purchase of all other articles of equipage at home and abroad; and for the payment of labor in equipping vessels therewith and manufacture of such articles in the several navy yards; all pilotage and towage of ships of war; canal tolls, wharfage, dock and port charges, and other necessary incidental expenses of a similar nature; services and materials in repairing, correcting, adjusting, and testing compasses on shore and on board ship; nautical and astronomical instruments and repairs to same; libraries for ships of war, professional books, schoolbooks, and papers; compasses, compass fittings, including binnacles, tripods, and other appendages of ship's compasses; logs and other appliances for measuring the ship's way, and leads and other appliances for sounding; photographs, photographic instruments and materials, printing outfit and materials, $350,000.

The amendment was agreed to.

The next amendment was, on page 17, line 19, after the word "four," to insert "from the active list," so as to make the clause read:

Ocean and lake surveys: Hydrographic surveys, including the pay of the necessary hydrographic surveyors, cartographic draftsmen and recorders, and for the purchase and printing of nautical books, charts, and sailing directions, $105,000: *Provided*, That the Secretary of the Navy is authorized to detail such naval officers not exceeding four from the active list as may be necessary to the Hydrographic Office.

The amendment was agreed to.

The reading was continued to line 7, page 20.

Mr. LEWIS. Mr. President, on page 20 I move to amend line 7, where the words "eighty thousand dollars" occur, by inserting "one hundred thousand dollars" in the item for the "Naval Training Station, Great Lakes."

Mr. LODGE. I have no objection to the Senator's amendment, but the committee amendments are to be first considered.

Mr. LEWIS. I beg pardon; I misunderstood what the bill was being read for.

Mr. LODGE. The committee amendments are to be first disposed of.

The PRESIDING OFFICER. The Chair will state to the Senator from Illinois that the bill is being read for action upon the amendments of the committee.

Mr. LEWIS. Very well.

The reading of the bill was continued.

The next amendment was, under the subhead "Bureau of Ordnance," on page 23, line 8, before the word "clerical," to strike out "chemists," and in the same line, after the word "clerical," to strike out "drafting, inspection," and in line 11, after the word "exceed," to strike out "$505,000" and insert "$220,000," so as to make the clause read:

Ordnance and ordnance stores: For procuring, producing, preserving, and handling ordnance material; for the armament of ships; for fuel, material, and labor to be used in the general work of the Ordnance Department; for furniture at naval magazines, torpedo stations, and proving grounds; for maintenance of the proving ground and powder factory and for target practice; for the maintenance, repair, or operation of horse-drawn passenger-carrying vehicles, and one motor-propelled passenger-carrying vehicle, to be used only for official purposes at naval magazines, the naval proving ground, Indianhead, Md., and naval torpedo stations; and for pay of chemists, clerical, drafting, inspection, and messenger service in navy yards, naval stations, and naval magazines: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, watchman, and messenger service in navy yards, naval stations, and naval magazines for the fiscal year ending June 30, 1917, shall not exceed $220,000; in all, $6,402,485.

The amendment was agreed to.

The next amendment was, on page 24, line 10, before the words "The Secretary of the Navy," to insert as a side heading, "Armor plant."

The amendment was agreed to.

The next amendment was on page 25, after line 7, to insert:

Batteries for merchant auxiliaries: For batteries for merchant auxiliaries (to cost not exceeding $3,300,000), to be available until expended, $1,650,000.

The amendment was agreed to.

The next amendment was, on page 25, line 13, after the word "ships," to insert "together with the necessary tools, cranes, and construction of ordnance storehouses," so as to make the clause read:

Ammunition for ships of the Navy: For procuring, producing, preserving, and handling ammunition for issue to ships, together with the necessary tools, cranes, and construction of ordnance storehouses, $13,720,000, to be available until expended.

The amendment was agreed to.

The next amendment was, on page 26, line 6, after the word "factory," to strike out "$100,000" and insert "$189,000, to be available until expended," so as to make the clause read:

For new and improved machinery and tools for torpedo factory, $189,000, to be available until expended.

The amendment was agreed to.

The next amendment was, on page 26, after line 17, to insert:

Contingent building fund: For minor extensions and improvements of public works under the cognizance of the Bureau of Ordnance, $10,000.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Yards and Docks," on page 27, line 20, after the word "pay," to insert "of technical, drafting, and inspection force and"; in line 23, after the word "clerical," to strike out "inspection, drafting"; in line 24, after the word "and," to strike out "other classified work" and insert "watchmen"; and on page 28, line 1, after the word "exceed," to strike out "$399,000" and insert "$250,000," so as to make the clause read:

Maintenance, Bureau of Yards and Docks: For general maintenance of yards and docks, namely: For books, maps, models, and drawings; purchase and repair of fire engines; fire apparatus and plants; machinery; operation or repair, purchase, maintenance of horses and driving teams; carts, timber wheels, and all vehicles, including motor-propelled and horse-drawn passenger-carrying vehicles to be used only for official purposes, and including motor-propelled vehicles for freight-

carrying purposes only for use in the navy yards; tools and repair of the same; stationary; furniture for Government houses and offices in navy yards and naval stations; coal and other fuel; candles, oil, and gas; attendance on light and power plants; cleaning and clearing up yards and care of buildings; attendance on fires, lights, fire engines, and fire apparatus and plants; incidental labor at navy yards; water tax, tolls, and ferriage; pay of watchmen in navy yards; awnings and packing boxes; and for pay of technical, drafting, and inspection force and of employees on leave, $1,774,000: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, messenger, and watchmen in the navy yards and naval stations for the fiscal year ending June 30, 1917, shall not exceed $250,000: *Provided further*, That hereafter worn-out motor-propelled vehicles for the Naval Establishment may be exchanged as a part of the purchase price of new ones.

The amendment was agreed to.

The next amendment was, under the subhead "Public works, Bureau of Yards and Docks," on page 28, line 10, after "$3,000," to insert "remodeling the old machine shop, building No. 18, for use as the main machine shop of the yard, not exceeding $300,000; in all, $303,000," so as to make the clause read:

Navy yard, Portsmouth, N. H.: Toilet and locker facilities, $3,000; remodeling the old machine shop, building No. 18, for use as the main machine shop of the yard, not exceeding $300,000; in all, $303,000.

The amendment was agreed to.

The next amendment was, on page 28, line 20, after "$7,000," to insert "improvements to heating system, $8,000; improvements to brass foundry, $7,900," and in line 22, after the words "in all," to strike out "$93,000" and insert "$108,900," so as to make the clause read:

Navy yard, New York, N. Y.: Dredging, to continue, $50,000; general distributing systems, $15,000; paving to continue, $10,000; ventilating system, $11,000; toilet and locker facilities, $7,000; improvements to heating system, $8,000; improvements to brass foundry, $7,900; in all, $108,900.

The amendment was agreed to.

Mr. O'GORMAN. I ask the indulgence of my colleague on the committee at this time to consider an amendment which I propose, and which has the approval of the committee. The amendment is now at the desk. It goes in at this point.

The PRESIDING OFFICER. As the Chair understands the situation the amendment would hardly be in order now except it were offered by the committee.

Mr. O'GORMAN. There is no objection, I understand, to the consideration of the amendment at this time, as it has the approval of the committee.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 28, after line 22, insert the following:

For improvement of East River, N. Y., with a view to providing a channel 35 feet deep from Long Island Sound to the navy yard, Brooklyn, N. Y., in accordance with so much of the report contained and published in House Document No. 188, Sixty-third Congress, first session, as applies to the channel through Hell Gate, $500,000.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 29, line 4, before the words "gun shop," to strike out "Addition to" and insert "Additional," and in the same line, after the word "cost," in parentheses, to insert "exclusive of equipment," so as to make the clause read:

Navy yard, Washington, D. C.: Additional gun shop (to cost exclusive of equipment not exceeding $600,000), $200,000; fireproof model storage, $65,000; fuel-oil storage, $18,000; toilet and locker facilities, $2,000; in all, $285,000.

The amendment was agreed to.

The next amendment was, on page 29, after line 7, to insert:

For the acquisition by purchase or condemnation of such lands in the vicinity of the navy yard, Washington, D. C., as in the judgment of the Secretary of the Navy it shall be deemed necessary or expedient to acquire for additions to said navy yard, $331,000, and in addition to said sum the unexpended balances of the appropriation in the act of March 3, 1907 (34 Stats., p. 1187), for a railroad bridge and track at the Washington Navy Yard, and of the appropriation in the act of June 24, 1910 (36 Stats., pp. 615–616), authorizing the Secretary of the Navy to enter into an agreement with the Philadelphia, Baltimore & Washington Railroad Co. for the construction of a track connection to the Washington Navy Yard, and the acquisition of land or property necessary in connection therewith, are hereby reappropriated and made available for the acquisition of such additional lands, and the several provisions of said act of June 24, 1910, so authorizing the Secretary of the Navy to enter into said agreement, are hereby amended to read as follows: "The Secretary of the Navy is hereby authorized and directed to enter into an agreement with the Philadelphia, Baltimore & Washington Railroad Co. for a sufficient and satisfactory track connection from a suitable point on the running tracks of said Philadelphia, Baltimore & Washington Railroad Co. to a suitable point on the track system of the Washington Navy Yard as said system is now or may be hereafter established: *Provided*, That said track connection, so far as the same may project or extend beyond the right of way or property now owned or occupied by the said railroad company, shall be constructed wholly upon a suitable and satisfactory right of way to be provided for such purpose by the United States, the title to which shall at all times remain in the United States: *Provided further*, That so far as may be consistent with the public interests said track connection, with its appurtenant turnouts and sidings, shall be located and constructed in, upon, over, and through public grounds, space and streets of the United States as the same are now or may be hereafter ascertained and established: *Provided further*, That the Secretary of the Navy is hereby authorized to acquire any part of the land or property necessary for said right of way by purchase or condemnation and to construct the connections, side tracks, turnouts, and switches necessary to the proper operation of the yard system in connection with the said branch track, and for the purpose of acquiring said right of way such part of the sums herein appropriated for additions to said navy yard as may be necessary are hereby made available: *Provided further*, That pending the completion of the track connection hereinbefore authorized and provided for the Philadelphia, Baltimore & Washington Railroad Co. is hereby authorized to maintain its track connection with the said navy yard as at present existing and to continue the operation thereof under such rules and regulations as may be established by the Commissioners of the District of Columbia for the governance thereof: *Provided*, That within 30 days after the completion of the new track connection with the said navy yard hereinbefore authorized and provided for said Philadelphia, Baltimore & Washington Railroad Co. shall, at its own expense, remove said existing track connection and restore and make the surface of the streets over and through which the same is laid satisfactory to the Commissioners of the District of Columbia: *Provided further*, That Congress reserves the right to alter, amend, or repeal this act: *Provided further*, That in the event that the Secretary of the Navy shall be unable to acquire the land or lands, or any parcel or parcels thereof, necessary or expedient in his judgment for the purposes aforesaid at a price deemed by him to be reasonable, then and in that event he is hereby authorized and directed to acquire the same by condemnation proceedings in the Supreme Court of the District of Columbia, to be instituted upon his request by the Attorney General of the United States, and to be conducted in substantial accord with the provisions of the act of Congress approved August 23, 1890 (26 Stats., pp. 412–413), providing a site for the enlargement of the Government Printing Office, which provisions are hereby made applicable to the proceedings for this purpose, and jurisdiction to hear and determine the same is hereby conferred upon the Supreme Court of the District of Columbia: *Provided further*, That the power and authority to acquire by purchase or condemnation, as the case may be, lands for the purposes aforesaid shall include the power and authority to purchase, condemn, or compensate for any wharves, bulkheads, structures, or other improvements upon any land, as well as any outstanding privately owned interests in the same, in the vicinity of the said navy yard deemed expedient for said additions within the area designated by the Secretary of the Navy that, though owned or claimed by the United States, is in the occupancy of private individuals, and the sums herein appropriated for are hereby made available for such purposes: *Provided further*, That upon the acquisition of the additional lands hereby authorized to be acquired all portions of public streets on which any squares acquired so abut and lying between the same, and all public alleys within said squares, together with such portions of streets and public alleys as lie between the present navy yard and the lands, or any part thereof, so acquired, are hereby abandoned and closed, and said portions of said streets and public alleys, together with the Government-owned land lying south of the north line of Potomac Avenue between the west boundary of the navy yard and the east line of Second Street east prolonged in a southerly direction, and such other Government-owned land along the water front of the Anacostia River lying between the east line of the said navy yard and the west line of Eleventh Street east prolonged in a southerly direction, shall be regarded as set apart and reserved for naval purposes: *Provided further*, That any balance not expended in said purchase or condemnation may be used toward improving the lands so added to the said navy yard and toward the extending of the railroad-track system thereof and connections thereto.

Mr. THOMAS. Mr. President, I notice that this amendment makes an appropriation of $331,000—

For the acquisition by purchase or condemnation of such lands in the vicinity of the navy yard, Washington, D. C., as in the judgment of the Secretary of the Navy it shall be deemed necessary or expedient to acquire for additions to said navy yard.

That is in addition to unexpended balances that are now in the Treasury, I suppose, and representing unexpended amounts of previous appropriations. Provision is then made by the amendment for purchasing a right of way for the building of a railroad track by the Philadelphia, Baltimore & Washington Railroad Co. to connect with the track system of the navy yard.

Then, on page 31 this amendment makes another disposition of this appropriation by permitting its use to purchase the right of way in addition to the original purpose for which it was appropriated. My understanding, in other words, of the amendment up to the point where I made the interruption is that it is proposed to appropriate moneys for the specific purpose of securing land, but it is also provided that the money may be expended, if necessary, for the purpose of purchasing a right of way to be occupied by the tracks of a railroad company. Apart from the apparent contradiction of the purposes for which the appropriation is to be used, I should like to inquire of the Senator having charge of the bill what amounts of unexpended balances are available under the provisions of the amendment and why it is necessary to make an appropriation of $331,000 to purchase lands necessary for naval uses, and at the same time to authorize the Secretary of the Navy to use it for the purpose of purchasing a right of way for a railroad?

Mr. SWANSON. Mr. President, if the Senator from Colorado will permit me, I desire to say that this amendment has been strongly urged by the Navy Department; and I have this morning received a letter from the department asking for an amendment of the amendment. The sum of $173,000 was appropriated for the purpose of getting land for a right of way, as I understand, and constructing a track for the railroad. That, however, has never been done. The department is now anxious to get about 20 acres, I believe, down there to answer the purposes of the navy yard for all time to come, and they are urging it.

Mr. THOMAS. That is to be a permanent acquisition?

Mr. SWANSON. It is to be a permanent acquisition. As I understand, the department has to buy some land to get the railroad track to the navy yard, and this appropriation is for that purpose. The tracks, as I understand, will be owned and used entirely by the navy yard. The department has insisted that it would take $331,000 to accomplish all this.

My attention has to-day been called—though I have not had an opportunity to carefully examine the amendment—to the fact that we already have an agreement with the Pennsylvania Railroad to construct a track. If that is true, there is no reason why the railroad should be released from that agreement. I have sent for the appropriation act, and I desire that this amendment go over, after it has been amended as the Secretary of the Navy has requested, in order that we may see whether the amendment which has been sent to me from the department accomplishes what I think ought to be accomplished.

Mr. WARREN. Mr. President, will the Senator from Colorado permit me to ask a question of the Senator in charge of the bill?

Mr. THOMAS. Yes.

Mr. WARREN. As I understand, it is proposed that the navy yard shall own the track from the yard to the point where it joins the track of the railroad? I assume the Senator proposes, although there may now be but one railroad in that section of the city, that the track built up to that point shall be open to any railroad?

Mr. SWANSON. The amendment which the Secretary of the Navy desires shall be included in the pending amendment allows any railroad to use it. The Secretary desires to have the power to contract with any railroad, and he desires to have an amendment adopted to that effect.

Mr. WARREN. I desire to say to the Senator from Virginia that the language should be so worded as to accomplish that end. That has been the rule heretofore as to Army posts.

Mr. SWANSON. I have here an amendment to that effect which was prepared by the Navy Department and was sent to us by the solicitor. These objections were out, and yesterday he sent me a provision which he desires to have offered as a substitute for the pending provision. After his proposed amendment is read, I desire to offer it as an amendment, and I should then like to have it go over until I can further look into the provision in relation to the Pennsylvania Railroad Co.

Mr. THOMAS. I think, Mr. President, that it is proper that I should add at this juncture, before taking my seat, that it would be better to make a specific appropriation for the purpose of purchasing as much of this right of way as may be necessary, and to make a distinct appropriation for the purpose of acquiring this additional acreage which the navy yard needs. I do not think it is good policy to make an appropriation of a given amount for a certain purpose, and then to invest the authorities with the power to expend that money for some other purpose if, in their judgment, any portion of it is necessary for such purpose.

Mr. SWANSON. It is simply a question as to how much will be needed. The money is already appropriated to get the right of way for the railroad tracks, and so forth.

Mr. THOMAS. If that is the case, then there is no need of diverting any part of this $331,000 for that purpose.

Mr. SWANSON. A portion of it may be needed to get the land; it will take $500,000, as the Navy Department states, to get what they need for the purposes of the navy yard.

Mr. THOMAS. I am not objecting to that.

Mr. SWANSON. They have $173,000 which has already been appropriated and which it is not necessary to reappropriate. They simply want $331,000 additional, making a half million dollars in all.

Mr. THOMAS. I have no objection to that at all. From the Senator's statement it is entirely plain that the entire amount appropriated is needed to obtain this additional land; and consequently I do not think that any of it should be expended or that any authority should be given to expend it for any other purpose. If an additional sum is necessary to secure the needed right of way or to perfect it, that should be arranged for by specific appropriation.

Mr. SWANSON. I should like to have adopted the amendment which has been suggested by the Secretary of the Navy, so as to carry out the suggestion made by the Senator from Wyoming [Mr. WARREN]; and then I should like to have the matter go over until I can look into the act appropriating $173,000, to see to what extent that act relieves the railroad from any obligation which it now has in connection with aiding in constructing the track.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment proposed by the Senator from Virginia.

The SECRETARY. On page 30, line 3, beginning with the words "The Secretary of the Navy," strike out the remainder of the page; on page 31 strike out all of lines 1, 2, and 3 and the following words in line 4: "are hereby made available," and insert in lieu of the matter stricken out the following:

The Secretary of the Navy is hereby authorized to enter into an agreement with such railroad company as he may deem proper for the purpose of establishing, maintaining, and operating a sufficient and satisfactory track connection with the railroad track system of the Washington Navy Yard as said system is now or may be hereafter established: *Provided*, That so much of said track connection as can not be constructed over any right of way or property now or hereafter owned or occupied by said railroad company shall be constructed wholly upon a suitable and satisfactory right of way to be provided by the United States, the title to which shall at all times remain in the United States: *Provided further*, That, so far as may be consistent with the public interests, said track connection, with its appurtenant turnouts and sidings, may be located and constructed in, upon, over, and through public grounds, space, and streets of the United States as the same are now or may be hereafter ascertained and established: *Provided further* That the Secretary of the Navy is hereby authorized to acquire any part of the land or property necessary for said right of way by purchase or condemnation and to secure the construction of the connections, sidetracks, turnouts, switches, etc., necessary to the proper operation of the yard system in connection with the said track connection; and for the purpose of acquiring said right of way such part of the sums herein appropriated for additions to said navy yard as may be necessary are hereby made available: *Provided further*, That authority is hereby granted to the railroad company, and its successors and assigns, entering into the agreement aforesaid to construct, maintain, and operate a bridge and approaches thereto for such track connection across the Anacostia River, D. C., at a point suitable to the interests of navigation, to an available point within or in the vicinity of the said navy yard, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

In line 20 on page 31 insert after the colon following the word "act" double quotation marks.

Mr. SWANSON. Mr. President, I should like to have the amendment to the amendment which I have sent to the desk adopted, and then I desire that the matter may go over until I can look into the act of 1911, which, I understand, put an obligation on some of the railroad companies to construct some of these tracks. I want to see whether or not this amendment to the amendment releases that obligation.

Mr. NORRIS. The Senator does not ask that the amendment be now voted on?

Mr. SWANSON. No; I simply ask that the committee amendment be pending. I do not care to have it now voted on; but I thought possibly the amendment suggested by the Secretary of the Navy would make it clearer, because, as I understand, it simply allows him to contract with any railroad to have access to the navy yard, so that it be not limited to one railroad.

Mr. THOMAS. I think the entire amendment had better go over without being adopted at the present time.

Mr. NORRIS. I should not like to see any part of the amendment adopted now.

Mr. SMOOT. Mr. President, I want to call the attention of the Senator in charge of the bill [Mr. SWANSON] to another matter. This amendment provides:

For the acquisition, by purchase or condemnation, of such lands in the vicinity of the navy yard, Washington, D. C., as in the judgment of the Secretary of the Navy it shall be deemed necessary or expedient to acquire for additions to said navy yard, $331,000; and, in addition to said sum, the unexpended balances of the appropriation in the act of March 3, 1907—

That was an act for a railroad bridge and track at the Washington Navy Yard—

and of the appropriation in the act of June 24, 1910—

That was virtually for the same purposes, but perhaps involved a more extended operation. Now, I want to ask the Senator if he knows whether the appropriations mentioned in these two specific acts were continuing appropriations?

Mr. SWANSON. I understood they were continuing appropriations, aggregating about $173,000, which would make half a million dollars for the purchase of this land.

Mr. SMOOT. Does the Senator understand that the unexpended balance is $173,000?

Mr. SWANSON. I have not looked at it definitely, but the Navy Department informed me that there was about $173,000 available for this purpose. If we had appropriated $500,000, with the amount unexpended and available the total would be $673,000 instead of $331,000 appropriated in this provision plus the $173,000 which is available. As I have said, I have not myself looked definitely into this matter, but the information furnished me is that the unexpended balance is $173,000, and that it is a continuing appropriation and available for this purpose.

Mr. SMOOT. I suppose the appropriation originally, then, was made as an appropriation until expended.

Mr. SWANSON. I think so. I do not know what items were covered by the amount. I have not had an opportunity to investigate it personally.

Mr. SMOOT. I did not know but that the Senator had looked it up.

Mr. SWANSON. No; I have not done so.

Mr. SMOOT. We can look it up in a moment and find out whether the other appropriation is a continuing appropriation.

Mr. SWANSON. The reason I would like to have the amendment go over is that I desire to make a personal investigation of it, which I have not had time to do.

The PRESIDING OFFICER. Does the Senator desire the amendment which he has offered to the amendment to go over?

Mr. SWANSON. I should like to have the entire amendment, including the amendment I have offered, to be passed over.

The PRESIDING OFFICER. The committee amendment, together with the amendment offered by the Senator from Virginia, will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 33, after line 14, to insert:

Naval Observatory: For purchase of the remainder of the tract of private land formerly known as "Normanstone," comprising 3,848.57 square feet lying within Naval Observatory Circle, which the Secretary of the Navy has authority to purchase under joint resolution approved August 1, 1894, $4,040.70.

The amendment was agreed to.

The next amendment was, at the top of page 34, to insert:

The Secretary of the Navy is authorized to lease for a period not to exceed three years storage facilities in the vicinity of the navy yard, Norfolk, at an annual rental of not exceeding $16,000.

The amendment was agreed to.

The next amendment was, on page 34, after line 6, to strike out:

Marine recruiting station, Port Royal, S. C.: For enlarging and improving hospital and for necessary equipment, $15,000.

And insert:

Marine recruiting station, Port Royal, S. C.: For a new building for the naval hospital and for necessary changes in existing buildings and equipment, $15,000.

The amendment was agreed to.

The next amendment was, on page 34, line 15, after "$8,000," to insert "to enlarge dry dock (limit of cost $1,085,000), $750,000; foundry and forge shop, $200,000," and in line 17, after the words "in all," to strike out "$20,000" and insert "$970,000," so as to make the clause read:

Navy yard, Charleston, S. C.: Dredging, to continue, $12,000; toilet and locker facilities, $8,000; to enlarge dry dock (limit of cost, $1,085,000), $750,000; foundry and forge shop, $200,000; in all, $970,000.

The amendment was agreed to.

The next amendment was, on page 35, line 1, after the word "reconstruction," to insert "extending wharf 1,650 feet, $100,000; in all, $250,000," so as to make the clause read:

Naval station, New Orleans, La.: To repair and reconstruct, where necessary, public works damaged in September, 1915, by hurricane, $150,000, and the accounting officers of the Treasury are hereby authorized to transfer from this appropriation to the appropriation "Naval station, New Orleans, La.," made by joint resolution approved April 25, 1914, the amount heretofore expended therefrom for such repairs and reconstruction; extending wharf 1,650 feet, $100,000; in all, $250,000.

The amendment was agreed to.

The next amendment was, on page 35, line 6, after "$9,000," to insert "floating crane, revolving type (to cost not exceeding $600,000), $300,000"; and in line 7, after the words "in all," to strike out "$84,000" and insert "$384,000," so as to make the clause read:

Navy yard, Mare Island, Cal.: Maintenance of dikes and dredging, $50,000; erecting shop, $25,000; toilet and locker facilities, $9,000; floating crane, revolving type (to cost not exceeding $600,000), $300,000; in all, $384,000.

The amendment was agreed to.

The next amendment was, on page 37, line 8, before the word "estate," to strike out "Li" and insert "Il"; in line 11, after the word "from," to strike out "'ford numbered five' (ford numbered five" and insert "'Ford No. 5' (Ford No. 5"; in line 17, after the word "feet," to strike out "west" and insert "east"; and in line 18, after the word "Territorial," to strike out "triangulation" and insert "trigonometric," so as to make the clause read:

Beginning at a point marked by a concrete monument at the southeast corner of the land acquired by the United States from the John II estate through condemnation proceedings, which point has the coordinates 230.1 feet south and 87.2 feet west from "Ford No. 5" (Ford No. 5 being marked by a galvanized pipe in a concrete monument stamped "U. S. 1911," established by the United States district engineer office, and having coordinates 8,570.99 feet south and 10,087.64 feet east from the Ewa Territorial trigonometric station); thence north 23° 12′ east 177 feet, more or less; thence north 16° 0′ east 66 feet, more or less, to a point on the shore line at high-water mark; thence southerly along high-water mark to a point marked by a concrete monument that is, with reference to the point of beginning, south 51° 0′ east 70 feet, more or less, the southwesterly boundary of the said tract being formed by the line joining said last-mentioned point on the high-water line with the point of beginning: *Provided*, That this transfer is in no manner to interfere with the right of the Navy Department to make such use of the shoals and islets extending in a northeasterly direction from Fords Island as the needs of the Naval Service may require: *Provided further*, That there may be established over said military reservation, at such place as may be agreed upon by the Secretary of the Navy and the Secretary of War, a right of way for the use of the Navy from the remaining portion of the naval reservation on Fords Island to the said shoals and islets.

The amendment was agreed to.

The next amendment was, on page 39, line 23, after "25,000," to insert "*Provided*, That the said bridge shall be so constructed as not to interfere with the navigation of the said creek; fence around powder factory, $28,000;" and in line 25, after the words "in all," to strike out "$78,000" and insert "$106,000," so as to make the clause read:

Naval Proving Ground, Indianhead, Md.: Three powder dry houses, $15,000; fire protection, $38,000; for the construction of a foot-passenger bridge over Mattawoman Creek, Charles County, Md., for the exclusive use of the Government of the United States under such rules and regulations as may be prescribed by the Secretary of the Navy, $25,000: *Provided*, That the said bridge shall be so constructed as not to interfere with the navigation of the said creek; fence around powder factory, $28,000; in all, $106,000.

The amendment was agreed to.

The next amendment was, on page 40, line 6, after "$10,000," to insert "fire and boundary wall, $5,000; in all, $15,000," so as to make the clause read:

Naval magazine, Lake Denmark, N. J.: Quarters for guards, $10,000; fire and boundary wall, $5,000; in all, $15,000.

The amendment was agreed to.

The next amendment was, on page 40, line 17, after "$105,000," to insert "sea wall and filling, $36,000; in all, $141,000," so as to make the clause read:

Naval torpedo station, Newport, R. I.: Seaman gunners' quarters, $105,000; sea wall and filling, $36,000; in all, $141,000.

The amendment was agreed to.

The next amendment was, on page 40, line 21, after "$3,500," to insert "purchase of additional land, $90,000"; and in line 22, after the words "in all," to strike out "$18,000" and insert "$108,000," so as to make the clause read:

Naval magazine, St. Juliens Creek, Va.: Filling house, $2,000; railroad system, $12,500; locomotive house, $3,500; purchase of additional land, $90,000; in all, $108,000.

The amendment was agreed to.

Mr. BORAH. Mr. President, it might be barely possible that it would be wise for us to know what some of these items are, the appropriations for which we are increasing. I will inquire where the Secretary is now reading?

The PRESIDING OFFICER. Page 41, line 8.

Mr. BORAH. In reference to the item on page 40, in line 21, appropriating $90,000 for the purchase of additional land, I should like to inquire what is that additional land to be purchased for?

Mr. SWANSON. Mr. President, if the Senator will permit me, I have a letter from the Secretary of the Navy explaining the matter. The Government has a very large magazine at St. Juliens Creek, near Norfolk. The amount of land they now have is rather limited, and they are anxious to increase the Government's holdings in order that they may make the magazine larger and also save it from danger.

Mr. BORAH. The amendment says, "For the purchase of additional land." How much additional land is going to be purchased? Ninety thousand dollars would purchase considerable land in Virginia, I apprehend.

Mr. SWANSON. Here is the basis on which this amendment was recommended. I read the following letter from the Secretary of the Navy, addressed to the chairman of the Committee on Naval Affairs of the Senate:

NAVY DEPARTMENT,
Washington, June 5, 1916.

Hon. B. R. TILLMAN, United States Senator,
Chairman Committee on Naval Affairs,
United States Senate, Washington.

MY DEAR SENATOR: I respectfully recommend the following insertion before the words "in all," in line 21, page 27, of the naval bill as it passed the House of Representatives, viz:

"For the purchase of additional land, $90,000."

This is for enlarging the magazine reservation on St. Juliens Creek, Norfolk, Va., which at present covers about 71 acres. The present site is becoming crowded and it is certain that expansion will shortly have to be provided for. It is, therefore, very desirable that land which has been offered for sale to the Government adjacent to the present magazine for about $90,000 be purchased.

This item was not included in the estimates submitted to the House, but in view of the unusually large appropriations for ammunition in prospect, there will be a tremendous increase in activity at all the naval magazines, and it is considered urgently necessary that the additional land here in question be purchased at the present time.

The land it is proposed to purchase comprises about 88 acres.

Very sincerely,

JOSEPHUS DANIELS.

Mr. BORAH. Mr. President, do I understand that it is proposed to pay $90,000 for 88 acres of land?

Mr. SWANSON. The item provides for the purchase of land. I presume it may be condemned. I do not know anything about the value of the land except what the Secretary of the Navy has written. I know that he was very insistent that this item should be included, as was Admiral Strauss, who was Chief of the Bureau of Ordnance.

Mr. BORAH. Is that land near the city?

Mr. SWANSON. It is near Norfolk; I do not know the exact distance.

Mr. BORAH. Well, of course, we are utterly in the dark in regard to it. It does seem that $1,000 an acre is rather an extraordinary price for land so situated.

Mr. SWANSON. From what I have been told, I do not think it is an exorbitant price. The Government usually acquires land under such circumstances by condemnation; it is very rarely that it purchases.

Mr. NORRIS. Mr. President, I should like to ask the Senator from Virginia a little further in regard to the same item. Is there a general statute by virtue of which the Secretary would have the right to go into court and condemn this land, or is the only authority he has to purchase it contained in this bill?

Mr. SWANSON. I should like to include the words "or condemnation," so as to make it clear. I think the acquisition of land should be made by condemnation unless it can be obtained at a satisfactory price. I think there is a statute which authorizes condemnation; but if not, I should like to have the language of the amendment include such authorization.

Mr. NORRIS. I know that, as a rule, when we are appropriating for a purpose of this kind we provide in the appropriation for acquiring the land by condemnation.

Mr. SWANSON. I should like to have the amendment read "purchase or condemnation." I think provision for condemnation ought to be made in all cases where land is to be obtained.

Mr. BORAH. It is pretty safe to assume that if the Government is going to pay a thousand dollars an acre the matter will not have to go into court.

Mr. NORRIS. That depends altogether on the circumstances. If the Secretary——

Mr. SWANSON. I offer an amendment to insert the words "or condemnation."

Mr. NORRIS. If the Secretary of the Navy should offer the owners of the land the full amount of the appropriation, he probably would not have to go into court; but if the Secretary of the Navy were of the opinion that the land was not worth the amount of the appropriation he would probably have to go into court.

Mr. WARREN. Mr. President, the Senator in charge of the bill will notice that the item on page 32, in respect to the acquisition of property for the Washington Navy Yard, provides for purchase or condemnation.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. NORRIS. I have not yielded.

Mr. WARREN. I beg the Senator's pardon.

The PRESIDING OFFICER. Does the Senator from Nebraska yield?

Mr. NORRIS. If the Senator from Wyoming desires to ask a question with regard to this item, I yield.

Mr. WARREN. I was going to say that quite often in items providing for the acquisition of land condemnation is provided for. On page 32 the manner of condemnation in connection with the acquisition of property for the Washington Navy Yard is provided for, it being there stated that the condemnation proceedings shall be conducted substantially in accordance with the provisions of an act of Congress, approved August, 1890, "providing a site for the enlargement of the Government Printing Office," and so forth. That act seems to have provided a successful method of procedure and has been followed very often since then.

Mr. SWANSON. That is nearly always provided in the acquisition of property in the District of Columbia.

Mr. NORRIS. That is not a general statute that will apply to every case, is it?

Mr. GALLINGER. It applies to the District of Columbia alone.

Mr. NORRIS. It applies only to the District?

Mr. GALLINGER. That is right.

Mr. WARREN. But it is usual to insert such a provision where the acquisition of land is provided for, as in the case of the item on page 32.

Mr. NORRIS. Mr. President, of course, if there were a general statute providing for the condemnation of property by the Government, and in such an item as this we simply authorized the property to be condemned according to law, that would be sufficient. I do not know whether there is such a general statute, though I am rather inclined to think there is.

Mr. SWANSON. There is one; and we usually put in the words "condemnation or purchase." They ought to be included in this instance.

Mr. NORRIS. Then, if condemnation proceedings become necessary, resort can be had to the general law, and the Government can begin the necessary proceedings in court.

Mr. SWANSON. I offer an amendment, on page 42, line 21, after the words "additional land, $90,000," to insert "to be obtained by purchase or condemnation, as the Secretary of the Navy may deem wise."

Mr. GALLINGER. Mr. President, I will suggest to the Senator that he make it "$90,000, or so much thereof as may be necessary."

Mr. SWANSON. I accept that amendment.

Mr. GALLINGER. It will probably make no difference, but I nevertheless offer the suggestion.

Mr. NORRIS. I should like to hear the suggestion made by the Senator from New Hampshire.

Mr. GALLINGER. I suggest that, after the numerals "$90,000," there be included the words "or so much thereof as may be necessary."

Mr. NORRIS. I think that is a very proper amendment.

Mr. SWANSON. I desire to amend the amendment so that it will read "$90,000, or so much thereof as may be necessary, to be obtained by purchase or condemnation, as the Secretary of the Navy may deem wise."

Mr. NORRIS. Mr. President, I know that there is sometimes a general opinion—and I think it is particularly applicable to the District of Columbia—that when an appropriation is made for the purchase of land, whether by condemnation proceedings or otherwise, it is necessary to use the entire appropriation before the matter is ended. I remember, several years ago, soon after I came to Congress, of being on a street car one day, after an appropriation had been made for the condemnation of some property and a Member of the House had made quite a determined speech in opposition to what he complained was the extravagant use of public funds. I heard two gentlemen talking it over—I do not know who they were, but they were apparently intelligent citizens of the District—and they concurred in the proposition that the Member of the House who had made the speech was wrong, because, as they said, when Congress provided for the purchase of real estate in the District of Columbia and made an appropriation for it, Congress had thereby placed a value upon the property, and that even though condemnation proceedings were resorted to the commissioners appointed to appraise the property had no other duty to perform than to divide the appropriation up between the owners of the property in proportion to the value of the property as they really thought those proportions were represented.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. NORRIS. I do.

Mr. GALLINGER. May I give the Senator a concrete example? When it was proposed to erect the Senate Office Building, a provision was placed in an appropriation bill that $750,000 should be appropriated for the purchase of land and toward the construction of the building. I took occasion in the Committee on Appropriations to suggest to the chairman, who was the late lamented Senator Allison, of Iowa, that mighty little of that appropriation would go for the construction of the building.

He differed with me. The result was that the owners entered into a combination and forced condemnation proceedings. In this District the juries are made up largely of real-estate men, and when the matter was settled they took out of the $750,000 $748,500, leaving $1,500 for the construction of the building!

Mr. NORRIS. I think that is a fair illustration of what often happens.

Mr. GALLINGER. I want to say a word further, if the Senator will permit me. I have been engaged in committee work, and will have to return immediately to the committee room, but I think there is a provision in this bill for the acquisition of land for the enlargement of the navy yard in the District of Columbia. The Government is never wise about matters of that kind. Somebody in the interest of the Government ought to have had an option on that land, but I happen to know that a citizen of the District has an option on that land, taken some time ago, in anticipation of this very appropriation; and we will pay all that it is worth, whether it is acquired by condemnation or not.

Mr. NORRIS. We will undoubtedly pay more than it is worth.

Mr. GALLINGER. Yes; more than it is worth.

Mr. BORAH. Mr. President, may I ask further of the Senator from Virginia how the sum of $90,000 came to be agreed upon?

Mr. SWANSON. If I mistake not, I wish to say to the Senator that I know what he is driving at. I knew nothing about this matter until a letter came to the committee urging the amendment. As I understand, this is the price at which the land is offered.

Mr. BORAH. Mr. President, if the Senator thinks I am driving at the proposition that he engineered this matter he is greatly mistaken. It is no reflection upon the Senator from Virginia at all, and I did not intend it in the slightest way as such. I beg the Senator's pardon. He must not draw that inference at all. What I thought, though, was that a proposition to buy land for the purpose proposed at the rate of a thousand dollars an acre was most interesting.

Mr. SWANSON. Mr. President, if the Senator can get land in the city of Norfolk, or near the city, on the water front for less than that, he would make a fortune very soon. The Senator knows that in Norfolk near the navy yard and in all that section, especially in the city, which is growing rapidly, land is held very high. As I understand, the owners have offered to let the navy yard have it at this price.

Mr. SMOOT. How many acres are there?

Mr. SWANSON. Eighty-eight acres. I will say to the Senator that I do not think it is an exorbitant price; but this amendment came up, and it was left to the clerk to include it. It ought to carry $90,000, if necessary, and provision ought to be made to acquire the land by purchase or condemnation. It ought to be included in that way.

I offer that amendment to the amendment.

The PRESIDING OFFICER. The Chair will state, for the information of the Senator from Virginia, that the amendment of the committee has already been agreed to, and there will have to be a reconsideration. Without objection, it will be reconsidered. The question now recurs on the amendment offered by the Senator from Virginia to the amendment proposed by the committee, which will be stated.

The SECRETARY. On page 40, line 21, in lieu of the amendment proposed by the committee, after the numerals "$3,500" and the semicolon, it is proposed to insert:

Purchase of additional land, to be secured by purchase or condemnation or otherwise, as the Secretary of the Navy may direct, $90,000, or so much thereof as may be necessary.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 41, after line 7, to insert:

The appropriation contained in the naval appropriation act approved March 3, 1915, of $20,000 for the construction of a building for the storage of torpedoes at the naval torpedo station, Newport, R. I., is hereby made available for expenditure for a like purpose at the naval coaling station, Melville, R. I.

The amendment was agreed to.

The next amendment was, on page 41, after line 23, to strike out:

Experimental laboratory: For laboratory and research work, including the construction, equipment, and operation of a laboratory, to be expended at the discretion of the Secretary of the Navy (limit of cost not to exceed $1,500,000), $1,000,000.

And to insert:

Experimental and research laboratory: For laboratory and research work on the subject of gun erosion, torpedo motive power, the gyroscope, submarine guns, protection against submarine, torpedo, and mine attack, improvement in submarine attachments, improvement and development in submarine engines, storage batteries and propulsion, improvement in radio installations, and such other necessary work for the benefit of the Government service, including the construction, equipment, and operation of a laboratory, the employment of scientific civilian assistants as may become necessary, to be expended under the direction of the Secretary of the Navy, $2,000,000.

Mr. SMOOT. Mr. President, I am going to ask the Senator to allow that amendment on page 42, beginning at line 4, to go over.

Mr. SWANSON. Until what time? Some time later in the evening?

Mr. SMOOT. I will try to get together the information I have by that time; but I want to say to the Senator that I am compelled to leave the Senate Chamber now to attend a meeting of the Appropriations Committee, and it may be after 4.30 before we get through with the District appropriation bill. Just as soon as I can get through there, however, I am going to get together the information which has been sent to me in connection with this item, and I shall be glad to take it up then.

Mr. SWANSON. Let the amendment be passed over.

Mr. SMOOT. While I am on my feet I should like to ask also that the amendment on page 132, beginning with line 5 and ending with line 9, may be passed over for the same reason in case I am not in the Chamber.

Mr. SWANSON. I will ask the Secretary to make a note of that.

Mr. WEEKS. Mr. President, as I may not be in the Chamber when the amendment on page 42 is taken up, I should like to ask a few questions now in regard to it. How much of this appropriation of $2,000,000 is to be expended for the construction and equipment of a laboratory, and where is the laboratory to be located?

Mr. SWANSON. There is a letter from Mr. Edison and others in connection with this amendment, which makes a very detailed statement of the contemplated expenditure. As I understand, this is to construct a building and equip it with the machines and all the chemical apparatus needed to make investigations and experiments on the lines indicated in the amendment. If the Senator will note the amendment of the Senate, it broadens the investigations and the experiments included in the House provision.

Mr. WEEKS. Has the committee any information about how much of the $2,000,000 is to be expended for a laboratory?

Mr. SWANSON. Mr. Edison and others said that unless we appropriated that amount it would be useless to make a smaller appropriation; that the good that could be accomplished by the expenditure of less than $2,000,000 would be so little that it would be a waste of money; that if the Government is going to have a scientific laboratory to experiment on all these matters, to ascertain the latest and most scientific methods as outlined in this amendment, less than $2,000,000 would not be of any value.

Mr. WEEKS. But that does not answer my question at all. Two million dollars covers a great many things in this paragraph. How much of it is to be expended for a laboratory?

Mr. SWANSON. As I understand, the entire amount is to be spent for building a laboratory and to equip it, both.

Mr. WEEKS. Oh, no. In the very line which I am talking about, line 12, it says, "the construction, equipment, and operation of a laboratory." How long is it proposed to operate it under this appropriation?

Mr. TILLMAN. I will say, for the benefit of the Senator, that Mr. Edison wrote to me, and the information I received was that it would take $1,500,000 to build and equip a laboratory, and then he needed $500,000 with which to conduct experiments.

Mr. WEEKS. How long will it take to construct the laboratory?

Mr. TILLMAN. It will be constructed as soon as possible.

Mr. WEEKS. I mean, it would take a year; would it not?

Mr. TILLMAN. I do not know.

Mr. CLAPP. That would depend upon how many men they put to work, of course.

Mr. SMOOT. No; it might take more than a year. It would depend upon how quickly they could get the machinery.

Mr. WEEKS. What I am trying to find out is whether or not the laboratory is likely to be operated this year. If not, why should we appropriate the money for it this year?

Mr. TILLMAN. You can depend on it that Thomas A. Edison does not fool with things. When he gets busy he gets very, very busy.

Mr. SWANSON. I should like to say that the details of the matter are to be found in a letter written by Mr. Edison. When the Government can get the valuable information, the genius and the scientific knowledge possessed by these men, free, and all they ask the Government to do is to furnish the laboratory and the expense of operating it, and their services are given free, and then the money is spent under the direction of the Secretary of the Navy, who has to approve the expenditures, it seems to me that it is a combination of science and genius and practical knowledge in the Navy Department that would make it a very wise expenditure on the part of the Government.

Mr. WEEKS. Let me ask the Senator what right we have to accept the services of these gentlemen without compensation?

Mr. SWANSON. I do not know any reason why we should not, if they offer them.

Mr. WEEKS. Is it not contrary to law?

Mr. SWANSON. I know of no law to that effect.

Mr. GALLINGER. It is contrary to law.

Mr. SMOOT. But this amendment provides that they shall be paid.

Mr. BORAH. If we can get something for nothing, let us repeal the law.

Mr. SWANSON. They must have some employees. The employees are the only ones who will be paid. The members of the advisory board, these scientists, do not get anything. It

is a patriotic effort on their part to aid the Government. It is the minor employees, who are not included in this advisory board, who get some compensation.

Mr. WEEKS. One more question, Mr. President. Would the Senator object to an amendment requiring that these employees should be under the civil service?

Mr. TILLMAN. All of this expenditure is under the direction of the Secretary of the Navy, and of course he is bound by all the laws they have in the Navy Department.

Mr. SWANSON. I have no objection.

Mr. WEEKS. Does the Senator think that it will be necessary for him to employ the people who are to work in this laboratory, unless there is a special provision for it, under the provisions of the civil-service act?

Mr. TILLMAN. I know it would.

Mr. THOMAS. If the Senator will permit me, I think the law is the other way. They are only exempted from the civil service by special enactment. We have, on several occasions, inserted provisions of that kind in different pieces of legislation, notably the banking act and the tariff act.

Mr. NORRIS. Mr. President, I should like to make a suggestion to the Senator from Massachusetts.

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I do.

Mr. NORRIS. I may be wrong, but, as I understand it, unless the law specifically exempts the employees from the classified service they would be put under the classified service under the general law.

Mr. WEEKS. I think the Senator is right.

Mr. TILLMAN. I will say to the Senator from Massachusetts that I will have Mr. Edison's letter here, and we will let this amendment go over until it comes, and then we will have it read into the RECORD.

Mr. BORAH. May I ask whether any hearings were had, or is there anything besides Mr. Edison's letter?

Mr. TILLMAN. No.

Mr. SWANSON. If the Senator will permit me, there were very full and voluminous hearings in the House.

Mr. BORAH. I had reference to the Senate committee.

Mr. SWANSON. Not in the Senate. The Senate had very few, if any, hearings. I do not suppose we spent half a day in hearings; but if the Senator will examine the hearings in the House he will find the matter very fully discussed, and, I think, the items of expediture, and so forth.

Mr. TILLMAN. The House only gave one million. Mr. Edison wrote and assured me that a million would be wasted.

Mr. SWANSON. As the Senator from Utah [Mr. SMOOT] has asked that it should go over, suppose we let it go over until he returns to the Chamber. It is useless to discuss it two or three times.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment was, on page 42, line 24, after the words "public works," to strike out "$7,139,975" and insert "$10,335,915.70." so as to make the clause read:

Total public works, $10,335,915.70 and the amounts herein appropriated therefor, except for repairs and preservation at navy yards and stations, shall be available until expended.

The amendment was agreed to.

The next amendment was, on page 43, line 2, after the word "officers," to strike out "on the active list of officers," so as to read:

The President is hereby authorized to appoint a commission of five officers of the Navy not below the rank of commander to investigate and report at the beginning of the next regular session of Congress if practicable, and if not, as soon thereafter as practicable, as to the necessity, desirability, and advisability of establishing an additional navy yard or naval station on the Pacific coast of the United States.

The amendment was agreed to.

The next amendment was, on page 43, after line 22, to strike out:

Said commission shall also investigate and report upon the necessity, desirability, and advisability of establishing an additional navy yard or naval station on the Atlantic coast south of Cape Hatteras or on or near the United States coast of the Gulf of Mexico or in the Caribbean Sea of a character adequate for the proper naval defense of that portion of the country. Said report shall contain all the information of like character as directed in the preceding paragraph relating to the investigation and report as to the Pacific coast.

And to insert:

Said commission shall also investigate and report as to the necessity, desirability, and advisability of establishing submarine and aviation bases on the Atlantic and Pacific coasts and other possessions of the United States, and as to the cost and location thereof.

Said commission shall also report on the advisability of establishing one or more naval academies on the Pacific coast or in the region of the Great Lakes and where the same should be located and the probable cost thereof.

Mr. FLETCHER. Mr. President, I desire to ask the Senator having the bill in charge, referring to the amendment on page 44, whether or not he understands that "the Atlantic" includes the Gulf of Mexico. If there is any question about it, I think that ought to be corrected. I would suggest, as an amendment, after the word "Atlantic," on page 44, line 8, to insert the words "Gulf of Mexico," so that it would read "on the Atlantic, Gulf of Mexico, and Pacific coasts."

Mr. SWANSON. I have no objection to that being inserted.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. WEEKS. Mr. President, I move to strike out the paragraph commencing on line 11 with the words "Said commission" and ending on line 14 with the words "cost thereof."

I presume it would not do any harm to have a commission traveling about to consider the question of establishing more naval academies, provided they reported that it was inadvisable to do so; but it seems to me that it is a piece of folly and nonsense to talk about establishing another naval academy or another military academy. The men that we propose to educate for the Navy can be educated to so much greater advantage in one place and so much less expense to the Government, wherever that naval academy is located, that to think of establishing other naval academies and constructing great plants, as would naturally follow any such course, seems to me the height of folly. I think the whole thing ought to go out of the bill.

Mr. SWANSON. Mr. President, if the Senator will permit me, there are Senators on the Naval Committee who are very insistent that there should be another naval academy, located either on the Great Lakes or on the Pacific Ocean.

Mr. WEEKS. Let me say to the Senator that I have no doubt that there are 40 Senators who would like to have naval academies established in their States.

Mr. SWANSON. And motions were offered to provide for them. We thought it would be better to have a commission to report on the matter before any action was taken pro or con. I hope the Senator will not object to this commission being organized. It is not a new commission. It is a commission that has work already. Let the commission make a report.

Mr. TILLMAN. Let the commission report, and then make the fight.

Mr. SWANSON. I concur with the Senator. I think one academy each for the Army and the Navy is sufficient; but I have no objection to having the matter investigated by this commission. I hope the Senator will not insist upon eliminating that provision, but that it may be included in the bill.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. WEEKS. I do.

Mr. THOMAS. I was going to suggest to the Senator from Massachusetts that this is the appropriate time to consider the matter if it is to be considered at all, because if this commission should make a report recommending one or more academies, those who are interested in the places selected will then strenuously exert themselves to secure the enactment of legislation establishing them; and once we begin to multiply or even duplicate these institutions we are going to have them all over the country.

Personally I am of the opinion that one additional academy, military as well as naval, for the West or for the Pacific coast might be a good thing for the country; but the difficulty is that the precedent once established is bound to produce a brood of academies, both naval and military, all over the country. My State will want one.

Mr. WEEKS. It would be natural for a great coastwise State like Colorado to want one.

Mr. THOMAS. The Senator's constituents will want one; and, as a consequence, we will have an omnibus bill providing for these institutions all over the country. Now is the time, I think, to determine the matter.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Florida?

Mr. WEEKS. I do.

Mr. FLETCHER. I was only going to say that I quite concur in the views of the Senator from Massachusetts and the Senator from Colorado, and I believe that now is the time to raise this objection. I think we can not do better than to retain the academy where it is.

Mr. TILLMAN. If Senators will look at the top of page 43 and see who constitutes this commission, I think they will get some light and understand that this is no cheap-John excur-

sion running around just to spend money, but that it will be composed of naval officers who are supposed to know the good of the Navy and the needs of it.

The PRESIDING OFFICER. The question is on the motion of the Senator from Massachusetts.

Mr. CLAPP. Mr. President, I hope the Senator will withhold his motion until the return of the junior Senator from California [Mr. PHELAN], who made a very elaborate argument before the committee, and I think the Senate ought to have the benefit of that argument before acting on this matter.

Mr. SWANSON. I am very much opposed to establishing any academy anywhere else, either for the Army or for the Navy.

Mr. TILLMAN. No one is more opposed to it than am I.

Mr. SWANSON. But this matter will have to be determined at some time. They are very insistent on it, and it seems to me that the report of a board on it could not do any harm.

Mr. WEEKS. Mr. President, I think the Senator will save himself and the Government trouble to let this matter come to a vote now and knock the whole thing out of the bill. I want to do the courteous thing by the junior Senator from California; but he is a member of the committee, and it seems he should be here while this bill is under consideration. I am either going to renew this motion later on or I am willing to defer it now if the Senator in charge of the bill would like to have it passed over temporarily.

Mr. SWANSON. I should like to have the Senator from California here when this matter is disposed of. It would not be proper to pass on it in his absence, it seems to me.

The PRESIDING OFFICER. The Chair understands that the Senator from Virginia desires to have the whole amendment passed over.

Mr. SWANSON. Let the amendment be passed over until the Senator from California comes in. We will recur to it as soon as he returns.

Mr. FLETCHER. I take it that the motion to strike out applies only to lines 11 to 14, inclusive, and not to the whole amendment.

The PRESIDING OFFICER. It will be necessary to have the whole amendment passed over.

Mr. NORRIS. Mr. President——

Mr. PHELAN entered the Chamber.

Mr. SWANSON. The junior Senator from California [Mr. PHELAN] is in his seat, and we can dispose of the amendment. I will state that the Senator from Massachusetts [Mr. WEEKS] has moved to strike out the provision directing a commission to make a report—

on the advisability of establishing one or more naval academies on the Pacific coast or in the region of the Great Lakes, and where the same should be located and the probable cost thereof.

Mr. PHELAN. Mr. President, I understand that a motion has been made to strike out the provision referred to by the Senator from Virginia. The object of the provision in the bill is to meet the absolute necessities of the Navy to-day in providing adequate means for the education of Naval officers. The Annapolis school has reached its capacity, and the Congress has increased the number of midshipmen. I am informed by the Secretary of the Navy that it is impracticable to enlarge the Annapolis Academy on account of inadequate ground, and it is not desirable to educate at any one place more than 1,200 midshipmen, and that is the capacity of the Annapolis Academy to-day.

England has two academies—a small, tight little island. The United States is an extensive country, with a population constantly growing. The western part of the country has recently come into well-deserved prominence. I have been informed that midshipmen are reluctant to come from the Far West to Annapolis on account of its remoteness from their homes, and western Senators have informed me—the Senator from Nevada did so the other day—that men have refused to go, on the advice of their parents, because they would be so remote from the influence of their parents. Therefore, the Navy is denied a class of midshipmen that would doubtless greatly increase the efficiency of the Navy, by introducing a desirable class of young men, hardened by the frontier, in the arduous service of war in behalf of their country when that time must come.

I do not know why the eastern part of the country should make any objection to the addition of another school; and, granting that other schools should be established, why they should not, not only in justice to the West but generously, accord that privilege to that part of the country, the Pacific coast, where the Navy is to-day most needed, where familiarity with its waters is most desirable, because I am not alone in believing that the next great naval engagement in which this country shall be involved will be rather in Pacific waters—the term "Pacific" being a misnomer—than in Atlantic waters. There the expansion is going on. There we read, no later than to-day, of treaties between Asiatic countries and European countries for the purpose of controlling the trade. There, according to William H. Seward, will be the future theater of the great events of the world; and he so stated it with prophetic vision at the time he, as Secretary of State, acquired the Territory of Alaska.

We have islands, Senators, in the Pacific. Whether we are to defend our frontier or not is a matter for future discussion. There is a disposition to give up some of these hazardous possessions of the United States; but, needless to say, we have them, and we are interested in the development of the Pacific trade, and there the future conflict will come.

I mention that merely to say that this country is larger than Maryland or New York or Massachusetts; that the Pacific Ocean, strategically, is of great importance to this country, and should be known and understood. I am told that there are men in the naval service of this Government to-day who have no knowledge whatever of Pacific waters. If some of them were educated on the shores of the Pacific, they would have special qualifications.

We have there the great ocean; we have still waters; we have navy yards. There is every facility for the education of the man not only in navigation on still waters and in the deep sea but in the construction of war vessels. It is only fair, in the establishment of a new school, if such a school is to be established, that it be established on the Pacific coast, and that the Members of this body should be informed as to the most desirable location, as to the probable cost, and as to every other fact which will guide them in determining their action.

I submit that this matter does not settle the question whether there shall be two schools, but merely puts the Senate in possession of the information necessary upon which to base a sound judgment.

Mr. NORRIS. Mr. President, it is true that this amendment does not technically settle the question as to whether or not we shall have another school, but it is the first step in that direction. If it is necessary that we should have another school like Annapolis, I should not be one to oppose its establishment; but before we take any steps let us determine whether or not it is necessary to establish another school. If there should be another one established, it probably would be established on the Pacific coast. I would just as lief it should be on the Pacific coast as on any other coast. But, Mr. President, if we are going to expand the Navy to such an extent that the school already established is too small, and we have not enough land there on which to build more buildings and to expand, then let us buy some more land there. If we establish one on the Pacific coast we will have to buy the land upon which it is established.

Mr. PHELAN. Mr. President, will the Senator submit to an interruption?

Mr. NORRIS. I will.

Mr. PHELAN. Congressman KENT, of California, has made a tender of a thousand acres of land on the Bay of San Francisco; so I judge other points on the coast would be just as ready to make a donation, if that is a moving consideration with the Senator from Nebraska.

Mr. NORRIS. I will say to the Senator that it has not much influence with me whether it is donated or not; but there is not any proposition here that anybody is going to donate the land. I presume we could advertise for donations and establish these schools all over and get the land donated.

Why, Mr. President, if the other argument is good, that the young men from the West refuse to go to Annapolis because they will be so far away from the influence of their fathers and their mothers, if that is an argument for the establishment of more military and naval academies, then let us establish them in every county in the United States.

Why, Mr. President, how far do they have to go now from my part of the country? I have not heard that any of them objected to going to Annapolis because they would be out from under the influence of parental care. But, Mr. President, if the sons of Nevada do not want to go to Annapolis, and therefore we are deprived of the valuable services of those young men; if they will not go there because they will be so far away from father and mother, how much better would it be if they went to San Francisco? They could not go home every Saturday night there. And what would happen to those valuable midshipmen if they were graduated from the academy, and the order came that they should go to South Africa, or to Japan, or to China, still farther away from their fathers and their mothers? I presume they would resign from the Navy.

Mr. KENYON. Their fathers might go along.

Mr. NORRIS. The Senator from Iowa suggests that their fathers might go along. That might be; but, Mr. President——

Mr. PHELAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from California?

Mr. NORRIS. I do.

Mr. PHELAN. I may have been misunderstood. I was merely describing the attitude of mind of the parents, not the disposition of the boy; and hence we lose that class of boy, on account of the mental attitude of the parents toward sending the boy to so remote a point. The boy himself is always willing to leave the parent nest.

Mr. NORRIS. Will the Senator from California assure us that these fathers and mothers of Nevada would not likewise object if their sons went to San Francisco? Would not that be just a little too far away from the control of parental influence?

When I mention San Francisco Bay as a center, it covers a very considerable area, easily accessible to points in Idaho, and in Nevada, and in Utah, and in Arizona, and in all the pioneer States. The Senator probably has reference to Nebraska. That is still more remote.

Mr. NORRIS. No; I had reference to Nevada because the Senator mentioned the State of Nevada.

Mr. PHELAN. It is one night's journey from San Francisco.

Mr. NORRIS. But the parents whose sons go to Annapolis would probably likewise object to their sons going to San Francisco, even though it took only two or three days to go and return.

Mr. PHELAN. To those people who are working hard for their living the consideration of the item of transportation—the cost is not so great for the smaller distance—means very much.

Mr. NORRIS. But the Senator will have to have some new regulations for this specific academy, because, even though parents living in Baltimore have sons in the Annapolis Academy, the young men could not go home to see their fathers without permission, and they would not get permission under the rules and regulations more than once or twice a year. They will get that permission if they live in Nevada, and the Government will pay the expense of the young men going there and back.

It seems to me it reduces itself down to this, that we are going to make a commercial proposition. If academies are going to be established for the benefit of the communities in which they are located rather than for the benefit of the Government, then we must go into the business, and we ought to have them everywhere. I could guarantee to you, Mr. President, that if you will establish a naval academy on the Missouri River we can have donated a thousand acres of land available for that purpose without any expense to the Government, and probably build a plant and turn over some boats that the Senator from Iowa has put out of commission by his opposition to the river and harbor bill.

Mr. KENYON. On the Platte River?

Mr. NORRIS. On the Platte and the Missouri Rivers.

Mr. KENYON. I do not know that there are any boats on the Platte River.

Mr. NORRIS. Oh, yes, there are boats on the Platte. But that does not make any difference. If you are going to establish these military academies for the benefit of the communities, then you ought to establish them where there is no water, because it will cost that much more money to get water there; and you can dig a channel up the Mississippi and its tributaries and do more good to the community by spending the Government funds than if you simply established a military academy along the ocean. Why should not the cities on rivers have them as well as the ocean cities?

It all reduces itself, it seems to me, to the proposition whether we need another academy. No good argument, as far as I have been able to hear, has been offered or even suggested that another academy is necessary. I think, if we had another one, it would probably go to the Pacific coast by general consent, but I do not believe we ought to go into the business of establishing academies for the benefit of communities. If we do, then we ought to establish another military academy for the Army. This is for the Navy.

If we must have two naval academies, then why not have two military academies? It is a stepping stone. It means the establishment of a naval academy on the Pacific coast, one on the Great Lakes, and one on the Gulf; and then the military academies, and they will not be confined to the coast, will go all over the country, because you can train your soldiers inland just as well as you can on the water. The one already established is on a river, and every river in the country will be demanding a military academy. After all, the great naval program of expansion is one more for the benefit of the community and individuals than it is for the benefit of the country. It may not be out of place to provide for the establishment of a dozen of them, because that will take public money and give it to somebody just as well as if we built two or three dozen useless battleships and let somebody get that money.

Mr. LEWIS. Mr. President, I am slightly interested in this provision. It will be noted that the provision calls for an investigation as to the places likely to be available for this new academy. One of the places is the Great Lakes. The Senator from Georgia [Mr. SMITH] says, "For Chicago." It is true, my home is in the imperial and unparalleled city of Chicago, which sits in queenly magnificence upon the great Lake Michigan. It feels that it is the most appropriate place where an academy could be located upon the Lakes if one is to be located in that vicinity. I confess a personal interest in that undertaking, and I was instrumental, together with the Senator from California [Mr. PHELAN], both being members of the Naval Committee, in having this provision written in the phraseology that it now presents.

Mr. President, there is only one inquiry here. The Senator from Nebraska [Mr. NORRIS] puts it very well and, I think, disposes of it and makes the issue absolute. If it is necessary for the Government to have academies for the education of students in the matters of naval warfare and naval commerce, then the Government should have them in number sufficient and at places appropriate to serve the object and to completely serve the full object of the Government. If, on the other hand, we have reached a point where the wisdom of the legislative body is that they are unnecessary further, that they should not be increased, that there should be no enlargement, then this provision should be defeated upon the ground that the policy is not for the welfare of the Government.

If, on the other hand, it has been discovered through past events or present existing circumstances that we should enlarge the Navy, enlarge its officers, prepare a larger field for the education of the men who shall serve in the Navy, then the question is, Where can that best be done?

I beg to say to the Senate that I think the able Senator from Nebraska has failed to catch the spirit which is the one which I think justifies this investigation. I tender it in detail, and if the one I offer is not sufficiently justified then I do not think that the mere question of accommodation of localities for the mere purpose of locality or appropriation for their profit or their pleasure would be sufficient.

This Government, Mr. President, extends from the Atlantic to the Pacific. If we shall ever have a conflict, such as I fear, it will come either from the Atlantic, Europe, from the Pacific, the Orient, or from the South. It is not generally conceded that we are likely to have trouble from the North. As to the latter I do not altogether agree. It is well known that I do not agree in this enjoyed security, but I do not intend to enter now upon that phase. It is enough to say that I have always harbored the fear that if this country should ever become involved in difficulty with any European nation it will find one of its greatest difficulties to solve at the north border.

But, Mr. President, the theory of an academy upon the Pacific coast is that those waters shall become learned to the seamen, shall become learned to the sailors, so that the ability to struggle in those waters and to contest in those waters may be known to men trained upon those waters.

Second, sir, that the Pacific coast and that part of the West shall feel akin and close to the Government. That it shall feel in participating in the Government it has been permitted to enjoy the benefit of the Government.

It is too well known, I am sure Senators will not regard this as an exaggeration, that there is a part of our country which has always felt that it has been divorced from the benefit of the Republic, and that the Atlantic has always enjoyed all the privileges so that every benefit conferred is to some degree sooner or later conferred there; that through favored privileges the Atlantic coast has enjoyed for nearly a hundred years a monopoly of benefits.

The Pacific coast should have one academy if it shall be first conceded that there shall be an increase in the opportunities and an increase in the number of the Navy. Two things that I feel result. One is, it is nearer to the citizens; they do not travel so far; they train at their doorways; they are acquainted with the water in which they may serve.

Mr. NORRIS. Mr. President——

Mr. LEWIS. I yield to the Senator.

Mr. NORRIS. Will the Senator permit an interruption?

Mr. LEWIS. Certainly.

Mr. NORRIS. I wish to suggest to the Senator this thought in answer to his argument, that one of the reasons why an additional academy should be located on the Pacific is to

familiarize the future men of the Navy with the Pacific waters. I may be wrong in it, but I believe the fact is that the men who are at Annapolis to-day get as much experience and drill and practice on the Pacific coast as they do on the Atlantic Ocean, and that, outside of the little boating in the immediate vicinity of the school where they would learn to handle boats, and so forth, they get as much absolute practice on one side of the country as they do on the other. I think that exists now, and while I agree with the Senator if it is decided that another academy shall be built it ought to be on the Pacific Ocean, yet the fact that a young man goes through a school there does not equip him any better in knowledge of the Pacific Ocean than though he went through a school on the Atlantic Ocean. When he is put in charge, as he eventually will be, of a battleship or any vessel of the Navy he is just as liable, if graduated from the Pacific coast school, to be sent to the Atlantic Ocean as he would be to be retained on the Pacific.

Mr. LEWIS. Mr. President, I desire in reply to say to the able Senator that he indulges in a state of facts that investigation will assure him are not well grounded. It is not until after the student has graduated that he is put upon a ship. Then, of course, he may train after that in waters anywhere; but pending the time of his graduation he is, I assure the Senator, by the regulations largely limited to the field upon the Atlantic coast.

But I wish to say to my able friend, this has another point of consideration that impresses me. I am now speaking about the coast. I am satisfied that while we live, if Providence shall be so generous as to allow us to live the Divine statute of limitations, the whole present policy of the Navy will be abandoned; that our country, extending so far, from the Pacific to the Atlantic, and our interests becoming constantly involved and in many cases so threatened, there will next arise the necessity for an Atlantic Squadron wholly controlled from the Atlantic coast for purposes of Atlantic defense; then there will be one on the Pacific coast, wholly existing upon the Pacific, trained on the Pacific, suited for Pacific necessities. The Panama Canal will make the channel through which these will join when necessary; yet, sir, under ordinary circumstances all life on each will be separate from each other for the purposes of the defense of the Republic against those things which many of us assume are inevitable in the future, from either coast, or both.

If I am right in that, surely then it is most appropriate that on the Pacific coast there should be the opportunity of a training station. Senators will see that the provision only calls for an examination. The objection made by the Senator from Nebraska, which is as well put and as forcibly as can be from any other source, if well taken, will clearly appear to those who will investigate the subject under this provision, and then that investigation which entails no expense will reveal such fact of just opposition. If, on the other hand, the investigation should reveal the necessity which the Senator says if revealed he would yield, as to the locating of some academy, then we will have the opportunity of the location.

This much I say for the Pacific coast. The only other place where I feel there will be the necessity for naval education is upon the Great Lakes. Let it not be forgotten that one of the great struggles of the Republic for the maintenance of itself was on the Great Lakes; and as I see it, Senators, not wanting to strike a note of alarm here to-day, the Great Lakes again will be a field of a very severe naval encounter in this Republic.

It might not be while we live—we all pray it shall not be ever—but it is inevitable if there should be an encounter anywhere that we should be involved with those nations which have possessions on the American continent now located upon the Great Lakes. For that reason I feel that the Great Lakes should have two stations. One should be for the shipyard. In that we are very much embarrassed by a treaty a hundred years old between the United States and Great Britain, which exists yet, which seems to forbid the construction of ships for naval uses or of ships at all upon the Great Lakes. Whether that treaty shall be abrogated or not I do not know, and why our Government continues to allow that obstruction to remain as it now exists against a shipyard on the Lakes, in view of the necessity for commerce, I do not understand.

Mr. NORRIS. Mr. President——

Mr. LEWIS. I yield to the Senator.

Mr. NORRIS. I presume the Senator is better posted on that than I am, and I am asking entirely for information. Would the provisions of that treaty prohibit the use by the students of an academy, if one should be located on the Great Lakes, of naval vessels for the purpose of practice?

Mr. LEWIS. I will say to my able friend that there was indulged before certain members of the committee their views on that subject, and I must say to the Senator there is some apprehension. There is a feeling on the part of very able men and thoughtful men in this body who have given the subject attention before, that the same objection which would prevail against the ships being built for naval purposes might be equally addressed to a naval academy if Britain sought to enforce the provisions of the treaty.

The hope is indulged that it will be waived by Great Britain as it has never been urged under certain conditions past where it might have been urged. But in reply directly to the Senator I say the subject is filled with very grave doubt. It is urged that the examination shall extend to the consideration of the Great Lakes in order that we may ascertain whether that part of the Middle West, which has felt at times that it has not been treated by this Government as an integral part. That it has often been ignored, and that it has been too often discriminated against. I feel that there upon the Great Lakes, a body of water foreign to both the Atlantic and the Pacific, calling for a different form of training, it would be most appropriate and justifiable to establish some form of academy where the young men could be trained for the uses of the water to the naval demands if these academies are necessary at all anywhere and if the increase of the Navy is essential and if further expansion of it is justified.

I respectfully call to the attention of the Senate that the provision merely asks to have the question investigated. If the investigation shall develop a report calling for their construction, then I think the objections urged by the able Senator could be probably addressed in more detail, but until the recommendation discloses their necessity these objections need not be entertained. If it should be disclosed that they are necessary, then I am sure the objections will be addressed to the mere matter of their cost, their propriety, and the appropriateness of their location, for none of us would defeat the project if the necessities of the Government called for it.

I join with the Senator from California in asking the Senate to allow the provision to remain.

Mr. WORKS. Mr. President, I am opposed to this bill and I expect to give the reasons for my opposition a little later on. But the Senator from Massachusetts makes a motion to strike out this provision of the bill. I am a little surprised that under the circumstances he should object to this provision. It seems to me to be quite ungrateful of him. It may be because he was educated at Annapolis and entertains the thought that no one can be well educated anywhere else.

This provision does not establish a naval academy on the Pacific coast. It only provides for a proper investigation of that subject in order to determine whether it should be so established or not.

I do not very well see how an advocate of the passage of this bill could object consistently to such a reasonable provision as that.

We all know, Mr. President, this bill is going to pass eventually and become a law, however unfortunate that may seem to me, and these different provisions in the bill must be judged upon that basis. If we are going to provide for an enormous Navy, which I think ought not to be established in a free country like this, there is certainly nothing unreasonable in providing that there may be two naval academies 3,000 miles apart. Why should the boys on the Pacific coast and nearby be compelled to come 3,000 miles to be educated under the Government when a school could be established nearer home?

I must say, Mr. President, that whatever my views may be of the bill itself as a whole, I can see no reason why this provision in the bill should be stricken out.

Mr. NEWLANDS. Mr. President, it seems to me that this amendment is an exceedingly reasonable proposal. As I understand, it is merely that this commission shall inquire into the advisability of establishing a naval school on the western coast.

Mr. President, so far as I am concerned, in our military and naval preparation for the future, I think that we ought to give great attention to the education and training of officers, both for the Army and the Navy. The estimate is that in our Army each man costs about a thousand dollars per annum, except in the Philippine Islands or in other foreign service, where the cost is higher. The average cost of an officer annually does not exceed $2,500; and yet a good officer has an expansive quality of one to one-hundredth, for a good officer can train 100 men. We have, therefore, by training officers, this element of elasticity in our naval and military preparation that we have always on hand, whether they are actually in the service or not, a body of men who are trained to arms and who are capable of training others. Thus, the very presence of that large body of men facilitates elasticity in our military preparations in case of emergency.

One of the great difficulties in England in training the enormous armies which they have recently produced has been a lack of officers, for in the preliminary stages of the war in Belgium

the officers of the British Army acted with their usual bravery and recklessness, leading their men instead of following and being protected by them, and they were swept away. Consequently England was at the greatest disadvantage, a disadvantage arising from the lack of having trained men who could train others.

I have been in hopes of seeing our Military Establishment enlarged in such a way as to provide military schools for training officers all over the country, making use of the original purposes of the land-grant college law, which provided not only for the advancement of agriculture and the mechanic arts, but for military training as well, the very purpose being to train for the Republic men who had some knowledge of military discipline and military tactics and military sanitation, and who would be able to take care of others. In every war that we have had the chief difficulty at the very start has been one of sanitation; one of inability to meet the ordinary requirements of sanitation, so that disease and pestilence have swept away more of our men than has war itself.

If we are going to have a larger Military Establishment and a larger Naval Establishment, are we to content ourselves with one naval school at Annapolis, Md.—the naval school at Newport being one, I believe, of advanced training—or are we to have others? Has not the Pacific coast its problems just as the Atlantic coast has its problems, and are we going to require that that enormous territory in the western region should send all of those whom we desire to train in the art of war, so far as it relates to our Navy, 3,000 miles away for that training? I believe that we should have such training as near as possible to the people themselves whose interests are affected, and that we should have as many of such schools as will be necessary to have on hand always, either in active or in retired service, a body of men who will be able to meet any emergency, whatever it may be.

I do not suppose for a moment that the Senate will reject this reasonable amendment, which has been inserted by the Committee on Naval Affairs, having knowledge of the exigencies of the situation regarding this matter.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Massachusetts [Mr. WEEKS].

Mr. VARDAMAN. Mr. President, I desire to have the amendment again stated. I was temporarily absent from the Chamber when it was offered.

The SECRETARY. On page 44, after line 10, it is proposed to strike out:

> Said commission shall also report on the advisability of establishing one or more naval academies on the Pacific coast or in the region of the Great Lakes and where the same should be located and the probable cost thereof.

Mr. WEEKS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Fletcher	Nelson	Smoot
Borah	Gallinger	Newlands	Swanson
Brady	Gronna	Norris	Taggart
Brandegee	Hardwick	Oliver	Thomas
Bryan	Hitchcock	Overman	Thompson
Catron	James	Phelan	Tillman
Chamberlain	Johnson, S. Dak.	Pittman	Townsend
Chilton	Jones	Poindexter	Underwood
Clapp	Kenyon	Pomerene	Vardaman
Clark, Wyo.	Kern	Ransdell	Wadsworth
Clarke, Ark.	La Follette	Shafroth	Walsh
Culberson	Lee, Md.	Sheppard	Warren
Curtis	Lewis	Smith, Ariz.	Weeks
Dillingham	Lodge	Smith, Md.	Williams
du Pont	Martin, Va.	Smith, S. C.	Works

The VICE PRESIDENT. Sixty Senators have answered to the roll call. There is a quorum present. The pending question is on the amendment of the Senator from Massachusetts [Mr. WEEKS].

Mr. WEEKS. Mr. President, just a moment to explain why I have made the motion which is now pending. One Naval Academy has been established for the construction and maintenance of which the Government has expended a great many millions of dollars. That institution is adequate for all the purposes to which it is likely to be devoted. I am surprised to hear Senators making an argument in favor of more naval academies because some other section of the country will be benefited. It does not make any difference to me whether the Naval Academy is on the Atlantic coast, the Pacific coast, or on the Gulf coast. It happens to be located on the Atlantic coast. I would feel exactly the same if it were located elsewhere.

No argument can be made that it will add to the efficiency of such an establishment or to the value of the product of that establishment if there are two institutions instead of one, or three instead of two. The same argument can be made in favor of the establishment of such an institution on the Great Lakes as can be made in favor of its establishment on the Pacific coast or in one of the Gulf States. It is one of those matters which ought not to be considered at all from the standpoint of location. It is a great national institution.

I do not think that a board of officers could be found who would report in favor of the establishment of an additional Naval Academy. I would feel it just as wise to put into the sundry civil bill a provision that a board should make an investigation to determine whether there should be another capital or not, or how many capitals there should be, and I am confident that there would be Senators—quite a number of them—if that were to be done, who would advance good arguments from their standpoint why a capital should be created in their own States. I hope that this important institution will not be trifled with, even to the extent of appointing a commission, and that that provision will be stricken from the bill.

Mr. VARDAMAN. Mr. President, I wish to detain the Senate just long enough to give my very hearty approval to what the Senator from Massachusetts [Mr. WEEKS] has said. I was impressed with the argument advanced by the honorable Senator from Nevada [Mr. NEWLANDS], that the Pacific coast has its problems and that it is necessary to establish a naval academy there in order that a peculiar science of naval warfare may be taught on the western coast of this country. I think, instead of founding another institution to teach men military sanitation, as suggested by the able Senator from Nevada, that we ought to offer a reward to somebody to discover an antitoxin that would kill the military germ that seems to be poisoning the blood of the American people and firing their brains to acts of indiscretion. Congress seems almost to have gone crazy on the subject of expending money for preparedness, which means, God knows what; but any proposition to spend any amount of money for anything on earth, if you just attach to it the name of "preparedness," would find supporters in this body. I sincerely hope that the motion of the Senator from Massachusetts will be adopted.

Mr. PHELAN. Mr. President, for the benefit of the Senators who were absent during the preliminary discussion, I simply desire to say that the committee report embraced a provision authorizing the President to appoint five naval officers, not lower in rank than that of commander, to report on various subjects—naval bases, aviation grounds, submarine bases, and, among other things, the advisability of providing for the growing needs of the Navy another naval academy, either on the Pacific coast or on the Great Lakes, and to report the location and probable cost thereof. They are simply charged with the duty of reporting on the advisability of it as well as the location and the cost—information necessary for the Senate to determine, with expert evidence on their part, the necessity for such action.

The Senator from Massachusetts has stated just now that Annapolis provides ample means. I desire to challenge that statement. The Congress has already increased the number of midshipmen by one-third, if I recall aright; and the Navy Department—the Secretary himself—has stated that the capacity of Annapolis is 1,200, and that that capacity is about being reached now. As we are aware, there are hundreds of young men constantly rejected for one reason or another, and that is the only reason why the pressure has not been greater upon the Congress to provide additional accommodations. So it remains undisputed that either Annapolis has to be enlarged or a new academy established elsewhere; and it is against sound economic considerations and also against military educational considerations to attempt, I am informed by the Secretary of the Navy in conversation, the education of a larger number of men than 1,200 at any one place. England has two naval academies, and England has led the way in the progress of naval development and construction.

If that be true, it is not a matter of sectional consideration. It is not a matter of geography. It is a matter of necessity that greater accommodations should be provided. The Pacific coast is looming up in importance. It is to be the theater of the great events of the world's future. Upon its waters possibly the next naval engagement shall be fought, and very few of the men educated at Annapolis have that intimate knowledge of that ocean and the neighboring waters, the bays, and the rivers and the harbors that qualifies them fully for service there. I am informed, on the other hand, that men who have served on the Pacific, when transferred to the Atlantic, have but an inadequate and imperfect knowledge of the waters where they command great fleets. So there will ultimately be, probably sooner than we expect, an absolute necessity for having both a Pacific Fleet and an Atlantic Fleet; and an admiral testified before the

House committee the other day that our so-called Pacific Fleet could be routed by one enemy warship, and that the only hope in the world for the Pacific Fleet as it is constituted to-day, guarding that great coast, would be the precipitation of a fog at the "psychological moment," under cover of which it might escape!

So the Pacific Ocean must be borne in mind, not only in the location of our fighting craft, but in the education of our youth. The great West is turning out men all the time of the right sort for fighting, not pampered by influences which prevail to a great extent in the luxurious cities of the East—hardy youths, brought up on the farm. I demonstrated here, on testimony of western Senators, that the mental attitude of the parents toward a college so remote from their homes that they never could afford to get to see their boy during the period of his education, four years, has actually deterred young men from seeking careers in the Navy, and they have refused proffered appointments as midshipmen to the Annapolis institution. So, in order to develop the Navy, not to develop the West, I claim that it would be exceedingly desirable now to secure merely a report from competent authority as to the advisability of doing this.

Possibly I need as much information as other Senators, but I will not accept the word of an alumnus of Annapolis, making the defense here of his alma mater, wishing to confer upon it exclusive benefits, as any reason whatever why another naval academy should not be established in some other part of the country. I have great respect for his filial love, but it should not stand in the way of legislation by the Senate of the United States. I recall that it is the spirit of emulation that develops the best in men and in institutions.

In the State of California a few years ago Leland Stanford, some time Senator to the United States in this body, having lost his son, decided to give his great wealth to the establishment of a university. The men who supported by taxation and by their loyal Californian spirit the University of California looked with fear, with a sense of apprehension, upon this vastly endowed institution entering the educational ranks for competition. What was the result? We have, instead of competitive institutions, rival institutions; and I believe the enrollment in the University of California, which thought it was threatened, ranks only second to Yale and Harvard; and Stanford, with equal pace, has gone forward until it is one of the great universities of the land. So the one that was threatened—the University of California—became the greatest of them all, stimulated by the presence of a rival educational institution.

Certainly when the Senator says he would just as soon vote for having two capitals in this country, one east and one west, he does not, I am sure, seriously attempt to make a comparison between, or establish as anything analogous, the development of universities and the establishment of capitals. I myself believe in one capital and one flag and one country. The capital is the emblem of the unity of the Nation. If the Senator were consistent in that statement, he would discourage all other educational institutions except a national university; and I do not believe, although his logic would lead him there, that he would give us that as his conclusion, after a careful survey of the field.

They say that in England once there was one lawyer in a town who was starving to death until another came, when they both grew rich.

It is the spirit of emulation, the spirit of competition, of doing better than the other man can possibly do, whether in scholarship or in oarsmanship or in swimming or in athletics or in seamanship or in construction, that will bring us the very highest development in the men who are in the future to defend the country in its battles upon the sea.

I may say, in conclusion, without appearing in the least to be sectional, that in the far western land we have a climate which enables men to work in comfort, which you appreciate to-day, the year around. Hence, it is due to that fact that there has been a greater proficiency shown by the men educated, say, in the sports, in that part of the country. I read but to-day that in that form of athletics where men are made alert and hardy, in the tournaments, the men from the West excel the men from the East, and it is stated that it is due entirely to the fact, not that they are better in spirit and in thought and in aspiration, but that on every day of the year they can in comfort develop their muscles and promote their skill in the open air. And so in aviation, which in the future will mean much in determining the battles of the country. There aviation fields and aviators—a part necessarily of naval education—will find clear skies and congenial environment.

Senators, inasmuch as this is merely an ordinary and desirable means of securing information, and not in the least committing this body to the policy of even two naval academies, I request, on behalf of those who are interested, not so much in the western part of this country, but who are interested very deeply and sincerely in the development of the Navy and the skill and proficiency of its men, that this motion to reject the amendment be voted down.

Mr. WORKS. Mr. President, I agree entirely with the Senator from Massachusetts that if a second Naval Academy is not necessary, the question of locating it on the Pacific coast should receive no consideration whatever. I am one of those who believe that favors of this kind should not be distributed in any such way. But the matter to be submitted to this investigating commission is not merely whether it should be located on the Pacific coast or not, but whether or not there should be a second naval school at all.

It may be that the officers who will be called upon to investigate the matter may not agree with the Senator from Massachusetts as to the importance of maintaining the one academy at which he was educated. He may be a little bit prejudiced in that respect; but I see no reason why that matter should not be committed fairly to the naval officers who will be called upon to determine that question, as they will determine it, without any reference to the wishes or the desires of the people of the Pacific coast, so far as I represent those people. But if it should be determined that it is advisable that a second one should be established, then I think it is fair to consider the other question as to where it should be located. We have one at the far eastern side of the country, and I think it should be considered fairly whether the other one ought not to be established on the Pacific coast, after first determining that there should be a second one, and not before.

Mr. THOMAS. Mr. President, I am very sorry that I can not agree with the argument presented by my friend the junior Senator from California [Mr. PHELAN] in behalf of this amendment. I stated somewhat briefly, when the Senator from Massachusetts yielded for a question, why I thought the matter should be disposed of now; and I would not undertake to repeat what I said at that time if it were not for the fact that there are a good many Senators present now who were not present in the Chamber then.

The proposed amendment is as follows:

> Said commission shall also report on the advisability of establishing one or more naval academies on the Pacific coast or in the region of the Great Lakes and where the same should be located and the probable cost thereof.

Evidently the commission, if this amendment is incorporated into the law, will be required to visit various localities and to report upon the advisability, not of one, not of two, perhaps, but of an indefinite number of naval academies on the Pacific coast or in the region of the Great Lakes.

If it is necessary that the Government should establish one or more naval academies in addition to that which it now has, I see no reason why this commission should be confined in its examination to the Pacific coast and to the Great Lakes. There are other sections of the country which perhaps might possess facilities or advantages equal, if not superior, to those possessed by the two sections of the country specified in the amendment. There is the Gulf coast, for example.

Mr. BORAH. That has already been included.

Mr. THOMAS. There is the great interior body of salt water at Salt Lake City.

Mr. SMOOT. The best place in the world.

Mr. THOMAS. And there is also the argument, which is by no means a fallacious one, that naval academies might be desired and in fact might be superior, from some standpoints, if they were located away from any body of water at all. In any event, other sections of the Union will clamor—and if this amendment should be adopted, I shall be one of them—for an extension of this investigation so as to comprise the great Rocky Mountain region, which is interested in the Navy to some extent, perhaps, as other localities are, for local reasons.

Mr. President, when this commission goes to the Pacific coast for the purpose of making this investigation, and to the Great Lakes, its members will be feasted and wined and dined, and they will have great difficulty in resisting the genial and bounteous hospitality of my very dear friend the junior Senator from California [Mr. PHELAN], when he has an opportunity to entertain them and acquaint them with the magnificent resources and the splendid people and the wonderful atmosphere of that land of sunshine and gold and flowers. They will receive similar entertainment from my equally distinguished and hospitable friend the Senator from Illinois [Mr. LEWIS], who, I understand, is also interested in this investigation. And if they should, perchance, come to the city of Denver, there is no question but that it will maintain its own reputation for hospitality and for entertainment. I do not know of any commission, even

with Mr. Edison at its head, that will be able to resist all of the blandishments, all of the entreaties, all of the persuasions, and all of the representations that will necessarily and very properly be made concerning the necessity, first, of another academy, and second, the necessity of its location at the particular place which is at the time the immediate subject of inquiry and investigation.

This, Mr. President, will be followed by a similar amendment to our military bill—which, I think, is equally appropriate, if this is appropriate—providing for a similar commission which shall report upon the advisability of establishing one or more military academies in addition to the one which we possess. That commission will also be subjected to the same representations and the same persuasive influences which it is difficult, perhaps, to resist, and which, whether resisted or not, will necessitate a report here which, if favorable, will be acted upon, and if unfavorable will in all probability be followed by the institution of another and yet another commission until we can get one which will make the right kind of a report.

Mr. President, assuming that a report favorable to some locality shall be made without regard to the question of its necessity, experience teaches us that those who represent the section of the country favored by the report will be besieged—indeed, they will be beleaguered—by their constituency until they secure the establishment of the institution and the appropriation necessary for its adequate operation. The precedent having been set every State in the Union, one after the other, will be clamoring here for the institution of similar establishments within their geographical boundaries. Indeed, I perhaps might go further and say that every city of any great importance and every congressional district will ultimately desire schools of this kind. If we may judge from the manner in which similar precedents have multiplied into appropriations for similar purposes, certainly the prediction which I make in this matter is not an extravagant one.

So I think that this project of increasing the number of these schools, which I do not believe necessary, should be met at the threshold, and instead of having the subject investigated we should first determine whether the investigation is necessary.

Mr. President, if we have not room enough at Annapolis to house and graduate a sufficient number of students to officer our Navy, we should increase the capacity of that school. If we have not enough room and accommodations and facilities at West Point to turn out the requisite number of officers for our Military Establishment, then that school should be amplified so that it can meet the new demands made upon it.

But do not let us begin the work of duplicating, because it means the subsequent multiplication of these institutions; and, of course, that means the added expense necessary for their maintenance.

We must remember, Mr. President, that this bill carries the enormous appropriation of $319,000,000, and that if it becomes a law for the purpose of carrying out its provisions there must be raised in the next two or three years an added sum of $488,000,000, in round numbers. More than three-quarters of a billion dollars are involved in this bill, and, while the amendment here does not affect the amount of the appropriation at all, we can easily perceive how this report may be followed by the consequences to which I have called attention.

I think that we should leave it here and that the motion to strike out as proposed should prevail.

Mr. BORAH. Mr. President, we will shortly pass a bill here carrying the appropriation of a tremendous sum of money, and it seems to me that in view of the burden that must necessarily apparently be placed upon the taxpayers of the country we ought to be exceedingly thoughtful with regard to those matters which are not essential at this time.

Naturally I should be very much in favor of anything which would look to the aggrandizement or the honoring of the Pacific coast or anything which would inure to its benefit or to its recognition or anything that would tend to place the country west of the Mississippi upon the political map of the United States. But I must say I disagree with my able friend from California and others as to the necessity at this time or as to the wisdom of including this provision in the bill.

This is a peculiar amendment, Mr. President, and speaks for itself. It does not provide, as I read it, that this commission shall report upon the advisability of establishing another naval academy, but it is to report alone upon the question as to the advisability of establishing one or more naval academies on the Pacific coast or in the region of the Great Lakes. The thing upon which they are called to pass is whether or not it is advisable to establish it in that particular region or country.

Mr. President, for many years we know that our Army appropriations have been filled up with large amounts for the purpose of maintaining forts in different parts of the country which ought long ago to have been abandoned. There have been a great number of forts established, some of them necessarily in the early days, but afterwards becoming wholly useless. Others were established out of the same spirit and enterprise which characterize this movement. All of them have been a drain upon the Treasury without any real benefit or value to the Army or to the protection of our country. Those forts, many of them, ought long ago to have been abandoned. It is almost impossible to secure their abandonment, but, to use perhaps a not wholly inapt and yet a rough phrase, they are in sense "pork" in the Army bill, and they are constantly sustained. We have had also the same thing with reference to some of our naval bases.

This is not with the intention of making it so, but, actuated by the same spirit, will result in the same way the establishing of some things which it seems to me are not necessarily connected with a thorough preparedness for the country.

If there is any reason why this academy should be established upon the Pacific coast, it can be better determined, in my judgment, in after years, after the spirit which now pervades the country shall have disappeared.

You could establish almost anything in any part of the country at this time which would have the name or pass under the cover of preparedness, and which might in after years serve no other purpose than that of simply a drain upon the Treasury.

It seems to me that there are other things which we need very much more for the Pacific coast. One of them was mentioned by the able Senator from California. We need a more real protection, more warships upon the Pacific coast, more of those things which will really be of service and which we may need immediately, and we had better address our attention in the line of securing those things rather than to speculate upon this matter, which to my mind is not necessary at this time, and may result in a great drain upon the Treasury without any real benefit to the country.

Mr. POMERENE. Mr. President, whether or not the provision which the Senator from Massachusetts seeks to strike out is in the form in which it should be placed or not I am not quite certain. I believe there should be some inquiry into this subject. I do not think that in the form it appears in the bill it covers the situation. Some months ago, when the movement was on foot to increase the number of cadets at the Military Academy and the number of midshipmen at the Naval Academy, an officer of the Navy came to me with this suggestion. He believed it was necessary to increase the membership in both institutions, but he felt that there were not sufficient accommodations at either of those institutions for the increased number of cadets or midshipmen, and he suggested that it might be well to provide a third institution for the first-year men, so that the cadets who were appointed to West Point and the midshipmen hereafter to be appointed to the Naval Academy could attend this third institution during the first year. His reason was, in brief, that the course of study at the two institutions during the first year is substantially the same, and that it might be of very great benefit to the graduates of both institutions if they were brought somewhat more closely together during the first part of their course of study.

Having in mind his suggestion, some time afterwards I introduced in the Senate Senate bill 4711. This bill was referred to the Military Committee. I think perhaps it has had some slight consideration, but it has not been taken up for final action I understand. My thought is that if this commission is to be appointed it would be well to authorize the commission to inquire into the advisability of establishing this third institution and also as to the wisdom or unwisdom of having the cadets and midshipmen together during the first year of their course of study.

I do not believe that we should attempt now to locate an institution, whether it is of the kind suggested by the Senator from California or the one suggested by the Senator from Illinois or the one suggested in the bill which I myself presented. I think that can be done later if we determine that it is necessary.

Mr. PHELAN. May I ask the Senator a question?

Mr. POMERENE. Certainly.

Mr. PHELAN. The Senator expressed a doubt as to the wisdom of one course or another. Where the provision merely requires information to be sought by experts, he certainly would not object to the receipt of that information prepared by experts.

Mr. POMERENE. No; except I do object to this, that it is attempted by the provision of the bill to limit the judgment of the experts to particular localities. I am quite sure that, notwithstanding the fact that the distinguished Senator from Colorado overlooked Ohio, if this commission would get to

work they would not go farther west than Ohio for either of the institutions.

Mr. PHELAN. In answer to that, I simply desire to say that the existing institution is upon the Atlantic coast, and no good purpose would be served, in my judgment, in bringing in the greater population of the West by establishing another institution on the eastern coast. While I concede there is a necessity for it, there must be another institution, no matter where it is located, because it is the judgment of the Navy Department, I suppose properly advised, that 1,200 is the capacity of the existing institution, and that not more than 1,200 men should be educated in one place. I take that as a basis. If we do establish another institution, it must be far from the eastern seaboard in order to make a new demand. It is immaterial to me, for the purpose of this discussion, where it is, provided it is beyond the Atlantic seaboard and far enough west to bring within its scope that new population that seeks to serve the country and which is deterred by the remoteness of the Annapolis institution from their home.

Mr. SMOOT. Mr. President, I desire to ask the Senator from California a question. The Senator makes the statement that it is not advisable that Annapolis should have at any time more than 1,200 students. On what authority does the Senator make that statement?

Mr. PHELAN. In my previous remarks I said I made the statement on the authority of the Secretary of the Navy in a private conversation. The ground there is limited, and additional ground can not be acquired without very considerable cost because it adjoins the city. The plant is of a size and adequate only to meet the demands of 1,200 midshipmen, and therefore it is impracticable to increase that plant to educate a larger number of men. As I recollect, that was his judgment at that time.

Mr. SMOOT. I have talked with a good many naval officers, and the information that they give me is that Annapolis could just as well have 2,400 or 3,000 as the present number.

Mr. GALLINGER. Will the Senator from Utah permit me?

Mr. SMOOT. Certainly.

Mr. GALLINGER. The Senator from Utah is aware of the fact that we have just constructed a high-school building in the city of Washington for the accommodation of 2,500 school pupils?

Mr. SMOOT. The new Central High School?

Mr. GALLINGER. The new Central High School.

Mr. PHELAN. Do I understand the Senator to say that without any additional buildings it would accommodate 2,400?

Mr. SMOOT. I did not say that. I was going to tell the Senator what naval officers had told me. They claimed that a great deal of the overhead expenses and much of the expense of maintaining the institution would be the same with 1,200 as with 2,400 students.

I never heard the question as to whether there was room sufficient discussed, but I take it for granted that additional land could be purchased. No matter where a school was established, there would have to be land acquired. The building of the central or administrative building for a new naval academy would be very expensive, while with very little expense, I am informed, the administrative buildings at Annapolis could be made ample for all purposes, even if the attendance was increased to 2,000.

I wish to say that if there is to be another naval academy established, if the policy is to increase the number, then, of course, I think myself there ought to be one located in the far West, not necessarily in California, for I think the Senator from Colorado designated the very best place in the United States for a military or naval academy, and that was Salt Lake City.

I believe that if the amendment is going to be favorably considered, the Senator ought to ask that it be broadened and that the investigation be made by the commission first as to whether it is advisable to establish another naval academy, and, next, if it is advisable to do so let the commission say where it should be located—not in the Great Lakes country or California alone, but anywhere in the United States, I care not where. I think that would be the proper thing to do if we are going to undertake it at all. However, I have no doubt in my mind but what, if there is another academy established, it is going to cost the Government of the United States not one million dollars but many million dollars, and it will be a constant drain upon the Treasury every year.

Therefore, Mr. President, it seems to me it would be ill-advised to adopt the amendment, even if amended as I suggested.

Mr. PHELAN. May I ask the Senator a question?

Mr. SMOOT. Certainly.

Mr. PHELAN. If the Senator from Utah were a member of the proposed commission to determine the advisability of establishing a naval academy either on the Pacific coast or the Great Lakes, in considering the advisability, would he not discuss the preferential plan advocated by many of enlarging Annapolis?

Mr. SMOOT. I would; and I want to say frankly——

Mr. PHELAN. Therefore we will elicit the information, which none of us seems to have in detail, from authentic sources.

Mr. SMOOT. Mr. President, I wish to say frankly to the Senator that I have not now sufficient knowledge at my command, nor have I been able to secure the information that I would consider absolutely necessary to decide that question, particularly the question as to the advisability; but I have had experience enough in trying to establish branch schools in connection with the main school to know that every time it is done it is an expensive undertaking. I take it for granted that this would be an expensive undertaking, though I am not prepared to say that the advantages that might accrue from it would not offset the expense. As to that question, I have not information sufficient at my command to decide; but I do know that it would cost the Government of the United States millions of dollars to undertake it. I further know that there are naval officers who have told me that it would be no advantage whatever to have a divided school.

Mr. JONES. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Washington?

Mr. SMOOT. I do.

Mr. JONES. Will the Senator from Utah state whether or not the Navy Department, or any official representing it, has officially stated or suggested to Congress that an additional naval academy was needed?

Mr. SMOOT. I do not know of any public statement which has been made to that effect, and I doubt whether there has ever been one. I do not think that any official of the Navy Department has ever publicly recommended that such a course be followed; but the Senator from California [Mr. PHELAN] has stated that in a private conversation with the Secretary of the Navy the Secretary told him that he thought 1,200 students were all that could be successfully taught at Annapolis.

Mr. JONES. What I desired to find out was whether or not the Secretary of the Navy, in an official way, or whether anybody representing the Navy Department, has ever suggested or recommended to Congress that any separate academy or divided academy should be established.

Mr. SMOOT. I think I am perfectly safe in saying that no one has made such recommendation.

Mr. JONES. If such officials thought it very necessary, they certainly would make such a recommendation.

Mr. PHELAN. Mr. President, the fact remains that there is a necessity for the increase of accommodations at the Naval Academy. When I introduced a bill last winter appropriating a sum of money for the purpose of constructing a naval academy on the Pacific coast there was a report from the Secretary of the Navy—for which I have sent—and in a conversation with me at that time the Secretary said he believed in the establishment of another naval academy; but he was not prepared, without an investigation by competent persons, to recommend it. I acquiesced in that view, and we have waited all these months without bothering Congress for the purpose of having a commission appointed to report, among other things, on that subject. This merely provides for a commission to make a report. A refusal to vote for the amendment would be a refusal to accept, with open-mind, information, which in no way determines the main question.

Mr. BRANDEGEE. Mr. President, I am very much in favor of the creation of this commission. I think the information that they would get and the report that they would make to us would be very valuable and instructive, but I do not see any particular reason why they should be confined to particular sections of the country if they think other sections are better for such location. For myself I would be perfectly satisfied to accept the recommendation of trained men in that line of business; in fact, I think I should prefer their recommendation; I know I would prefer it to my own. I was going to suggest, however, to the chairman of the committee whether or not the purpose could not be served if we struck out the words "on the Pacific coast or in the region of the Great Lakes" and inserted words so that the amendment might read in this way:

Said commission shall also report on the advisability of establishing one or more additional naval academies and where the same should be located and the probable cost thereof, and whether the present academy should be enlarged.

Mr. SWANSON. Mr. President, this amendment was inserted at the request and in consequence of the earnest efforts of the junior Senator from California [Mr. PHELAN], the Senator from Illinois [Mr. LEWIS], and the Senator from Michigan [Mr. SMITH], all of whom are members of the committee. If it is agreeable to those Senators to accept the amendment now proposed by the Senator from Connecticut, it is perfectly agreeable to me.

Mr. BRANDEGEE. The only object I have is that the commission, being a commission of experts and naval officers, might have a free hand to suggest to Congress what they really thought was the best thing to do. We shall always have the right in the end to determine what is the best thing to do if we disagree with them.

Mr. LEWIS. I am perfectly willing that any form of investigation shall be made.

Mr. SWANSON. With the concurrence of the Senators previously named by me, I accept the amendment to the amendment.

Mr. SHEPPARD. Mr. President, let the amendment be again stated.

Mr. BRANDEGEE. I have not formally prepared it, but I have interlined the amendment in the bill which I hold in my hand. The reporter, of course, has taken the amendment down as I read it; but I will repeat it for the information of the Senate.

Mr. LIPPITT. Mr. President, if the Senator from Connecticut will excuse me, if he is going to offer that amendment to the amendment, would it not serve all of his purposes if, after the word "academies," he simply struck out the words "on the Pacific coast or in the region of the Great Lakes"?

Mr. BRANDEGEE. I did propose to strike out those words and to add something at the end of the amendment. If the Senator will permit me, I will once more read the amendment as it would read if my suggestion were accepted. I really do not care whether it is accepted or not. As I propose to amend the amendment it would read:

Said commission shall also report on the advisability of establishing one or more additional naval academies, and where the same should be located, and the probable cost thereof and whether the present academy should be enlarged.

Mr. SWANSON. I accept the amendment.

Mr. WEEKS. Mr. President, it is possible that the amendment to the amendment offered by the Senator from Connecticut [Mr. BRANDEGEE] may improve the original proposition, which was evidently purely sectional in its intent; but it does not improve the fundamental condition which is proposed to be effected by this proposition.

We do not need another naval academy. We have the facilities, possibly barring suitable dormitory rooms, at the Naval Academy for a greatly increased number of midshipmen. It would be a waste of the Government's money, in my judgment, to establish another naval academy.

Some Senator, in speaking to-day, has referred very truly to the course which is followed when a fort or any other Government establishment is once fixed. We go on year after year appropriating money for additions, for improvements, for repairs, and for maintenance, whether they are needed or desirable or whether they are not. Here is a case where, in my judgment, there is no necessity for the establishment of an additional naval academy. In fact I believe the product which would go to the Navy from two institutions would be less homogeneous, that it would be less adapted to our needs than if they went from one institution. I can not see any argument in favor of the proposition, and I sincerely hope that the entire amendment will be voted out of the bill.

Mr. VARDAMAN. I ask for the yeas and nays on the amendment.

Mr. POINDEXTER. Mr. President, I think, if the proposed commission should be appointed, they ought not to be limited to reporting on the advisability of establishing particular academies. It seems to me that they ought also to have authority to report, if any additional school at all is to be established, whether or not it should be a preparatory school. I know that there are a great many authorities in the Navy Department who favor the establishment of a preparatory school, where young boys may be prepared for entrance to the Naval Academy and also for entrance to the Military Academy. So, I move to amend this paragraph by inserting after the word "academies" the words "or schools preparatory for the United States Naval and Military Academies"; so that that may be included in the scope of the report.

The VICE PRESIDENT. Is that accepted by the committee?

Mr. SWANSON. Mr. President, I can not agree with the Senator that preparatory schools should be included in the scope of this provision. The only excuse I have ever heard from the naval officers with whom I have talked for the establishment of a second academy was to constitute purely a post-graduate school for, say, a one year's course, after a man had been graduated from the Naval Academy. Some have thought that possibly a second academy of that kind should be established, which could be a part of the academy at Annapolis and which would include post-graduate courses of one year, or some such period as that. As to preparatory academies all over the country, I think it would be a great mistake if we entered upon that system.

Mr. WEEKS. Mr. President, let me call the attention of the Senator to the fact that we have such an institution in the War College, which affords substantially a post-graduate course.

Mr. SWANSON. As I have said, the only excuse that I have ever heard and that ever has made any impression on me for the establishment of second academies was that there should be afforded a post-graduate course after the regular course at Annapolis had been completed.

The VICE PRESIDENT. The inquiry of the Chair was directed to the chairman of the committee for the purpose of keeping the record straight. The Senator from Washington can not, without the consent of the chairman of the committee, at the present time amend this portion of the amendment, because there is a motion pending to strike it out; and it is only when modified by the consent of the chairman of the committee that it can be modified before the motion to strike out is put.

Mr. POINDEXTER. The rule provides that the portion to be stricken out may be first perfected.

The VICE PRESIDENT. There is nothing to be inserted here; that is the difficulty about it.

Mr. GALLINGER. Question!

Mr. SHEPPARD. I rise to a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Texas will state it.

Mr. SHEPPARD. Does the adoption of the committee amendments at this time preclude the offering of amendments to those amendments at a later time?

The VICE PRESIDENT. If they are adopted now, it precludes that until the bill reaches the Senate, unless there is a motion to reconsider the vote whereby they have been adopted.

Mr. GALLINGER. I assume that in considering a committee amendment an amendment to amend the committee amendment would be in order.

The VICE PRESIDENT. There is no doubt about that, but that was not the inquiry of the Senator from Texas. The inquiry was directed to a case where the committee amendment had been adopted.

Mr. SHEPPARD. We were unable to hear the observation of the Senator from New Hampshire.

Mr. GALLINGER. My observation was that pending the consideration of a committee amendment a motion to amend that amendment would be in order.

SEVERAL SENATORS. Vote!

The VICE PRESIDENT. The question is on the amendment of the Senator from Massachusetts.

Mr. NORRIS. I ask for the yeas and nays.

Mr. JONES. Let us have the amendment read now as amended by the Senator from Connecticut.

The VICE PRESIDENT. The Secretary will read the amendment as modified.

The SECRETARY. On page 44, line 11, it is proposed to strike out the committee amendment as modified, as follows:

Said commission shall also report on the advisability of establishing one or more additional naval academies and where the same should be located and the probable cost thereof and whether the present academy should be enlarged.

Mr. PHELAN. That is the amendment offered by the Senator from Connecticut [Mr. BRANDEGEE].

The VICE PRESIDENT. No; it is an amendment accepted by the committee. The Chair is trying to rule that on a motion to strike out amendments can not be submitted to the text unless they are modifications accepted by the committee.

Mr. WEEKS. I ask for the yeas and nays.

Mr. SMITH of Georgia. I was unable to hear just what the Chair ruled. Does the Chair hold that we can not amend the committee amendment now?

The VICE PRESIDENT. No; there is a motion to strike out a committee amendment, and the Chair is ruling that a Senator can not on motion amend the part to be stricken out; that it must be done by the consent of the committee. If it is not stricken out, it can be amended, or if it is stricken out another amendment can be proposed.

SEVERAL SENATORS. Question!

The VICE PRESIDENT. The question is on the motion of the Senator from Massachusetts to strike out.

Mr. WEEKS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). In the absence of the senior Senator from Missouri [Mr. STONE], with whom I am paired, I withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. WADSWORTH. I have a general pair with the Senator from New Hampshire [Mr. HOLLIS]. In his absence I withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Tennessee [Mr. SHIELDS], and vote "nay."

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. VARDAMAN. I am requested to announce the unavoidable absence of the junior Senator from Tennessee [Mr. SHIELDS]. He is absent on important business. I ask that this announcement may stand for the day.

Mr. GALLINGER. I ask whether the junior Senator from New York [Mr. O'GORMAN] has voted?

The VICE PRESIDENT. He has not.

Mr. GALLINGER. I have a general pair with that Senator, and will withhold my vote. If privileged to vote, I should vote "yea."

Mr. GRONNA. I have a general pair with the Senator from Maine [Mr. JOHNSON]. In his absence I withhold my vote. If privileged to vote, I should vote "yea."

Mr. CATRON. I inquire if the Senator from Oklahoma [Mr. OWEN] has voted?

The VICE PRESIDENT. He has not.

Mr. CATRON. I have a pair with him, and therefore withhold my vote. If at liberty to vote, I should vote "yea."

Mr. TOWNSEND. I wish to announce the absence of my colleague [Mr. SMITH of Michigan], who is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the remainder of the day.

Mr. WALSH. I announce the absence of my colleague [Mr. MYERS] on account of illness. He is paired with the Senator from Connecticut [Mr. MCLEAN].

Mr. CHAMBERLAIN. I desire to announce the unavoidable absence of my colleague [Mr. LANE] on account of illness.

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. PAGE] with the Senator from Oklahoma [Mr. GORE];

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 27, nays, 32, as follows:

YEAS—27.

Borah	Fletcher	Martin, Va.	Sterling
Bryan	Hitchcock	Nelson	Thomas
Culberson	Kenyon	Norris	Townsend
Cummins	La Follette	Oliver	Vardaman
Curtis	Lippitt	Smith, Ga.	Warren
Dillingham	Lodge	Smith, Md.	Weeks
du Pont	McCumber	Smoot	

NAYS—32.

Ashurst	Hardwick	Phelan	Smith, Ariz.
Bankhead	James	Pittman	Smith, S. C.
Beckham	Johnson, S. Dak.	Poindexter	Swanson
Brady	Jones	Pomerene	Thompson
Brandegee	Kern	Ransdell	Tillman
Broussard	Lewis	Shafroth	Walsh
Chamberlain	Newlands	Sheppard	Williams
Chilton	Overman	Simmons	Works

NOT VOTING—36.

Catron	Gronna	McLean	Saulsbury
Clapp	Harding	Martine, N. J.	Sherman
Clark, Wyo.	Hollis	Myers	Shields
Clarke, Ark.	Hughes	O'Gorman	Smith, Mich.
Colt	Husting	Owen	Stone
Fall	Johnson, Me.	Page	Sutherland
Gallinger	Lane	Penrose	Taggart
Goff	Lea, Tenn.	Reed	Underwood
Gore	Lee, Md.	Robinson	Wadsworth

So the motion of Mr. WEEKS to strike out was rejected.

The VICE PRESIDENT. The question now recurs on the amendment of the committee.

Mr. POMERENE. I move to amend the amendment by inserting the matter which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to add, at the end of the amendment, the following words:

Said commission shall also report on the advisability of establishing a school for the accommodation, instruction, and training of military cadets and midshipmen, at which school all cadets and midshipmen shall attend for the first year after their appointment, and the place where it should be located, and the probable cost thereof.

Mr. SWANSON. I have no objection to that amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment. [Putting the question.] The Chair is in doubt.

Mr. POMERENE. I ask for a division.

The VICE PRESIDENT. All in favor of the amendment to the amendment will rise. [A pause.] Those opposed will rise. [A pause.] There is no doubt that the amendment to the amendment is rejected. The question now recurs on the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, under the subhead "Bureau of Medicine and Surgery," on page 44, line 27, after the word "stores," to strike out "$700,000" and insert "$921,740," so as to make the clause read:

Medical Department: For surgeons' necessaries for vessels in commission, navy yards, naval stations, Marine Corps, and for the civil establishment at the several naval hospitals, navy yards, naval medical supply depots, Naval Medical School, Washington, and Naval Academy, and toward the accumulation of a reserve supply of medical stores, $921,740.

The amendment was agreed to.

The next amendment was, on page 46, line 3, after the words "in all," to strike out "$167,000" and insert "$241,080," and in line 5, after the words "dairy herd," to insert "land for pasturage, and erection of necessary buildings," so as to make the clause read:

Contingent, Bureau of Medicine and Surgery: For tolls and ferriages; care, transportation, and burial of the dead; purchase of books and stationery, binding of medical records, unbound books, and pamphlets; hygienic and sanitary investigation and illustration; sanitary and hygienic instruction; purchase and repairs of nonpassenger-carrying wagons, automobile ambulances, and harness; purchase of and feed for horses and cows; purchase, maintenance, repair, and operation of two passenger-carrying motor vehicles for naval dispensary, Washington, D. C., to be used only for official purposes; trees, plants, care of grounds, garden tools, and seeds; incidental articles for the Naval Medical School and naval dispensary, Washington; naval medical supply depots, sick quarters at Naval Academy and marine barracks; washing for medical department at Naval Medical School and naval dispensary, Washington; naval medical supply depots, sick quarters at Naval Academy and marine barracks, dispensaries at navy yards and naval stations, and ships; and for minor repairs on buildings and grounds of the United States Naval Medical School and naval medical supply depots; rent of rooms for naval dispensary, Washington, D. C., not to exceed $1,200; for the care, maintenance, and treatment of the insane of the Navy and Marine Corps on the Pacific coast, including supernumeraries held for transfer to the Government Hospital for the Insane; for dental outfits and dental material, not to exceed $38,000, and all other necessary contingent expenses; in all, $241,080: *Provided*, That the Secretary of the Navy, in his discretion, may expend $25,000 of said appropriation for the purchase of a dairy herd, land for pasturage, and erection of necessary buildings for the naval hospital at Las Animas, Colo.

The amendment was agreed to.

The next amendment was, on page 46, line 15, after the words "United States," to strike out "$17,500" and insert "$24,908," so as to read:

Transportation of remains: To enable the Secretary of the Navy, in his discretion, to cause to be transferred to their homes the remains of officers and enlisted men of the Navy and Marine Corps who die or are killed in action ashore or afloat, and also to enable the Secretary of the Navy, in his discretion, to cause to be transported to their homes the remains of civilian employees who die outside of the continental limits of the United States, $24,908.

The amendment was agreed to.

The next amendment was, on page 47, line 1, after the word "Surgery," to strike out "$884,500" and insert "$1,187,728," so as to make the clause read:

In all, Bureau of Medicine and Surgery, $1,187,728.

The amendment was agreed to.

The next amendment was, on page 49, after line 22, to insert:

NAVAL DENTAL CORPS.

That the President of the United States is hereby authorized to appoint and commission, by and with the advice and consent of the Senate, dental surgeons in the Navy at the rate of 1 for each 1,000 of the authorized enlisted strength of the Navy and Marine Corps, who shall constitute the Naval Dental Corps, and shall be a part of the Medical Department of the Navy. Original appointments to the Naval Dental Corps shall be probationary for a period of two years and may be revoked at any time during the probationary period by the President: *Provided*, That the rank of such officers of the same date of appointment among themselves at the end of said probationary period shall be determined by the recommendations of an examining board appointed by the Secretary of the Navy, which board shall conduct a competitive examination, based upon both service record and professional attainments, in accordance with such regulations as may be prescribed by the Secretary of the Navy; and the rank of such officers

so determined shall be as of date of original appointment with reference to other appointments to the naval service: *Provided further*, That all appointees to the grade of dental surgeon shall be citizens of the United States between 24 and 30 years of age, and shall be graduates of standard medical or dental colleges and trained in the several branches of dentistry, and who shall before appointment have successfully passed moral, physical, and professional examinations before medical and professional examining boards appointed by the Secretary of the Navy and have been recommended for appointment by such boards.

Dental surgeons shall have the rank, pay, and allowances of lieutenants (junior grade) until they shall have completed five years' service. Dental surgeons of more than 5 but less than 20 years' service shall, subject to such examinations as the Secretary of the Navy may prescribe, have the rank, pay, and allowances of lieutenant. Dental surgeons of more than 20 years' service shall, subject to such examinations as the Secretary of the Navy may prescribe, have the rank, pay, and allowances of lieutenant commander: *Provided*, That the total number of dental surgeons with the rank, pay, and allowances of lieutenant commander shall not at any time exceed 10.

All officers now in the Dental Corps, appointed under the provisions of the act of August 22, 1912, entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1913, and for other purposes," including the officers appointed for temporary service, shall be appointed dental surgeons without further examination and without regard to the age qualifications herein prescribed: *Provided*, That the officers so appointed shall not be subject to the provisions herein prescribed for probationary service for a period of two years: *Provided further*, That such officers shall, after appointment as herein prescribed, rank from date of commission and take seniority among themselves in the order of their original appointment by the Secretary of the Navy as shown on the Navy list on the date of approval of this act: *And provided further*, That no dental surgeon appointed in accordance with the provisions of this act who on original appointment to the Dental Corps was over 40 years of age shall be eligible for retirement before he has reached the age of 70 years, except for physical disability incurred in the line of duty.

Dental surgeons who shall have lost numbers on the Navy list by sentence of court-martial or by failure upon examination for promotion shall be considered to have lost service accordingly for purposes of advancement in rank with increased pay and allowances.

DENTAL RESERVE CORPS.

That a Navy Dental Reserve Corps is hereby authorized to be organized and operated under the provisions of the act approved August 22, 1912, providing for the organization and operation of a Navy Medical Reserve Corps, and differing therefrom in no respect (except as may be necessary to adapt the said provisions to the Navy) other than that the qualification requirements of the appointees shall be dental surgeons and graduates of reputable schools of medicine or dentistry instead of "reputable schools of medicine," and so many of said appointees may be ordered to temporary active service as the Secretary of the Navy may deem necessary to the health and efficiency of the personnel of the Navy and Marine Corps, provided the whole number of both Naval Dental Corps and Naval Dental Reserve Corps officers in active service shall not exceed in time of peace 1 to 1,000 of the officers and enlisted men of the Navy and Marine Corps: *Provided*, That all officers now in the Navy Medical Corps and the Navy Dental Reserve Corps shall be recommissioned, respectively, in the Navy Medical Reserve Corps as established under the provisions of the act of August 22, 1912, and in the Navy Dental Reserve Corps provided in this act, in the order of their original appointment in said corps, and hereafter when ordered to active duty they shall receive promotion in rank in the respective reserve corps under the same relative conditions and provisions of active service as is provided in this act for the Naval Dental Corps.

Mr. OVERMAN. Let that be passed over, Mr. President.

Mr. SWANSON. Mr. President, I understand the Senator from Massachusetts and the Senator from New York desire to be heard on this amendment.

Mr. LODGE. The Senator from North Carolina desires to have it passed over for the present. I have no objection.

The VICE PRESIDENT. The amendment beginning at the foot of page 49 and going to line 18 on page 53 will be passed over.

The reading of the bill was resumed.

The next amendment was, under the subhead "Bureau of Supplies and Accounts," on page 53, line 21, after the word "duty," to strike out "$12,925,135.36" and insert "$12,927,735.36," and in line 24, before the word "commutation," to strike out "dental surgeon at Naval Academy, $2,400," so as to read:

Pay of the Navy: Pay and allowances prescribed by law of officers on sea duty and other duty, $12,927,735.36; officers on waiting orders, $175,000; officers on the retired list, $3,124,527; commutation of quarters for officers on shore not occupying public quarters, including boatswains, etc.

Mr. NORRIS. Mr. President, I should like to inquire of the Senator from Virginia why the provision for this dental surgeon is stricken out here?

Mr. SWANSON. This dental surgeon is really entitled to $2,600 by the length of his service at the academy. Having this provision there limits him to less than he is entitled to under the law. Therefore it is cut out at that point and included on the other side in the proper amount—$2,600.

Mr. LODGE. It is provided for under another item.

Mr. NORRIS. That is what I wanted to ascertain.

Mr. SWANSON. Yes; it was a mistake.

Mr. NORRIS. Is there only one dental surgeon there?

Mr. LODGE. There is only one at the academy. He has been long in the service there, and there has only been one there.

Mr. NORRIS. It seemed to me that it would really be necessary to have more than one.

Mr. LODGE. When the Naval Dental Corps probably is established there undoubtedly will be a detail made there of an assistant.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, in the item of appropriation for "Pay of the Navy," on page 54, line 19, after the words "Fish Commission," to strike out "61,500 men" and insert "68,700 men, and the President is hereafter authorized, whenever in his judgment a sufficient national emergency exists, to increase the authorized enlisted strength of the Navy to 87,000 men."

Mr. NORRIS. Mr. President, I do not care to debate this amendment particularly; but it is quite an important one, and it seems to me there ought at least to be an explanation on the part of the committee as to why it is put in. As I understand, it increases the Navy from 61,500 men to 68,700 men, or possibly to 87,000 men.

Mr. SWANSON. Mr. President, if the Senator will note, the House increased the personnel of the Navy of enlisted men to 61,500 men, and we increased it to 68,700 men. At present a great many of our battleships are in reserve, not in commission, and a great many of them in reserve have not a complement of men sufficient to have them well manned. We have not any reserve like the other nations. Our Naval Reserve only amounts to 400 men. We have a Naval Militia of several thousand. One of the great complaints about the Navy being that we do not have enough enlisted men, the General Board recommended that our force of enlisted men should be increased to 74,700 men—that is, 68,700 enlisted men and 6,000 apprentice seamen. We have adopted the recommendation of the General Board and increased the men to that extent, and we are satisfied that it is needed. It is needed to use the ships we already possess. This will take care of our best battleships and battle cruisers, and it will give a complement of 50 per cent of men on the ships that are in reserve; and that is what the General Board recommends.

Mr. LODGE. If the Senator will allow me, it is absolutely necessary if we are to man our ships.

Mr. SWANSON. Absolutely so. The Secretary recommended it.

Mr. VARDAMAN. Is this for the ships already constructed or for the ships to be constructed under this bill?

Mr. LODGE. Ships already constructed are out of commission and insufficiently manned; and some of the destroyers are at this moment short of men in order to make up the complement of battleships.

Mr. SWANSON. We make no appropriation or authorization for enlisted men until the ship is ready. This is simply to take care of the present needs.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 54, in line 24, after the words "Hospital Corps," to strike out "$857,405.75"; in line 25, after the words "Naval Militia," to strike out "$28,421,394.25" and insert "$30,655,704.29"; on page 55, line 6, before the word "thousand," to strike out "three" and insert "six"; in line 7, before the word "apprentice," to strike out "five hundred"; in line 9, after the word "law," to strike out "$740,880" and insert "$999,630"; in line 10 after the words "in all," to strike out "$46,876,246.86" and insert "$50,226,912.65"; and in line 15, after the word "fund," to insert "*Provided*, That the enlisted strength of the Navy authorized in this act shall be deemed to include all enlistments heretofore made during this calendar year which may have been in excess of the number authorized by law at the time," so as to read:

Pay of petty officers, seamen, landsmen, and apprentice seamen, including men in the engineers' force and men detailed for duty with the Fish Commission, 68,700 men, and the President is hereafter authorized, whenever in his judgment a sufficient national emergency exists, to increase the authorized enlisted strength of the Navy to 87,000 men; and pay of enlisted men of the Hospital Corps and for the pay of enlisted men detailed for duty with the Naval Militia, $30,655,704.29; pay of enlisted men undergoing sentence of court-martial, $225,000, and hereafter the number of enlisted men of the Navy shall be exclusive of those sentenced by court-martial to discharge; and as many machinists as the President may from time to time deem necessary to appoint; and 6,000 apprentice seamen under training at training stations and on board training ships, at the pay prescribed by law, $999,630; pay of the Nurse Corps, $119,182; rent of quarters for members of the Nurse Corps, $15,000; in all, $50,226,912.65; and the money herein specifically appropriated for "Pay of the Navy" shall be disbursed and accounted for in accordance with existing law as "Pay of the Navy," and for that purpose shall constitute one fund: *Provided*, That the enlisted strength of the Navy authorized in this act shall be deemed to include all enlistments heretofore made during this calendar year which may have been in excess of the number authorized by law at the time.

The amendment was agreed to.

The next amendment was, on page 56, after line 8, to insert:

Hereafter in addition to the appointment of midshipmen to the United States Naval Academy, as now prescribed by law, the President is hereby allowed 15 appointments annually instead of 10, as now prescribed by law, and the Secretary of the Navy is allowed 25 appointments annually instead of 15, as now prescribed by law, the latter to be appointed from the enlisted men of the Navy who are citizens of the United States, and not more than 20 years of age on the date of entrance to the Naval Academy, and who shall have served not less than one year as enlisted men on the date of entrance: *Provided*, That such appointments shall be made in the order of merit from candidates who have in competition with each other passed the mental examination now or hereafter required by law for entrance to the Naval Academy and who passed the physical examinations required before entrance under existing laws.

Mr. THOMAS. Mr. President, in the examination this year of the enlisted men, 23 of the candidates qualified. Under the existing provisions of law it was possible to appoint but 15 of them. I should like to inquire of the Senator having charge of the bill whether the bill contains any provision for the admission of the additional eight men who passed the examination?

Mr. LODGE. They are covered by this amendment.

Mr. SWANSON. The amendment allows the Secretary of the Navy to appoint 25 men.

Mr. THOMAS. I understand that; but my inquiry is whether, under this provision, these eight men will be admitted?

Mr. SWANSON. It is understood from the Secretary that he will be able to take care of these eight men under it.

Mr. LODGE. They are covered by the language of this amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, at the top of page 57, to insert:

That hereafter the Secretary of the Navy is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Naval Academy at Annapolis, Md.: *Provided*, That the Filipinos undergoing instruction, as herein authorized, shall receive the same pay, allowances, and emoluments, to be paid out of the same appropriations, and shall be subject to the same rules and regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as are authorized by law and regulation for midshipmen appointed from the United States, but the Filipino midshipmen herein authorized shall not be entitled to appointment to any commissioned office in the United States Navy by reason of their graduation from the Naval Academy.

Mr. WADSWORTH. Mr. President, it seems to me that this amendment of the committee presents a rather unusual phase as a piece of legislation. The Secretary of the Navy is authorized, under this amendment, to admit four Filipinos to the Naval Academy, to educate them at the expense of the Government of the United States, and the amendment then proceeds to deny to those Filipinos the right to serve as officers in the United States Navy.

It seems to me that it is at least a doubtful policy to educate these Filipinos as naval officers and then refuse by statute to make use of ther services. It can not be contended by the friends of this amendment that we are educating Filipinos to serve in a Filipino navy at some time in the future, for I do not think any Senator will contend that the Filipinos, if granted their independence at sometime in the future, really will possess a navy which will sail the seas.

Mr. SWANSON. This amendment makes exactly the same provision for the Naval Academy that the present law makes for the Military Academy.

Mr. WADSWORTH. Mr. President, may I suggest that that is a very different proposition? The United States Government supports in the Philippines now a military force composed of Filipinos, the Filipino Scouts; and I assume, without having accurate information on the subject, that one of the purposes of admitting Filipinos to the Military Academy at West Point is perhaps to educate some of those Filipinos to be commissioned officers of the land force maintained in the Philippines. But this is for the education of naval officers, and I do not think it can be contended that the Filipinos are going to maintain a navy. Yet this provision forbids their being employed in the United States Navy; and I think educating Filipinos to be naval officers will result in educating Filipinos to be naval officers in some other navy than our own.

Mr. SWANSON. The Philippine legislature also requested that this privilege should be extended to them and it was transmitted through our Governor General, and the Secretary of the Navy recommended that the request of the Philippine Legislature be complied with. He thought it would be very beneficial.

Mr. WADSWORTH. I do not want to create the impression that anything I said in regard to this amendment arose from an unfriendly or ungenerous feeling toward the Philippine people. I think it is a very commendable project to educate Filipinos in the United States, but if the United States Government is to embark upon the policy of education for Filipinos in the United States at Government expense it should be done in the universities of the country and not in the naval schools and at the same time forbid the Filipinos from taking advantage of that education as naval officers. It is apparent of course there is good reason for forbidding the enrollment of these Filipino midshipmen as officers of the Navy. It seems to me if the Government wants to spend money on educating Filipinos it is a very commendable project and should be done in the universities of the country instead of the Naval Academy.

Mr. VARDAMAN. Mr. President, I can understand why the education of Filipinos at West Point might be of advantage to the United States so long as it is the purpose of the United States Government to hold the Philippine Islands, but I do not believe that any man should be an officer of the United States Navy except an American white man. I put it on that ground. I am afraid that some of us are not quite as mindful of the magnitude of the problem involved, and as cautious as prudence would dictate we should be in dealing with the question of race. In my judgment the race question is the most difficult problem which the American people are called upon to solve. And the danger which I see in the situation is the unmindfulness on the part of the leaders of public thought of the gravity of the question.

Mr. SWANSON. The amendment provides that he shall not be an officer.

Mr. VARDAMAN. I understand. Then if he is not to be an officer you do not want to educate him as the able Senator from New York has said for some other navy, because he is going to use his education or the knowledge which he acquires at the academy for some purpose that will be of benefit to him. He is not going to be a mere private in the Navy of the United States. If he can not get employment in the American Navy as an officer he will join some other navy. It is quite natural for this man to seek the field of employment wherein he may find the goal of his ambition and realize his hopes.

Mr. TOWNSEND. May I ask the Senator in charge of the bill what object the committee had in mind in inserting this provision?

Mr. SWANSON. The legislative body in the Philippines requested us to grant this privilege. It was transmitted through our Governor General, and the Secretary of the Navy requested it.

Mr. TOWNSEND. What reason did they give for giving their men an education they could not use?

Mr. SWANSON. They had an idea that if they became independent in the case of any ships they might possess it might be of value, and if they did not become independent they might serve this Government.

Mr. TOWNSEND. They have no right to serve this Government.

Mr. SWANSON. But as an officer of a ship there, a man educated at the academy becomes a good seaman in all directions.

Mr. STERLING. I should like to direct a question to the Senator in charge of the bill in view of what he last said in regard to the request of the Philippine Legislature in this regard. Are the Philippine Legislature or the Filipino people satisfied with the amendment as it is proposed? In other words, are they satisfied with a provision that will exclude Filipino students or graduates of the Naval Academy from being commissioned as officers?

Mr. SWANSON. I have no information on that subject. This amendment was drawn and reported as requested by the department. It was transmitted at the request of the Philippine Legislature.

Mr. SHAFROTH. Mr. President, I should like to say a word in relation to the matter. I think it is very important for this Government that we should have the most friendly relations with the Philippine people, no matter what may be the outcome of their desire for independence, and for that reason it seems to me that any manifestation on our part of good feeling or of favor at this time would evidently have a tendency to draw them to us in the way of assistance and in every way in the administration of the government over there.

It seems to me, Mr. President, that inasmuch as this same provision is practically in the Army bill for the Military Academy, and inasmuch as the scouts over there are in the United States service and are making good in every particular, performing whenever they are called out excellent service, and they are in every way desirous of aiding and assisting the United States Government, it is a recognition of their standing that is bound to make toward the good feeling that now exists between the Filipinos and the American Government. Whether or not we

sever relations between the Government and the Filipinos, this provision, it seems to me, would have a wholesome effect.

Mr. WEEKS. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. WEEKS. I wish to ask the Senator whether he does not think if it is desirable for us to show our friendly feeling to the Filipinos by educating some of their young men it would be wise for us to educate them in a way so they would be useful to themselves and to their people and to our Government? Turning to the Army Register I find that there have been several Filipinos graduated at the Military Academy and they are serving in the Philippine Scouts as officers. Undoubtedly they are performing good service. If it is desirable to show our friendship, why would it not be well for us to increase the number at the Military Academy rather than to educate them at the Naval Academy, when they would be of no service to us or to their own country by being given that education?

Mr. SHAFROTH. I can say with regard to where these people should be educated that I understand there is now a law on the statute books of the Philippine Islands which provides a fund for the education in American universities of Filipinos out of their revenues, and 100 Filipinos are being educated continuously in the United States at universities and schools. They are doing their part. They are trying to get a knowledge of our institutions and of our language, and their good intent is shown by the fact that they make that appropriation for the education of these people.

Mr. VARDAMAN. Mr. President, I wish to suggest to my friend from Colorado that it is possible that it would be a very sore disappointment to the bright Filipino boy who goes to the Naval Academy and equips himself for that work in life and shows his fitness and aptitude to be denied the privileges after he has gone through the academy, of using the knowledge he had acquired there. I can not imagine a more unfortunate plight for a proud, ambitious man to find himself in than that. You cultivate the mind, fire the ambition, and then shut the door of hope in his face. Now, I think, for the good of the American white people the door of hope should be shut in his face, if it must be done; but I prefer not firing the ambition and generating the hope when we know beforehand that the door must be shut.

If, as suggested by the Senator from Massachusetts, you educate him at the Military Academy at West Point, he can go to his native country and there engage in the service of the United States by serving in the Army, but under the terms of this bill if we educate him, if we graduate him from the Naval Academy, he is denied the privilege of using the knowledge he acquires there in the service of the United States in the Navy, and it may be a sad disappointment to him.

The Senator can very readily understand why we do not want to have a man of that race as an officer in the United States Navy.

Mr. SHAFROTH. Mr. President, it may be that there are objections to the phraseology that is here employed; but if the Philippine people are to have their independence they ought to have some people there who are capable of conducting whatever vessels they may have for themselves in any armament or navy that they may acquire.

Inasmuch as we are trying to put them upon a basis of independence so that they can handle their own affairs, I do not believe they would take it as an affront or as anything against them if they are not accorded the right of becoming officers in the United States Army.

This is a proposition of education, and, inasmuch as the Naval Academy gives such an excellent education, it is natural that there should be people from that country who would desire to come here.

Mr. President, I understand that we admit foreigners into the Naval Academy. The President has a right to designate a certain number from any country who may acquire an education at our Naval Academy. They pay a proportionate charge. The proportion that the cost of maintaining the academy bears to the number of cadets in the academy fixes the price at which the Government permits entrance into the academy from foreign countries, which has been estimated, I think, at $13,500 for the four-year term. Those people do not enter our Navy. They want to get the knowledge that is given there.

Mr. President, it seems to me in view of our relations with those people and the desire to assist them in every way we can, whether they become independent or whether they do not become independent, this is a wise provision.

Mr. WEEKS. I wish to ask the Senator if he recalls any cases where young men from any other country than Japan were admitted to the Naval Academy?

Mr. SHAFROTH. I do not know, but I have understood that the President has the power to admit them into the academy. I have been so told.

Mr. WEEKS. Thirty or forty years ago we did educate some Japanese students in the Naval Academy, but I do not recall any other instance.

Mr. THOMAS. I think they have been admitted to West Point.

Mr. WEEKS. That is a very different matter.

Mr. NELSON. Mr. President, I desire to make a suggestion in respect to this matter. I can conceive where these officers can be very useful in the Philippine Islands without being officers in our Regular Navy. We have a peace establishment—the Filipino Scouts—to keep the peace, and the officers that we have educated at the Military Academy become officers of it. With the great number of islands and the water surrounding them, we need something to aid the Government in patrolling the sea to prevent smuggling and to take care of the shipping. We have a Coast-Guard Service there that used to be called the Revenue-Cutter Service. I can not see why it would not be very possible to have little vessels armed as patrol vessels commanded by these Filipino officers, with crews entirely of Filipinos.

In the Philippines the Moro population especially have been great navigators in their day. I can remember when I was a boy seeing pictures of Moros sailing in their peculiar ships. They are considered great navigators.

To me it seems that these officers educated at the Naval Academy would be useful for two purposes. They would be useful in forming a part of the water patrol necessary to prevent smuggling. They need not command any but sailors of their own blood, and I am sure there could be no objection to that, and they could become very efficient. Besides that, they would become good, useful officers to command merchantmen. They have local shipping over there—vessels navigated by their own people, plying between the islands—and these men could become useful commanders of them.

So I think, on the whole, we ought to manifest toward the Filipino people a little friendliness, and I do not think it would jeopardize our own service in the least. By excluding them from the Navy you do not cut them off from their usefulness in their own bailiwick, in their own islands. They can become useful there in the patrol service, as I have indicated, and also in the local merchant service.

Therefore I trust that this little amendment may be left in as a matter of encouragement to the Filipino people.

Mr. SWANSON. In addition to that, I should like to say that this request was formally presented to this Government. The resolution was passed by the Philippine Legislature, and the legislature, through the Governor General, transmitted it, and I think it would be an evidence of ill will to reject the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 57, after line 15, to insert:

COMMISSIONED PERSONNEL.

Hereafter the total number of commissioned officers of the active list of the line of the Navy, exclusive of commissioned warrant officers, shall be 4 per cent of the total enlisted strength of the active list authorized by law: *Provided*, That the total number of commissioned line officers on the active list at any one time, exclusive of commissioned warrant officers, shall be distributed in the proportion of 1½ in the grade of rear admiral to 4 in the grade of captain, to 8 in the grade of commander, to 14 in the grade of lieutenant commander, to 32½ in the grade of lieutenant, to 40 in the grades of lieutenant (junior grade) and ensign, inclusive.

And that the total number of commissioned officers of the active list of the following-mentioned staff corps at any one time, exclusive of commissioned warrant officers, shall be distributed in the various grades of the respective corps as follows:

Medical Corps: One and one-half deputy surgeons general with the rank of rear admiral, to 4 medical directors with the rank of captain, to 8 medical inspectors, to 18 surgeons, to 68½ in the grades below surgeon: *Provided*, That hereafter appointees to the grade of assistant surgeon shall be between the ages of 24 and 32 at the time of appointment.

Pay Corps: One and one-half deputy paymasters general with the rank of rear admiral, to 4 pay directors with the rank of captain, to 8 pay inspectors, to 86½ in the grades below pay inspector.

Construction Corps: One and one-half naval constructors with the rank of rear admiral, to 5½ naval constructors with the rank of captain to 14 naval constructors with the rank of commander, to 79 naval constructors and assistant naval constructors with rank below commander: *Provided*, That vacancies in the Construction Corps shall be filled in the manner now prescribed by law, at such annual rate as the Secretary of Navy may prescribe.

Corps of Civil Engineers: One and one-half civil engineers with the rank of rear admiral to 5½ civil engineers with the rank of captain, to 14 with the rank of commander, to 79 civil engineers and assistant civil engineers with rank below commander: *Provided*, That the total authorized number of commissioned officers of the active list of the following staff corps, exclusive of commissioned warrant officers, shall be based on percentages of the total number of commissioned officers of the active list of the line of the Navy as follows: Pay Corps, 12 per cent; Construction Corps, 5 per cent; Corps of Civil Engineers, 2 per

cent; and that the total authorized number of commissioned officers of the Medical Corps shall be sixty-five hundredths of 1 per cent of the total number of the officers and enlisted men of the Navy and Marine Corps; and that officers in the lower grades of the Pay Corps, the Construction Corps, and the Corps of Civil Engineers shall be advanced in rank up to and including the rank of lieutenant commander with the officers of the line with whom or next after whom they take precedence under existing law.

Chaplains: One and one-half chaplains with rank of rear admiral to 5½ with rank of captain, to 14 with rank of commander, to 79 chaplains and acting chaplains with rank below commander.

Provided, That for the purpose of determining the authorized number of officers in any grade or rank of the line or of the staff corps, there shall be excluded from consideration those officers carried by law as additional numbers, including staff officers heretofore permanently commissioned with the rank of rear admiral, and that nothing contained herein shall be held to reduce below that heretofore authorized by law the number of officers in any grade or rank in the line or staff corps.

Provided, That hereafter the pay and allowances of officers in the upper half of the grade or rank of rear admiral in each corps and chiefs of bureaus shall be that now allowed by law for the first nine rear admirals, and the pay and allowances of officers in the lower half of the grade or rank of rear admiral in each corps shall be that now allowed by law for the second nine rear admirals.

Provided further, That when there is an odd number of officers in the grade or rank of rear admiral in each corps, the lower division thereof shall include the excess in number, except when there is but one.

Whenever a final fraction occurs in computing the authorized number of any corps, grade, or rank in the naval service, the nearest whole number shall be regarded as the authorized number: *Provided*, That at least one officer shall be allowed in each grade or rank herein established.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

Mr. WALSH. Mr. President, I inquire if that is the conclusion of the amendment?

Mr. LODGE. That is the conclusion of that amendment. The next amendment, I will say to the Senator from Montana, relates to warrant officers.

Mr. WALSH. I observe some provisions toward the close of what follows, page 63, evidently applying to all officers.

Mr. LODGE. We have not yet reached that. This amendment stops at the top of page 61. It relates only to the increase of grades made necessary by the increase in the number of enlisted men.

Mr. WALSH. Mr. President, I suppose probably this may be denominated as general legislation. I want to inquire of the Chair just exactly what the action of the Senate was on yesterday touching the right to insist upon a point of order in the Senate upon a matter considered as in Committee of the Whole?

The VICE PRESIDENT. The Senate then decided that the point of order might be made in the Senate as well as in Committee of the Whole.

Mr. WALSH. I regret that. I was quite well satisfied that matter adopted in Committee of the Whole would not be subject to a point of order in the Senate unless reserved.

I have an amendment to offer to this amendment proposed by the committee, which was tendered some time ago by the Senator from South Carolina [Mr. TILLMAN], the chairman of the committee. I do not see him here. I offer it as an amendment to the committee amendment, and ask that it be inserted after the end of the amendment on page 61.

The VICE PRESIDENT. The amendment to the amendment proposed by the Senator from Montana will be stated.

The SECRETARY. On page 61, after line 5, it is proposed to insert:

Hereafter every officer of the Navy shall be officially addressed by the title of his rank without any distinction or discrimination whatever, except that in written communications the corps to which any such officer belongs shall be stated next after his name.

Mr. WALSH. I hope the committee will find no objection to that amendment.

The VICE PRESIDENT. The question is on the amendment to the amendment.

Mr. THOMAS. Mr. President, I should like to inquire of the Senator from Montana just what the purpose of that amendment is?

Mr. WALSH. It is a very simple matter. The earlier provisions of the bill give to various staff officers in the Navy a certain rank, as the Senator from Colorado will have noted. The Medical Corps, for instance, is to consist of "one and one-half deputy surgeons general with the rank of rear admiral to four medical directors with the rank of captain." So the Pay Corps is to consist of "one and one-half deputy paymasters general with the rank of rear admiral," and so forth. My amendment to the committee amendment simply provides that in communications to them they shall be addressed by the rank which they have.

Mr. THOMAS. Mr. President, what would happen to me, for instance, if I were to address one of these gentlemen without addressing him by his rank?

Mr. WALSH. The Senator from Colorado would be guilty of a gross breach of etiquette of the service.

Mr. THOMAS. I want to find out and understand exactly what may be accomplished by the amendment. Seriously, I was struck somewhat with the unusual phraseology of the Senator's amendment, as I know the Senator is always very careful in preparing his amendments.

Mr. WALSH. I think that there should be no difficulty at all about understanding the matter. The staff officers in the Navy have rank as is provided in the bill.

Mr. THOMAS. That is perfectly right.

Mr. WALSH. Exactly; but, unlike the staff officers in the Army, they are not entitled to be addressed in official communications by the title appropriate to their rank. For instance, the head of the Medical Corps in the Navy, a man like Surg. Gen. Blue, has the rank of admiral, but he is not to be addressed as admiral. The man who is at the head of the Medical Corps in the Army is Gen. Gorgas. He is to be addressed by the title accompanying his rank. He has the rank of a major general, and he is Gen. Gorgas; but the other gentleman is not Admiral Blue.

Mr. SMITH of Georgia. Does the Senator from Montana think that the title of "general" has added anything to the great standing of Dr. Gorgas? Is he not bigger as Dr. Gorgas than he is as Gen. Gorgas?

Mr. WALSH. Of course I do not want to set up my judgment about that. There is, however, the most invidious and unjustifiable kind of distinction raised in these cases. These officers are given this rank by law, and yet they are not to be addressed by the title which goes with that rank. A short time ago, for instance, when we had the Army reorganization bill under consideration, a Dental Corps was created, and a very strenuous effort was made—and a successful effort—to give to the officers in the Dental Corps rank in accordance with the length of the time they served, and that amendment was adopted. Even veterinary surgeons in the Army were given rank. Automatically they are addressed in the Army by the title which goes with the rank, but the officers who in the Navy now enjoy the right thus to be addressed find some reason for objecting to having their associates of the staff addressed by the title which goes with the rank. My amendment to the amendment is offered simply to accord them that right.

Mr. THOMAS. If the Senator really thinks the amendment is necessary, I shall not object to it, although it seems to me it is largely punctilio.

Mr. WALSH. It is.

Mr. SWANSON. Mr. President, I do not think the amendment offered by the Senator from Montana ought to be adopted. As succinctly as I can I desire to explain the effect of it. To fix the pay of staff officers in the Navy they are given certain rank. The officers of the different staff corps rank so and so with the pay of that rank. This is an effort to bring about a condition under which a chaplain, for instance, will not be called "chaplain," but will be called captain, commander, or admiral. I have never seen a preacher yet who has requested to be called admiral or captain or by any military title.

Mr. VARDAMAN. Mr. President, does the Senator say that the title fixes the pay? Then in that instance "the rank is but the guinea stamp."

Mr. SWANSON. No; not the title but the rank. The law provides, for instance, that a chaplain shall have the rank of captain. That means that his pay shall be the same as that of a captain; but he is still called a chaplain. A doctor of medicine, a member of the Medical Corps, is called doctor, but he receives the pay of the rank which he holds. Some of them have the rank of lieutenant, some have the rank of commander, some have the rank of captain, but doctors in the Navy are not called captains.

Mr. VARDAMAN. The only interest, then, that they have is that their title be given them by the paymaster.

Mr. SWANSON. I do not think, as a general thing, they are interested in having a military title. Shall we call a preacher "admiral"? If a preacher goes abroad on a battleship, shall he be introduced as Admiral So-and-so or Captain So-and-so or Lieutenant So-and-so or Commander So-and-so?

Mr. WALSH. Will the Senator from Virginia yield to me for a moment?

Mr. SWANSON. I will.

Mr. WALSH. We ought to be fair about this. Chaplains can not possibly attain the rank of admiral under the bill.

Mr. SWANSON. Oh, yes; they can if they serve a sufficient length of time.

Mr. LODGE. If the Senator will allow me, it makes no difference whether a staff officer is a chaplain or a doctor or a dentist

or a paymaster, this is an effort to give him a title which does not represent his duties. The duties of an admiral are perfectly well known. He is a flag officer and he commands a fleet. The duties of a captain are represented by his title; he commands a ship. This amendment proposes to give titles to men who do not perform duties corresponding with the titles.

Mr. GALLINGER. Mr. President, if the Senator from Virginia will permit me, I should like to ask the Senator from Massachusetts a question, because this is a revelation to me. Did I properly understand the Senator from Massachusetts to say that in the Navy a physician or a dental surgeon can obtain the rank of admiral?

Mr. LODGE. The dental surgeon can not.

Mr. GALLINGER. Who can—all the other staff officers?

Mr. LODGE. All of them.

Mr. GALLINGER. Veterinarians in the Army can reach high rank, can they not?

Mr. LODGE. I do not know how it may be in the Army, but I think they can. The Senator from Oregon will know as to that. However, in the Army I think veterinarians can reach the rank of major.

Mr. CHAMBERLAIN. I understand that is so under the Army bill.

Mr. LODGE. The fact that such a practice exists in the Army does not weigh with me.

Mr. GALLINGER. As to chaplains, how high can they go?

Mr. LODGE. They can go as high as admiral.

Mr. GALLINGER. As high as admiral?

Mr. LODGE. Yes; after they serve a sufficient length of time.

Mr. GALLINGER. I did not suppose that was possible; and I am glad to get the information.

Mr. NELSON. Mr. President, with the permission of the Senator from Virginia, I will say that, as I understand, the object of the amendment of the Senator from Montana is to require a seaman when he addresses a chaplain to call him "captain" instead of "chaplain."

Mr. SWANSON. "Captain" or "commander" or "admiral."

Mr. NELSON. And if a seaman addresses a dental surgeon he must call him either "lieutenant" or "captain" instead of "Mr. Surgeon." Is not that the object?

Mr. SWANSON. That is the object and purpose of the amendment.

Mr. NELSON. And when he addresses a paymaster he must call him "lieutenant" or "captain," or whatever his rank may be, instead of "Mr. Paymaster." Is not that confusing all ranks and titles?

Mr. SWANSON. Absolutely, Mr. President. In the Army officers are given brevet rank of general or lieutenant or colonel, but they do not get the pay of such rank. In the Army, however, an officer gets the title of the rank which he actually holds.

Now, our Navy ranges over the entire world. Its officers are brought in contact with the officers of other navies, and there is not a navy in the world in which staff officers are given title as proposed in the amendment of the Senator from Montana.

I have here information as to what is the practice in connection with staff officers in other navies. In England paymasters have the title of paymaster in chief, fleet paymaster, full paymaster, assistant paymaster, and so forth. So it is in the case of doctors. Now, it would be a curious thing in London to introduce a preacher as "admiral" or "captain."

I think there are only a few members of the staff who are in favor of such an amendment as this. I have not seen a single physician in the Medical Corps who has requested it. The Surgeon General says he would rather be known as a doctor than as a commander or an admiral; and I have not seen a member of the Medical Corps who has taken a different position, although there are some paymasters and members of other staff corps who favor such a provision as this. If a man is ashamed of being a chaplain, he ought not to be in the Navy; if he is ashamed of being a doctor, he ought to abandon the practice of medicine and not try to hide it by getting another title. So, if a man is a paymaster, that title is an honorable title and has been an honorable title for a long time, and he should not be ashamed of it. Why should he try to have the title of captain or admiral or any other title that does not appertain to the calling in which he is engaged?

When you speak of an admiral, necessarily there is brought up in your mind an officer who commands a fleet. No one would think of a chaplain or of a doctor in that connection. When you think of a captain you think of a man who commands a ship, and you would not think of a man who was a mere paymaster or a mere physician or a mere chaplain. When you think of a commander you think of a man who commands a smaller ship than one of the large ships. Thus the title indicates the vocation. This is so of every navy in the world, and I think a majority of the officers of the American Navy with whom I have talked—paymasters, doctors, and chaplains—are satisfied, and the desire voiced in the amendment proposed by the Senator from Montana does not come from any large number of them.

Mr. WALSH. Mr. President, I want to say another word or two about this matter. However absurd it may seem to some Senators who are not affected, this subject is by no means a small matter to the staff officers who are thus discriminated against. Of course it might or might not seem ridiculous to address a chaplain as admiral, but if a man devoted his whole life in the Navy to the betterment and uplifting of the moral character of the enlisted men and the officers of the Navy, and by long and faithful and devoted service attained actually to the rank of admiral and was entitled to the pay of an admiral, I do not think that it would be regarded as a matter for risibility at all that he should be spoken of as Admiral So-and-so; indeed, I should imagine very likely he would esteem it as a very much to be coveted distinction. So with the members of the Medical Corps. I have no doubt in the world that they are all proud of the profession to which they belong, but, at the same time, the distinction of being called an admiral, if a surgeon may aspire to so high a distinction as that, I have no doubt is very much coveted.

But, Mr. President, whatever may be said about it, by way of comparison, the system does obtain in the Army. It has been of such value to the staff officers of the Army that the law has interposed and declared that they shall be entitled to be addressed by the title which goes with their rank.

Now, Mr. President, you will bear in mind that these officers are noncombatant officers. The staff officer in the Army runs no risk of his life at all, so far as the general accidents of military service are concerned. He does not go upon the firing line. But the staff officer in the Navy, Mr. President, has to go with his ship. He has to risk his life in battle just the same as any officer in the line. If there were any reason for making a distinction in the matter at all, it ought to be made in favor of the staff officers in the Navy rather than in favor of the staff officers of the Army.

But, Mr. President, that this is not regarded by any means as a trifling matter by those who are affected by it and by those who have given some study to the matter is known to everybody who has followed this controversy, which is by no means a new one. A very distinguished officer of the Navy—Rear Admiral Fiske, lately retired—contributed an article upon this subject to the Army and Navy Journal of January 26, 1907, strongly urging—bear in mind, a line officer—that this invidious distinction now existing in the Navy be wiped out for the good of the naval service. His letter upon the subject is so pertinent to the present discussion that I trespass upon the patience of the Senate to read it. It is not very lengthy. He says:

> The staff officers of the Navy wish the same titles in their respective corps as the line officers have in their corps. They give as their reasons:
>
> 1. The fact that officers holding corresponding positions in our sister service, the Army, have such titles.
>
> 2. The fact that titles like "assistant surgeon" give a false impression among people outside the Navy as to the position of the holders of the title, and that such titles as "pay director" and "medical inspector" are foolish.
>
> 3. The fact that their present titles tend to belittle them among the people they meet in civil life, and that it is harmful to them and to the Navy in general to have any of its officers belittled.
>
> They disclaim any wish to pretend to belong to any corps except their own, and they disclaim any dissatisfaction with their present titles, so far as the Navy itself is concerned, feeling that their titles are correctly understood by the people in the Navy.
>
> Many line officers oppose their being given the titles they desire. Unless I am misinformed, these line officers do not state as their reason any belief that the practical efficiency of the Navy would be impaired. The only reason I have heard is the oft-repeated statement that the title is the only thing most line officers ever get, and that they ought not to be compelled to share their titles with other people.
>
> Now, it is an admitted principle that every man will do his work better if he is contented than if he is not contented; so that it is better to give every man what he wants, so far as it can be done, and provided that it can be done without working harm to some thing or some person. Therefore it would be better to give staff officers the titles they wish unless it would do harm to some thing or some person.
>
> As no claim has been made that the giving of those titles would do harm to anything, not even to the practical efficiency of the Navy, all reasonable opposition can be based only on the theory that it would do harm to some persons—the only possible persons being the line officers.

Now, would it do them any harm? If so, what harm? The only possible harm would be by robbing the line officers of some fraction of the honor which their titles may be supposed to confer on them.

But their titles do not confer on them whatever. Titles do not confer honor; titles can not confer honor. Honor is too sacred a thing to be conferrable by title. Honor is not conferrable even by position, except in so far as the position gives its holder an opportunity to do honorable service and receive proper credit for it.

This being true, no man who possesses a title, given him from any cause, can possibly be harmed if some other man be given the same title from some other cause. The President of the United States is not harmed by sharing the title of "President" with thousands of presidents of small affairs. Elihu Root is not harmed by sharing the title of "Secretary" with thousands of secretaries. A captain of the line of the Navy is not harmed by sharing the title of "captain" with thousands of tugboat captains, police captains, and captains of militia; and if all the medical directors, medical inspectors, pay directors, and pay inspectors were given the title of "captain," the only result would be that instead of sharing his title with, say, 10,000 captains in the United States, he would share it with 10,060 captains. The fact that no harm is done to any man by titles being given to other men may be proved by the two instances following:

1. Secretary Stanton made a great many brevet brigadier generals in order, it has been said, to belittle Gen. Sherman by making the title of "general" common. But the scheme did not succeed, and Sherman's glory was not dimmed.

2. There was once an officer blessed with a handsome person, an erect carriage, an unusually rich voice, and a certain peculiarity of the chest, which combined to give him the appearance of a pomposity entirely foreign to his nature, which was essentially modest. His subordinates nicknamed him "God"; yet his brother officers were not in the least wounded by his being given this title, though it was much higher than theirs.

I want to conclude this, Mr. President, by reading from the RECORD the remarks of some of the distinguished Senators who are now opposing this amendment when the provision of the Army reorganization bill relating to dental surgeons was under consideration by the Senate. The distinguished Senator from Massachusetts [Mr. LODGE], who seems quite earnestly opposed to the simple little amendment which I have here offered, had something to say on that occasion. The Senator from Ohio [Mr. POMERENE] had introduced an amendment to the bill the purpose of which was to give rank and to give accompanying title to dental surgeons in the Army, a distinction which, apparently, they had not theretofore enjoyed. He said at that time:

Nearly every man who enters the Dental Corps, if he were simply seeking the financial emoluments connected with the office, could do better in his private practice; but he will be attracted by the fact that he may be entitled to some official rank. Some men may not regard that as of very much importance, but others do. The question of rank seems to be a matter of very great importance to the medical profession; and I would not be understood for one moment as attempting to decry the merits of that profession; but the dental profession is entitled to some recognition as well. We are interested in having the Dental Corps so attractive that it will bring to it the best of the young men in that profession; and if we are going to deny to them the right of rank, certainly we are going to detract from the service itself. Let us encourage rather than discourage the young men of the great dental profession.

And then the Senator from Massachusetts [Mr. LODGE] said as follows—I read from page 6126 of the proceedings of April 14:

Mr. President, I shall not consume all of my time. The bill, as it stands, gives dental surgeons the pay and allowances of first lieutenants until they have accomplished 10 years' service; after 10 years' service and up to 25 years' service they receive the pay and allowances of captain; and after more than 25 years' service they receive the pay and allowances of major. The proposition of the Senator from Ohio, as I understand, is simply to give them the rank.

Then he continues:

Mr. President, during the many years which I have been here the question between staff and line has been frequently before both bodies and before committees on which I have served. I was never a friend in those days of giving high rank to the various divisions of the staff; but Congress always seemed to differ from me in that respect, and seemed always to have a great feeling of favor for the staff, and the question now seems to be well settled.

Mr. LODGE. Mr. President, if the Senator will allow me, there is the broadest possible distinction between the rank and the title.

Mr. WALSH. There is no doubt about that; but the Senator from Massachusetts will agree with me that, under the law, when you give these dental surgeons rank in the Army they get title.

Mr. LODGE. I beg the Senator's pardon. There is not one word about title here.

Mr. WALSH. Why, that is the general statute.

Mr. LODGE. What I advocated was giving them rank; nothing else. I never advocated giving them title. In the Army I know that the titles are given to the Staff Corps, and I think it is thoroughly wrong; and I do not think it is any argument for introducing a bad system into the Navy.

Mr. WALSH. I am simply calling attention to the fact that the Senator was quite willing to introduce that system into the Army and make it applicable to dental surgeons in the Army. Of course, he could have prevented it from being introduced into the Army by resisting at that time the amendment offered by the Senator from Ohio.

Mr. LODGE. I thought they ought to have the rank. I think so still; but I never advocated their having titles, either in the Army or in the Navy..

Mr. SMITH of Georgia. Mr. President, those of us who advocated it in the Army were in this position: The doctors already had the title and the rank, and we felt that there should not be a discrimination against the dentists. It was there; there was no chance to escape it, and we simply extended it and made it uniform.

Mr. WALSH. Exactly. Now, I want the Senator to follow his views to their logical conclusion. The Medical Corps in the Army had the rank and had the title. The dental surgeons did not have the rank. The Senator from Georgia did not want any invidious distinction between the members of the Medical Corps and the members of the Dental Corps; exactly; and I do not want an invidious distinction here between the staff officers in the Army and the staff officers in the Navy.

Mr. SMITH of Georgia. If the Senator will pardon me, I do not think there is any. The doctor and the dentist stand side by side there without an official title. I should be glad to vote the title out for the doctors and the dentists, both, in the Army.

Mr. WALSH. The Senator has not any opportunity to do that.

Mr. SMITH of Georgia. No. There is no discrimination between the two classes. In the Navy the title has not been introduced as to either. As I said before, if I were Gen. Gorgas I would vastly prefer to be called "Dr. Gorgas" than "Gen. Gorgas." I do not think it is any reflection on him to call him "doctor." I think a great doctor is fully as great a man as a great soldier.

Mr. WALSH. I am perfectly satisfied that the Senator from Georgia, in saluting Gen. Gorgas, would feel that he had committed a horrible faux pas if he did not address him as "general."

Mr. SMITH of Georgia. On the contrary, Mr. President, I think Gen. Gorgas enjoys being called "Dr. Gorgas" fully as much as he does "Gen. Gorgas."

Mr. WALSH. That may be, but I am very sure that the Senator would not act upon that impression.

Mr. SMITH of Georgia. And I have accosted him in that way, and I thought he seemed pleased.

Mr. WALSH. Jocularly, I dare say.

Mr. President, I will conclude what I have to say by remarking that you are conferring no rank upon these officers at all by this amendment. The rank goes. The law provides that the Surgeon General shall have the rank of rear admiral. He has the pay of a rear admiral. He has everything that goes with a rear admiral except that you must not call him that.

Mr. LODGE. Except the title and the duties. He has none of the duties of a rear admiral.

Mr. WALSH. Oh, well, duties——

Mr. LODGE. Yes; he has none of the duties. He can not command a fleet, and he is not a flag officer.

Mr. WALSH. On the contrary, he is given the rank of an admiral and charged with the duties of surgeon general.

Mr. LODGE. He has no duties as a rear admiral. It is an attempt to give him a title that misrepresents his office.

Mr. WALSH. I suppose, then, that the Senator would likewise contend that Gen. Gorgas has none of the duties of a major general.

Mr. LODGE. I do not think he has.

Mr. WALSH. Did the Senator from Massachusetts vote to confer that title on him?

Mr. LODGE. Why, it is the law. I could not help voting for it.

Mr. WALSH. Why, certainly. We passed a special act here, did we not?

Mr. LODGE. But he has the title anyway, under the Army law.

Mr. WALSH. Exactly; he has. And what reason is there why the same title should not be accorded to the staff officers of the Navy?

Mr. LODGE. Why, the reason is, to my mind, perfectly simple, Mr. President. It is giving a man a title which does not describe him. It is giving him a title to which he has no title. The name "admiral" implies certain duties. The name "captan" in the Navy implies certain duties. Those duties are not performed by doctors and paymasters, and can not be.

Mr. HITCHCOCK. Mr. President, I should like to ask the Senator from Montana what reason there is for bestowing titles in the Navy, as he proposes, which really have no significance,

any more than there would be in the Senate of the United States to bestow upon our excellent chaplain, who daily conducts religious services in the Senate, the title of United States Senator? It would be just as appropriate in one case as in another. To call these men admirals and captains does not make them so, any more than to call the tail of a sheep a leg makes it so.

The Senator refers to the practice in the Army. I am sure the Senator also knows how it came about that these civilians attached to the Army secured their titles. He knows that they were secured by lobbying in the Congress of the United States. He knows that they were not bestowed for the good of the Army, but that they were bestowed to satisfy the demands of the medical profession, the demands of the veterinarians, the demands of the dental profession. I think it is time to call a halt, and not to permit our Navy to be infected by this same vice that already extends so far in the Army.

Mr. WALSH. Mr. President, I am not sufficiently informed about the matter to either affirm or deny the statement made by the Senator that concessions to staff officers of the Army are secured by lobbying rather than as a result of the solid judgment of the Congress of the United States concerning what was best for the service. The Senator, however, rose to address a question to me, and I want to answer his question.

The difference between the case that he put to me, that of a Chaplain of the Senate, and the one before us is certainly obvious. We have given these officers the rank. It may be quite inappropriate, I do not undertake to say that it is not quite inappropriate, to give a chaplain or a surgeon or a naval constructor or the head of the Pay Corps, for instance, the title of admiral. Of course few of them reach such a distinction under any circumstances; it is cut off with lieutenant commander in most instances. A chaplain, however, may rise to the rank of an admiral, contrary to what I said awhile ago. But we have given that rank; we have created these officers.

Mr. President, if the Constitution of the United States provided for the office of chaplain and said that he was to have the rank of a Senator why should you not call him a Senator? We do not call him a Senator simply because he has not any such rank as a Senator. But you are giving the rank to these men, and yet you are denying to them the name which goes with the rank. If the chaplain were indeed a Senator, why should you not call him so instead of calling him Dr. Prettyman?

Mr. WEEKS. Mr. President, just a word. We have followed in the Navy the practice that has obtained in every navy in the world since there were navies in this respect. This is not a new contention; it is a very old one. Ever since the beginning of time as far as I know there have been some staff officers who have desired that they be given a title to which they were not entitled. A title indicates a man's profession, or his trade, or his occupation; and we can not make a man something other than what he is fitted to do.

It is no argument in favor of this contention that titles are given to officers in the Army who are staff officers. I believe on the whole that that practice is not approved of by most of the people in the Army, but in any case it is a bad practice for us to adopt something which has been discountenanced and discredited in all the navies of the world and which the larger part of the officers in our Navy do not believe in.

I think there is no very strong contention in favor of this legislation from most of the staff corps of the Navy, but there are a few uneasy beings who are always seeking something to which they are not entitled, and that is the result of this movement at this time. I think it would bring about confusion in the service. I think it would in a sense have to do with inefficiency rather than efficiency. I do not think it would mean anything more than gratifying the pride of some man in having a title to which he had no claim and which he is not fitted for. Therefore, for every reason I think it would be unwise to adopt this practice in the Navy.

Mr. TILLMAN. Mr. President, as the amendment we are discussing is the one I gave notice I would offer, I think I ought to explain how it came into the Senate now. I myself decided it was not wise to offer it, or try to bring it to a vote at all at this session, and requested the Senator from Montana not to present it at all. I am very sorry he has done so, because it precipitated a fight which was unnecessary and it will do more harm to the Navy than good. I would be glad to have him withdraw it.

I believe there is merit in this amendment and the reform which it is intended to bring about; and I give notice now that next winter, when we have more time, I expect to have a hearing before the Senate Committee on Naval Affairs on this question of titles and rank, and the rivalry between line and staff officers, and give both sides a chance to present their side, if the Naval Committee will sustain me in bringing about the hearing.

The chiefs of bureaus in the Navy Department are now called admirals. Why, I do not know. But it has been so for a long while, and there must have been a good reason for starting the custom in the past. The line and staff in all other branches of the public service, Army, Marine Corps, and Coast Guard, and the Revenue-Cutter Service, have no distinction, and I do not think there ought to be one in the Navy. It is producing friction now and has been producing friction for years, and it ought to be ended if it is possible to do it.

However, I will not discuss the matter any further this evening.

Mr. SWANSON. I desire to print in the RECORD so that Senators may see it what is the title given in all the navies of the world.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

Numbers and titles of staff corps of principal foreign navies.

[Office of Naval Intelligence, Navy Department, Feb. 27, 1912.]

MEDICAL OFFICERS.

Line titles.	England.	Number.	France.	Number.	Germany.	Number.
Vice admiral	Director general of the medical department.	1	Surgeon general, first class	1	Staff surgeon general (personal as vice admiral.	1
Rear admiral	Surgeon general	5	Surgeon general, second class	6		
Captain	Deputy surgeon general	134	Chief surgeon, first class	14	Surgeon general	5
Commander	Fleet surgeon	147	Chief surgeon, second class	15	Chief surgeon general	68
Lieutenant commander	Staff surgeon	186	Principal surgeon	65	Chief staff surgeon	
Lieutenant	Surgeon	178	Surgeon, first class	140	Staff surgeon	94
Junior lieutenant			Surgeon, second class	100	Chief assistant surgeon	118
Ensign			Surgeon, third class	(1)	Assistant surgeon	
Total		651		341		286

Line titles.	Japan.	Number.	Italy.	Number.	Austria.	Number.	Russia.	Number.
Vice admiral								
Rear admiral	Surgeon general	7	Major general	1	Staff surgeon general	1		
Captain	Inspector	14	Colonel	8	Chief staff surgeon, first class.	2		
Commander	Fleet surgeon	40	Lieutenant colonel	12	Chief staff surgeon, second class.	4	Hold civil rank of the Russian general service; are not officers.	304
Lieutenant commander	Staff surgeon	68	Major	31	Staff surgeon	9		
Lieutenant	Surgeon	114	Captain	107	Battleship surgeon	46		
Junior lieutenant	Assistant surgeon, first class.	56	Lieutenant	83	Frigate surgeon	20		
Ensign	Assistant surgeon, second class.	35						
Total		334		242		82		304

[1] As required.

Numbers and titles of staff corps of principal foreign navies—Continued.

PAY OFFICERS.

Line titles.	England.	Number.	France.	Number.	Germany.	Number.
Vice admiral			Paymaster general, first class	1		
Rear admiral			Paymaster general, second class	4		
Captain	Paymaster in chief	12	Paymaster chief, first class	12		
Commander	Fleet paymaster	160	Paymaster chief, second class	12	Staff paymaster	46
Lieutenant commander	Staff paymaster	72	Principal paymaster	37	Chief paymaster	179
	Paymaster	36				
Lieutenant	Assistant paymaster, 4 years' seniority.	332	Paymaster, first class	100	Paymaster	
Junior lieutenant			Paymaster, second class	40		
Ensign	Assistant paymaster, 4 years' seniority.		Paymaster, third class	(1)		
Total		612		+206		225

Line titles.	Japan.	Number.	Italy.	Number.	Austria.	Number.	Russia.	Number.
Vice admiral								
Rear admiral	Paymaster general	4	Major general	1	Paymaster general	1		
Captain	Inspector	19	Colonel	6	Chief paymaster, first class	5		
Commander	Fleet paymaster	48	Lieutenant colonel	17	Chief paymaster, second class	6		
Lieutenant commander	Staff paymaster	79	Major	28	Chief paymaster, third class	16	Line officers perform pay corps duties.	
Lieutenant	Paymaster	79	Captain	107	Paymaster, first class	86		
Junior lieutenant	Assistant paymaster, first class.	62	Lieutenant	80	Paymaster, second class	37		
Ensign	Assistant paymaster, second class.	33	Sub lieutenant					
Total		324		239		151		

CONSTRUCTORS.

Line titles.	England.	Number.	France.	Number.	Germany.	Number.
Vice admiral	Constructors belong to civil branch of the navy. They have no military rank; but assistant constructors, while serving at sea, are given rank of engineer lieutenant. Titles are as follows:		Inspector general of naval construction	1	(Constructors are a civil corps; the titles are not translatable.)	
Rear admiral			Director of naval construction	10		
Captain			Engineer in chief, first class	18	Schiffbau-direktor	7
					Schiffbau-betriebs-direktor	24
Commander	Director of naval construction	1	Engineer in chief, second class	18	....do	4
Lieutenant commander	Director of dockyards and works	1	Principal engineers	18	Baural fur schiffbau	41
Lieutenant	Chief constructor	14	Engineer, first class	62	Schiffbaumeister	84
Junior lieutenant	Constructor	28	Engineer, second class	20		
Ensign	Assistant constructor	75	Engineer, third class	(1)		
Total		119		147		160

Line titles.	Japan.	Number.	Italy.	Number.	Austria.	Number.	Russia.	Number.
Vice admiral			Lieutenant general	1				
Rear admiral	Inspector general	5	Major general	3	General constructor	1		
Captain	Inspector general	6	Colonel	8	Colonel constructor	5		
Commander	Chief constructor, first class	6	Lieutenant colonel	10	Chief constructor, first class	4		
Lieutenant commander	Chief constructor, second class.	24	Major	15	Chief constructor, second class	4	No authentic information	
Lieutenant	Constructors	25	Captain	55	Chief constructor, third class	5		
Junior lieutenant	Assistant constructors	8	Lieutenant	18	Constructor, first class	3		
Ensign					Constructor, second class	1		
Total		74		110		23		

[1] As required.

The VICE PRESIDENT. The question is on the amendment of the Senator from Montana [Mr. WALSH] to the amendment of the committee.

Mr. TILLMAN. I hope the Senator will withdraw it.

The amendment to the amendment was rejected.

The amendment was agreed to.

The next amendment of the Committee on Naval Affairs was, on page 61, after line 5, to insert:

Chief boatswains, chief gunners, chief machinists, chief carpenters, chief sailmakers, chief pharmacists, and chief pay clerks shall, after six years from date of commission, receive the pay and allowances that are now or may hereafter be allowed a lieutenant (junior grade), United States Navy: *Provided*, That chief boatswains, chief gunners, chief machinists, chief carpenters, chief sailmakers, chief pharmacists, and chief pay clerks shall, after 12 years from date of commission, receive the pay and allowances that are now or may hereafter be allowed a lieutenant, United States Navy.

That warrant officers shall receive the same allowances of heat and light as are now or may hereafter be allowed an ensign, United States Navy: *Provided*, That any commissioned warrant officer of the active list who shall have had six years' service as a commissioned warrant officer may be commissioned with the rank of lieutenant (junior grade) in the corps to which he belongs upon satisfactorily passing such examination as may be prescribed by the Secretary of the Navy, and upon recommendation of the examining board composed of three officers not below the rank of lieutenant commander.

The amendment was agreed to.

The next amendment was, on page 62, after line 4, to insert:

Provided, That hereafter promotion to the grades of captain and rear admiral shall be by selection from the next lower respective grade: *Provided further*, That no officer shall be eligible for promotion by selection to either the grade of rear admiral or the grade of captain until he shall have been recommended for appointment to such grade by a board of nine flag officers of the line of the Navy, which board will base its recommendations upon the comparative probable fitness for command afloat in the respective grades into which promotion is to be made of all captains or commanders, respectively, of the line of the Navy who shall at the time the recommendation is made have had not less than three years' service in the grade in which they are then serving, except that the recommendation of the board in the case of officers of the former Engineer Corps who are restricted by law to the performance of shore duty only, and in that of officers who may hereafter be assigned to engineering duty only, shall be based upon their comparative fitness for the duties prescribed for them by law, and that upon promotion they shall be carried as additional numbers in grade: *Provided further*, That no officer shall be recommended for such promotion unless he shall have received the recommendation of not less than seven members of said board: *And provided further*, That any officers so selected shall, prior to promotion, be subject in all respects to the examinations prescribed by law for officers promoted by seniority, and in case of failure for any reason to pass such examination such officer shall lose his then existing opportunity for promotion and such examination shall not be considered in event of subsequent retirement to entitle such officer to the rank of the next higher grade.

Mr. POINDEXTER. Mr. President, I will ask the Senator from Virginia if he will not allow that amendment to go over until

to-morrow? I failed to notice in the reading of it a provision prescribing the manner in which the board for the selection of officers for promotion may be appointed. It is a matter of a great deal of importance aside from that, and I should like the Senator to let it go over.

Mr. SWANSON. If there is objection to it, I will be glad to let it go over.

Mr. WEEKS. Mr. President, I will ask the Senator from Washington—and I intend to make comment on that particular phase of the amendment—if the provision for a board of nine senior admirals would not cover his suggestion?

Mr. POINDEXTER. If there is to be a board vested with these very great powers, it seems to me that some such provision as that suggested by the Senator from Massachusetts would be very worthy of consideration. The merit of this proposition, of course, depends absolutely on the administration of the powers. If the board administers the vast power which it has over the careers of their fellow officers efficiently, undoubtedly it would be a good system, but it could be made a very obnoxious system by poor administration.

Mr. SWANSON. As I understand, the amendment goes over until to-morrow.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 63, after line 10, to insert:

For purposes of retirement all officers now in the Navy or Marine Corps shall be credited with service from the dates they take precedence in accordance with law.

The amendment was agreed to.

The next amendment was, on page 63, after line 13, to insert:

Nothing contained in this act shall be construed to reduce the pay or other benefits of any officer of the Navy or Marine Corps as now provided by law.

The amendment was agreed to.

The next amendment was, under the subhead "Officers for engineering duty only," on page 63, line 18, after the word "Navy," to insert "not below the grade of lieutenant commander," and on page 64, line 16, before the word "ensigns," to strike out "acting," so as to make the clause read:

Officers of the line of the Navy not below the grade of lieutenant commander may, upon application, and with the approval of the Secretary of the Navy, be assigned to engineering duty only, and that when so assigned and until they reach the grade of commander they shall perform duty as prescribed in section 4 of the personnel act approved March 3, 1899, and thereafter shore duty only as now prescribed for officers transferred to the line from the former engineer corps, except that commanders may be assigned to duty as fleet and squadron engineers: *Provided*, That when so assigned they shall retain their place with respect to other line officers in the grades they now or may hereafter occupy, and also the right to succession to command on shore in accordance with their seniority, and shall be promoted as vacancies occur, subject to physical examination and to such examination in engineering as the Secretary of the Navy may prescribe: *And provided further*, That the number of officers so assigned in any one year shall be in accordance with the requirements of the service as determined by the Secretary of the Navy: *Provided further*, That the Secretary of the Navy is hereby authorized to appoint annually in the line of the Navy for a period of 10 years following the passage of this act, in the order of merit determined by such competitive examination as he may prescribe, 30 ensigns for the performance of engineering duties only.

The amendment was agreed to.

The next amendment was, on page 65, line 3, before the word "ensigns," to strike out "acting"; in line 7, before the word "commissioned," to insert "regularly"; and in line 9, after the word "examination," to insert "to qualify for the general duties of the line," so as to make the clause read:

Such ensigns shall, upon the completion of the probationary period of three years, of which two years shall have been spent on board cruising vessels and one year pursuing a course of instruction at the Naval Academy prescribed by the Secretary of the Navy, be regularly commissioned in the grade of lieutenant of the junior grade after satisfactorily passing such examination to qualify for the general duties of the line as may be prescribed by the Secretary of the Navy, and having been recommended for promotion by the examining board and found physically qualified by a board of medical officers of the Navy.

The amendment was agreed to.

The next amendment was, on page 65, after line 13, to strike out:

Such officers shall thereafter be required to perform engineering duties only, and shall be eligible for advancement to the higher grades in the manner herein provided for line officers assigned to engineering duty only.

The amendment was agreed to.

The next amendment was, on page 65, line 21, after the word "liquors," to strike out "or other misconduct," and, on page 66, line 4, after the word "liquors," to strike out "or other misconduct," so as to make the clause read:

Hereafter no officer or enlisted man in the Navy or Marine Corps in active service who shall be absent from duty on account of sickness or disease resulting from his own intemperate use of drugs or alcoholic liquors shall receive pay for the period of such absence, the time so absent and the cause thereof to be ascertained under such procedure and regulations as may be prescribed by the Secretary of the Navy: *Provided*, That an enlistment shall not be regarded as complete until the enlisted man shall have made good any time in excess of one day lost on account of sickness or disease resulting from his own intemperate use of drugs or alcoholic liquors.

The amendment was agreed to.

Mr. WILLIAMS. Mr. President, I desire to recur to the committee amendment striking out lines 14, 15, 16, and 17, on page 65, which read:

Such officers shall thereafter be required to perform engineering duties only, and shall be eligible for advancement to the higher grades in the manner herein provided for line officers assigned for engineering duty only.

I ask that that amendment go over until to-morrow, because I have some data which I desire to bring to the attention of the Senate. I shall oppose the committee amendment.

Mr. SWANSON. I shall not object to the amendment going over.

The VICE PRESIDENT. The amendment has been agreed to. However, without objection, the vote whereby the amendment was agreed to will be reconsidered and the amendment will be passed over.

Mr. NELSON. Mr. President, I desire to call the attention of the chairman and members of the committee to the injustice of the proviso beginning at the foot of page 65, which reads:

Provided, That an enlistment shall not be regarded as complete until the enlisted man shall have made good any time in excess of one day lost on account of sickness or disease resulting from his own intemperate use of drugs or alcoholic liquors.

Is not that a discrimination between the enlisted men and the officers? In the case of the officer we simply provide that he shall not receive pay, but in the case of the enlisted man he is required to serve the full time lost. That is not putting the officers and enlisted men on a fair footing of equality. It seems to me the enlisted man should receive the same favors as does an officer. The provision preceding the proviso reads:

Hereafter no officer or enlisted man in the Navy or Marine Corps in active service who shall be absent from duty on account of sickness or disease resulting from his own intemperate use of drugs or alcoholic liquors shall receive pay for the period of such absence, the time so absent and the cause thereof to be ascertained under such procedure and regulations as may be prescribed by the Secretary of the Navy.

Mr. LODGE. Mr. President, if the Senator will allow me, an enlistment is for a definite period.

Mr. NELSON. Yes.

Mr. LODGE. And an officer's service, of course, is not definite.

Mr. NELSON. But he can retire at a given age.

Mr. LODGE. Oh, yes; he can retire for age, but I mean he has a life service, and you can not apply the word "enlistment" to a commissioned officer.

Mr. NELSON. If an enlisted man in the Navy is unfortunate enough to be sick for, say, six months or more, he is required to serve six additional months.

Mr. LODGE. Only if his sickness is caused by drugs or alcohol.

Mr. NELSON. The provision concerning drugs and alcohol applies to officers, too.

Mr. LODGE. Certainly.

Mr. NELSON. If the same rule were applied to enlisted men as is applied to officers, it would be just to say that the enlisted man should not receive pay for that time. That would be applying the same rule.

Mr. LODGE. That is provided for in the first part.

Mr. NELSON. It is provided as to officers that they shall not receive pay for the period of absence. If the same provision were made as to the enlisted man, it would be putting them on a parity. The bill simply says as to officers that for the period of their sickness they shall not be entitled to pay; but as to the enlisted men, it is provided that they shall also serve an additional time in the Navy.

Mr. SWANSON. But they are paid when they serve the additional time. If the Senator will allow me, I will endeavor to explain it. If an enlisted man gets drunk for five days, he loses his pay, as does the officer in a similar case; but the enlisted man, to complete his term of enlistment and to be entitled to a discharge, if he has been absent from duty for more than one day, must serve out a time equal to the period of his absence in order to complete his enlistment. He is simply kept in the Navy longer, but he is paid for the additional service.

Mr. NELSON. Does he lose his pay during his sickness?

Mr. SWANSON. He loses his pay if he is sick on account of being drunk, say.

Mr. NELSON. Well, there is a discrimination.

Mr. SWANSON. Wait a moment. Under this provision the officer also loses his pay. If an officer were drunk for five days, he would lose his pay. When it comes to counting the service of the enlisted man, at the end of three years he is entitled to his

discharge; but if he has been sick in excess of one day on account of drunkenness his enlistment is extended, as I understand, to cover the period during which he was absent from duty, but he gets pay for the additional period.

Mr. NELSON. Mr. President, if the provision simply deprived the enlisted man of pay during that period, as is done in the case of the officer, it would put them on an equal footing, but the enlisted man is not only deprived of his pay for that time, but he is required to serve an additional time.

Mr. SWANSON. For which he is paid.

Mr. NELSON. That is the result of this bill. It is a top-heavy officers' bill, and it does not properly recognize the rights of the enlisted man.

Mr. SWANSON. If the Senator will permit me, the warrant officer and enlisted man, I think, are treated as fairly as the officers. The enlisted man has contracted to serve the Government for three years, for which the Government agrees to pay him so much money. Now, during one month of his service he was absent on account of being drunk, so that at the end of his term of enlistment he has not given three years' service. As I understand, under this provision, if an officer is absent because of drunkenness he loses his pay, as the enlisted man loses his pay, but before the enlisted man can complete his contract of enlistment he must serve another month, because he has agreed to serve three years, and he lacks one month of doing so. He is, however, paid for the additional month.

Mr. NELSON. What about the officer who loses time by being drunk?

Mr. SWANSON. He can not get out of the service at all, unless he resigns, and his resignation is accepted.

Mr. NELSON. He can retire when the retiring age comes.

Mr. SWANSON. He can retire at 62. If the Senator will look at the provision, he will see that there is no discrimination. Of course, if an officer only served for a specified time, as an enlisted man does, he could be required to serve an additional time, but the officer does not have that kind of a service.

Mr. NELSON. It looks to me as though you are inflicting a double penalty on the enlisted man. First you deprive him of pay when he is laid up, and in the next place you require him to serve the additional time to make up for it. That is leaving him not on the footing of the officer. It is a discrimination between the enlisted man and the officer.

Mr. OLIVER. Mr. President, I think if the contention of the Senator from Minnesota should be carried to its logical conclusion it would simply result in allowing the officer that gets drunk and is out of the service for, say, a month, to have the privilege of serving a month additional beyond the age limit, and it seems to me to be a temptation to them to go off on a spree once in a while.

The reading of the bill was resumed.

The next amendment was, at the top of page 67, to insert:

That the Secretary of the Navy is hereby authorized and directed to cause to be paid to Mrs. Eliza Orr, mother of the late William Orr, fireman, United States Navy, an amount equal to six months' pay at the rate received by him at the date of his death.

Mr. SMITH of Georgia. Mr. President, I should like to know why that personal claim is added here.

Mr. SWANSON. The Secretary urgently requested it. As I understand the case—I will get the letter in a minute—an enlisted man usually designates a person who shall receive his pay in case of his death, and in this case I think the enlisted man failed to designate his mother, and under the law she could not get it. I think this is to correct his failure to designate the person whom he wanted to get this six months' pay. I think that is the case; but, if it is not, I will correct the statement when I find the letter.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 67, line 13, after the word "retirement," to insert:

Provided, That hereafter any retired officer of the naval service who shall be detailed on active duty shall, while so serving, receive the active duty pay and allowances of the grade, not above that of lieutenant commander in the Navy or of major in the Marine Corps, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement: *Provided*, That nothing herein shall be construed to reduce the pay of any retired officer on active duty whose retired pay exceeds the active duty pay and allowances for the grade of lieutenant commander.

So as to make the clause read:

No officer who, after having commanded a fleet in active commission, has been retired for age and whom, in the judgment of the Secretary of the Navy, the public interests make it necessary to retain for a time after said retirement and who is performing active duty as chairman of the executive committee of the General Board, shall, for the period so retained, suffer any reduction in the emoluments he was receiving at the time of his retirement: *Provided*, That hereafter any retired officer of the naval service who shall be detailed on active duty shall, while so serving, receive the active duty pay and allowances of the grade, not above that of lieutenant commander in the Navy or of major in the Marine Corps, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement: *Provided*, That nothing herein shall be construed to reduce the pay of any retired officer on active duty whose retired pay exceeds the active duty pay and allowances for the grade of lieutenant commander.

Mr. WEEKS. Mr. President, I move to amend, in line 16, page 67, by striking out the words "lieutenant commander" and inserting "commander."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to strike out the word "lieutenant," before the word "commander," so that it will read "not above that of commander."

Mr. WEEKS. The reason I propose that, Mr. President, is because it seems to me that the retired officer in the admiral's list, and possibly in the commander's list, would receive less pay as a lieutenant commander on the active list than he would as a retired officer in the grade at which he was retired.

It is rather difficult to determine what the pay is. Of course, the base pay is given in the register, but the number of fogies affects it so that I can not tell just what the pay of any particular man would be. An admiral's base pay is $6,000. His retired-list pay would be $4,500, based on that. That would be more pay than he would receive on the active list as lieutenant commander, even if he were given pay for the highest grade, 64 years, after the date of his commission, with all the bonus added.

Mr. LODGE. The proviso protects him in that.

Mr. WEEKS. That is quite true; but a large percentage of the officers who are retired are admirals, commodores, and captains. I do not see any particular reason why the pay of those men should not be at least the pay of a commander, if they are going to perform the duties which they naturally would—the duties of their grade.

Mr. NELSON. Mr. President, may I ask the Senator a question?

Mr. WEEKS. Certainly.

Mr. NELSON. Assuming that one of these retired officers is put to work and given this pay, would his retired pay continue? Would he get both?

Mr. WEEKS. Oh, no.

Mr. NELSON. There is nothing in this paragraph to say that he will not.

Mr. WEEKS. There is a provision of law that no officer of the Government shall receive pay for two services under any circumstances.

Mr. NELSON. He would be deprived of his retired pay?

Mr. WEEKS. For instance, the Senator from Minnesota could not receive the pay of United States Senator and the pay of a major general in the Army, even if he were serving as major general.

Mr. NELSON. Oh, no; but——

Mr. POINDEXTER. He could receive the pay of United States Senator and the pay of judge of a Federal court.

Mr. WEEKS. That is because a judge has a retired pay, and——

Mr. SWANSON. Mr. President, if the Senator will permit me, this amendment is in conformity with the Army amendment. Under the present law a retired naval officer can not receive pay in excess of the pay of a lieutenant; and very frequently they get less pay for working than they do if they are not working.

Mr. WEEKS. I approve of this amendment. I think it is a very just one.

Mr. SWANSON. The Army has it up to the pay of major. We thought we ought to make the provision as to retired naval and Army officers conform in the law.

If you get a contest between the two, you will soon have retired officers receiving as much pay as active officers. We think that in the case of a man who has retired at the age of 62, or retired on account of physical disabilities, the pay of a lieutenant commander is sufficient pay for him. If he has been retired when he did not have the physical disability, he has been unworthily retired. Now, after he attains the age of 62 years, we reached the conclusion that for active service in the Navy the pay of a lieutenant commander is sufficient. The Army decided that a major's pay was sufficient.

I do hope the Senator will not insist on this amendment. This is quite a good advance in the pay of retired officers, making it conform with the Army; and it seems to me we have gone

as far as we can go in paying retired naval officers up to the pay of lieutenant commander.

In reference to the remarks of the Senator from Minnesota, I will say that they can not get two pays. The situation is this: If the retired pay exceeds the pay of a lieutenant commander, the officer gets the retired pay but gets no active pay. If the retired pay of one of the younger officers is less, he gets the pay of a lieutenant commander if he would have reached that position if he had continued in the Navy.

The VICE PRESIDENT. The Chair desires to inquire whether there is to be a recess or an adjournment. The Chair will adjourn the Senate at 6.30 o'clock under the order heretofore made.

Mr. SWANSON. I understand there has been an agreement to adjourn this evening, so there can be a morning hour tomorrow. I will therefore make that motion.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (S. 2845) authorizing the sale of the marine-hospital reservation in Cleveland, Ohio, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House insists upon its amendments to the bill (S. 5425) to standardize lime barrels, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ASHBROOK, Mr. ABERCROMBIE, and Mr. REAVIS managers at the conference on the part of the House.

The message further announced that the House had passed a bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 16911) making appropriation for the relief and transportation of destitute American citizens in Mexico, and it was thereupon signed by the Vice President.

EMPLOYMENT OF STENOGRAPHER.

Mr. BRYAN, from the Committee on Claims, reported the following resolution (S. Res. 228), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Claims, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fourth Congress, to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES:

A bill (S. 6616) granting an increase of pension to James W. Higgins (with accompanying papers); to the Committee on Pensions.

By Mr. CURTIS:

A bill (S. 6617) to correct the military record of James H. Painter (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 6618) granting a pension to William E. Puett;

A bill (S. 6619) granting an increase of pension to Reuben H. Chapel (with accompanying papers);

A bill (S. 6620) granting an increase of pension to John S. Stearns (with accompanying papers);

A bill (S. 6621) granting a pension to Frederick Besancon (with accompanying papers);

A bill (S. 6622) granting a pension to Marcia R. Ainsworth (with accompanying papers); and

A bill (S. 6623) granting an increase of pension to Samiria H. M. Bryant (with accompanying papers); to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 6624) granting an increase of pension to Elizabeth M. Baker; to the Committee on Pensions.

AMENDMENTS TO NAVAL APPROPRIATION BILL.

Mr. SHEPPARD submitted an amendment providing that Brazos Island and Point Isabel, Tex., be added to the list of cities for specific plans for improvements of harbors and connecting channels, etc., intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

Mr. FLETCHER submitted an amendment proposing to appropriate $350,000 to repair and reconstruct when necessary public works damaged in July, 1916, by hurricanes at the navy yard and station, Pensacola, Fla., intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

WATER-POWER DEVELOPMENT.

Mr. UNDERWOOD. Mr. President, I have in my hand some newspaper editorials and resolutions relating to the so-called Shields water-power bill. I do not desire to take up the time of the Senate in reading them, but I ask unanimous consent that they may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[From the Portland Oregonian, May 24, 1916.]

TIDE TURNS AGAINST PINCHOT.

The administration forces in Congress now evince a decided reluctance to press water-power legislation at this session. The Ferris bill, relating to water power on public land, has passed the House, and Senator MYERS has reported a substitute, which has been made the unfinished business but has been displaced by other business, and the Senate has failed to agree on a time when it shall again be taken up, the steering committee refusing to push it forward. The Shields bill, relating to water power on navigable streams, has passed the Senate, and the Adamson substitute has been reported to the House, but the Rules Committee has sidetracked it in favor of the Army and Navy bills, appropriation bills, and the shipping bill, and there is no prospect of its being taken up until after the national conventions. There is so wide a divergence between the House and Senate bills on important points of policy that long debates in conference committees would likely delay agreement.

Although President Wilson and Secretary Lane have several times expressed a desire for final action at this session, administration leaders in Congress show a sudden lack of interest in the subject. One reason may be the growth of public sentiment against the proposed invasion of the rights of the States. A remarkable evidence of this fact is the adoption by the Conservation Congress of resolutions favoring the Shields and Myers bills by a vote of 116 to 39, against the opposition of Gifford Pinchot and James R. Garfield. This proof that the tide is turning against Pinchotism may have given the Democratic leaders pause. Another cause for delay is the fact that the main points in controversy are before the Supreme Court for decision, in the case of the Beaver River Power Co., appealed from Utah, which is to be argued in the fall and which may be decided before a new Congress meets. The six States which intervened have made so strong a case against the usurpation advocated by Mr. Pinchot that the leaders in Congress may not be willing to waste time in passing a law which may be annulled by judicial decision before it can come into operation.

Greatly as Oregon desires that its water power be unlocked, it would rather see laws passed which rest on a firm foundation of constitutionality, such as will be laid by the decision in the Utah case, than see laws passed which, as the Oregonian believes, will be made dead letter by that decision.

—

[From the Newport (Wash.) Miner.]

WHO WILL DO THE MOST GOOD?

Gifford Pinchot complains that the Shields bill, which has been passed by the Senate as a substitute for the Ferris bill passed by the House, proposes to give away the water powers of the country without compensation.

What Mr. Pinchot calls compensation is a question. The minute any water power is developed by a private company it immediately begins to pay taxes to the State, city, and county; special corporation taxes; in many instances gross-earning taxes; and many other forms of licenses, fees, etc., to both State and National Governments.

To an ordinary citizen this would look like compensation for the use of water power. It is an unquestionable fact that if additional fees and licenses are to be asked by the Government it will increase the cost of operation and naturally the price to the consumer. From an industrial standpoint it will tend to discourage development of power enterprises in the Pacific coast States, where we have so much need of any kind of development that furnishes pay rolls.

If there were any chance of power companies getting hold of our water powers and making arbitrary rates there would be cause for alarm; but there is no such chance, as the rates these companies are allowed to charge are already under the control and supervision of State and interstate commerce commissions, and the rights of the public are fully protected.

What the Western States want is development. They do not care whether it is under the Shields bill or some other bill.

The Shields bill, however, as passed by the Senate, seems to fully protect "future generations," whom the supporters of the Ferris bill worry so about, and at the same time allows the present generation to develop and enjoy its water-power resources instead of letting them run to waste in the ocean.

Who will do our State the most good—Gifford Pinchot sitting in a soft-bottomed chair in Washington, D. C., working for a bunch of faddists, or a hard-headed engineer developing one of our water powers and employing 500 to 1,000 men, especially when we already have laws fully protecting the rights of the public against excessive rates, etc.? (Pacific Coast Manufacturer.)

—

[From the Williston (N. Dak.) Graphic, May 11, 1916.]

THROWING PINCHOTISM OVERBOARD.

The National Conservation Congress has, by a decisive vote, indorsed the Shields bill for the development of water powers in navigable streams. Despite the pleadings and the threatenings of the Gifford Pinchot idealists, who want the Government to retain its ownership of the powers forever and ever, the congress has thus declared for a sound and practical plan of permitting private interests to develop them under careful Government regulation, safeguarding the public's interests.

The Pinchot conception of conservation is that natural resources must be kept locked up in Government possession, where private interests can not get at them for development. There is no end of water power going to waste in this country. The Government will not develop it, and, if Mr. Pinchot had his way, no one else would be permitted to do so.

It's the same way with the coal in Alaska. Coal lands there must be leased and not sold outright. But coal lands are useless without railroads, and railroads are not permitted to lease coal lands except for their own use. So before there can be coal leasers there must be Government-built railroads. Accordingly the Government begins a 500-mile railroad to reach the most distant of the coal fields, while it neglects to build a 30-mile stretch into the most accessible field. Thus Alaska must wait three years for coal that might be had in six months. That is conservation of coal!

But the National Conservation Congress is weary of Pinchotism and ready for practical water-power development—and that is some progress! (Minneapolis Journal.)

—

[From the Newark (N. J.) Evening Star, June 5, 1916.]

WEALTH IN THE AIR.

A good example of the value of intensive farming is given by a Cumberland County truck farmer, who produces 625 bushels of potatoes and 10,000 quarts of strawberries to the acre. People familiar with agriculture need not be told that these yields are about three times the normal. He does it by an arrangement of overhead sprinklers covering 160 acres, and by lavish fertilizing.

The average European farmer uses 200 pounds of fertilizer to the acre, the average American farmer 28 pounds. And at that the farmers of the United States spend $170,000,000 a year for fertilizers, and get crop returns lower than those of Europe by half.

Above each square mile of the earth's surface there are 20,000,000 tons of nitrogen. We are spending yearly on Chilean nitrates $21,000,000, at $75 a ton. Chile's nitrate beds will be exhausted about seven years from now. Then we shall be compelled to get our nitrogen supply from the air. Why not begin now?

In Europe 1,200,000 hydrohorsepower is used every year to extract nitrogen from the air. England is about to establish a nitrogen plant in Iceland. We have the water power and the air. We need the enterprise and foresight.

There is a military side to it also. If we should be drawn into war now and lose control of the sea, we could get no nitrates from Chile, our powder would soon give out and we could make no more until we harnessed our streams to draw nitrogen from the air.

—

[From the Washington Post, June 11, 1916.]

THE WATER-POWER BILL.

The report that President Wilson may veto the water-power bill is not very encouraging to those who had hoped that the day of antagonism to honest enterprise had passed. It would be strange, indeed, if the President should disapprove the water-power bill in the face of the approval given to the appropriation of $20,000,000 for a Government nitrate plant. If the bill had been enacted months ago there would now be under way a considerable development of water power, and instead of one Government nitrate factory there would be a number of large interests investing in this new process for manufacturing fertilizers and the essential ingredient of powder for war purposes.

The water-power bill would not cost the United States a single dollar.

All that it would do would be to permit the Secretary of War to issue permits for water-power development upon some definite plan or system. The measure was passed by the Senate by a two to one vote after all the arguments against it had been analyzed and disposed of. It may be assumed that the differences of opinion with regard to the merits of this bill are honest differences. The chief dispute is over the recapture clause, which provides that after capitalists have invested their money in the erection of dams and the building of power plants, the Government, at the end of 50 years, by paying the cost of the property, may take it over for Government operation. The opponents of the bill say that the recapture claue is so phrased as to enable investors to defeat the purpose of the law by technicalities. If this be true, it is hard to understand why the ablest lawyers in the Senate, men who are honest and patriotic, voted for the measure. There were the same differences of opinion over the Sherman antitrust law many years ago when it was before the Senate; yet the law has worked very well. It should be assumed now that since the measure passed the Senate by a large majority, it is a good working program for the development of water power.

There are in the bill a great many provisions for regulation by State commissions as well as the National Government, and at any time these regulations can be made stronger if the need for restriction appears. The main thing is to get development under way, and if the present measure is to be vetoed, a definite substitute should be suggested for it without delay.

—

[From the Ishpeming (Mich.) Record, May 26, 1916.]

WATER-POWER DEVELOPMENT.

At a recent meeting of the National Conservation Congress held in Washington, D. C., the indorsement of the principle of private industrial development of the great waterway resources of the United States was put through after a stormy session in which Gifford Pinchot and his followers were turned down and their principles were repudiated. The action as the result of the stormy debates is taken by the members to mean that the big conservation body has grown tired of seeing the vast resources of the country tied up and was anxious to put itself on record before the whole country as favoring legislative measures for private development of our water resources.

The development of water power, which conservationists recognize as the greatest natural resource the country has, has been brought almost to stagnation by the failure of legislation looking to its development. Business men with capital have stood ready to start on the hazardous undertaking of harnessing great rivers in order to provide cheaper power and light, as well as cheaper fertilizers for the farmer and a greater supply of explosives for our Army and Navy, through the new process of taking nitrogen from the air by means of water power. They have been met with the cry of "trust" and "monopoly," until, as business men, they were almost ready to abandon their efforts. The action of the Conservation Congress, however, in placing its stamp of approval on a plan to permit private industry to go ahead and develop water powers, under a limited franchise and carefully governed restrictions, is regarded as the most important step to water-power conservation that has been made in recent years.

Such men as Hugh L. Cooper, the engineer of international reputation who built the Keokuk Dam as well as big water-power plants at Niagara and on the Susquehanna River, have been prominent in the power fight. The President and members of his Cabinet and Members of Congress, without regard to political affiliations, have been advocating strongly the necessity of legislative action that will put an end to a stagnation in the development of this wonderful resource. Almost every other nation of any size, it has been pointed out, is ahead of America in the use of water power. This fact, it is said, coupled with the growing demand of the people of the United States that something be done so that the country can utilize as well as conserve this vast resource, is regarded as the basis of the decisive action by the Conservation Congress.

—

[From the Electrical World, May 6, 1916.]

THE CONSERVATION OF WATER POWERS.

Convinced of the necessity for water-power development in the interests of conservation and of national preparedness, the National Conservation Congress in convention assembled this week indorsed in principle two water-power bills now pending before the Legislature at Washington. Following close on the heels of the water-power conferences of the American Institute of Electrical Engineers and of the American Electrochemical Society in the same city last week, the action of the Conservation Congress is ominous. While there may be some question of the propriety of a national body approving or disapproving any particular form of legislation, there can be absolutely no doubt that the conservationists were impressed with the vital need of quick and definite action, and adopted the surest means of making their desires known. The high character and wide range of subjects discussed and the patriotic enthusiasm of the speakers and of the convention as a whole were sufficient to remove this action of the Conservation Congress from taint of suspicion. Now that light and understanding have been freely imparted on the situation, action should no longer be deferred.

[From the Leavenworth Times, May 1, 1916.]

FAVORS SHIELDS BILL.

The Rotary Club has passed a resolution indorsing the Shields bill, which has been introduced into the House of Representatives after having passed the Senate. This bill provides for the issuing of 50-year permits for the development of water-power sites on navigable streams anywhere in the United States. The bill anticipates the prevention of waste of such immense quantities of power as is now taking place.

—

[From the Memphis (Tenn.) Herald, May 17, 1916.]

THE SHIELDS WATER-POWER BILL.

The discussion on the best bill for Congress to adopt in bringing into action the dormant water power going to waste goes on with unabated zeal, with the tendency to favor the Shields bill in preference to all others. Because of the wide publicity of the Pinchot plan a good deal of attention was given to his views at first until the gentleman began to get a little peevish and fretful on account of the preference for the Shields bill. Now he has almost eliminated himself from attention. The big bugaboo Mr. Pinchot found in the Shields bill doesn't exist at all—that is, in the leases amounting to in perpetuity. On the contrary, ownership ceases absolutely at the expiration of the 50 years. Tennessee will be greatly benefited by this bill, as this State is fortunately blessed with water-power streams, and as the esteemed Chattanooga Times says, millions of money is waiting to be invested in Tennessee as soon as the bill becomes a law.

The Times says:

"The strongest argument for the passage of the Shields or a similar bill to the same purpose is that millions of dollars are ready for investment in plants having for their purpose the development of electrical power through the use of inland waters of the country. Senator SHIELDS has said that if this bill should become law, the development along the Tennessee River would within the next few years add immeasurably to the wealth of the country and become a most powerful agency in promoting the industrial development of the States through which it passes. As it is, few men of wealth are willing to undertake such development hedged about as they would be under present rules and regulations governing running streams under control of the Government."

We should say that, while conserving agencies for the benefit of coming generations is a duty upon the present Government, something is due those who are now on the scene of activity and whose energies and activities are being directed to the projection of enterprises and the development of resources the full benefits of which will extend long beyond the time of their natural lives and which will therefore become rich heritages for those who shall come after them.

—

[From the San Jose (Cal.) Herald, May 25, 1916.]

KEEPING CAPITAL AT HOME.

If American capital, seeking opportunities for investment in water-power development, is to be kept at home, American laws governing water-power development must be made quite as attractive as the laws of Canada or of the Canadian Provinces. That Canada welcomes the investment of American capital has been amply demonstrated.

The present Dominion water-power law of Canada, enacted five years ago, has failed to lure American dollars, and is to be remedied; but the law of Quebec—a Province where water-power development does not come under Dominion control and regulation—is far more liberal in its provisions, and far more alluring in its terms, than any bill now before the American Congress. Add to this the fact that Quebec has the most attractive water powers undeveloped in all North America, where the cost of installation is relatively cheap, where leases run from 75 to 99 years, where terms are moderate, and where tidewater transportation is at hand and big markets within easy reach, and it will be realized that this much of Canadian competition is a factor which can not be ignored in working out the water problem in the United States.

Within recent months American capital of vast extent, discouraged by the repeated failure of the American Congress to adopt a water-power policy, turned toward Quebec, intending to make an initial investment of $10,000,000 in a development that ultimately would reach 600,000 horsepower, the largest single enterprise of the kind on this continent. That the investment has not yet been made is due solely to a conflict of private interests owning the power site. When that obstacle is overcome, ten, twenty, perhaps thirty millions of American

capital, that first sought investment in the United States, will follow into Canada the American millions that went to the Canadian side of Niagara Falls to build and operate the only hydroelectric plant on this continent that to-day produces commercial atmospheric nitrogen for the manufacture of fertilizers and explosives.

So liberal have been the Quebec officials in the administration of their water-power policy that American capital to-day has less fear of the Quebec Government than of the Government of the United States. Moreover, the Canadian Province which threatens to become the most active competitor of the United States in the hydroelectric field is already offering definite terms, while in the United States there is nothing but uncertainty—an uncertainty that grows greater as the prospect for water-power legislation grow dimmer.

—

[From the Engineering Record, New York, Feb. 12, 1916.]

CONCENTRATION OF WATER-POWER CONTROL.

The bugaboo of a water-power trust has been raised again by the publication of the report, submitted to the Senate by the Secretary of Agriculture, showing the relations of the companies owning water power in the United States. The report was briefly abstracted in the last issue of the Engineering Record, page 192. From various quarters have come expressions of fear that the people of the United States either now or later are to be at the mercy of the octopus. Granting that 18 corporations control more than one-half of the total water power used in public-service operations in this country, and that 6 corporations control more than one-quarter, what need is there for alarm so long as the State utility commissions have control over the rates? In other words, no matter how extensive the monopoly, the return to it from the ownership of the water powers remains in control of the people. Such is not the case, of course, where the entire power produced at a particular point is used by a single corporation for industrial purposes. Yet it is not these powers that are discussed in the report in question.

That the report itself recognizes the advantage of monopoly is apparent from the following passage:

"Monopolization of the supply in any given territory makes possible, through interconnections of stations and through diversification of load, economies of operation that would not be possible for isolated independent stations. Interruptions to service may be lessened, the needs of the customer may be better served, and rates may be lower with a single power system than with several. No better service is given and no lower rates charged than in California, where, notwithstanding the considerable municipal developments, 90 per cent of the total primary power is used by public-service corporations, or in Montana, where 89 per cent is owned by two affiliated corporations. Having the ability to give the better service and the lower rate, it only remains for the proper public agency to require it."

It is right here that the case of the agitators who hold up the water-power-trust bugaboo falls to pieces, because the proper public agency to require reasonable rates is already provided in the various public-service commissions which now regulate electric utilities in all but 15 States.

—

[From the Utica (N. Y.) Observer, June 5, 1916.]

WATER-POWER DEVELOPMENT.

The Shields water-power bill, if it becomes a law, will throw open to development a large amount of water power. Its sponsor declared that the amount that would be developed is upward of 15,000,000 horsepower, or the equal of 100,000,000 tons of coal consumption per year.

The bill places a large responsibility in the hands of the Secretary of War. He is authorized to grant permits for dams and power plants where he believes that such dams will improve the navigability of streams. It is manifest that in this clause there is a large restriction, for there are many power-producing streams which are not navigable, and the dams would make them so only for rowboats. It is not clear why mountainous streams were not included in the bill.

The dams are to be constructed by private capital, which shall provide locks, gates, etc. Business within the State shall be regulated by the State and interstate business by the Interstate Commerce Commission. It appears that through this provision any corporation is under close control as to its prices. The plans for the dams, morever, must be approved by the War Department in order that the best improvement of navigation and the fullest development of waterpower may be obtained.

The corporation must pay a rental for public lands and a charge for the rights and privileges in the use of water. These rentals and charges are to be fixed by the Secretary of War. The money thus received is to be placed into a special fund for use in further improvement of waterways.

A corporation is prevented from delaying in its work by a provision which requires that it shall begin work within two years after the granting of the permit. The Secretary shall prescribe that the work shall be completed within a reasonable time, fixed by him. If the works are not completed as directed, or if the provisions are violated, the corporation is subject to penalties or revocation of the grant.

At the end of the 50-year period, for which the permits are granted, the Government may extend the lease, make a new grant, or upon one year's notice take over the property upon payment of its value. This value shall be determined by agreement, or by the Federal courts. No rights granted by the Government shall be allowed in arriving at this value and such rights shall not be included in fixing the rates to consumers.

Municipally owned dams and power plants for irrigation, or for supplying power for municipal purposes, are given preferences for surplus water. The bill does not apply to small streams.

The measure contains an antimonopoly clause providing that no dams shall be controlled by any unlawful monopoly, or shall form any unlawful constraint to limit the output of electrical energy, or in restraint of trade. This seems to be a superfluous provision, for existing laws should take care of that.

The Senate talked about this bill for weeks, and passed it by a good majority, which indicates that the Senate is fairly well satisfied with it. It is a measure which gives private enterprise much inducement to develop various water powers, and at the same time it does not give these valuable rights away, as public property has been given away heretofore. It is to be noted, however, that at the end of the 50-year lease, the Government shall pay the value of the plant. The Government could do the same with the railroads. On the other hand, 50 years hence they may fix values differently, so that the unearned increment piled up by the public will not be included in the price.

[From the Boston Commercial, Feb. 19, 1916.]

DEVELOPMENT REAL CONSERVATION—THE FOLLY OF WITHHOLDING WATER POWER FROM PUBLIC USE—AMPLE COMPENSATION IN SERVICE AND TAXES.

Gifford Pinchot, who came prominently into the public eye several years ago as one of the foremost advocates of conservation, apparently has not awakened to the fact that the American people have debated that question in their minds until they are satisfied that it is simply the crazy idea of an illogical dreamer. He is now writing personal letters to editors, asking the press to help him "defeat a most serious attack upon our public resources." He says the Shields bill, now before the Senate, gives to the "power interests" without compensation the use of water power on navigable streams; that the amount of power these streams will supply is larger by far than all the power of every kind now in use in the United States; and then he rambles on about provisions which should "enable the people to take back their own property at the end of 50 years."

Mr. Pinchot is a socialist, though he probably does not know it, and it is altogether improbable that the socialists would accept him as such. His idea, reduced to its final analysis, is that the whole people should own everything and that the lazy and improvident, through the mere mistake of birth, should inherit a share of the accumulations of the creative, the industrious, and the thrifty; it seems to be his opinion that one method to bring about his desired distribution of wealth would be to hold up those who finance and develop industries and make them pay the Government for the privilege of doing business. John Ruskin objected to steam-railroad building in England because, in his opinion, it would deface the scenery. Gifford Pinchot is afraid some one might develop water power in "the Grand Canyon, the greatest natural wonder on this continent." Therefore Pinchot is in no sense original.

If the savings of thrifty people had not been put into corporations to build up the railroads probably no one would now take as a gift either the water powers or the great agricultural areas of the interior of this country, there would not be taxable property enough in the United States to pay the salaries of the little group of muckrakers who still hold public office, and the relatively small area from which food products could be moved to seaboard would not support one-half of the present population. Everybody knows, possibly excepting Pinchot, that the development of the country's water powers will result in the creation of property values and that the taxes the holders of such properties will pay will compensate the Government handsomely. They also know that by the use of this power the productive capacity of the country will be immensely increased, giving remunerative employment to labor and exerting an influence to reduce the cost of living. It is common knowledge also that the entire material progress of humanity has been due to the development and use of natural resources by the people who save, invest, and work, and who do not permit themselves to be restrained from doing so by impracticable theories.

If this country is to go ahead industrially, an immense amount of mechanical power must be developed. Is it better that the coal deposits or the waterfalls should be conserved? One or the other must furnish the power.

Mr. Pinchot thought the coal of Alaska should be conserved, also the forests, and now the water powers. The rest of us in the United States do not agree with him fully, and therefore it would seem to be up to him to remove his place of residence to the interior of South America or Africa, where everything is being conserved.

If there is anyone left who has the courage to invest his capital in the development and equipment of a water power in the United States after the way the Government has treated investors during the past eight or nine years, he should be given the privilege of doing so and he should also be awarded a medal for bravery.

That water powers or anything else should be operated at cost for the alleged "benefit of the people" is a figment of the imagination. Profits are just as essential to industrial and material progress as food is to a growing child.

If the full product of the industry were divided equally among those who take part in its production, there would be no fund with which to build for the future. Until there is a sufficient accumulation to pay for clearing the land, providing the seed, and cultivating the plants, there can be no harvest, and a part of each crop must be saved for seed and to feed the workers until harvest time the following year.

Undoubtedly a few editors will fall for Mr. Pinchot's argument, but it is believed that a vast majority of them know better. The population of the United States is increasing, and the only way to provide the growing numbers of people with food, raiment, and shelter is by the development of the country's natural resources, the extension of its industries, and the continuing increase of its production.

A relatively small portion of the profits of industry is wasted by the rich on luxuries and extravagances, but more than three-quarters of all net earnings are reinvested and the profits thereon reinvested in such a way that the public gets the full benefit to the last dollar.

Fortunately, approximately all of the profits so far made in this country have been invested at home. After they begin to be invested abroad the people of other countries will get the benefit of them. If Gifford Pinchot's dreams are permitted to come true, American capital will go abroad in shiploads.

The old song says, "The mill will never grind again with the waters that are past." The only way to conserve water power is by developing and using it. By this method the millions of horsepower now running to waste every day should be conserved, Mr. Pinchot to the contrary notwithstanding.

—

RESOLUTIONS PASSED BY CIVIC ORGANIZATIONS OF THE UNITED STATES, INDORSING THE SHIELDS NAVIGABLE-STREAM WATER-POWER BILL (S. 331).

BY THE RALEIGH CHAMBER OF COMMERCE, RALEIGH, N. C.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

Whereas cheap electrical power for the irrigation of our desert lands; for the treatment of our limestone, phosphate, and mineral resources; for the operation of light, heat, and power plants in areas now closed to electrical competition; for the electrification of divisions of our railroads; for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers, and to assure us an adequate ammunition supply in time of war; and for reducing the cost of power in manufacturing of every description, now waits upon a change in our present laws; and

Whereas water-power development under vigilant regulations by National and State authorities, insuring absolute freedom from monopoly or restraint of trade, and forfeiture in event of failure to develop, and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land, is fully secured in the Shields bill, recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That the Raleigh Chamber of Commerce, of Raleigh, N. C., an association representing the commercial and agricultural interests of Raleigh and Wake County, upon whose welfare depends the livelihood of many employees and the prosperity and comfort of a population of 70,000, now comprised within the commercial and agricultural districts of Raleigh and Wake County, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urge upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to every Senator and Congressman from the State of North Carolina, and to every commercial and agricultural association with whom this association is in correspondence or affiliation.

—

BY THE COMMERCIAL CLUB OF SALT LAKE CITY, UTAH.

At the regular meeting of the board of governors on April 24, 1916, the following resolutions in regard to the Shields bill now pending in Congress were adopted:

"Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

"Whereas cheap electrical power for the irrigation of our desert lands, for the treatment of our limestone, phosphate, and mineral resources, for the operation of light, heat, and power plants in areas now closed to electrical competition, for the electrification of divisions of our railroads, for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers and to insure us an adequate ammunition supply in time of war, and for reducing the cost of power in manufacturing of every description now waits upon a change in our present laws; and

"Whereas water-power development, under vigilant regulation by national and State authorities, insuring absolute freedom from monopoly or restraint of trade and forfeiture in event of failure to develop, and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land is fully secured in the Shields bill, recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore, be it

"*Resolved*, That the Commercial Club of Salt Lake City, an association representing the commercial and agricultural interests of Salt Lake, upon whose welfare depends the prosperity and comfort of a population of approximately 130,000, now comprised within this district, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

"*Resolved*, That a copy of this resolution be mailed by the secretary of this association to every Senator and Congressman from the State of Utah."

—

BY THE CARBONDALE BUSINESS MEN'S ASSOCIATION, CARBONDALE, PA.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste, because their development is financially impossible under our present laws; and

Whereas cheap electrical power, for the irrigation of our desert lands; for the treatment of our limestone, phosphate, and mineral resources; for the operatioa of light, heat, and power plants in areas now closed to electrical competition; for the electrification of divisions of our railroads; for the manufacture of nitrogen from the air on a scale to lessen the costs of our farm fertilizers and to insure us an adequate ammunition supply in time of war; and for reducing the cost of power in manufacturing of every description, now waits upon a change in our present laws; and

Whereas water-power development, under vigilant regulation by national and State authorities, insuring absolute freedom from monopoly or restraint of trade and forfeiture in event of failure to develop and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land, is fully secured in the Shields bill, recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That the Carbondale Business Men's Association, of Carbondale, Pa., an association representing the commercial, agricultural, and mining interest of the community, upon which depends the livelihood, prosperity, and comfort of a population of 35,000 now comprised within the commercial, agricultural, and mining district in and around the city if Carbondale, Pa., hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to the Congressman representing this district and to the Senators from the State of Pennsylvania.

—

BY THE EL PASO CHAMBER OF COMMERCE, EL PASO, TEX.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

Whereas cheap electrical power for the irrigation of our desert lands; for the treatment of our limestone, phosphate, and mineral resources; for the operation of light, heat, and power plants in areas now closed to electrical competition; for the electrification of divisions of our railroads; for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers and to insure us an adequate ammunition supply in time of war; and for reducing the cost for power in manufacturing of every description now waits upon a change in our present laws; and

Whereas water-power development under vigilant regulation by National and State authorities, insuring absolute freedom from monopoly for restraint of trade and forfeiture in event of failure to develop, and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land is fully secured in the Shields bill recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That El Paso Chamber of Commerce, of El Paso, Tex., an association representing the commercial and agricultural interests of El Paso, Tex., upon whose welfare depends the livelihood of El Paso employees and the prosperity and comfort of a population of 100,000 now comprised within the commercial and agricultural districts of El Paso, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to the Senators and Congressmen from the State of Texas.

—

BY THE ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE, KY.

Be it resolved by those members of the Engineers' and Architects' Club of Louisville present at a meeting May 2, 1916, That the development of the enormous water powers of the United States would add greatly to the wealth, the comfort, and the business opportunities of the people of the United States.

Resolved further, That in the opinion of the members of this club such development is impossible unless the persons who propose to develop the various water powers can do so under reasonable and certain laws, which laws should provide for such tenure of the water-power rights and land necessary for the development of such rights as will enable investors either to enjoy in perpetuity the fruits of their investment or to be reimbursed for their expenditures in case the Government should see fit to take over these rights.

Resolved further, That the plan of requiring a separate act of Congress for the development of each water power is entirely impracticable, as business men can not afford to subscribe money to an enterprise when the legal right to carry on the enterprise is not already secured, and probably can not be secured without incurring considerable expense, and waiting for an indefinite period—possibly four or more years.

Resolved further, That Senate bill No. 3331, known as the Shields bill, having been read and discussed by this meeting, it is the sense of the meeting that it fully protects the interests of the public and will promote the speedy development of our water powers.

Resolved further, That the Secretary be instructed to send a copy of this resolution to each Senator and Representative from the State of Kentucky; also that a copy be sent to the Louisville Board of Trade, and that the Louisville Board of Trade be requested to memorialize Congress on this subject, and lend its influence toward securing the passage of a bill which will enable the water powers of the country to be harnessed for use under terms which will be fair to the investors and fair to the public.

—

BY THE HARTFORD CHAMBER OF COMMERCE, HARTFORD, CONN.

Whereas the State of Connecticut has a large number of undeveloped water powers which are situated to a large extent on navigable rivers, and it is now generally admitted that the laws now on the statute books of the United States are such as to prevent the adequate development and utilization of these water powers and the improvement of navigation in connection therewith, so that such water-power development and improvement of navigation is now and has been for many years at a standstill; and

Whereas cheap electrical power for the operation of light, heat, and power plants; for the electrification of railroads; for the manufacture of nitrogen from the atmosphere for use as farm fertilizers; to insure an adequate supply of ammunition in time of war; and for the treatment of our limestone, phosphate, and mineral resources; and for supplying low-cost power for manufacturing of every description is now prevented by the present laws; and

Whereas new legislation must be enacted by the Congress of the United States so that water-power developments can be permitted and encouraged upon terms under which the necessary capital can be obtained for such development and improvement of navigation; and

Whereas a bill known as the Shields bill has been passed by the United States Senate, under the terms of which the development of water power is permitted and encouraged under proper regulation by National and State authorities, with provision for the termination of the Government franchise at the end of 50 years and the payment of compensation to the Government for any use of Government property and land, with adequate provisions for the protection of the interests of the consumers of power, and with proper safeguard for the investment of capital, and for the improvement of navigation upon navigable streams, which said Shields bill is now pending in the House of Representatives: Therefore be it

Resolved, That the Hartford Chamber of Commerce, an association representing the commercial, business, manufacturing, and agricultural interests of the city of Hartford and surrounding territory, hereby indorses the Shields bill as passed by the Senate and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and

That a copy of this resolution be mailed by the secretary of this chamber to every Senator and Congressman from the State of Connecticut and to other chambers of commerce in the United States.

—

BY THE CHAMBER OF COMMERCE AND MANUFACTURERS' ASSOCIATION, DALLAS, TEX.

Resolved, That the Chamber of Commerce and Manufacturers' Association, representing the commercial and agricultural interests of Dallas, hereby indorse the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the Secretary of this association to every Senator and Congressman from the State of Texas.

BY THE GADSDEN CHAMBER OF COMMERCE, GADSDEN, ALA.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

Whereas cheap electrical power for the treatment of our limestone, phosphate, and mineral resources; for the operation of light, heat, and power plants in areas now closed to electrical competition; for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers and to insure us an adequate ammunition supply in time of war, and for reducing the cost of power in manufacturing of every description, now waits upon a change in our present laws; and

Whereas water-power development, under vigilant regulation by National and State authorities, insuring absolute freedom from monopoly or restraint of trade, and forfeiture in event of failure to develop, and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land, is fully secured in the Shields bill, recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That the Chamber of Commerce of Gadsden, an association representing the commercial and agricultural interests of Gadsden, upon whose welfare depends the livelihood of many thousands of employees, and the prosperity and comfort of a population of some 50,000 now comprised within the commercial and agricultural districts of Etowah County, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the Secretary of this association to every Senator and Congressman from the State of Alabama and to every commercial and agricultural association with whom this association is in correspondence or affiliation.

GADSDEN CHAMBER OF COMMERCE.

MAY 8, 1916.

BY THE CHAMBER OF COMMERCE, MONTGOMERY, ALA.

Whereas the present governmental system makes it practically impossible to develop the great water power now dormant in the State of Alabama, thereby retarding the material progress of 2,000,000 people; and

Whereas the manufacture of electricity through the cheaper process of water power has become a necessity for the development of our mineral resources and the making of nitrogen from the air for fertilizers and ammunition in the event of war; and

Whereas complete protection is guaranteed the people from oppression by corporations in the so-called Shields general dam bill passed by the United States Senate and now pending in the House of Representatives: Therefore be it

Resolved by the board of directors of the Chamber of Commerce of Montgomery, representing the commercial, industrial, and agricultural interests of the capital city of Alabama, That we urge upon the House of Representatives the speedy passage of the Shields bill, in order that the material development of our State may not be hindered.

Resolved further, That copies of these resolutions shall be transmitted to Members of Congress and commercial organizations throughout the country with a request that they join with us in a demand for this needed legislation.

Certified as a true copy.

BRUCE KENNEDY,
General Secretary.

MONTGOMERY, ALA., *April 25, 1916.*

BY THE ROME CHAMBER OF COMMERCE, ROME, GA.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

Whereas cheap electrical power for the treatment of our limestone, phosphate, and mineral resources, for the operation of light, heat, and power plants in areas now closed to electrical competition, for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers and to insure us an adequate ammunition supply in time of war, and for reducing the cost of power in manufacturing of every description, now waits upon a change in our present laws: and

Whereas water-power development, under vigilant regulation by National and State authorities, insuring absolute freedom from monopoly or restraint of trade, and forfeiture in event of failure to develop and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land, is fully secured in the Shields bill, recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That the Chamber of Commerce of Rome, an association representing the commercial and agricultural interests of Rome, upon whose welfare depends the livelihood of many thousands of employees and the prosperity and comfort of a population of some 100,000, now comprised within the commercial and agricultural districts of Floyd County, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to every Senator and Congressman from the State of Alabama and to every commercial and agricultural association with which this association is in correspondence or affiliation.

ERADICATION OF THE CATTLE TICK.

Mr. RANSDELL. Mr. President, I have received a very interesting communication from the Acting Chief of the Bureau of Animal Industry, United States Department of Agriculture, on the subject of the cattle tick, a matter we had under consideration on yesterday. The communication reached me too late to have it placed in the RECORD then, and I ask to complete the record on the cattle tick by having this letter printed.

Mr. SMOOT. The subject of the communication is a past issue. Why should it go in the RECORD?

Mr. RANSDELL. Because it contains very valuable information, and it is also very short.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

The matter referred to is as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF ANIMAL INDUSTRY,
Washington, D. C., July 12, 1916.

HON. JOSEPH E. RANSDELL,
United States Senate.

DEAR SENATOR RANSDELL: As a result of 10 years' experience in tick eradication the Federal officials in charge of this campaign are convinced that the hearty cooperation of the people themselves is absolutely essential to success. The Department of Agriculture's representatives in the field, therefore, have been warned of the danger of beginning systematic work in any county before public opinion is ready to lend vigorous support to the enterprise. It frequently happens that a few of the more progressive farmers are earnest advocates of tick eradication, while the rest of the community may be either indifferent or actually hostile. In a number of instances in the past when tick eradication has been begun under these circumstances it has been found necessary after two or three years for the Federal Government to withdraw its men, because the results in their work were, to a great extent, nullified by popular indifference. To make a success of eradication, all cattle in the county must be dipped regularly. In practice this is only possible when the great majority of the people are so strongly in favor of the work that they will insist upon the enforcement of the necessary regulations.

Recent instructions sent out from Washington to the men in charge in the infested regions directed them to procure a list of the voters in any county in which there was manifestation of local interest in tick eradication. Circular letters and pamphlets explaining the evil of the tick and the possibility of its elimination could then be sent to this list.

The next step is to arrange for practical demonstrations of dipping. Since the Federal department has no funds at its disposal for the purpose, the construction of demonstration vats must be undertaken either by the local authorities or by one or more public-spirited and progressive stock owners. The cost of building a vat is comparatively small, not exceeding $50, exclusive of labor provided by farmers, and it has been found that these practical demonstrations are by far the most effective method of convincing farmers that the tick can be eradicated without any injury whatsoever to live stock. As soon as the vats are built a number of demonstrations are held in order to give all the people of the county an opportunity to see for themselves that dipping does no injury to cattle. There is a widespread belief among the less informed stock owners in the tick-infested regions that the arsenic in the dipping vats poisons cattle and dries up milch cows. This erroneous notion may be easily dispelled if arrangements are made for holding the dipping vat on exhibition for a few days.

After a series of such demonstrations meetings of farmers are held and the benefits of tick eradication explained clearly and forcibly. Ordinarily these meetings lead to the organization of county live-stock associations, which have been found very influential factors in promoting eradication. It is customary for these associations to apply to the county board for the materials for the vats and for the chemicals used in the baths. Until satisfactory arrangements have been made in this or some similar way for the construction of sufficient vats to accommodate all the cattle in the county without driving them long distances the time is not ripe to undertake active eradication work. In most instances the law requires that before such work is undertaken the county should vote for it in a special election. Even where no such election is actually required, the moral effect of the expression of the people's will is greatly to be desired.

Systematic eradication work means the dipping of all cattle in the county every 14 days in a standard arsenical solution. If this regulation is rigidly enforced, one season should see the elimination of the ticks and the freeing of the country from quarantine. Every dipping, however, should be supervised by regularly appointed inspectors, and the arsenical solution should be tested and made of standard strength before each time that the vat is used. Furthermore, care should be taken to account for each cow in the territory in which the vat is located. A few neglected cattle will afford a refuge for the tick and in time undo all that was accomplished by the dipping of the others.

This necessarily involves some inconvenience to cattle owners. As has already been said, therefore, before active work is undertaken, it is essential that public sentiment be brought to a point where this inconvenience is cheerfully accepted. In general, one to two years' preliminary work is sufficient for this purpose. The free use of demonstration vats will do much toward shortening the period and increasing enthusiasm for the active work that is to follow.

As large areas were freed from cattle ticks each year, more and more people became convinced that ticks could be eradicated at a reasonable cost. Furthermore, they discovered that as soon as ticks which kill susceptible cattle were gone, better cattle were at once brought into the country and year-old calves produced that would weigh more than cattle at two years of age raised under tick conditions. These plain every-day facts gave impetus to the work, and tick eradication increased and developed in nearly all the States where cattle ticks flourished, until up to the present time there has been freed from ticks an area of approximately 285,000 square miles, an area nearly as large as that of the combined States of Mississippi, Alabama, Georgia, Florida, South Carolina, and North Carolina. This means that practically 40 per cent of the area formerly under quarantine for cattle ticks has been released as being free from ticks. (See inclosed statement of "Progress in Tick Eradication, July 1, 1906, to March 10, 1916.")

The possibility of eradicating ticks is no longer doubted by the farmer. The question now is, How soon can the last tick be eliminated from the United States?

Congress and the State legislatures are each year appropriating larger sums of money to the end that the work may be increased. In many cases where State legislatures failed to appropriate sufficient funds to meet the demands for tick eradication, the county courts have come to the rescue. In other cases farmers have formed local live-stock associations and provided funds to build cattle-dipping vats, to buy dipping materials, and receive the cooperation and assistance of the United States Department of Agriculture in carrying on systematic work.

The cost of tick eradication varies according to conditions and the personal efforts put forth by the farmers themselves. In some States the cost runs as high as $11.80 per square mile; in others as low as

$6.70 per square mile. But when we realize that the same class of farm lands in a tick-free county will sell for $5 to $10 more per acre than the same class of land in tick-infested areas, there can be no question as to whether tick eradication is profitable to the farmer and to the State.

In connection with the above it may be stated that subsequent to the time the Secretary submitted estimates for tick-eradication work during the fiscal year 1917 the interest in tick eradication has increased tremendously. In Texas, where the work usually included two or three counties at a time, there are now 20 counties which have decided to take up the work, and it is to meet this general increasing demand for tick eradication that additional funds have been requested, for the purpose of conducting the work along the old lines in countries which have not thus far been reached. The department is prohibited by act of Congress from expending funds for the construction of cattle-dipping vats and for the purchase of materials for the preparation of dips except for experimental purposes. During the last fiscal year less than $300 was expended for such work. The vats and dipping materials required for use in the eradication of ticks have been provided, therefore, by either States, counties, or individuals. The various States in the tick-infested territory are expecting to expend during the next fiscal year a total of $975,730 for tick eradication, as follows: In Alabama, the State is expecting to appropriate $25,000 and the counties $120,000; Arkansas, the State $34,000, other sources $50,000; Florida, the State $15,000; Georgia, the State $29,000, the counties $69,000; Louisiana, the State $18,000, counties $90,000; Mississippi, the counties $108,230; Missouri has been released from quarantine; North Carolina, the State $8,000, counties $5,500; Oklahoma, the State $35,000, counties $110,000, other sources $20,000; South Carolina, $30,000; Tennessee has been released; Texas, the State $40,000, counties $160,000; Virginia, the State $2,000, counties $7,000; making a total for the States directly of $236,000, the counties $669,730, and other sources $70,000.

The Legislatures of Mississippi and Louisiana have both recently passed laws requiring all counties in the States where tick infestation exists to take up the work of eradication on request by the State live-stock sanitary officials. In Alabama the work has been greatly increased, and in Florida funds have been pledged by landowners, transportation companies, and other interested persons which will provide an additional fund of $60,000 each year for three years.

Very truly, yours,

J. K. MOHLER,
Acting Chief of Bureau.

[1] Only portions of five of the 61 counties were quarantined.

MARINE HOSPITAL RESERVATION, CLEVELAND, OHIO.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2845) authorizing the sale of the marine-hospital reservation in Cleveland, Ohio, which were, on page 2, line 3, after "appraisements," to insert "and at not less than the appraised value," and, on page 2, to strike out lines 8 to 22, both inclusive, and insert in lieu thereof the following: "That the proceeds of the sale of so much of said reservation and the improvements thereon as is sold under the foregoing authorization are hereby appropriated and made immediately available for the provision of a new marine hospital at Cleveland, Ohio, including furnishing and the acquisition of a suitable site therefore, within a limit of cost of $400,000; and the balance of the proceeds of the sale shall be paid into the Treasury as miscellaneous receipts."

Mr. POMERENE. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

The VICE PRESIDENT. The hour of 6.30 o'clock having arrived, the Chair declares the Senate of the United States adjourned until to-morrow at 10 o'clock a. m.

Thereupon (at 6 o'clock and 30 minutes p. m., Thursday, July 13, 1916) the Senate adjourned until to-morrow, Friday, July 14, 1916, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *July 13, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father who art in heaven, we thank Thee that down deep in our hearts we recognize and fully appreciate the beauty, potency, and truth of the great principles enunciated by the Master, but we realize that we fall short of those principles in our daily duties; hence we pray for strength, that we may assimilate them and make them dominant in all the transactions of life, that we may hasten the coming of Thy kingdom upon the earth. In the spirit of the Lord Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

WATER-POWER BILL.

The SPEAKER. The House automatically resolves itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3331, the water-power bill, with the gentleman from Kentucky [Mr. JOHNSON] in the chair.

The House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3331, the water-power bill, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce.

Mr. VOLSTEAD. Mr. Chairman, I believe we were considering section 20 when the consideration of this bill was suspended the other day.

Mr. ADAMSON. Section 10.

The CHAIRMAN. There was an amendment pending to section 10.

Mr. VOLSTEAD. I desire to offer an amendment to section 20.

The CHAIRMAN. It can be offered only by unanimous consent, inasmuch as section 20 has already been disposed of. The Clerk will report the amendment which is pending before the committee.

Mr. ADAMSON. I would like to dispose of it, Mr. Chairman.

The CHAIRMAN. The amendment was offered by the gentleman from California [Mr. KENT] and amended.

The question was taken, and the amendment as amended was agreed to.

Mr. ADAMSON. Mr. Chairman, I move that the committee do now rise and report the bill to the House. No; I withdraw the motion. There are two gentlemen who wish to speak.

Mr. VOLSTEAD. I desire to ask unanimous consent to return to section 20. I desire to offer an amendment to that section.

The CHAIRMAN. Is there objection?

Mr. MANN. Reserving the right to object, what is the amendment?

Mr. ADAMSON. Until I can find out what it is, I shall reserve the right to object.

Mr. VOLSTEAD. It is a substitute embodying section 14 of the Shields bill.

The CHAIRMAN. The gentleman from Minnesota [Mr. VOLSTEAD] will send his amendment to the desk.

Mr. ADAMSON. I understand it is a section of the Shields bill. I object, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment to section 20 proposed by the gentleman from Minnesota [Mr. VOLSTEAD], to which objection is made. It will be reported for information.

Mr. ADAMSON. Mr. Chairman, we are not considering the Shields bill at all, and the gentleman stated to me privately that he wanted to amend a section of the Shields bill.

Mr. MANN. No; the gentleman is mistaken. The gentleman wanted to amend section 20, and to that end offers an amendment from the Shields bill.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Minnesota [Mr. VOLSTEAD].

The Clerk read as follows:

Amend the section by substituting the following: "That the term 'navigable waters' as used in this act"——

Mr. ADAMSON. Mr. Chairman, I see what it is. It is to substitute section 14 of the Shields bill, and I object.

The CHAIRMAN. The gentleman from Georgia objects.

Mr. MANN. Under a special order of the committee, Mr. Chairman, the gentleman from Minnesota [Mr. SMITH] is entitled to address the House for 10 minutes.

Mr. ADAMSON. And also under that arrangement the gentleman from Tennessee [Mr. SIMS] is to be recognized for five minutes.

The CHAIRMAN. Under the special order the gentleman from Minnesota [Mr. SMITH] will be recognized for 10 minutes and the gentleman from Tennessee [Mr. SIMS] will be recognized for 5 minutes. The gentleman from Minnesota [Mr. SMITH] is now recognized.

Mr. SMITH of Minnesota. Mr. Chairman, if the mysterious forces of electric energy are placed within the easy reach of all the people by the agency of the Government, their burdens will be immeasurably lightened and their comforts greatly increased. On the contrary, if the Government fails and neglects to control this well-nigh "universal future source of industrial power," and permits it, unregulated and uncontrolled, to remain in selfish and unsympathetic private hands, it is certain to become the controlling force of the most despotic combination ever created to control the commercial, industrial, and domestic affairs of a people. Even the very Government itself, if not already under the influence of this combination, will sooner or later be corrupted by the evil influences bound to emanate from so vast and unrestrained twentieth century organization of natural and artificial forces.

The proposition we are now considering is a measure providing for the development and use of this electrical power generated by water power from dams to be erected in navigable streams. The principal feature of this legislation is the regulation of the development and "use of electric current," so that the great benefits accruing from the discovery of electrical transmission will contribute to the comfort and happiness of all the people instead of a few.

On a proposition so complicated and far-reaching as this it is not surprising that a variety of theories are put forth to solve the problem. However, by the processes of elimination and agreement these schemes can be reduced to a single theory as soon as a common understanding of the fundamental principles involved is reached, but until the fundamental principles are discovered and understood no reconciliation of the contending theories is possible.

Since we adopted the amendment directing the Secretary of War to make a charge for the use of the flow of water in the river a few of my colleagues have expressed themselves as being satisfied with this bill, as though the exercise of this taxing power were a fundamental feature of the legislation.

While I am convinced that the amendment is a proper one, such a feature is by no means fundamental or necessary to the accomplishment of the purpose of this legislation, to wit, to put within the reach of all the people hydroelectric power at the lowest cost that will be in keeping with sound finance.

Can it be said by anyone, except the Democratic Party, which has taxed everything in sight except babies, that the taxing of flowing water in our rivers will to any appreciable degree accomplish the thing we are seeking? If so, I would like to have him point it out. The water-power monopoly opposed the imposition of this tax most vehemently. Why? Not because it made any difference to them, for every dollar of tax the Government compels this monopoly to pay will be charged to the consumer; this is one of the benefits of being a monopoly. Then why should it oppose the tax? Because by so doing attention will be diverted from the fundamental principles of the bill, which in this case are acceptable to the hydroelectric people.

Has any representative of the Water Power Trust objected to the regulatory features of this or the Shields bill? Notwithstanding the regulatory sections of the bill provide for no regulation at all, but simply turn the whole subject of regulation over to the Secretary of War without limitation or restriction. If this bill or the Shields bill becomes a law in its present form any future candidate for the Presidency can have all the money he wants for campaign purposes from the trust if he will agree to let it suggest his Secretary of War.

Each succeeding Secretary of War will have the power to regulate this industry according to his own personal notions. He will be untrammeled by any law to either guide or restrain him.

Is it reasonable to suppose that the water-power interests would let such a provision remain in the bill unopposed if they were not cocksure that they would be on the inside in the matter of regulation?

Ah! but I hear some piping voice say that this industry will be regulated by State commissions, and therefore it is immaterial what kind of regulation is prescribed by Congress. The same could be said of our railroads with equal justification.

The conditions brought about through the agency of physical combination of plants and lines have made electric current interstate and have developed its interstate tendencies to such an extent that it is practically beyond State control.

Let me call your attention to what Hugh L. Cooper, one of the chief representatives of the Water Power Trust, had to say on this phase of the question before the Committee on Interstate and Foreign Commerce of the House of Representatives on March 11, 1914, when asked by Chairman ADAMSON:

> What is the reason this will not do? If it is entirely within the jurisdiction of the State, let the State do what it pleases.
>
> Mr. COOPER. I am afraid of any State. As far as I am personally concerned I would not put up $5 for some States to shoot at. I have heard such awful things stated in the halls of the various legislatures that I am very generally afraid of them. It is not a joke with me; I am afraid of it, but I am not afraid of Congress.

But in February, 1916, Mr. Cooper sings quite another song, as appears from an article in the Outlook over his signature, a marked copy of which publication was sent to Members of Congress during the discussion of the Shields bill in the Senate for the purpose of gaining their support for that bill. In this article Mr. Cooper says:

> The regulation of rates by any Cabinet officer is wrong in practice, except temporarily pending the establishment of commissions in a few States which still lack them. If the rates fixed by the State commissions are unfair to either power companies or consumers, either party can appeal to the people and eventually secure justice.

In view of what Mr. Cooper said on March 11, 1914, does anyone believe that he was sincere in February of 1916 when he said that he believed that State commissions should regulate the service, and so forth. The trusts are simply playing a little game of hide and seek with the Members of Congress and the public. What they want is what they have in the pending bills, to wit, no regulation at all, or such as it may be to be in the hands of the Secretary of War.

It must be manifest to everyone who has examined the pending measure that under its terms the Water Power Trust would be able to get a grant in perpetuity free from effective regulation. The very thing they should not be permitted to get, if we desire to retain a portion of the benefits of our water power for the public. However, it is contended by some that it is better to give the trust the kind of a grant they want so as to unlock this natural resource that is now running to waste. To this I have but to say that until the water-power monopoly develops and puts into operation the 61 water-power sites that it obtained from the Federal Government between 1905 and 1907 it comes with poor grace for it to cry, "locked up water-power sites."

Under the present conditions the enactment of a wise and beneficial water-power bill is not a Sunday-school picnic nor a protracted prayer meeting, as the distinguished chairman of the committee having charge of this matter would lead one to believe from his remarks. On the contrary, it is sizzling with more inate cussedness and fiendish selfishness than any other piece of legislation brought before Congress in a quarter of a century.

I deeply appreciate the difficulties of my colleagues who are combating the active and resourceful lobby in Washington, as well as a vile and mercenary press at home. We of the Central West are fortunate in having only one daily paper that is stabbing us in the back and espousing the cause of the Water Power Trust. The paper I have in mind is the Minneapolis Tribune, whose proprietor, W. J. Murphy, has made millions out of water-power grants. He bitterly bemoans the fact that he has been without a representative in Washington and has had to go elsewhere for aid in his plundering campaign of public property. The city of Minneapolis is to be congratulated that my predecessors, Messrs. Washburn, Fletcher, and Nye, never permitted themselves to be used for such an unholy purpose.

The substitute for the Shields bill offered by the House is made up from a great number of other bills, and is known as a composite bill, according to the gentleman from Georgia [Mr. ADAMSON]. No one can claim its authorship. Figuratively speaking, it is a legislative pick-up. That can not be said of the Shields bill, because it looks so much like Rome G. Brown that he could not deny its authorship, even if he would. This is no reflection upon Mr. Brown, who is an honest, able, and conscientious lawyer, and who always looks out for the best interests of his clients. If he were employed by the Government to draw a bill, instead of by the Water Power Trust, you can rest assured that he would present a measure that would fully protect the interests of the public.

The sooner the secret influences that are at work to shape this measure so as to give the control of the vast water-power

resources of the country to the hydroelectric people free from efficient regulation come into the open the better for both sides to this controversy. The sooner you discover your enemy the quicker you can dispose of him.

If these propositions did not have such monopolistic possibilities, we would meet with but little opposition in enacting a law that would meet the situation.

In the early winter the water-power interests organized an association known as the Water Power Development Association, with headquarters at Washington and branch offices in other cities. Since the organization of this association its secretary has been Marcus A. Beeman, who was formerly secretary to the Cleveland and Buffalo Chambers of Commerce, and secretary to the New Jersey State Chamber of Commerce, and its principle publicity man is Mr. Walker, formerly principle publicity man in Secretary Lane's office.

One of the methods adopted by this association to deceive the public was to send free plate matter to country publishers and have them run in the daily papers as an expression of their own opinion, subsequently collecting these editorials and mailing them regularly to Members of Congress without any explanation, thus conveying the impression that the article presented the local opinion of the community in which the matter circulated.

The Democrat, of Mineral Point, Wis., of June 8, 1916, has this to say in reference to this boiler-plate method of publicity:

A TRICK THAT IS VAIN.

If the men who are behind the scheme to pervert the minds of the people on the water-power question by sending free plate matter to country publishers had been present at the meeting of the newspaper men in the senate chamber at Madison last Friday night, they would doubtless have come to the conclusion that tricks that are vain will hardly get them very far in the court of public opinion. When the matter was put up to Courtland Smith, president of the American Press Association, he confessed that in his opinion it was "rotten business," and the unanimous opinion of the gathering was that the publisher who would accept the plates and publish them, except as paid advertisements, plainly marked as such, would do himself and his profession dishonor.

The Daily Herald, of Quincy, Ill., of March 29, 1916, carries the following article, written by Gilson Gardner, which sets forth some of the activities that have been going on in Washington by the Water Power Development Association as well as the water-power lobby. For the benefit of the Members of the House, I will insert in the RECORD this article, as well as a list of names of some of the men who have been in Washington contributing to water-power legislation:

WATER BILL POWER GRAB—SHIELDS BILL HAS BIG LOBBY AT WASHINGTON—SHIELDS BILL IS BITTERLY FOUGHT BY CONSERVATIONISTS—SAID BY OPPONENTS TO BE WORST FORM OF GRAFT.

[By Gilson Gardner.]

WASHINGTON, D. C., *February 29.*

Since February 7 the entire attention of the United States Senate has been devoted to a bill drafted by water-power grabbers and supported by a powerful water-power lobby—the Shields bill. The debate, although it has gone on for more than 20 days, is only just beginning.

The Shields bill is vicious in the extreme. The purpose of those behind it is to secure control of the remaining water-power sites on navigable streams, without compensation or Government supervision, nor any adequate provision for regulation of rates to consumers nor the recovery of the site at the end of the proposed 50-year franchise period.

The bill is supported in the Senate by its author, JOHN K. SHIELDS, of Tennessee; OSCAR W. UNDERWOOD and JOHN H. BANKHEAD, of Alabama; JOHN F. SHAFROTH, of Colorado; REED SMOOT, of Utah; KNUTE NELSON, of Minnesota; and WESLEY L. JONES, of Washington. It is being bitterly fought by Senators LA FOLLETTE and HUSTING, of Wisconsin; NORRIS and HITCHCOCK, of Nebraska; KENYON, of Iowa; LANE, of Oregon; POINDEXTER, of Washington; and WALSH, of Montana.

HAS BIG LOBBY.

In the Senate galleries a large number of lobbyists may be observed daily watching its progress and sending notes to Senators on the floor. Among those observed in the gallery and about the offices of Senators UNDERWOOD, SHIELDS, and JONES are Henry L. Peirce, of the General Electric Co.; Hugh S. Cooper, for Stone & Webster; M. O. Leighton, of the Utah Securities Co.; Frank H. Short, of the Pacific Gas & Electric Co.; ex-Congressman Dennis O. Flynn, of the Electric Bonding interests; J. W. Worthington, of Alabama Power & Light; ex-Congressman George Washington Taylor, representing the Muscle Shoals (Ala.) Co.

The latest move in the fight has been the organization of what is called the Water Power Development Association. This is a publicity bureau, and starts its career by hiring the principal publicity man from Secretary Lane's office, a former newspaper correspondent. This new lobby concern takes the public into its confidence by admitting frankly that it has a special interest to serve in seeking the passage of the Shields bill, since it is made up of certain named builders of water wheels and electrical appliances and supplies of all kinds. Among them are the I. P. Morris Co., of Philadelphia; the Allis-Chalmers Manufacturing Co., of Milwaukee; Wellman-Seaver-Morgan Co., of Cleveland; R. Thomas & Sons Co., of East Liverpool, Ohio; Westinghouse Electric & Manufacturing Co., of Pittsburgh.

WORKING FOR BILL.

Mr. Marcus A. Beeman, secretary of the new association, has been assistant secretary of the Cleveland and Buffalo Chambers of Commerce and secretary of the New Jersey State Chamber of Commerce.

The water-power subject is displacing all matters in the Senate, and the friends of the Shields bill are getting impatient at the delay. Various efforts have been made to put a check on the debate, but those opposing the measure in the public interest are determined to continue their opposition if no business is done between now and fall.

The following is a list of names of some of the men who have been in Washington urging legislation of the kind outlined in the Shields' bill:

Josiah T. Newcomb—Stone & Webster.
L. L. Nunn—Utah Power Co.
H. J. Pierce, of Seattle, Wash.
John H. Finney—Aluminum Co. of America.
Ex-Congressman D. J. Flynn, of Oklahoma.
Calvert Townley—Westinghouse interests.
Henry L. Cooper—Du Pont interests.
Frank M. Washburn—American Cyanamide Co.
Ex-Congressman C. B. Landis—Du Pont interests.
Rome G. Brown, chief lecturer, draftsman, and attorney for the water-power interests.
S. Z. Mitchell—General Electric Cos.

The CHAIRMAN. The time of the gentleman from Minnesota has expired. The gentleman from Tennessee [Mr. SIMS] is recognized for five minutes.

Mr. SIMS. I ask unanimous consent that my time be extended to 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SIMS. Mr. Chairman, a bill very similar to the one that is now about to pass the House was considered in the Sixty-third Congress by the Committee on Interstate and Foreign Commerce, reported to the House, amended in various ways and passed by the House, and sent to the Senate, but was not acted on by that body. The Committee on Interstate and Foreign Commerce of the House has been considering this subject very closely and seriously and conscientiously for a number of years. When the present Congress convened, or very shortly thereafter—I do not remember the exact day—our distinguished chairman, Hon. W. C. ADAMSON, introduced a bill, and the Committee on Interstate and Foreign Commerce gave it conscientious, continuous, very earnest, and long consideration, and was doing its very best to get that bill reported to the House and passed as soon as possible, without any reference to any bill then pending in the Senate. In the Senate, on the legislative day of March 3, being calendar day of March 8, 1916, the Senate bill passed. It came to the House and was referred to the Committee on Interstate and Foreign Commerce on March 10. The House committee had practically finished consideration of the bill introduced by the gentleman from Georgia [Mr. ADAMSON], and on the 21st of March the committee directed a favorable report on the Adamson bill as a substitute for the said Senate bill. Some gentlemen seem to have reached the conclusion that because the Senate bill reached the House on March 10 and was on that day referred to the Committee on Interstate and Foreign Commerce, and was reported out by substitute on March 21, that the 11 days between those two dates was all the time that the House committee gave to the bill which it reported as a substitute. That is a very great mistake, because the House committee had been considering a bill almost the exact substance of which had been reported in a former Congress for three months of this session.

Mr. Chairman, I believe I am stating the facts when I say that, as far as it is possible to know anything of the matter from the expressions of the members of the committee, there was an honest, sincere, and conscientious purpose to try to report to this House and pass a bill which would be in the interest of the general public and not intended to conserve any existing monopoly, and not intended to have in it legislation under which a water-power monopoly might hereafter be formed.

Now, we may have made a mistake. Possibly the committee not possessing all wisdom could not foresee what some court in the future might hold. But our intention was to protect the public interest and at the same time report a bill which would not prevent water-power development in this country.

After the Senate bill had been reported I noticed quite a lot of criticism in the newspapers, similar to that which has just been read from the desk, and wanting to know what the highest authority on conservation had to say as to this substitute, on the 25th of May I wrote Hon. Gifford Pinchot asking him if he had considered and studied the House substitute for the Senate bill, and that I would be glad to have any suggestions from him as to any amendment that he though might be desirable to the House substitute for the Senate bill.

I was anxious to have his advice because, as I understand, he is chairman of the conservation association and in that way representing those who had been very anxious to protect the public from any monopolistic control of these water powers. I have not a copy of my letter to Mr. Pinchot, if I had I would

read it as part of my remarks. On May 29 I received the following letter from Mr. Pinchot:

MILFORD, PIKE COUNTY, PA., *May 29, 1916.*

Hon. THETUS W. SIMS,
United States House of Representatives,
Washington, D. C.

MY DEAR MR. SIMS: Yours of May 25 has just been forwarded to me. Since I do not expect to be in Washington for some time, I have asked Mr. Harry Slattery, secretary of the Conservation Association, to submit to you such amendments as we think necessary to make the House substitute for the Shields bill acceptable to the conservationists. I am only sorry I can not get the opportunity to go over the matter with you in person.

With my best thanks for writing as you did, believe me,

Sincerely, yours,

GIFFORD PINCHOT.

Now, I have waited patiently and expectantly from the day I got that letter from Mr. Pinchot for Mr. Slattery's suggested amendments that the conservation association thought were necessary to the House substitute, or the original Adamson bill, and to this hour I have received no suggestion from Mr. Slattery or anyone else. I know that Mr. Pinchot is sincere; his letter shows it on its face, and I know that I was, and therefore I feel that I am warranted in saying that the bill as reported was so near what the conservation association would have it that they have suggested no amendments from the 25th of May to this day, the 13th day of July. I think I have a right to assume that the bill as reported was so near what the conservationists desire, as represented by the organization of which Mr. Pinchot is president, that they thought it was unnecessary to suggest any amendments. I must suppose that so important a measure as this is would not have been overlooked by Mr. Slattery.

Mr. KENT. Will the gentleman yield?

Mr. SIMS. Certainly.

Mr. KENT. I can tell the gentleman from Tennessee two things the conservationists objected to in the bill, namely, lack of certain compensation clause and a more definite system of termination. These things have been embodied now by amendment in the present bill. If they have any more objections, I do not know them.

Mr. SIMS. I was only drawing conclusions which, I think, are fully warranted, which are that the bill as reported was not seriously objectionable to the conservationists, and now as it has been amended by the gentleman from California [Mr. KENT], who has just made the statement, which shows that the bill as amended is wholly acceptable to the conservationists.

Mr. ESCH. Will the gentleman from Tennessee permit me to ask in his time a question of the gentleman from California?

Mr. SIMS. Yes.

Mr. ESCH. Did not the amendment which the gentleman from California has just offered to the House have the concurrence of the ex-Secretary of the Interior, Mr. Fisher, one of the most strenuous conservationists?

Mr. KENT. He had one criticism to make of it. He found it difficult to define where the transmission line feature should cease. When I used the words "point of application" he said that that was difficult to construe, but he could not for the life of him find a better phrase.

And now with the permission of the gentleman from Tennessee I want to say that I did not mean to say that this was entirely satisfactory to the conservationists, but I have been close to Mr. Slattery and Mr. Pinchot, and I do not know of anything else that they want done to the bill.

Mr. SIMS. I was assuming, Mr. Chairman, that the bill was satisfactory. I have shown that the report was not gotten up hastily and dumped into the House, but was a matter of serious, faithful, and long consideration.

I do not want to be a party to a bill that carries a "joker" of any sort, if I know it. Speaking for myself and as a Member of the House and as a member of the committee, I was willing to amend section 10 by striking out the words "after the expiration of 50 years," so that it would read that at any time the United States may terminate the right herein granted upon giving two years' notice and by complying with the other provisions of section 10.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. SIMS. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. SIMS. As I was about to say, that without waiting for the expiration of the 50 years I was willing to give the Government that power, for the reason that I sincerely and honestly believed that no capitalist will hesitate to invest his money in such enterprises when he knows that the United States, whenever it recaptures the property, will return to the investor every cent of his money. But there were other members of the committee, a majority, who did not take that view of it, and were afraid that such an amendment might prevent any further development of water powers by private capital.

Such an amendment would make it impossible to build up a water-power monopoly. But the House has retained the right to pass upon every application to build a dam for water-power development. Under this bill they will still have to come to Congress for permission, and with 435 vigilant members of this body, some Member will be certain to see any "joker" that may be proposed in any bill hereafter introduced and who can and will place any limitation upon it or restriction they see fit. Therefore I think under this bill, even without the amendments put on by the Committee of the Whole, it offers a perfectly sound and workable plan for safe water-power development, and the great fundamental controlling thing is to keep the whole question of water-power control within the grip of the 435 Members of this body, who can place upon the bill authorizing the building of a water-power dam any limitation it may see fit to prevent its going into the hands of any existing monopoly or one to be hereafter created. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired. All time has expired.

Mr. REAVIS. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. REAVIS. Mr. Chairman, I am not entirely satisfied with section 10 of this bill, even as it is amended by the gentleman from California [Mr. KENT]. Fifty years is a very long time; too long, as I view it, for these leases to run. If you will trace human ingenuity as applied to water power through the past 50 years, you will very likely go back to a gristmill to which your father and mine took their sacks of wheat to receive in exchange a specified amount of flour. The water power of a half century ago as compared with the water power of to-day was inconsequential in value, because the value of water power, as the value of everything else, is dependent entirely upon its utilization. Within the past 50 years—yes, within the past 25 years—human ingenuity has created inventions that make water power to-day vastly more valuable than it was formerly, and even the wildest imagination of this hour will not attempt to conceive the usages of water power 50 years hence. If you will go to Niagara Falls you will see the tremendous power of that awful cataract harnessed and carried along tiny wires for hundreds of miles beyond the brink of the gorge. It is no longer necessary to go to the scene of the power, for the power is now brought to you. In the city of Niagara Falls the houses and business places are lighted with that power, their manufactories derive their power from hydroelectric power generated by the Falls. If you will stand in the city of Detroit in the evening and look just across the river into the city of Windsor, Canada, you will see the factories of that place lighted by the power generated at Niagara Falls, more than 200 miles away. It is interesting to note that Canada has retained that tremendous asset for its own benefit, while we have granted our rights to private enterprise. The power that is applied to Windsor, 200 miles and more from the brink of the gorge, is sold, so I am informed, to that community for just one-third of what the patrons in the United States pay for it on the very brink of the cataract itself.

No one can look into the future and tell what the value of these water powers will be 50 years hence. In this bill as amended by the gentleman from California [Mr. KENT] there is a provision that the United States must give six months' notice before these leases can be terminated and the property taken over and they may be taken over then only upon the United States making adequate compensation to the lessee for the value of his property. The payment is to precede the taking. That will lead to litigation concerning the payment that will tie up these leases for an interminable length of time so that the lessee will be in possession for a term much longer than 50 years. I would like to see incorporated in this bill a provision that at the end of the specified period nominated in the lease the United States may take this property over and make adequate compensation, to be thereafter ascertained. In that way there will be no holding on to the power for a term in excess of the lease. There is not a man on the floor of this House in the heat of this afternoon who will be on the scene of action when these leases expire. There is not a single lessee who will take a lease under the provisions of this bill who in human probability will live until the expiration of his lease. It is a responsibility to legislate for the present, but it is a tremendous responsibility to foreclose the future for 50 years and more. You and I are legislating to-day for the second

generation, and we are legislating in a way that will permit the lessee under the provisions of this bill not only to hold the property for 50 years, but, by adding interminable litigation as to the value of the property to be turned over to the United States, will doubtless retain the property and this tremendous asset for a period long beyond the life of the lease. [Applause.]

Mr. MANN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I did not originally intend to say anything about section 10 and the recovery clause, but I have said privately and am perfectly willing to say it publicly that I do not regard the recovery clause in this bill as of any very great importance. The important section of the bill—in reference to that is the power to amend the bill so as to make the amendment apply to the existing water powers without any liability on the part of the Government for changing the arrangements. No man is wise enough to-day to tell the terms upon which the Government should recover the power 50 years hence. I can remember when the States or the Federal Government had no control over railroad rates, when such a thing as control by a municipality over public utility company rates was not dreamed of; and with the development of water power for years to come there will undoubtedly come with it a distinct line of policy which States will use for the control of that power. We have not reached the wisdom yet where we can settle that question, but it will be settled in the future.

I rose for the purpose of saying a word concerning the Committee on Interstate and Foreign Commerce and its distinguished chairman. I have not agreed in many essential features with the gentleman from Georgia [Mr. ADAMSON] and other members of the Committee on Interstate and Foreign Commerce on the water-power question. I did not agree with the majority of that committee, when I had the honor of being its chairman, but, Mr. Chairman, the gentleman from Georgia, able man, conscientious man, has given great study to this subject for many years.

The Committee on Interstate and Foreign Commerce, in my opinion, is the most important legislative committee of this House. It does more work dealing with great questions than any other committee, and its membership has never been recreant to the will of the House. Mr. Chairman, while the gentleman from Georgia [Mr. ADAMSON] may not agree with the policy adopted by the House in some particulars, it is not necessary to say that he will never betray the House. [Applause.] I commend him and thank him and his committee for the splendid work they have done on this bill as well as upon other bills. [Applause.]

Mr. COOPER of Wisconsin. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Mr. Chairman, I desire only to direct attention to the great importance of Members being here when the conference report shall come up for consideration. In this connection I ask especial attention to the fact that the pending bill came from the Senate to the House and was referred to the Committee on Interstate and Foreign Commerce on the 10th of March, which committee reported it out by substitute on the 21st of March, but that the House has not been called upon to consider it until in this intense heat in the middle of July, at a time when Members are all anxious to have the session end that they may go home. And yet while we have been considering it we have been told two or three times during the discussion that after all the bill which is to become the law is to be written in conference.

Months have elapsed during any one of which the House could have taken up the measure and given it weeks of thorough consideration such as its vast importance demands.

But consideration is delayed until the middle of July, toward the end of a long session of Congress, with the mercury at 95 in the shade and with Members wishing to go to their homes, and then, I repeat, the House is informed that after all the real bill is to be written in conference. I presume that, as is usual in such circumstances, when the conference report is brought in gentlemen will say, "Oh, well, we must adopt it and adjourn." And yet it is in many respects the most important bill that has been before the House of Representatives in 25 years. As the gentleman from Nebraska [Mr. REAVIS] remarked, a few years ago, a man who wanted work done at a mill had to go to the mill. All the power was at the dam site. But to-day the power is efficient 200 miles in every direction from the dam site, and that power can be connected in every direction with electric power generated at other dams. The possibilities in such combinations are tremendous. What will these be 25 years from now? And what will these be when 50 years, the term of the privileges granted under this bill, shall have passed away? No man can foresee. The methods of production, of insulation, and of distribution are constantly being improved. When I was at Niagara Falls a few years ago a stockholder in the American plant, replying to my question, said, "Why, machinery that six years ago was all right is obsolete now. Nobody can tell what combinations can be made 25 years hence." Said he, "I am a hard-headed business man; my imagination does not get the better of me, I think, and yet I believe that in 25 years from now a large percentage of all the manufacturing in the United States will be done by electrical power."

The coming conference report will be a document of tremendous importance.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ADAMSON. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ADAMSON. Mr. Chairman, I wish to thank the gentleman from Illinois [Mr. MANN] for his generous remarks. He has always been appreciative, generous as able, and everybody knows his ability and knows of his distinguished service on our committee. As to the remarks of the gentleman from Wisconsin [Mr. COOPER], the latter part of his statement is correct. I have repeatedly stated to this House during the past 10 years that this was the most important matter that has been before Congress, and I do not think the gentleman from Wisconsin intends for the country to understand the first part of his statement as he made it. Everybody in this House knows, and the gentleman himself will concede it on reflection, that it has been impossible to get this bill up for consideration in this House earlier at this session, although we have striven earnestly to do so. I put it on the Unanimous Consent Calendar as soon as it was reported. It remained there and was passed over several times without prejudice, until finally objection was made and it went off, but it remained on that calendar for several months. The Committee on Rules was consulted time and again, appeal after appeal was made to try to get consideration for it, but gentlemen here know what the state of public business has been during this session, with other matters pressing for consideration, and it has been postponed until this is the first opportunity we have ever had to get consideration for it. Its importance was recognized by me, for my speech went in the RECORD on the first day of the session. The committee went to work, and although the Senate bill remained in the committee but 11 days, the committee had prepared a bill ready to report when it came. We simply whipped it into shape and put it in as a substitute for the Senate bill. I do not think the gentleman ought to intimate that there has been any purpose to delay consideration.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. ADAMSON. Certainly.

Mr. COOPER of Wisconsin. I did not impute any wrongful motive to the gentleman, or to any other Member of the House, but simply stated the fact that the bill has been here since March, while things of much less importance have been considered for days and days, when the House was simply eating up time, as everybody must know. And it is difficult to understand, if, as the gentleman says, this bill is the most important thing in the way of legislation proposed, as he says in 10 years—and I say in a generation—why it could not get before the House.

Mr. ADAMSON. Mr. Chairman, no effort has been made to curtail anybody's opportunity in debate; and I wish time, at least, to say this, without any reflection on anybody—and I hope the gentleman from Wisconsin will not so construe it, as it is not so intended—that whenever a bill has been reported and is on the calendar of this House five months I do not know any law to prevent any Member from studying that subject. On the other hand, it appears to me to be the duty of Members, when the most important bill for 25 years is on the calendar and persistent effort is made to get it up, to look into the subject and be prepared to discuss it when it does come up. I have made somewhat the same statement when men have said we have hurried about the consideration of some other bill. Mr. Chairman, I will not move that the committee rise, because I think the gentleman from Illinois [Mr. FOSTER] wishes to speak.

Mr. FOSTER. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for three minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FOSTER. Mr. Chairman, the question of water power upon the public domain and the navigable streams, as Members who have been here for several years know, has been a very live question in each Congress. There have been divergent views upon this question here as well as outside of Congress as to what the franchise ought to contain and what requirements ought to be made, and the conditions under which they may be permitted to operate. As has been stated here before, I think that one of the great things to have in this bill is a provision that permits regulation of the water power so that the people can not be charged exorbitant prices. Another is that there should be a charge upon every permit that is given to operate. Another is that the franchises should have a definite ending. As has been stated here by the gentleman from Kentucky [Mr. SHERLEY], who has taken a prominent part in this legislation and has rendered a valuable service to the whole country in this matter, and has offered the suggestion that meets the views of all of us who believe there should be proper regulation, there should also be no question as to the time when the permit should terminate. Fifty years is a long time, and the developments that are being made now in electricity are such that no man can tell what 50 years may bring about.

I remember a few years ago these water-power bills were upon the Unanimous Consent Calendar, and up to that time what bills had gone through had been passed by unanimous consent.

There were only a few of them up to that time, but there appeared, as I remember, at one session of Congress some 16 or 17 of them upon the calendar, but none of them has gone through from that time to this. And I think the temper of this House and the temper of the country is such that no legislation will ever get through this House, whether it is in the form of a conference report or a bill, that does not properly provide for regulation and a definite termination of the franchise. I do not know that this bill will come out of conference during this session. I doubt whether it does. I believe the gentleman from Georgia, though his views are not in accord with mine on many points of this bill, to be an honest man, and when he assures this House that he will not bring in a report that does not agree with the views of Members without giving them a chance to vote on it, I have confidence that he will do exactly what he says in the matter.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOSTER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GILLETT. Mr. Chairman, it is perfectly obvious that this bill is passing the House, not with any expectation that it will become a law in this form, but in order that there may be a conference between the House and Senate upon it, and that then a satisfactory compromise may be agreed upon. My district is deeply interested in its fate. We are not insistent upon any particular form. Our vital interest is not in the economic and industrial results, although they may be prodigious for us. But as an incident to the construction of a great dam, to supply power to a region famous for its diversified industries, there will be opened to navigation a long stretch of the Connecticut River, which we hope will bring a new adjustment of freight rates to 250,000 people. For nearly 20 years I have been working zealously toward that end. Several times it has seemed that we were sure to win and then one of those unexpected obstacles, which are so common here, has arisen and dashed our hopes. I trust that this bill will at last become a law and in such form that capital will not be afraid to take advantage of it. In the past capital in Massachusetts has stood ready to organize under any fair bill and to construct a dam which would furnish much-needed power to the industries of the district, and which would also provide locks so that boats could come up from the Sound.

I trust that this project, which now appears so favorable, will not again be thwarted and that this time at last the present unendurable conditions may be remedied.

Mr. ADAMSON. Mr. Chairman, I move the committee do now rise and report the bill as amended to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee had had under consideration S. 3331, an act to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce, and had directed him to report the same to the House with certain amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. ADAMSON. Under the rule under which we are operating, the previous question is automatically ordered, and under the agreement of yesterday the vote goes over until to-morrow.

Mr. MANN. Only the final vote, I think.

Mr. ADAMSON. The final vote, but the rule automatically orders the previous question.

The SPEAKER. Is a separate vote demanded on any amendment? [After a pause.] If not, the Chair will put them in gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The final vote on this bill goes over until to-morrow morning.

Mr. RAKER. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from California [Mr. RAKER] rise?

Mr. RAKER. I rise for the purpose of asking unanimous consent that the bill H. R. 15096, after the reading of the Journal and the disposition of other business on the Speaker's table——

Mr. MANN. Mr. Speaker, I ask for regular order.

The SPEAKER. The regular order is to recognize the gentleman from Missouri [Mr. RUCKER].

Mr. ADAMSON. Will the gentleman from Illinois withhold that until I can make a statement for a minute?

Mr. RAKER. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. RAKER. Am I not permitted to put my unanimous-consent request?

The SPEAKER. The House made a special order the other day that as soon as we got through with this bill, which we have just finished, the corrupt-practices bill should be privileged.

Mr. RAKER. I do not want to take its place.

The SPEAKER. The gentleman from Illinois [Mr. MANN] demands the regular order.

Mr. ADAMSON. He reserves it at my request, as I understand, for a minute.

The SPEAKER. Does the gentleman from Illinois [Mr. MANN] adhere to his point or not?

Mr. MANN. I demand the regular order.

CAMPAIGN CONTRIBUTIONS AND EXPENDITURES.

Mr. RUCKER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15842.

Mr. ADAMSON. Will the gentleman withhold that a minute for me to make a statement to the House?

Mr. RUCKER. I will, if I may do so.

Mr. ADAMSON. I call the attention of the gentleman from Illinois [Mr. MANN] to what is known as the bill-of-lading bill that there is a general demand for all over the country; and what I wanted to ask was it be given a privileged status.

Mr. MANN. Reserving the right to object, it is not fair to the gentleman to put the burden upon me to object to bills of this kind, which I am in favor of, when they know it is not the intention to consider them at this time.

Mr. ADAMSON. I do not want to do anything unjust, and I will withdraw the request.

Mr. RUCKER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15842, and pending that motion it may be desirable to see if we can agree upon time for general debate. What time would the gentleman from Michigan [Mr. MAPES] like to have?

Mr. MAPES. I think we can get along with one hour on this side.

Mr. RUCKER. I will say frankly that I have had no requests for time on this side, and I am quite sure will not use an hour, but I ask unanimous consent that general debate continue for two hours, one-half to be controlled by the gentleman from Michigan [Mr. MAPES] and one-half by myself.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I have no objection to limiting the general debate. We are going to have a meeting of the House to-morrow, necessarily. There is not a very large membership here to-day. Does the gentleman expect to get very far with the bill under the five-minute rule to-day?

Mr. RUCKER. I will say to the gentleman, Mr. Speaker, it is the hope that we finish it to-day.

Mr. MANN. There is no chance to do it. It ought not to be finished to-day in the absence of so many Members. I think it would be wise to let the five-minute end of the debate go over until to-morrow.

Mr. RUCKER. And not read the bill under the five-minute rule to-day at all?

Mr. MANN. No; finish the general debate only.

Mr. RUCKER. I want to be entirely acquiescent in every suggestion the gentleman makes.

Mr. MANN. I think we can finish the bill to-morrow, and that is all we will do anyway to-morrow.

Mr. BURNETT. It will only come in after the vote on the other bill, will it not?

Mr. MANN. Certainly.

Mr. RUCKER. I will say to the gentleman that we will have no trouble about that.

Mr. MANN. I am willing to meet at 11 o'clock to-morrow, if it is necessary.

Mr. SMITH of Minnesota. Mr. Speaker, will the gentleman withhold his motion?

Mr. RUCKER. Yes.

Mr. SMITH of Minnesota. I ask unanimous consent to extend in the RECORD the remarks I made this morning on the dam bill.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

The SPEAKER. What was the request of the gentleman from Missouri?

Mr. RUCKER. Mr. Speaker, the request was that the debate be limited to two hours, one-half to be controlled by the gentleman from Michigan [Mr. MAPES] and one-half by myself.

The SPEAKER. The gentleman from Missouri [Mr. RUCKER] asks unanimous consent that the debate be limited to two hours, one half to be controlled by the gentleman from Michigan [Mr. MAPES] and the other half by himself. Is there objection?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Missouri that the House resolve itself into Committee of the Whole House on the state of the Union.

The motion was agreed to.

The SPEAKER. The gentleman from Missouri [Mr. ALEXANDER] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15842, the campaign publicity bill, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes.

Mr. RUCKER. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. RUCKER. Mr. Chairman, I am going to consume but a few minutes in presenting this bill to the committee.

Before I address myself to the bill I want to refer briefly to a little pleasantry that occurred here on the floor of the House a few minutes ago. The distinguished gentleman from Illinois [Mr. MANN], having once been the distinguished chairman of the Committee on Interstate and Foreign Commerce, with still some affection for that committee, paid the committee a great compliment, which the chairman of the committee, my distinguished friend from Georgia [Mr. ADAMSON], admits to be merited. The criticism I have to make is that the gentleman from Illinois, who generally knows everything, knows so little about the personnel of some of the committees of the House, because when it comes to real earnest, hard working, patriotic, active, genial, affable, and handsome gentlemen, both Democrats and Republicans, I believe the Committee on Election of President, Vice President, and Members of Congress will take the prize. [Laughter and applause.]

It has been my good fortune to preside over that committee, and I want to say now that whatever of success has attended the results of my efforts has been very largely contributed to by the membership of the committee; I mean all the members of the committee. From the time we began the consideration of this bill, Democratic members and Republican members applied themselves to it studiously and patriotically, and we finally evolved a measure which we believe is the best bill on publicity every presented to Congress, and we present it with a unanimous report, without a dissenting voice on either side of the committee.

There is absolutely no partisanship in it. Each and every member, feeling the responsibility of his position, has striven to present a bill which would be acceptable first to the Congress and approved by the people of the United States, and I believe we have succeeded.

Let me say generally there is not a great difference between the bill now pending and the bill which passed this House during the second session of the Sixty-third Congress. Members of the committee who are present now will recall that at that time we had a more or less spirited contest over several provisions written into the bill which was then being considered, and the House in its wisdom inserted a good many amendments, striking out some language and inserting other language. This committee, which I have already told you in good faith is the best committee in the House, has proven its worth by showing its submission to the will of the House. The bill now presented for your consideration is in strict harmony with the will of the House, as expressed in the various votes taken while the measure was being considered in the other Congress.

It is true there are some changes in it. There are some changes by transposition and consolidation and division, changes in the position of certain sections in order to make the bill more harmonious and perfect. There are some changes which simply involve the incorporating of two sections into one or separating one section into two.

There is one change that I want particularly to call to your attention, which is an innovation or an enlargement of the scope of the bills of this character heretofore considered by Congress. Until this bill was reported I believe no bill was ever reported which sought to require publicity of the amount of expenditures in campaigns applying to the great offices of President and Vice President of the United States. This bill does that. This bill requires all candidates for the Presidency and Vice Presidency to make and publish statements, both before and after the nomination and before and after election, just as it requires candidates for the Senate and House to make reports, except that the time for filing those reports is somewhat different.

In fixing the amount which a candidate for President might legitimately expend under the provisions of this bill, the committee acted without precedent, and hence upon its own judgment. We wrote into the bill that a candidate for the Presidency of the United States could expend, if he saw fit to do so, not exceeding $50,000 for nomination and election, and a candidate for Vice President $25,000.

It will occur to Members here present, no doubt, at first blush, that this is a large sum; but when we consider the great questions which may confront the American people and the necessity of publicity, or of a campaign of education, and analyze it, it seems to me the amount is not excessive. Fifty thousand dollars would be on the average a fraction over $1,000 per State for educational purposes, and if candidates for the Presidency have to pay the same rates for expressing their views that some of the rest of us have to expend, they would not go very far even at that rate—a thousand dollars for a State. If there is any criticism to be made, it may be that the amount is too small. I propose, with the consent and patience of the House, to call attention very briefly to various sections of the bill.

Mr. CRISP. Mr. Chairman, will my friend yield?

Mr. RUCKER. I yield to the gentleman.

Mr. CRISP. Does the $50,000 mean that that is the only amount that can be expended by the candidate, or the committee outside of the amount that the candidate himself can expend?

Mr. RUCKER. I will be glad to answer the gentleman's question. The $50,000 is the amount that the candidate himself may expend. It may come from his own purse, or it may consist, in part, of contributions from friends in aid of his candidacy. But the $50,000 is all that he can expend in carrying on his campaign, either from his own purse or from money contributed to him. That does not affect the activities of committees. That is another proposition.

Mr. CRISP. That is the proposition I wanted to refer to, whether it confined the advocacy of his candidacy to $50,000.

Mr. RUCKER. No.

Mr. WALSH. Does not the language read that he shall not expend or cause to be expended over $50,000?

Mr. RUCKER. I think you are right.

Mr. WALSH. Would not that limit the amount that a committee could expend?

Mr. RUCKER. If the gentleman will read the section governing expenditures by the committee, I think he will reach a different conclusion. The committee is not spending it in the sense that this law seeks to regulate and control expenditure by the candidate. The committee is regulated and governed by a section of the bill which is independent of the section we are now discussing.

Mr. WALSH. Will the gentleman state how much the committee can expend?

Mr. RUCKER. I am glad the gentleman asked that question. In this bill there is no limitation on the amount that the committee may expend. There is a limitation upon the method of expenditure or the source of contribution. The only limitations, however, are those which spring from publicity. Right or wrong, I have a pronounced view on this question, and I realize that I run counter to the judgment of some very strong men in expressing the views I am going to express. Throughout this bill the effort has been rather to invite or to induce every man who wants to make contributions toward political campaigns to make those contributions to a committee, and then the committee, by the provisions of this bill, is required to make public the name of the person from whom the contribution came and for what purpose it was used. We fix no limitation on the amount the committee can expend. They can expend whatever they see fit to expend, along legitimate lines, of course.

Mr. GREEN of Iowa. If I correctly understand the bill, a candidate for President might expend in one State the entire amount to which he is limited, might he not?

Mr. RUCKER. I think he could do so if he wanted to, but it is not likely a candidate for President would do that.

Mr. HASTINGS. Will the gentleman yield further?

Mr. RUCKER. I will yield.

Mr. HASTINGS. Did the committee consider the advisability of limiting the amount which the committee might expend for the election of President and Vice President? In other words, was that question up before the committee, and did the committee consider it?

Mr. RUCKER. I want to be entirely frank with the gentleman. The question was at different times discussed briefly. It was not pending in the form of an amendment before the committee.

Mr. HASTINGS. Then nobody offered an amendment before the committee.

Mr. RUCKER. No amendment of that sort was offered that I recall.

Mr. HASTINGS. And it was only informally considered.

Mr. RUCKER. Only informally considered. No amendment of that sort considered.

Mr. HASTINGS. I want to take occasion now to say, in the gentleman's time, that I would favor that sort of an amendment and vote for it, limiting the amount that a committee might expend in the election of a President and Vice President.

Mr. RUCKER. One gentleman took that view, and I know there are gentlemen who uphold it, but I can not but think they look at the question from the wrong angle. I do not believe there should be any limitation whatever on any legitimate means to reach the judgment of American voters. Much of the money that is expended nowadays in campaigns, obviously is expended for educational purposes, literature, speeches; and I believe the more literature we have and the more speeches we send out, the more men express their views on great national and international questions, the better able the American voter will be to intelligently express his views through the ballot box. I may be wrong about it, but I have that conviction.

Mr. HASTINGS. Will the gentleman yield further?

Mr. RUCKER. I will be glad to.

Mr. HASTINGS. The gentleman has seen statements made in elections heretofore that many millions of dollars were said to have been expended by the two committees in the election of President and Vice President. Does not the gentleman think those amounts are exorbitant and that there ought to be some limitation in some way?

Mr. RUCKER. Unquestionably; but I believe we present here an antidote for that sort of wrong. We present a preventive for it. I recall very well the campaign to which the gentleman refers. The gentleman will bear in mind that at that time there was no publicity law, and Democratic committees and Republican committees alike got all the money they could get from every source on earth, from concerns that were interested in legislation, and in appointments, and so forth, who gave tremendous sums, almost enough from one man, if current reports may be relied upon, to finance a national committee. But to-day what political party would stand sponsor for the expenditure by its committee of these stupendous sums, contributed by the special interests which contributed to that campaign? The very fact, published to the world, that they received these stupendous donations from special interests of the country would ruin, in the eyes of the American people, any party, regardless of who its candidate might be, in my judgment. I believe in all sincerity that when we can require and secure publicity of the conduct of men we almost guarantee rghteous and correct action by men. It is when men may do things unknown to their neighbors that they do wrong. Why, you can not go upon the streets and find a petty thief who will steal with human eyes gazing upon him. Publicity scares men who have tendencies toward evil and protects the public from contamination and degradation, and will protect the ballot box from pollution, I hope and believe.

Mr. THOMPSON. What arrangement do you make for publicity?

Mr. RUCKER. We make the best arrangement that I have been able to get the House to agree to. A long time ago I had in mind a thought which I believed was even better than we here present, but I believe we have here that which will in most cases secure genuine publicity. Now, I am not going to claim, and no man here would respect the soundness of my judgment if I should claim, that this law is perfect or that this bill proposes a perfect scheme. It is not perfect, and no mortal man has ever yet been able to devise a law on any subject that all men would or have obeyed. Every statute, from homicide to common assault, is violated. This statute may be violated, although I want to say that this bill deals with a class of men who are not criminal, and whose status in life is such, enjoying, as they do, the confidence of the people, that every impulse will lead and help them to comply with the provisions of this bill and not to violate them. The gentleman asks what provision we make for publicity. My reply is that, beginning with the President and Vice President, Senators, and Representatives, we require each one to solemnly swear that the statement of expenditures made by him is true, and that the statement contains every item of money received and expended by him or by anyone for him with his knowledge and consent, from any source, in aid and support of his candidacy for nomination or election. That ought to get at the true condition of affairs. We require that statement to be made before nomination and after nomination, and a like statement to be made before and after election. Then this bill seeks to amend existing law in a very material way along that line. As it stands to-day—and the Members on both sides of the House know what I say to be true—there has been somewhat of carelessness on the part of some gentlemen, due to the fact that nobody has seen fit for obvious reasons to try to enforce this law seriously.

Let me suggest that if I was seeking a nomination against the gentleman from Oklahoma, who has just asked me a question, and he should know that I had violated the law, if he knew I had not filed my statement, if he knew I had filed a false statement, if he had defeated me, public sentiment would say, "Oh, you have had victory enough; do not prosecute the man." If I should defeat him and he had the same knowledge, then public sentiment would say, "Oh, take your defeat like a man; don't you become an informer; let some one else do it." Yielding to considerations of that kind of sentiment nobody informs.

Now, we fix it differently. We provide that each candidate for the Senate and for the House in his initial statement shall give the name and the home address and the Federal judicial district in which his opponent resides.

Mr. COX. That is new, is it not?

Mr. RUCKER. It is. He must give all that in the initial statement. Then in the proper section this bill proposes that the the Clerk of the House shall, within 30 days after the statement ought to have been filed by one whom he knows, from information obtained from the returns on file, has failed or refused to comply with this law, report to the district attorney in the district in which the delinquent resides the fact that such candidate has not complied with the publicity laws of the United States. In that way through officials, without involving any candidate, whether successful or defeated, we make it the official duty of the Clerk to communicate directly to the prosecutor for the United States in the district in which the defaulting candidate resides. The bill makes it the duty of the district attorney to investigate and prosecute if the facts warrant it. That, I believe, gentlemen, is an important change in the existing law.

Mr. THOMPSON. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. THOMPSON. What about the national committee that collects money and spends it for the election of President of the United States—what kind of a report is that committee required to make?

Mr. RUCKER. Not only the national committee, but every other committee, whether composed of one or a number of men, which receives or expends money in a campaign, as an individual

or as a committee, is bound to make a statement similar to the one I have described for Senators and Members of Congress. They must show from whence every dollar received or disbursed came and for what purpose it was used. In every case where bills paid exceed $10 they must have a voucher showing what it was actually expended for. The books must be kept open to inspection, so that the truth of the statement may be verified.

Mr. COX. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. COX. What was the general purpose in only requiring items reported of expenditure in excess of $10? In my country on both sides it is the $1 and $2 bills of which the banks are drained about two days previous to the election that does the work out there.

Mr. RUCKER. Well, I never lived in Indiana and never participated in politics there, and perhaps I do not understand it. [Laughter.]

Mr. COX. If the gentleman will look at the geography of his own State, down on the border line he may find the same state of affairs.

Mr. RUCKER. The gentleman from Indiana may have information along those lines which I disclaim. [Laughter.]

Mr. STEENERSON. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. STEENERSON. You cut down in this bill the maximum amount that can be expended by a Member of Congress.

Mr. RUCKER. The gentleman is wrong about that; the House cut it down, and we obeyed the mandate of the House. In the last Congress the committee reported a bill providing, as the existing law does, $5,000, but the House by a very pronounced vote said that was too much.

Mr. STEENERSON. Does that interfere with the expenditure of the committee?

Mr. RUCKER. No.

Mr. STEENERSON. In addition to that the committee can participate and extend——

Mr. MANN. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. MANN. Does not the bill expressly forbid it; that is to say, a committee is organized in behalf of a candidate for Congress and the limitation applies not only to what the Member of Congress spends but to what the committee has spent?

Mr. RUCKER. Oh, unquestionably.

Mr. MANN. The gentleman from Missouri did not understand the question of the gentleman from Minnesota.

Mr. RUCKER. No. The bill in as strong language as we can put it provides that no candidate shall expend through himself, his agent, or anybody else, exceeding $2,500.

Mr. STEENERSON. Suppose there is a volunteer committee outside of his contribution that spends something in addition to the $2,500.

Mr. RUCKER. The candidate is chargeable with every dollar expended by anybody from any source with his knowledge and consent.

Mr. STEENERSON. Whether he furnishes the money or not?

Mr. RUCKER. Yes.

Mr. STEENERSON. Suppose the candidate himself expends $2,500; that is all the money that can be expended in his behalf?

Mr. RUCKER. If any more is expended with his knowledge or consent he is chargeable with it. At this time I am suffering some discomfiture because that is the law.

Mr. STEENERSON. I simply wanted to understand whether this limit of $2,500 is upon the total amoupt to be expended, whether furnished by the candidate or his friends.

Mr. RUCKER. That is what the bill says expressly, and I would say that, judging from the attitude of the gentleman from Illinois [Mr. MANN], I evidently misunderstood the gentleman a moment ago, because I had no intention of making any conflicting statements.

Mr. STEENERSON. The gentleman clearly did.

Mr. ANDERSON. Mr. Chairman, in many States primaries have already been held under the existing law, which permits an expenditure of $5,000. It is barely possible that some candidates have already exceeded the limit in this bill. What would happen in a case of that kind?

Mr. RUCKER. I had an idea that possibly this might catch somebody here, and I have studiously tried to draft an amendment which I propose to offer which I think will protect them. In other words, I will say to the gentleman that it would be unfair, the limit now being $5,000 and in many cases the campaigns for nomination having been concluded, with a perfect right to spend up to $5,000, all for nomination, if need be, to change it to $2,500 now.

Mr. GORDON. It would also be unconstitutional, would it not?

Mr. RUCKER. And thus deny the candidate the right to spend anything for the election, or make him a criminal if he did. Before the bill passes we will see if we can not agree upon an amendment which leaves the existing law, so far as the amount to be expended is concerned, in operation during this year.

Mr. WALSH. Mr. Chairman, I notice that in section 7 supplemental statements are required to be filed, itemized, detailed statements every six days. Will the gentleman state how the committee arrived at the time within which those detailed statements should be filed—how they came to fix upon it as every sixth day?

Mr. RUCKER. This refers to statements made by committees?

Mr. WALSH. Yes.

Mr. RUCKER. When the existing law was being enacted my recollection is that the gentleman from Indiana, Mr. Cullop, offered an amendment requiring these supplemental reports to be made every sixth day, and the House adopted it and the Senate agreed to it.

Mr. WALSH. And that is the only reason it is in the bill?

Mr. RUCKER. It is existing law, and to that extent existing law is reproduced in this bill.

Mr. WALSH. Do I understand that itemized detailed statements such as are required in this bill are now required by law?

Mr. RUCKER. Absolutely. Those supplemental statements do not have to contain a full statement of all of the transactions of the committee, but transactions that have occurred since the last statement was made.

Mr. WALSH. They have to contain what is called for in section 8 of the bill.

Mr. RUCKER. Yes; what has transpired since the former statement was made, because the section provides that publicity does not have to be given in any supplemental statement of any item of which publicity has already been given.

Mr. WHEELER. Mr. Chairman, candidates for Congress who have campaigns on now will have expended $2,500 up to the time this becomes a law. Under the bill he could not expend any more money then. That would be unfair, would it not, when up to this time he has been operating under a law which permits him to expend up to $5,000? He would be handicapped for the balance of the campaign.

Mr. RUCKER. I desire to read to the gentleman an amendment which has been prepared with the approval of the committee, although the committee as a committee has taken no formal action upon it. At the end of the section, regarding the statements and fixing the amount of the expenditure, I propose to offer an amendment, to read as follows:

Amend by inserting at the end of line 26, page 14, the following: "*Provided further*, That the amount which may be expended by candidates for Senator and Representative in securing nomination and election in the year 1916 shall be the same as now prescribed by law."

Mr. WHEELER. Then, if that is adopted, this limitation in the bill will not apply to this year?

Mr. RUCKER. No; and it ought not to.

Mr. EMERSON. Mr. Chairman, how much can a candidate expend now under the present law?

Mr. RUCKER. He can not expend more than $5,000 under the Federal law, and not that much if his State law fixes a lower limit.

Mr. EMERSON. Will the gentleman give us an idea what constitutes the expenses of a candidate?

Mr. RUCKER. I am in the best position in the world to give the gentleman that information, because I am now in the midst of a campaign, and I have been thinking very seriously about it.

Mr. EMERSON. To give the gentleman an idea of what I mean, of course he knows that candidates are approached to give funds to churches and clubs and for advertising this or that magazine and something else. Is that a part of the campaign expenses?

Mr. RUCKER. I think if any Member of Congress is willing to admit that he gave the Methodist Church or the Baptist Church—I do not know to which the gentleman belongs—$25 in order to get the Baptist or the Methodist vote, he ought to account for it; but I do not believe that any Member of Congress would ever offend the church or stultify himself by giving the church one dollar for the purpose of securing the votes of the membership of the church.

Mr. EMERSON. I do not think any Member would, either.

Mr. RUCKER. I am a Methodist myself, although that may not be generally known, and I desire to state that I received a letter a few days ago from a good Methodist brother in which he told me that his church was in arrears on a piano which had been purchased for the church, and he wrote: "You are needing votes right now, and you have a good deal of opposi-

tion in this particular locality, and the Methodists are strong, and a good liberal contribution toward paying for that piano would be the best campaign that you could make in this locality." I wrote him back that I never yet had gotten low enough to attempt to buy the Methodist Church, and I would not do it. And if I give them $25 or $10 or some other sum I shall not charge myself with it, because I shall not give it for campaign purposes. I would give it just as quickly if I did not expect a vote.

Mr. WALSH. I see here that the forms for the statement required by this act shall be furnished by the Clerk of the House of Representatives. Does that include the ledger or record which is to be kept by the treasurer? Will the Clerk of the House furnish the ledger or record?

Mr. RUCKER. No; I do not think so.

Mr. WALSH. Why should not the Clerk of the House furnish the record which has to be kept by the committee, in order that it may be kept in a uniform manner?

Mr. RUCKER. Well, if they will keep the items and report the items, that is all the public is interested in. The gentleman can readily see that it would be a right tedious, as well as an expensive, task to undertake to furnish ledgers to all persons in the country who may handle campaign funds.

Mr. WALSH. He can send them out in separate sheets, the same as he sends out statements.

Mr. RUCKER. The ledger they keep must be a permanent book, so it may be preserved.

Mr. WALSH. It says here that the ledger or record may be kept on loose rough sheets.

Mr. RUCKER. The record.

Mr. WALSH. I know; but you are giving discretion here to the treasurer to keep either the ledger or the record. Why, he could keep it on a sheet of wrapping paper.

Mr. RUCKER. Let me say—and I take the criticism kindly—the gentleman is simply forcing me to again insist that the committee in presenting this, the best bill ever presented on this subject, did not expect absolute perfection.

Mr. WALSH. I understand. My only purpose was to suggest that, might not the Clerk of the House have some of these loose sheets for the use of treasurers of committees?

Mr. RUCKER. I think the gentleman will bear me out in this and will agree with me that in a heated campaign if the Clerk of the House would send out a lot of loose sheets like this, some clerk, officer, or treasurer who was not as careful in his methods as some other gentleman might lose the sheets and they never could be found. Now, if there was any trouble about it at all, I would rather amend the bill and provide that they should be required to keep permanent records, because the purpose is, and ought to be, to make the committee in good faith account for absolutely every dollar of money it receives or expends.

Mr. WALSH. In other words, the gentleman thinks he should be stricter with the committee than he is with the candidate?

Mr. RUCKER. You can not be as strict with a candidate as with the committee.

Mr. WALSH. One further question.

Mr. RUCKER. I suppose I make myself clear to the gentleman? You could not do that.

Mr. WALSH. With reference to the amount which the candidate may expend. Does the bill as proposed by the committee proceed upon the theory that States have the right to enact statutes fixing the limit which may be expended by the candidate for Senator or for a Member of the House at less than $2,500?

Mr. RUCKER. Unquestionably. I want to say in answer to the gentleman's question that as a constitutional question I very seriously doubt whether the State has any jurisdiction to prescribe how much money we may spend, or any other condition touching our qualifications, but the fact is some of the States have done so; and, yielding to the sentiment which it evidently had, the purpose being the purification of election in order that every vote might clearly represent the judgment of the voter, we recognized that right by writing into the bill that no candidate could expend a larger sum or a greater sum than he may lawfully expend under the law of the State in which he may reside.

Mr. WALSH. So that the bill as proposed recognizes the State laws, and it may result in a man being allowed to expend $2,500 while across the line from my district, in a bordering State, my colleague could not expend but $1,500?

Mr. RUCKER. Yes.

Mr. WALSH. It recognizes the inequality in the amount that can be expended by candidates?

Mr. RUCKER. It recognizes the fact that in the State of Missouri, one of the greatest States of this Union [applause], in one district a certain limit is the maximum that one may spend, and just across in an adjoining district the amount may be twice as much.

Mr. WALSH. In the same State?

Mr. RUCKER. In the same State.

Mr. WALSH. And that is fixed by State law?

Mr. RUCKER. That is fixed by State law. Let me say to the gentleman I do not desire to talk about personal matters, and I do not want to reveal too much——

Mr. WALSH. That was not my purpose in asking the question.

Mr. RUCKER. I will make this statement. In my own district I can not spend this year within $200 as much as I could in the last election, although I have occasion to spend four times as much——

Mr. WALSH. In other words, there is a descending relation——

Mr. RUCKER (continuing). Owing to the fact that I was so very satisfactory to my Republican friends they did not put up a Republican candidate and there was no Republican vote to base the amount upon.

Mr. WALSH. It seems to me that is a good argument for this House making it a uniform law.

Mr. RUCKER. It is a good argument to induce the Legislature of Missouri to change its law.

Mr. WALSH. To comply with this act, for instance.

Mr. RUCKER. As a matter of fact, let me say, in answer to the gentleman's suggestion, that the hope of this committee—and if we ever realize that hope we will be amply well paid—it is the hope of this committee, with the aid of Members of the House and Senate, to make a publicity law along a line so perfect and satisfactory that every State of the Union will pattern after it and enact laws which will articulate with this Federal law, requiring publicity of statements of accounts in the States similar to what we are requiring here, and in that way begin and go all along through the great fabric of this Republic purifying the elections. I hope it can be done.

Mr. SIMS. If I understand your bill—and I have not read it at this time closely—you limit this amount of expense to those items of expense required to be reported only. In other words, expense items are not required to be reported under this bill?

Mr. RUCKER. Traveling expenses, for instance.

Mr. SIMS. Or postage.

Mr. RUCKER. Under the Federal law you do not have to account for postage, but under our State law you do.

Mr. SIMS. Under this law there is no limit of expenditures, provided they are of the kind not required to be reported, so far as Congress is concerned?

Mr. RUCKER. That argument is worthy of consideration and thought, but how can it be done? There is every conceivable expense, either forcing men to intentionally forget or else forcing a man to carry a bookkeeper along to keep account of every little item of expense. It can not be done.

A man is busy and rushing about transacting business, and he can not do it. Now, I only know one State of the Union where postage stamps have to be accounted for, and that is Missouri; and I want to say I can not write one letter to each name on my mailing list and put a 2-cent stamp on it without violating the law of my State.

Mr. MANN. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. MANN. The gentleman can frank congressional matter without any violation of the law to all of his constituents, can he not?

Mr. RUCKER. Yes, sir. I believe so.

Mr. MANN. So that the gentleman has advantage over anybody running against him. The other man has to put a 2-cent stamp on his letter, and he can not do it without violating the law, but the gentleman can send a dozen pieces to one individual and does not violate the law. I do not say that the gentleman does.

Mr. RUCKER. I want to say I have never done that for the reason that I always feared it would likely do me more harm than good.

Mr. MANN. The gentleman knows that some gentlemen may do it. The gentleman knows that every Member of the House——

Mr. WALSH. You can not send a political circular under a frank.

Mr. MANN. Practically a political circular. I know of one room in this building now where there are a lot of people employed sending out a campaign document printed in the CONGRESSIONAL RECORD.

Mr. RUCKER. I think the gentleman is correct about that, but I think there are two of those rooms. I never have adopted that plan. I am not complaining about conditions.

Mr. SIMS. I wanted to get the answer of the gentleman. There is no attempt in this law to limit the expenditures that are not required to be reported upon the theory that those expenditures are not of the kind that are liable to corrupt the electorate like the writing of letters? In some States we have the election of county officers and State officers in August. We do it in Tennessee. Consequently, there are more candidates for office in the August election by far than there are in the fall election. Many counties are close. Suppose a candidate for Congress is requested by the committee of his party in those counties to contribute to the local party campaign fund for the August election. Now, does he have to report that under this law? As a matter of course he would not be called on if he was not a candidate, and he pays primarily because he expects to receive, directly or indirectly, a party benefit.

Mr. RUCKER. That is a question of mixed ethics of law that the gentleman is as well able to answer as I am. I will not attempt to answer it.

Mr. SIMS. What will he do?

Mr. RUCKER. I do not know. How much time have I consumed, Mr. Chairman?

The CHAIRMAN. About 50 minutes.

Mr. CRISP. Can I ask the gentleman a question? I had the honor and privilege of serving under my friend in the last Congress, and I know of his great efforts in this direction. You contemplate, then, amending the law to require the candidates to mail to their opponents a copy of the statement that they have?

Mr. RUCKER. No. The House knocked that out in the last Congress. The House did not think it wise. I thought it was.

Mr. FESS. Will the gentleman yield to me?

Mr. RUCKER. I will be glad to answer the gentleman, but I have promised some time.

Mr. FESS. Does the bill contemplate the expense of sending a statement to the newspapers? Suppose you announce you can not go back home, and you have to take that method?

Mr. RUCKER. A paid item?

Mr. FESS. Naturally it would be a paid item.

Mr. RUCKER. It would have to be accounted for. The reason you send it back is to let them know you are not coming, and thus arouse friends to activity.

Mr. FESS. If you make a trip in your own automobile, which costs money, would that be included?

Mr. RUCKER. That is one of the inequities, as the gentleman can see very well.

Mr. FESS. I was asking for information.

Mr. DECKER. As I understand the law as you have it now, and as it will be after this bill is passed, a man must swear to his expenditures that have been made either with his knowledge, by himself, or with his knowledge and consent by others.

Now, the gentleman from Ohio spoke about the newspaper advertisements. I was wondering if there were advertisements in the newspapers of the district purporting to be under some committee supporting some man for Congress, we will say the "Jones for Congress Club," should those be accounted for by the candidate?

Mr. RUCKER. Oh, I suggest this to the gentleman: To my mind it is inconceivable that such a club could run an advertisement for the benefit and in the interest of any candidate without his knowledge. If he knew of such effort being made in his behalf and acquiesced in it—that is, did not stop it—he ought and must charge himself with it or, in my judgment, violate the law as it now is and as it is proposed in this bill.

Mr. Chairman, I reserve the balance of my time. Will the gentleman from Michigan [Mr. MAPES] use some time now?

Mr. MAPES. Mr. Chairman, in view of what the distinguished chairman of our committee, Mr. RUCKER, has said, it may not be out of place for me at the outset, on behalf of the other Republican members of the committee and myself, to express our appreciation of the uniform courtesy and consideration which the chairman has always shown to the Republican members of the committee. In the consideration of this bill I think it is well within the truth to say that he consulted and worked with the Republican as much as with the Democratic members. [Applause.]

As the chairman of the committee has said, it is proposed by this bill to codify the laws now on the statute books requiring that an accounting be made of and publicity be given to campaign receipts and expenditures and to make some important amendments to such laws.

It may be of interest to know the history of recent Federal legislation on this subject. The first law enacted by Congress attempting to require publicity of campaign receipts and expenditures was approved June 25, 1910. It required an accounting after election only by campaign committees operating in two or more States; that is, the national campaign committees. As the bill passed the House of Representatives it required an accounting by the committees before as well as after the election, but the provision requiring an accounting before election was stricken out in the Senate.

At the next Congress a bill was introduced and passed the House of Representatives amending the law so as to require an accounting by the national committees before election, as the House bill provided in the previous session. The Senate at that session went further than the House of Representatives. It not only retained the provision requiring an accounting by such committees before the election, which it had stricken out of the House bill at the previous session, but incorporated a new provision, which went further than the House had proposed to go, requiring candidates for the nomination or election to the House of Representatives and the Senate, as well as committees, to give an accounting of their campaign receipts and expenditures both before and after the election, and limited the amount which such candidates could expend.

That act was approved August 19, 1911, and is the law at the present time. You are all familiar with that law. It is the law under which Members of Congress have had to file reports for the last four years.

In the last Congress the gentleman from Missouri [Mr. RUCKER] introduced a bill, somewhat similar to the present one, to codify and revise these acts. That bill passed the House of Representatives and was reported by the Senate committee, but was never taken up in the Senate.

Whenever this matter has been considered in Congress the right of Congress under the Constitution to enact legislation of the kind has been questioned by some, particularly in so far as it related to the nomination of candidates, but it is now generally conceded that Congress has the right to pass such legislation. The Supreme Court has recognized the right of Congress to regulate elections at which Members of Congress are elected in several cases. The nomination is such an essential part of the election, and in many districts is so nearly equivalent to an election, that it would be unreasonable and to no purpose to give Congress the power to regulate the one and not the other. Such a construction would render the power of Congress over the election of its own Members of no avail.

The present law does not define, nor is it proposed by this bill to define, the purposes for which money can be used in political campaigns. It only proposes to limit the amount of expenditures and require publicity thereof.

Mr. SMITH of Minnesota. Mr. Chairman, will the gentleman yield there?

Mr. MAPES. I yield.

Mr. SMITH of Minnesota. Does not the gentleman think it would be better to limit the expenditure of money to certain purposes, rather than to limit the amount of money that is expended? Or, in other words, would it not be better, if we are going to omit the one, to omit the one as to the amount that we can expend, and incorporate the one that designates the purposes for which the money may be expended?

Mr. MAPES. I will say to the gentleman that, so far as I am personally concerned, I would favor a law which would both limit the amount of money that could be expended and define the purposes for which it could be spent. However, I think that if publicity is given of all expenditures, there will not be very much improper use of money in political campaigns.

Most of the States have laws defining the purposes for which money can be expended in political campaigns, and I do not believe any candidate for Congress is going to spend money for which he has to account, showing that he has violated those State laws.

Mr. SMITH of Minnesota. In that connection, does not the gentleman think the candidate needs some protection as well as the public?

Mr. MAPES. Undoubtedly.

Mr. SMITH of Minnesota. And that it would be well to limit the purposes for which the money can be expended, so as to avoid just the thing that the chairman of this committee called our attention to a moment ago?

Mr. MAPES. Yes.

Mr. SMITH of Minnesota. The candidate's time is very valuable. He has only a short time in which to reach his constituents, and he would be saved an immense amount of trouble if certain parties should know that it was unlawful to approach him to secure money or other favors at that time.

Mr. MAPES. What the gentleman from Minnesota says is undoubtedly true.

Mr. MADDEN. Mr. Chairman, will the gentleman yield there for a question?

Mr. MAPES. Yes.

Mr. MADDEN. The gentleman has given a lot of study to this proposition. I would like to ask him if he has given any thought to this view of the case: Suppose that a citizen, who may happen for the time being to be a candidate for a Federal office—Member of Congress or Senator or President—should think proper to make a contribution to the national committee of his party or to the State committee of his party or the county committee of his party, without respect to anything in connection with his own candidacy. Has the committee reached the conclusion that that is chargeable to his expenses as a candidate for the office he is running for?

Mr. RUCKER. Mr. Chairman, will the gentleman permit me to answer?

Mr. MAPES. I yield to the gentleman from Missouri.

Mr. RUCKER. Let me say this to the gentleman from Illinois: For four years I believe the law has plainly stated that any candidate might make contributions to political parties within the limits herein defined; in other words, not to exceed $5,000.

Mr. MADDEN. That does not answer my question at all.

Mr. MAPES. I will say to the gentleman from Illinois that in Michigan candidates, when they contribute to the State or county committees, do account for those contributions in their statements.

Mr. MADDEN. That does not answer my question at all. What I want to know is whether the mere fact that a man is a candidate for an office over which the Federal Government has jurisdiction prohibits him as a citizen of the United States from contributing out of his own money to the success of the party with which he is affiliated, whether it is through the national committee or otherwise?

Mr. MAPES. If the committee has jurisdiction over the district in which he is a candidate, I should say he ought to account for it.

Mr. MADDEN. Well, say the national committee.

Mr. MAPES. If a candidate for Congress, in the State of Illinois, for instance, contributed to the local campaign of some man in California, perhaps it would not have to be accounted for; but if he contributed to the national committee, or to the State committee of Illinois, I think it ought to be accounted for.

Mr. MADDEN. Does the gentleman think the national committee has any effect in the management of the campaign in any congressional district in the United States?

Mr. MAPES. It ought to disband, if it has not.

Mr. MADDEN. It has not. I have never been connected with a campaign yet where any committee, national committee or congressional committee, both of which committees are supposed to have control of the campaign, have either contributed their moral support or their financial support or in any other way supported the candidacy of any man who ran for the office of Member of Congress coming within my knowledge.

Mr. MAPES. They distribute literature and help the local campaign committees in other ways.

Mr. FOCHT. Will the gentleman yield right there?

Mr. MAPES. Yes.

Mr. FOCHT. I will say to the gentleman from Illinois not only that, but they have been a hindrance and a detriment from the fact that the word has gone abroad that they were helping you, and people call to see you, and when you refuse their demands and explain that they are not helping you, they believe you are lying to them. [Laughter.]

Mr. MAPES. That may be the practical effect, but that is not the purpose for which they are organized.

The theory of this legislation, as stated in the report of the committee of the Senate on the first bill, is "the belief that publicity of contributions and expenditures in a campaign for a public office will tend to lessen, if not wholly prevent, the improper use of money in public campaigns and so promote the purity and honesty of elections."

It is interesting to note the change of attitude of the Democratic Party in regard to this character of legislation. It is not many years ago that the members of that party generally declared legislation of this kind unconstitutional, and that the regulation of elections ought to be left to the States. In 1894, during the Cleveland administration, that party repealed the Federal election laws and the bribery statutes passed soon after the Civil War for the purpose of maintaining the purity of elections, against the protest and opposition of the Republican Members of Congress. To-day the Democratic Party makes the enactment of a measure somewhat similar a part of its legislative program.

Most of the States have corrupt-practices acts of a much more stringent nature than the present Federal law or than is proposed by this bill. The State laws, as a rule, provide not only for publicity and limit the amount that may be expended, but they define the purposes for which money can be expended as well. The next step in Federal legislation undoubtedly will be the enactment of a statute after the manner of the State laws defining the purposes for which money can be expended in campaigns in which Members of Congress are to be elected and restoring the bribery statutes that were repealed in 1894.

Mr. MADDEN. Will the gentleman yield for one more question?

Mr. MAPES. Just a brief question. I have already taken more time than I intended to take.

Mr. MADDEN. I wish to ask the gentleman if the committee have given any consideration to the question whether a citizen of the United States has any rights that anybody is bound to respect if he becomes a candidate for office?

Mr. MAPES. I do not think this bill limits them in any way. Many believe that Federal legislation of this character would be more effective than the State laws upon the same subject, and that this legislation will not be complete until Congress enacts some such law. They believe that a Federal law upon the subject would command much more respect than the State laws do.

It is well to bear in mind, however, that this bill does not annul the corrupt-practice acts of the States. It is in addition to them. It aims to supplement the State laws rather than to supplant them. It expressly provides that the State laws shall not be annulled and that the candidates mentioned in it shall not be exempt from complying with such State laws.

The amount that can be expended under State laws differs greatly in the different States. In Missouri, for example, the home of the distinguished chairman of the committee, a candidate for Congress can expend $100 for the first 5,000 voters, $2 for each 100 voters over 5,000 and under 25,000, $1 for each 100 voters over 25,000 and under 50,000, and $0.50 for each 100 voters over 50,000. This would allow a candidate for election to the House of Representatives in a district where there were 50,000 voters, which is more than the average, to expend in his campaign for the nomination and election a total of $750.

Mr. RUCKER. Will the gentleman yield?

Mr. MAPES. Yes.

Mr. RUCKER. The gentleman very accurately quoted the Missouri statute, but unfortunately, as I have had occasion to discover recently, the amounts that may be expended are not based on the voting strength of the district, but on the vote actually cast.

Mr. MAPES. I think that is correct.

Mr. SLOAN. May I ask the gentleman a question?

Mr. MAPES. Very briefly.

Mr. SLOAN. In the State of Missouri, if a candidate for Congress spent more money than the statute of the State of Missouri provides, would he come under the penalty provided in this statute if it was under the maximum generally provided?

Mr. MAPES. The bill expressly states that he would.

Mr. SLOAN. That is, we are brought down to the Missouri basis.

Mr. MAPES. If we live in Missouri, we are.

West Virginia allows an expenditure of $75 only for each county in the district. The amount that can be expended varies in the different States, some States allowing 50 per cent of the first year's salary, or $3,750, to be expended by a candidate for Congress. This bill limits the amount that a candidate for the House of Representatives can spend for his nomination and election to $2,500 and a Senator to $5,000. These amounts are in addition to his expenditures for travel and subsistence, stationery and postage, writing or printing—other than in newspapers—and for telegraph and telephone service.

Some of the important changes in the pending bill over the present law are the following:

The bill for the first time limits the amount that can be expended by candidates for the office of President and Vice President of the United States and requires them to give publicity to their expenditures. The committee has limited the amount that can be expended by a candidate for President for the purpose of securing his nomination and election to $50,000 and to a candidate for Vice President to $25,000.

In this connection I will say that the committee struck out of the present law the provision which exempts candidates from accounting for expenditures for distributing posters, handbills, and letters.

Mr. SMITH of Minnesota. You struck that out?

Mr. MAPES. We struck it out of the present law. We felt that candidates ought to account for such expenditures.

The present law only requires campaign committees operating in two or more States to make a statement. The pending bill requires all committees that receive or expend any money for the purpose of influencing or attempting to influence the result of a primary or an election at which candidates for President,

Vice President, Senator, or Representative in Congress are to be nominated or elected to make a statement even though operating entirely with a State.

This provision of the bill is criticized because of the number of reports that will be required, but it seemed to the committee that the law would not be effective unless it required reports from all committees that take part in the campaign. The fact is that the congressional campaign committees and the county committees within the congressional districts are very important factors in the election, and a law which would leave them out of consideration would be incomplete. In recommending this provision the committee is only following out the action of the House of Representatives in the last Congress. The bill reported by the committee at that time did not contain such a provision, but an amendment covering the matter was voted into the bill in the House.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. MAPES. Briefly.

Mr. MADDEN. Take the case of Cook County, Ill., where we have 10 congressional districts in one county. The county committee has jurisdiction over the whole campaign of the 10 congressional districts. They conduct a campaign for every man who runs for office of any kind, name, or nature in Cook County. How are they going to make a report as to just what they spend for a candidate for Congress, when his campaign is coupled up with all the other candidates? It can not be done.

Mr. MAPES. I think under the provisions of this bill, if they account once for the money they expend, that will cover it even though there are a number of candidates. They do not have to make any more statements than they would if there were only one candidate. The money is spent for the benefit of the ticket, and the candidates for Congress are on the ticket. The committee would undoubtedly have to account for all expenditures made in the campaign.

Under the provisions of the bill voluntary committees or associations of the friends of candidates or any individual who expends $50 or more for the purpose of helping to nominate or elect a candidate must make a report, unless he contributes the same to a committee.

The bill also provides that no committee shall expend in any one State more than is contributed or raised by citizens of that State. The purpose of this provision is to prevent the excessive use of money in a State which it may seem desirable or important to carry.

The bill also reduces the amount that may be expended by candidates for the House of Representatives from $5,000, in the present law, to $2,500, and for the Senate from $10,000 to $5,000. This is in addition to expenditures for printing, writing, stationery and postage, traveling expenses, and so forth, and is more than is allowed by the majority of the States having corrupt-practice acts.

Another new provision requires a candidate to file a copy of his statement with the clerk of the United States district court having jurisdiction over the Federal judicial district in which the candidate resides.

The bill also requires that anyone found to have violated its provisions shall not receive or retain the office to which he has been declared elected. The committee has some doubt as to the constitutionality of this provision in view of the right of each House to determine the qualifications of its own Members, but has put it into the bill for whatever moral effect it may have.

Mr. MILLER of Delaware. Will the gentleman yield for a question?

Mr. MAPES. Yes.

Mr. MILLER of Delaware. What happens to a man who runs for Congress and is defeated? Does the law make provision that if he violates the law they can get after him as well as the sitting Member?

Mr. MAPES. Every man who violates the law comes under the jurisdiction of the law, and will be dealt with by the district attorney in the district in which he resides.

Mr. MILLER of Delaware. Will it be up to the district attorney, or will the successful candidate for Congress have to do it, in the same way that the defeated candidate would push it against the successful one?

Mr. MAPES. This bill provides that it is the duty of the Clerk of the House to call the attention of the district attorney to any violation of the law.

Mr. SLOAN. Under the existing law would it require the Cook County committee to report first to the Cook County authorities; second, to the secretary of state of the State of Illinois, as they do in our State——

Mr. MAPES. If the State law provides that.

Mr. SLOAN. And third, to the Clerk of the House?

Mr. MAPES. This law requires the committee to report to the Clerk of the House and to the clerk of the district court having jurisdiction.

Mr. TAGGART. There are many States that have statutes limiting expenditures for local and State officers, but which expressly omit to place any limitation on candidates for Senator or Representative in Congress or for President and Vice President. This act has no reference to any State statute, except those that place a limitation on candidates for Congress and national candidates, as I understand.

Mr. MAPES. That is it.

To state the purpose of the bill in one sentence, I think it can fairly be said that the bill aims to require publicity of all expenditures for the purpose of influencing the result of the nomination or election of a candidate for President, Vice President, Senator, or Representative in Congress, whether made by the candidate himself, by regularly organized political committees, voluntary associations of friends, or otherwise.

Mr. WALSH. Will the gentleman yield?

Mr. MAPES. I yield to the gentleman from Massachusetts.

Mr. WALSH. I notice that the forms for statements required in this act shall be furnished by the Clerk of the House. Does the Clerk of the House furnish forms for candidates to the Senate or for the election of President and Vice President?

Mr. MAPES. I think that has been the practice.

Mr. WALSH. It is intended to continue that practice, is it?

Mr. MAPES. It is. The bill is reported unanimously by the Committee on Election of President, Vice President, and Representatives in Congress. No one will claim for the bill that it will bring about a political millenium, but if enacted into law it will make it a little more difficult to use money in political campaigns improperly, or, as Gladstone is said to have answered the critics of certain reform legislation in England, it will make it a little harder to do wrong and a little more easy to do right. [Applause.]

Mr. ADAMSON. Mr. Chairman, I will ask the gentleman from Missouri in charge of the bill about what hour will the general debate end?

Mr. RUCKER. Will the gentleman from Michigan inform me how many speeches he has on that side?

Mr. MAPES. We have three more speeches. I think our time will be all taken up.

GEORGIA WATERMELONS.

Mr. ADAMSON. Mr. Chairman, I have a matter of the highest privilege, and I ask the gentleman to yield to me a minute or so to talk about it.

Mr. RUCKER. I will yield to the gentleman.

Mr. ADAMSON. The hour of closing debate does not suit me, so I will have to ask the loan of Members. The Committee on Interstate and Foreign Commerce has a very important meeting at which they have a clinic and will dissect the bodies of a large number of Georgia watermelons that have come in from Troup County, Ga., in the district which I have the honor to represent. They will have as special witnesses the surviving Members of the Fifty-fifth Congress as special guests. Any Member present who is a friend of the Committee on Interstate and Foreign Commerce, or of the surviving Members of the Fifty-fifth Congress, is invited to come up and participate.

Mr. RUCKER. At what time does this meeting take place?

Mr. ADAMSON. At 3 o'clock, in the room of the Committee on Interstate and Foreign Commerce. [Applause.]

CAMPAIGN CONTRIBUTIONS AND EXPENDITURES.

Mr. MAPES. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. SANFORD].

Mr. SANFORD. Mr. Chairman, I wish to join with the gentleman from Michigan [Mr. MAPES] in paying the highest possible compliment to the ability, capacity, and patience of our able chairman, through whose diligence we have been able here to present a bill that expresses at least the best judgment, regardless of partisan considerations, of the members of the committee with reference to publicity.

A few months ago there came from the White House a list describing in detail the specifications of the task set before Congress for this session. That list came directly from the President, as all Members of the House understood, and on that list there was included an item describing this bill, as I am now informed. It was called the corrupt-practice act. I have been on the committee all winter, but I did not recognize that this was a corrupt-practice act. I do not want to say that the President used "weasel words," because I assume that he may not have known exactly what was in the bill or exactly what a corrupt-practice act is.

Mr. ANDERSON. Will the gentleman yield?

Mr. SANFORD. Yes.

Mr. ANDERSON. I wanted to ask the gentleman if he remembered whether in that list there was a presidential primary law.

Mr. SANFORD. I do not recall that there was. The point I am trying to make is that the bill before us is a publicity bill—nothing more. It is not designed to become in any real sense a corrupt-practice act. This bill, however, recognizes the existence of corrupt practices, the law to prevent which was repealed by the Democratic Party in 1894.

During the reconstruction period that followed the Civil War and between 1865 and 1870 several Federal statutes were enacted in exercise of the authority conferred on Congress by the Constitution to prevent corrupt practice at elections. There were provisions to protect the citizen in doing the things necessary to qualify himself to vote and penalties provided for wrongfully refusing to receive a vote, and for unlawfully hindering a person from voting. There was provision to keep the United States courts open to protect such rights. There was provision for the appointment of supervisors of election to attend at all times and places for holding elections of Representatives and Delegates in Congress, and such supervisors were required to scrutinize the counting of the ballots. There was provision for the summary punishment of persons offending against these laws. All of these provisions, constituting a complete system for the protection of the interests of the Federal Government at elections where Members of Congress and Senators were to be chosen, were embodied in title 26 of the Revised Statutes.

There were further laws for the punishment of crimes against the elective franchise providing for the punishment of persons who unlawfully hinder, delay, or prevent any citizen from voting and punishing persons for fraudulently voting or for using any force, threat, intimidation, or bribery; punishing fraudulent registration, punishing officers of election for violation of duty; punishing persons for being guilty of conspiracy to prevent the support of any candidate; punishing supervisors of election for neglecting their duties; punishing other persons for interfering with supervisors of election or for obstructing the verification of the registration list.

There was, in fact, a complete exercise of the authority given Congress to protect the purity of the ballot at elections at which Representatives in Congress were chosen.

But when the Democratic Party was in power in 1894 these laws were repealed on the theory that they were both unconstitutional and inexpedient.

It is interesting to quote a paragraph from the report of the committee that favored the repeal of these laws:

> But we regard these statutes as chiefly inimical to the best interests of the people because they are, in effect, a vote of lack of confidence in the States of the Union. The inference is irresistible that they were enacted because of a lack of confidence in the honesty if not in the ability of the States to conduct their own elections. With such an intention plainly on their face, with what consideration could they be met by the people for whom they were intended, except that of distrust and suspicion? Would the United States Government suffer less by the prevalence of fraud in elections than the States whose officers we sent to represent it in the Government of the United States? Is fraud in elections any less contemptible because it emanates from the people of the States without Federal interference, or is it any less dangerous to the people of the States because it lacks Federal supervision?
>
> Let every trace of the reconstruction measures be wiped from the statute books; let the States of this great Union understand that the elections are in their own hands, and if there be fraud, coercion, or force used, they will be the first to feel it.

The same party, again in power, admits the weakness of the theory on which it repealed these remedial laws and proposes to cover up its shortcomings with a publicity statute.

The burden of the argument, however, for the repeal of these statutes was on the ground that they were unconstitutional. Throughout the discussion of this subject it is very evident that the Democratic Party has been unwilling to recognize the authority of the Federal Government to pass such laws. The reason for this attitude of mind is almost self-evident, and can clearly be found in the following figures:

At the 1914 election of Members of Congress the total vote cast in certain districts was as follows:

	Total vote.
NORTH CAROLINA.	
First district	8,940
Second district	8,843
Sixth district	8,392
SOUTH CAROLINA.	
First district	3,053
Second district	4,688
Third district	4,521
VIRGINIA.	
First district	5,578
Fourth district	2,902
Sixth district	4,214
TEXAS.	
Seventh district	7,003
MISSISSIPPI.	
Seventh district	3,702
Third district	2,168
Eighth district	2,404

The population of the above districts is in almost every case approximately 200,000.

Mr. FESS. Will the gentleman yield?

Mr. SANFORD. Gladly.

Mr. FESS. I made a comparison of the seventh Ohio district with the State of Mississippi, and found that the seventh Ohio district cast one-third more votes than the eight districts of the State of Mississippi in 1914.

Mr. SANFORD. That is very interesting in a representative body.

Mr. FOSTER. Will the gentleman yield?

Mr. SANFORD. Certainly.

Mr. FOSTER. Does the gentleman think that the fact that in a southern district where there is no opposition in a general election that it is a fair comparison to what the vote is in other districts?

Mr. SANFORD. I think it is fair to point out that in a congressional district in the United States, with a population of 200,000, there are only 2,000 or 3,000 interested American citizens ready to express in the only way possible for them their interest in the Government of the United States. [Applause on the Republican side.]

Mr. FOSTER. Now, without any politics in it, laying aside the politics——

Mr. SANFORD. I do not call it politics.

Mr. FOSTER. In a southern district in which there is no opposition, no other candidate running as a Member of Congress, does not that make some difference in the number of votes that may be cast? Has the gentleman compared the districts where there is opposition to see what the vote is?

Mr. SANFORD. I have found that where there is some competition—for instance, like the district I referred to in Texas, where there are 3 Republican votes—it does make some difference.

I have the honor to represent a district of approximately the same size in population as those mentioned above, and at the 1914 election there were polled in my district 52,362 votes. The voting strength of the districts represented by the gentlemen on the left of the aisle ranges from 30,000 to 50,000.

In this connection, also, it is interesting to note that the chairman of the great Agricultural Committee of this House, the gentleman from South Carolina, represents a district which polled a total vote of 5,501. The gentleman from Virginia, the chairman of the Banking and Currency Committee, represents a district that polled at the last election 4,214 votes. The chairman of the Committee on Education, the gentleman from Georgia, represents a district that polled 6,836 votes. The gentleman from Virginia, the chairman of the Committee on Insular Affairs, that has reported such important bills to change the policy of this Government concerning its island possessions, represents a district that polled 4,578 votes. The gentleman from Georgia, the chairman of the Committee on Interstate and Foreign Commerce, represents a district polling 4,754 votes. The chairman of the Committee on Military Affairs, the gentleman from Virginia, who has had charge of the most important bill that has come before this session of Congress, represents a district that polled 5,255 votes. The gentleman from North Carolina, the chairman of Ways and Means and the leader of the House, represents a district that polled only 7,843 votes.

The total vote of all the districts combined represented by the chairmen of all these important committees is much less than the total vote of the district which I represent, but in the hands of these chairmen of committees is the control of most of the important legislation of Congress. I do not question the ability of any of these gentlemen, but merely desire to point out the character and extent of their representation.

Mr. CALDWELL. Will the gentleman yield?

Mr. SANFORD. I will yield to my colleague.

Mr. CALDWELL. Did the gentleman have a contest in the Republican primary at the time he was nominated?

Mr. SANFORD. Oh, we have no troubles in the Republican Party in my district. [Laughter.]

Mr. CALDWELL. Did the gentleman receive as many votes in his primary as he did in the general election?

Mr. SANFORD. I did not pay much attention to the primary.

Mr. CALDWELL. Does not the gentleman know that in the South the fight is all made in the primary, because all the decent people down there are Democrats? [Laughter.]

Mr. SANFORD. Yes; the primary is a family quarrel. But I think I have a right to comment on the election itself.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. MOORE of Pennsylvania. I think the gentleman did not catch the import of the inquiry of the gentleman from New York [Mr. CALDWELL], which was this, that the contest in the States about which the gentleman from New York [Mr. SANFORD] just addressed the House, hinges always on the primary election and does not hinge on the general election at all.

Mr. SANFORD. I caught that.

Mr. MOORE of Pennsylvania. So that what applies in this particular instance would not apply after the candidate had gained the nomination?

Mr. SANFORD. Yes; I see that.

Mr. FOCHT. We all understand what underlies this whole business, and why they do not vote in the fall, but I would like to ask the gentleman, while he is on his feet, to state how he regards the action of the chairman of the Committee on Ways and Means and the other members representing the southern districts that poll only two or three thousand votes, in bringing in a revenue bill to tax the North untold millions of dollars when they pay very little of it themselves, and what will be the ultimate result of that? Are they not inviting something to be done and done very soon?

Mr. SANFORD. I understand that, and in this connection I want to say that I make no reflection and do not want to be understood as making any reflection on the ability or quality of mind of any of the chairmen of these committees, but I say what I do merely to call attention to the quality of representation, in order that some people may be able better to understand the vision of the men who helped in this great year to more clearly define Americanism in this country.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. PLATT. If it is constitutional to pass a bill of this kind would there be anything to prevent a Republican majority sometime from requiring that at least 30,000 votes should be cast for somebody in a congressional district before a man should be certified as elected to this great body?

Mr. SANFORD. I can answer the gentleman by saying that the Supreme Court of the United States has said that this body has almost unlimited power with reference to the supervision of the elections at which Members of Congress are chosen.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. WALSH. Does the gentleman think the passage of this bill is going to produce more votes in these districts to which he has referred; that there will be more votes cast at these elections?

Mr. SANFORD. Oh, no; nothing can do that.

Mr. MADDEN. The gentleman replies that nothing can do that.

Mr. SANFORD. Nothing; that is, that can be done at this session of Congress.

Mr. MADDEN. Oh, that is quite a different proposition.

Mr. SANFORD. I will come to that.

Mr. MADDEN. Will the gentleman come to that?

Mr. SANFORD. Yes.

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. ADAIR. Has the gentleman taken notice of the fact that the State from which I come, the northern State of Indiana, is represented by 11 Democratic Congressmen, one of whom is a member of the Committee on Ways and Means, and that each one of these 11 was elected by probably as large a vote as the gentleman from New York received, and that one gentleman of those 11, who is a member of the Committee on Ways and Means, figured in reporting to the House the revenue bill, as well as did the gentleman from North Carolina [Mr. KITCHIN].

Mr. SANFORD. I am not discussing the revenue bill. I would rather not get into that. I was interrupted by a gentleman who brought it up, and the gentleman's remark can apply to his inquiry.

Mr. ADAIR. Then I shall apply it to the gentleman from Pennsylvania [Mr. FOCHT].

Mr. SANFORD. Mr. Chairman, I find that I must refuse further to yield.

These figures quoted above clearly show why the party in power at the present time is perfectly willing to commit itself to a harmless publicity statute while it keeps off the statute books laws to prevent corrupt practices at elections.

I am in favor of the passage of this bill, although I believe it to be merely a halting step. I am in favor of voting for it because I am perfectly confident that no effective law on this subject could be passed in this Congress.

If we start consideration of this subject with the assumption that money is improperly used in political campaigns and with the assumption that elections are not honestly conducted throughout the different States of the Union, one may well question whether or not the power given to Congress by section 4 of Article I of the Constitution does not carry with it a duty that is coextensive with that power and an obligation that is definite. [Applause.]

The provision of the Constitution is as follows:

> The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

The framers of the Constitution apparently clearly foresaw that the time might come that the States would fail in their duty in this matter of holding elections, and reserved to the Congress, it seems to me, the fullest power to make regulations affecting the manner of conducting elections. New conditions, however, not foreseen by the writers of the Constitution, have arisen which emphasize the obligation of Congress to cure the evil of corrupt practice at election if such evil in fact exists, and I for one believe that it does. The new conditions of which I speak are those that have grown out of the introduction of the direct primary. In a large number of congressional districts to-day the direct primary election is for all practical purposes the final election. In those districts the only real contest is the contest at the direct primary. The result of the primary election is final. Those are the districts in which one or the other political party is so strong that its candidates are either wholly unopposed or so weakly opposed that the final election may be said to be uncontested. It is in the conduct of the direct primary contest in such cases that money is spent. It is probably a fact that in many congressional districts fully as much money is spent by congressional candidates and their supporters in these days in seeking to be chosen at the primary election as is spent in the final election contest itself. The improper use of money to control the result of the direct primary is just as vicious and threatens just as seriously the stability of the Government as the improper use of money in the campaign for final election.

At each stage in the development of the law which the pending bill seeks to amend it has been strenuously objected, both in this House and in the Senate, that Congress has no authority to interfere with or in any manner to regulate direct primary elections. These objections, however, have been overridden, and Congress has assumed the authority to the extent to which these bills have gone to regulate the use of money at the primary election, as well as at the final election. If the Congress has operated within its constitutional authority in going to the extent to which it has already gone, it seems clear to my mind that it not only has authority but it must also recognize the obligation to do all within its power to regulate the manner of holding both primary and final elections to such an extent that it may be said that it has done its whole duty to promote the purity and honesty of elections.

The bill before us, without any partisan distinctions, has received the unanimous approval of the members of the committee. It probably represents the best that can be done at this time. It would, it seems to me, however, be unwise to claim that much good will be accomplished by this bill. Its influence to accomplish purity in elections is decidedly an indirect influence. I do not pretend to be able to accurately estimate the total number of reports that will be required by this bill. It is something like 20,000.

Reports are required of every candidate and of each candidate before and after the primary election, and before and after the final election. It requires also reports of all committees, associations, and organizations, whether political or not, of all their transactions with reference to money expended or promises given for the purpose of influencing or attempting to influence the result of any such elections. How many such committees there will be or how many candidates in the 435 congressional districts of the country I do not know, nor does anybody else.

Every detail is required to make complete paper record of financial transactions that may effect the result of the elections. I can not imagine how Congress can do any more than is being done under this bill to make publicity possible.

The point that I am trying to make is that it is easy to accomplish publicity, but that we are accomplishing very little toward promoting purity. Under the direct-primary system

it has been commonly and constantly claimed that the rich man has a distinct advantage and the poor man has no chance.

Without having any evidence to offer, I should be unwilling to say as a fact that the political committees and the candidates who have been making reports under this law have not truthfully and accurately reported their expenditures, although I may be permitted to say that from many conversations with many people I have gained the impression that it is generally understood that it is not a difficult thing to make a report as to campaign expenses. If this bill does no more than impress upon the mind of the candidate for Congress the fact that if he inaccurately and untruthfully reports as to his campaign expenses he is a criminal and unfit to take his seat it will perhaps have done much. The crime, however, of violating this act is one that is not easily detected. I can not find that anyone has been convicted of violating this act since its original passage in 1910. From that fact, however, I do not draw the conclusion that many persons have not violated it, and violated it willfully.

I do not know that anything can be done further than is being done to enforce honest obedience to the provisions of this law. But what I am trying to point out is the fact that the law does not, and probably can not, do much to embarrass those who are inclined to purchase public office, for a person so criminally inclined surely can not hesitate to falsely report the amount of his disbursements.

I have no doubt that the vast number of men who are or who have sought to be or who have sought to become Members of the Senate or House of Representatives feel themselves morally bound by the limitations of this law. As to such persons and as to all persons who are mentally honest the law would be sufficient if it merely fixed the limit of disbursement. One of the primary purposes of providing for publicity is to control the acts of those who desire to use more money than that limited, or who desire to use and do use money for corrupt purposes.

This committee has taken the position which is clearly described by its learned chairman in his report, where he says that—

> No attempt is here made, nor in any part of this bill, to limit the expenditure of money used in an effort to reach the judgment of electors. Appeal to the mind and judgment of men by political parties and candidates for political office is commendable and is encouraged by every section and provision of this bill.

The purpose of the bill, as the chairman points out, is to prevent the use of money "to demoralize, corrupt, and debauch the electorate." The root of the evil, therefore, at which this bill with its indirect influence is aiming is the purchased vote. The scheme of the bill by which it attempts to use this indirect influence is to require an accurate account of the collection and distribution of all money by candidates and committees in the hope that in this manner men will be prevented from using money for a corrupt purpose because of the fact that they are required to account for the money. I can not be very optimistic with reference to the curative value of this bill. A person who would use money to buy votes is a criminal. The bill simply requires, therefore, of the criminal who would debauch the electorate that he add to his crime the further and much easier crime of falsely reporting his act.

What I am saying, however, is not any criticism of this bill, which I sincerely hope will pass the House. I merely desire to point out how Congress has the clear duty to deal further with this matter of corrupt practices by reenacting the statute repealed in 1894.

There has grown up in this country a wholesome regard for the Federal criminal laws. Such laws are feared more than the statutes of any of the States. The long arm and the farseeing eye of the Federal Government under such a statute would now go a great way, in my judgment, to persuade men that it is a dangerous thing to attempt to demoralize, corrupt, and debauch the electorate. The repealed statutes were well within the supervisory power of Congress under that provision of the Constitution which I have cited, giving to Congress the right to make and alter regulations affecting the manner of holding elections. The Supreme Court of the United States, in Ex parte Seibold (100 U. S., p. 372), speaking on this subject, says:

> In making regulations for the election of Representatives it is not necessary that Congress should assume entire and exclusive control thereof. By virtue of that clause of the Constitution which declares that "the times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the place of choosing Senators," Congress has a supervisory power over the subject and may either make entirely new regulations or add to, alter, or modify the regulations made by the State.
>
> In the exercise of such supervisory power Congress may impose new duties on the officers of election or additional penalties for breach of duty or for the perpetration of fraud or provide for the attendance of officers to prevent fraud and see that the elections are legally and fairly conducted.
>
> The exercise of such power can properly cause no collision of regulations or jurisdiction, because the authority of Congress over the subject is paramount, and any regulations it may make necessarily supersede inconsistent regulations of the State. This is involved in the power to "make or alter."

Mr. Chief Justice Bradley, in the opinion in that case, uses the following language appropriate to this discussion:

> It is the duty of the States to elect Representatives to Congress. The due and fair election of these Representatives is of vital importance to the United States. The Government of the United States is no less concerned in the transaction than the State government is. It certainly is not bound to stand by as a passive spectator when duties are violated and outrageous frauds are committed.

In Ex parte Yarbrough (110 U. S., 664) the Supreme Court used the following language with reference to the right of Congress to regulate elections at which Members of Congress are chosen:

> Will it be denied that it is in the power of that body to provide laws for the proper conduct of those elections; to provide, if necessary, the officers who shall conduct them and make return of the result, and especially to provide in an election held under its own authority for security of life and limb to the voter while in the exercise of this function? Can it be doubted that Congress can by law protect the act of voting, the place where it is done, and the man who votes from personal violence or intimidation and the election itself from corruption and fraud?
>
> If this be so—and it is not doubted—are such powers annulled because an election for State officers is held at the same time and place? Is it any less important that the election of Members of Congress should be the free choice of all the electors because State officers are to be elected at the same time?
>
> These questions answer themselves; and it is only because the Congress of the United States, through long habit and long years of forbearance, has in deference and respect to the States refrained from the exercise of these powers that they are now doubted.

In James v. Bowman (190 U. S., 127) the Supreme Court held section 5507, Revised Statutes, to be unconstitutional. This section was designed to punish persons who by means of bribery or certain threats should intimidate or prevent the exercise of the right of suffrage to persons protected by the fifteenth amendment to the Constitution. In this case the court, in holding this particular statute unconstitutional, used the following language:

> We are fully sensible of the great wrong which results from bribery at elections, and do not question the power of Congress to punish such offenses when committed in respect to the election of Federal officers.

The interest of the Government, therefore, being of such vital importance, the authority of Congress in the matter being so unquestioned, the existence of the evil of corrupt practice being recognized by the pendency of this bill, is it not a fact that the obligation is on Congress to recognize the evil, to again exercise its authority, and to meet its obligations? [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. FLOOD having taken the chair as Speaker pro tempore, a message from the Senate announced that the Senate had agreed to the amendments of the House to the bill (S. 2845) authorizing the sale of the marine-hospital reservation in Cleveland, Ohio.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 6279. An act for the relief of William Harold Kehoe.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 6279. An act for the relief of William Harold Kehoe; to the Committee on Military Affairs.

PUBLICITY OF CAMPAIGN CONTRIBUTIONS AND EXPENDITURES.

The committee resumed its session.

Mr. MAPES. Mr. Chairman, I yield 10 minutes to the gentleman from Minnesota [Mr. ANDERSON].

Mr. ANDERSON. Mr. Chairman, I am in favor of a uniform corrupt-practice act applied to all of the States in the election of Members of Congress. I think it is unfortunate that while we are dealing with this general subject we are proposing to do it in the wholly inadequate way proposed by this bill. Ordinarily Federal statutes dealing with matters which have formerly been under the jurisdiction of the State legislatures are passed with a view of securing uniformity of laws with respect to the general subject. There are now corrupt-practice acts in many of the States. These acts differ in many essential features. This law would create no uniformity with respect to these laws whatever. It only serves to increase the complications and discriminations which now exist. For instance, as has been stated, in the State of Missouri, represented by the

distinguished chairman of the committee that reports this bill, there is a limit of approximately $600 or $700 in the amount that he can legally expend. This law will in no way affect that, although in those States in which there is now no limitation whatever the candidate will be limited only by the amount specified in this bill. In my own State there is a requirement that a candidate shall report all of his expenditures, including expenditures which are specified in this bill and expenditures which are not specified in this bill.

Mr. COLEMAN. Does the gentleman not think that such a law is a good deal better than the one before us now?

Mr. ANDERSON. I do think so. I have no doubt of that whatever. That is one objection to this bill—it repeals State laws which are better than this bill. The law is in many respects wholly and utterly inadequate.

Mr. MAPES. How does it repeal any State law?

Mr. ANDERSON. I will answer that question. This bill contains on its face a recognition of its own inadequacy. It provides it shall only repeal or supersede State laws in those particulars in which it is in conflict with State laws. The same provision is carried in the existing law, but in the State which I have the honor to represent in part the Attorney General has held that, with respect to the limit and with respect to the statement to be filed under the State law, the present law repeals the State law. I do not know how much further his decision goes, but it goes that far.

Mr. WALSH. Does the gentleman believe Congress can pass a measure——

Mr. ANDERSON. I yield to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Does not this bill expressly provide that the State laws shall be in force as far as they pertain to elections?

Mr. ANDERSON. It does, and so does the present law; but the gentleman is familiar, I think, with the rule of law that where the Federal Government undertakes to deal with a subject it enters that field exclusively, and so the Attorney General has held that it does repeal the sections of our law which requires a full report and which fixes a limit upon the expenditure.

Mr. WALSH. Is the gentleman of opinion that Congress can enact a law which will abrogate State laws pertaining to the election of Members of the House and the Senate?

Mr. ANDERSON. I have no doubt of it whatever.

Mr. RUCKER. Will the gentleman yield?

Mr. ANDERSON. I will.

Mr. RUCKER. If the gentleman will look at section 16 of the bill he will find that it is expressly provided that—

> This act shall not be construed to annul or vitiate the laws of any State, not directly in conflict herewith, relating to the nomination or election of candidates for the offices herein named, or to exempt any such candidate from complying with such State laws.

Mr. ANDERSON. Yes. But it is in conflict with many of the best and most salutary provisions of existing State laws. It requires statements to be filed concerning certain disbursements of the candidate at certain times and in certain places, while the State laws require statements to be filed at other times and at other places, with respect to other and different disbursements of the candidate. It is in conflict with the State law wherever it differs from the State law in its requirements, but as the gentleman has said, because it does not specifically repeal the State law, the candidate, for his own protection, must comply with both, and in those States where statements are required to be filed at other times and places than are specified in this bill, and as to other disbursements, the candidate must keep two separate accounts, and file anywhere from 16 to 24 separate statements of his receipts and expenditures. This is no small task in the middle of a campaign. But I was addressing myself particularly to the fact that this bill does not create uniformity of law with respect to corrupt practices in elections, but, on the contrary, only perpetuates the discriminations which now exist between the different States, and complicates the difficulties of the candidate.

Mr. EMERSON. Will the gentleman yield?

Mr. ANDERSON. I yield.

Mr. EMERSON. As suggested by the chairman of the committee, it does not vitiate any State law, unless directly in conflict with it. Does that pertain to the amount expended? Suppose the amount the State allowed a candidate for Congress to expend was $1,000 or $2,000 and this allows $2,500; would that be construed as being in conflict?

Mr. RUCKER. The gentleman does not state it correctly. The law as it stands now and the language in this bill is that no candidate for Senator or Representative may spend any larger or greater sum than he can lawfully spend under the laws of the State in which he resides, provided that the total amount that he may expend does not exceed $5,000. Now, then, if the State law limits the amount to $10,000, on the face of the law it would be in conflict, and it could be cut down to $5,000, but if the State puts a lower limit than $5,000, the law recognizes the validity of the act.

Mr. ANDERSON. The gentleman from Missouri, of course, will recognize the fact that that is an injustice. There is no reason why a man should be permitted to spend $5,000 in one congressional district because he lives in the State of Minnesota and be limited to $600 because he lives in the State of Missouri.

Mr. RUCKER. I grant the gentleman is right, that there should be uniformity, but the States have acted, and the States have not thus far acted with uniformity. Now, we ought to fix the law so that we invite the States to legislate along the line of this bill and try to bring about a condition which will create uniformity.

Mr. ANDERSON. We have here the power to create uniformity. We are not obliged to wait for the States to conform to the statute we may pass here. We have the power here to create uniformity.

Mr. RUCKER. Well, the gentleman will appreciate this: If the law of my State or yours fixes a certain limitation and Congress puts a higher limitation, and the gentleman or I would say that we spent the money under the authority of a law of Congress, while in the final analysis we might not be amenable under the State law, we would be amenable to the criticism and animadversion of every man who indorses the State law, which would put a gentleman to great disadvantage.

Mr. ANDERSON. I think that when Congress undertakes to deal with a general subject that it ought to deal with the general subject adequately, and if it assumes jurisdiction of a proposition, it ought to assume the jurisdiction to the exclusion of the State. It ought to create, so far as possible, a general uniformity in the law which will put all candidates for the same office on the same footing.

Mr. RUCKER. I want to qualify what I said a little while ago. I feel there should be uniformity just as far as practicable, but, if the gentleman will bear with me, I have heard Members on this floor say that in certain districts in the United States it would be harsh and unjust to put them on the $5,000 limitation for the reason of their having different nationalities in their district, many of whom could not understand the language which the Member speaks, and that he must have printing done in this language and have printing done in that language and printing in some other language in order to reach those people.

Mr. ANDERSON. You do that very thing in this bill. You limit every Member of Congress to $2,500 for the expenses which are specified under the bill. But the fellow who is limited by State laws to a less sum than that is still limited by that law.

Mr. RUCKER. The reason the congressional act put it at $2,500 is because Congress in its judgment thought $2,500 would be sufficient to meet the conditions in any district.

Mr. ANDERSON. I agree with that. This bill is inadequate in many respects. It contains no definition as to what are legal expenditures under the law. In other words, there is no section in this bill which defines the purposes for which a candidate may expend money. He may under this bill hire any number of persons to go out and exercise their influence throughout his district for the purpose of influencing the election without violating any provision of the bill whatever.

He may spend a million dollars for advertising, outside of the newspapers, without violating any section of this bill. He may spend a hundred thousand dollars on speakers and bands without incurring the slightest penalty under its provisions. He may send a telegram to every voter in the congressional district without incurring any penalty under this bill. He may do all of these things without making any account whatever of the expenditure, but if his State law prohibits expenditures for these purposes or limits such expenditures, he is subject to all of the penalties of the laws of the State. This law will not encourage the passage of corrupt practice acts in the States; it only exempts candidates in States which have no corrupt practice act from the penalties to which other candidates in States that have corrupt practice acts are subject. I again repeat, that while we are dealing with this subject we ought to deal with it adequately and in such a way as to put the candidates of all the parties and of all the States upon an equal footing before the law.

Mr. RUCKER. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Ten minutes.

Mr. RUCKER. I yield 10 minutes to the gentleman from Texas [Mr. YOUNG].

Mr. YOUNG of Texas. Mr. Chairman and gentlemen, I had not intended to make a speech on this bill, and I am not going to speak on the merits of the bill, but inasmuch as a moment ago the gentleman from New York [Mr. SANFORD] reviewed at some length the number of votes polled in some of the Southern States, and mentioned particularly the State which I have the honor in part to represent—the great State of Texas—I wish to say the gentleman is not familiar with the conditions in that section of the country. We have laws protecting the ballot there, but our great fight is in the primary election, and if he were to be in Texas a week from next Saturday he would find out whether or not the people of that great State take an interest in their public affairs; because they go to the ballot box almost as one man to express themselves on the issues before the people and on the candidates that are up for nomination. But the nomination in the primary election settles everything in that section of the country. We do not have an opposition ticket at the general election. My district has a population of something like 215,000 people, and polls about 25,000 votes in the primary election. In the general election I have no opposing candidate, and the governor, as a rule, has no opposing candidate, and in my district from 12,000 to 15,000 votes are polled at the general election. Everything is settled at the primary, and hence there is nothing that calls for a general turnout at the general election. And I want to make this suggestion: In the strong Republican districts in the North and the East, I dare say, where the Democratic opposition amounts to nothing, or scarcely nothing, in your primary election you have not a full representation of your citizenship.

Mr. EMERSON. Will you give some of us fellows from the North a few pointers as to how you keep this opposition at the election out?

Mr. YOUNG of Texas. I will tell you about it. When a Republican from the North comes South he finds such a fine bunch of people who are members of the Democratic Party that forthwith he becomes a Democrat.

Mr. MANN. Why do you not send some here?

Mr. YOUNG of Texas. They send enough to take care of the interests of the country on the floor of this House.

I rise, Mr. Chairman, to put this feature of the elections in the South before the House. I say the general turnout is on the primary day and that the ballot boxes are protected by the laws of the various States. Every man has a right to go and has a right to be protected when he goes to the ballot box and casts his vote.

Mr. FOCHT. May I ask the gentleman a question?

Mr. YOUNG of Texas. I want to say to the gentleman from Pennsylvania——

Mr. FOCHT. Will you answer the question?

Mr. YOUNG of Texas. When you say we tax the North, I want to say to you that if you will go into my State——

The CHAIRMAN. Will the gentleman yield?

Mr. FOCHT. I asked whether the gentleman will yield or not.

Mr. YOUNG of Texas. I have the floor.

The CHAIRMAN. The Chair was trying to find out if the gentleman from Texas would yield. Does the gentleman yield?

Mr. YOUNG of Texas. In a moment. If you go to my State, you will find that the steel bridges that cross the streams of my county come from the great State of Pennsylvania, and we pay for them out of the products that we grow in the South—the great cotton crop, that goes to your country to help bless and clothe the people of your section. It is one great country, and we have diverse interests, and we feel that all these interests should be taken care of alike.

Mr. FOCHT. Does that answer my question?

Mr. YOUNG of Texas. I was answering what the gentleman asked a moment ago.

Mr. FOCHT. You just stated a moment ago about how you were going to have those seats filled again with Democrats. May I ask you on the square, my brother and friend, how many Democrats you would have left over there if they were sent here on the basis of the number of votes cast instead of on the basis of population?

Mr. YOUNG of Texas. There would not be a vacant seat on this side, sir.

Mr. FOCHT. Will you yield me a minute further?

Mr. YOUNG of Texas. To ask a question. I am not yielding for a speech.

Mr. FOCHT. You are making a speech and I am asking you questions. I ask you how many Democrats now sit there in defiance, if not in violation, of the Constitution of the United States?

Mr. YOUNG of Texas. Not a single man, and the imputation is unworthy of the gentleman who makes it.

Mr. FOCHT. I refer you to the statistics read by the gentleman from New York [Mr. SANFORD] as my answer.

Mr. RUCKER. Mr. Chairman, while everybody is in a good humor I move that the committee do now rise. [Laughter.]

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. COOPER of Ohio, indefinitely, on account of illness, at the request of Mr. FESS.

To Mr. LINDBERGH, indefinitely, on account of the dangerous illness of his daughters.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 16911. An act making an appropriation for the relief and transportation of destitute American citizens in Mexico.

EXTENSION OF REMARKS.

Mr. BENNET. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of aeronautics, by printing a brief memorandum prepared for me by the Legislative Reference Bureau of the Congressional Library.

The SPEAKER. The gentleman from New York [Mr. BENNET] asks unanimous consent to extend his remarks in the RECORD by printing a memorandum on aeronautics prepared by the Legislative Reference Bureau of the Congressional Library. Is there objection?

Mr. MANN. Considering that we are pretty much in the air, I shall not object. [Laughter.]

The SPEAKER. Is there objection?

There was no objection.

Mr. BEAKES. Mr. Speaker, I ask permission to extend my remarks by printing the speech of the President of the United States before the Salesmen's Convention at Detroit.

The SPEAKER. What speech?

Mr. MANN. Just another campaign speech. [Laughter.]

Mr. BEAKES. The speech of the President before the Salesmen's Convention at Detroit.

The SPEAKER. By printing the speech of the President before the Salesmen's Convention at Detroit. Is there objection?

There was no objection.

Mr. FOCHT. Mr. Speaker, I desire to extend my remarks in the RECORD on the subject of "The birth of a nation."

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks on "The birth of a nation." Is there objection?

There was no objection.

Mr. MATTHEWS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a lecture delivered at Yale University by Mr. W. H. Phipps, of Ohio, late auditor general of the Philippine Islands.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. FOSTER. Reserving the right to object, was this gentleman a Member of Congress?

Mr. MATTHEWS. No. He was auditor of the Philippine Islands.

Mr. FOSTER. I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. GREENE of Massachusetts. I ask unanimous consent, Mr. Speaker, to extend my remarks in the RECORD by printing an article written by Mr. STINESS, of Rhode Island, in regard to the condition of the country after the European war.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD by printing an article written by Mr. STINESS in regard to the condition of the country after the European war. Is there objection?

There was no objection.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 16911. An act making an appropriation for the relief and transportation of destitute American citizens in Mexico.

HOUR OF MEETING TO-MORROW.

Mr. RUCKER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock.

The SPEAKER. The gentleman from Missouri asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock a. m. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. RUCKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Friday, July 14, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on reexamination of harbor of refuge, Grand Marais, Mich. (H. Doc. No. 1286), was taken from the Speaker's table, referred to the Committee on Rivers and Harbors, and ordered to be printed, with illustration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and a joint resolution were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DICKINSON, from the Committee on Ways and Means, to which was referred the bill (S. 5645) for the establishment of Noyes, in the State of Minnesota, as a port of entry and delivery for immediate transportation without appraisement of dutiable merchandise, reported the same without amendment, accompanied by a report (No. 962), which said bill and report were referred to the House Calendar.

Mr. ALLEN, from the Committee on Ways and Means, to which was referred the bill (H. R. 16417) to provide for the exportation of gin in bond in other than original packages, reported the same without amendment, accompanied by a report (No. 963), which said bill and report were referred to the House Calendar.

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (H. R. 386) to create in the War Department and the Navy Department, respectively, a roll designated as the "Civil War volunteer officers' retired list," to authorize placing thereon with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes, reported the same with amendment, accompanied by a report (No. 964), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the joint resolution (S. J. Res. 50) authorizing the Secretary of the Interior to sell the coal deposits in and under certain public lands to the Republic Coal Co., a corporation, reported the same with amendment, accompanied by a report (No. 965), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and a resolution were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr YOUNG of North Dakota, from the Committee on Claims, to which was referred the bill (S. 798) for the relief of Kate Canniff, reported the same with amendment, accompanied by a report (No. 954), which said bill and report were referred to the Private Calendar.

Mr. CAPSTICK, from the Committee on Claims, to which was referred the bill (H. R. 1963) for the relief of John E. Keys, reported the same with amendment, accompanied by a report (No. 955), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (S. 3533) for the relief of Mike G. Womack, reported the same with amendment, accompanied by a report (No. 956), which said bill and report were referred to the Private Calendar.

Mr. CAPSTICK, from the Committee on Claims, to which was referred the bill (H. R. 15797) for the relief of Charles L. Schroeder, reported the same with amendment, accompanied by a report (No. 957), which said bill and report were referred to the Private Calendar.

Mr. YOUNG of North Dakota, from the Committee on Claims, to which was referred the bill (H. R. 5020) for the reimbursement of Horace M. Blunt for the loss of a horse while hired by the United States Geological Survey, reported the same without amendment, accompanied by a report (No. 958), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 2205) for the relief of Robert T. Legge, reported the same without amendment, accompanied by a report (No. 959), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 12240) for the relief of John Brodie, reported the same without amendment, accompanied by a report (No. 960), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 2210) for the relief of James Diamond for horse lost while hired by the United States Forest Service, reported the same without amendment, accompanied by a report (No. 961), which said bill and report were referred to the Private Calendar.

Mr. SWIFT, from the Committee on Claims, to which was referred the bill (H. R. 12204) to authorize the Secretary of the Treasury to audit and adjust certain claims of the city of New York to the Court of Claims, reported in lieu thereof H. Res. 305, accompanied by a report (No. 966), which said resolution and report were referred to the Private Calendar.

ADVERSE REPORTS.

Under clause 2 of Rule XIII, adverse reports were delivered to the Clerk and laid on the table, as follows:

Mr. CAPSTICK, from the Committee on Claims, to which was referred the bill (H. R. 13294) for the relief of Henry Hotchner, reported the same adversely, accompanied by a report (No. 967), which said bill and report were laid on the table.

Mr. SWIFT, from the Committee on Claims, to which was referred the bill (H. R. 8781) for the relief of William E. Horton, reported the same adversely, accompanied by a report (No. 968), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill (H. R. 9076) for the relief of Alfred Sjostrom, reported the same adversely, accompanied by a report (No. 969), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill (H. R. 9036) for the relief of Sidney G. Sherwood, reported the same adversely, accompanied by a report (No. 970), which said bill and report were laid on the table.

Mr. CAPSTICK, from the Committee on Claims, to which was referred the bill (H. R. 13017) for the relief of M. Elizabeth Rochford, reported the same adversely, accompanied by a report (No. 971), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill (H. R. 5040) for the relief of John M. Dimmick, reported the same adversely, accompanied by a report (No. 972), which said bill and report were laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. SIEGEL: A bill (H. R. 16971) to provide for the promotion of vocational education; to provide for cooperation with the States in the promotion of such education in agriculture, the trades, commerce, industries, and home economics; to provide for cooperation with the States in the preparation of teachers and supervisors of vocational subjects; and to appropriate money and regulate its expenditure; to the Committee on Education.

By Mr. CASEY: A bill (H. R. 16972) to enlarge, extend, remodel, and improve the public building at Wilkes-Barre, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. MOORE of Pennsylvania: A bill (H. R. 16973) fixing the rate of pay of compositors and bookbinders in the Government Printing Office; to the Committee on Printing.

By Mr. SWIFT [from the Committee on Claims]: Resolution (H. Res. 305) referring the bill (H. R. 12204) to authorize the Secretary of the Treasury to audit and adjust certain claims of the city of New York to the Court of Claims; to the Committee of the Whole House.

By Mr. LINDBERGH: Joint resolution (H. J. Res. 264) authorizing a joint committee to investigate certain representations relative to Roman Catholic organizations; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. BURKE: A bill (H. R. 16974) for the relief of John L. Kelley; to the Committee on Military Affairs.

By Mr. CASEY: A bill (H. R. 16975) granting an increase of pension to Mrs. Dolly Russell; to the Committee on Invalid Pensions.

By Mr. DRUKKER: A bill (H. R. 16976) granting an increase of pension to Annie E. Post; to the Committee on Invalid Pensions.

By Mr. EMERSON: A bill (H. R. 16977) to authorize the President to reinstate Guy H. B. Smith, formerly captain, Fourth United States Infantry, in the Army; to the Committee on Military Affairs.

By Mr. GARD: A bill (H. R. 16978) granting an increase of pension to Elizabeth Kyle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16979) granting a pension to Patrick H. Madigan; to the Committee on Pensions.

By Mr. HULBERT: A bill (H. R. 16980) for the relief of Edward N. Carr; to the Committee on Military Affairs.

By Mr. KENNEDY of Iowa: A bill (H. R. 16981) granting an increase of pension to Andrew Reed; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16982) granting an increase of pension to Christian Lock; to the Committee on Invalid Pensions.

By Mr. McGILLICUDDY: A bill (H. R. 16983) granting an increase of pension to Arvesta M. Conrey; to the Committee on Invalid Pensions.

By Mr. POWERS: A bill (H. R. 16984) granting an increase of pension to John W. Cook; to the Committee on Pensions.

Also, a bill (H. R. 16985) granting an increase of pension to Daniel Smiley; to the Committee on Pensions.

By Mr. PRICE: A bill (H. R. 16986) for the relief of the heirs of William E. Bradshaw; to the Committee on Claims.

Also, a bill (H. R. 16987) for the relief of the heirs of Elijah Evans; to the Committee on Claims.

By Mr. RUBEY: A bill (H. R. 16988) granting an increase of pension to Bentley Briant; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of citizens of Lincoln County, Mo., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, (by request), petition of Delaware Branch of the Congressional Union for Woman Suffrage, favoring amendment for woman suffrage; to the Committee on the Judiciary.

By Mr. CURRY: Memorial of Admiral R. D. Evans Camp, No. 33, United States Spanish War Veterans, of Sacramento, Cal., favoring Nolan minimum-wage bill; to the Committee on Labor.

By Mr. DALE of New York: Petition of William Fox, of New York City, against tax on theaters; to the Committee on Ways and Means.

Also, petition of the National Security League, relative to military training in public schools; to the Committee on Education.

Also, memorial of Delaware Branch of Congressional Union for Woman Suffrage, relative to amendment for woman suffrage; to the Committee on the Judiciary.

By Mr. FLYNN: Petition of William Fox, of New York City, against bill to tax theaters; to the Committee on Ways and Means.

By Mr. KENNEDY of Rhode Island: Petition of Mrs. Caroline McDowell, of Providence, R. I., favoring amendment for woman suffrage; to the Committee on the Judiciary.

By Mr. LINTHICUM: Petition of Edward J. Rosenstein, Baltimore, Md., favoring bill for Federal censorship of motion pictures; to the Committee on Education.

By Mr. MATTHEWS: Evidence supporting House bill 16928, to grant a pension to Michael Levi; to the Committee on Pensions.

By Mr. O'SHAUNESSY: Petition of Alfred G. Langley, Newport, R. I., relative to location of power plant in Washington, D. C.; to the Committee on the District of Columbia.

Also, petition of Rhode Island Bankers' Association, relative to amendments of Federal reserve act; to the Committee on Banking and Currency.

Also, memorial of the Providence Chamber of Commerce, favoring appropriation for aero coast-patrol system; to the Committee on Naval Affairs.

By Mr. RAKER: Protests of Francis Carr and Roscoe J. Anderson, of Redding, and California Producers' Association, of San Francisco, Cal., against further tax on copper and copper industry; to the Committee on Ways and Means.

Also, protests by Dudley V. Saeltzer and W. J. Harrington, chairman Democratic County Central Committee, of Redding, Cal., against further tax on copper and copper industry; to the Committee on Ways and Means.

By Mr. TIMBERLAKE: Petition of sundry citizens of Colorado, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

SENATE.

FRIDAY, *July 14, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thy name is above every name. We desire Thee above all the earth. Thou hast brought to us the rich and manifold ministries of Thy grace. Thou dost hold us in Thy hand. We desire Thy favor above all the favor of men. We would work into all the institutions of our land the will and the purpose of God. Every thought to usward has been a thought of love and of protection and of fatherly mercy. We bless Thee that to-day our lives are in Thy hands and the destiny of our great Nation is in Thy keeping.

We pray that this day Thou wilt guide us in the way of truth. Guard us from every evil thing. May the full expression of our lives be the going forth of the influence and power of Thy truth and Thy spirit in us that we may maintain the high ideals given to us by our fathers who received them as they supplicated the throne of the heavenly grace.

Guide us this day. Forgive our sins. For Christ's sake. Amen.

THE JOURNAL.

On request of Mr. GALLINGER, and by unanimous consent, the reading of the Journal of the proceedings of the legislative day of Friday, July 7, 1916, was dispensed with and the Journal was approved.

CALLING OF THE ROLL.

Mr. TILLMAN. Mr. President, I note the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Brady	Gallinger	Overman	Taggart
Brandegee	Hollis	Owen	Thomas
Bryan	Johnson, S. Dak.	Shafroth	Tillman
Chamberlain	Jones	Sheppard	Underwood
Chilton	Kenyon	Simmons	Wadsworth
Clarke, Ark.	Kern	Smith, Ga.	Warren
Culberson	La Follette	Smith, S. C.	Williams
Curtis	Lodge	Smoot	Works
Dillingham	Martin, Va.	Sterling	
Fletcher	Oliver	Swanson	

The VICE PRESIDENT. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. ASHURST, Mr. GRONNA, Mr. RANSDELL, Mr. SAULSBURY, Mr. SHERMAN, and Mr. TOWNSEND answered to their names when called.

Mr. CHAMBERLAIN. I desire to announce that my colleague [Mr. LANE] is detained from the Senate by illness.

Mr. TOWNSEND. I desire to announce the absence of the senior Senator from Michigan [Mr. SMITH] and to state that he is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

Mr. NELSON, Mr. BORAH, Mr. MCCUMBER, Mr. HARDWICK, Mr. LEE of Maryland, Mr. VARDAMAN, and Mr. PITTMAN entered the Chamber and answered to their names.

Mr. VARDAMAN. I wish to announce that the Senator from Tennessee [Mr. SHIELDS] is absent on important business and that the Senator from Montana [Mr. MYERS] is detained on account of illness.

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present.

WORKMEN'S COMPENSATION.

The bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes, was read twice by its title.

The VICE PRESIDENT. The bill will be referred to the Committee on the Judiciary.

Mr. SMITH of Georgia. I think the bill should be referred to the Committee on Education and Labor. We have a current bill exactly like it before that committee, and a subcommittee has already been appointed and is at work upon it.

The VICE PRESIDENT. If there is no objection, the bill will go to the Committee on Education and Labor.

PERSONAL EXPLANATION—WORK OF THE SESSION.

Mr. GALLINGER. Mr. President, I desire to occupy the attention of the Senate a very brief time in the nature of a question of privilege. In the Washington Post of July 13 I find this language:

> Yesterday morning Senators GALLINGER, TOWNSEND, HARDING, CLARK, and CUMMINS, representing the Republican conference committee, conferred with the Democratic steering committee over the proposed legislative program for the remainder of the session as adopted by the majority. The minority proposed that the session be brought to a close after the remaining appropriation bills and the shipping and revenue bills have been acted upon.
>
> The majority was not willing to stop with this legislation, but there was accord between both sides on the desire to get away as speedily as possible. The majority will insist upon passage of the corrupt-practices bill before adjournment, and the Republicans probably will not hold out against it. The majority was told, however, that if it insisted upon proceeding with child labor, workmen's compensation, and the immigration bills, the session would drag on until October.
>
> Republican members of the conference gave assurances that there would be no filibuster against either the shipping or the revenue bills. They will be discussed at considerable length. Republicans will oppose both, offer substitutes, and make their partisan position clear, but when that is done they said the measures would be permitted to come to a vote.
>
> EXPEDITES ARMY AND NAVY BILLS.
>
> This conclusion of the minority will tend to hasten consideration of the Army and Navy bills. The sentiment in the Senate is strong for a large Navy and a substantial provision for the Army. If there is any delay in connection with these preparedness bills, it will not come from their advocates.
>
> The Democrats are particularly anxious to put their corrupt-practices bill through, because they fear the Republicans are due to receive very large campaign contributions from certain special interests. This they want to prevent, not only in the interest of clean politics, but of the success of the Democratic ticket. A conference will be held later on legislation not included in yesterday's agreement, but it is not believed that anything but the matters agreed upon and, perhaps, the corrupt-practices bill will receive attention before adjournment. All conservation measures go over until next session.

Mr. President, in some particulars the statements contained in this newspaper are correct and in others they are not. In behalf of the minority I want to say frankly and without equivocation, representing, I believe, every Senator on this side of the Chamber, that we have not at any time suggested that we would oppose further legislation to that on the program which is set out in this newspaper article. We on this side of the Chamber are anxious to get through the session, as our Democratic friends are anxious to get through, as speedily as possible, but I want to say it was distinctly understood at that conference that the Democratic majority, who are responsible for the legislation of this session, would not be unduly obstructed in any action they might take if they felt that it was their duty to bring up either the child-labor bill, the immigration bill, or the workmen's compensation bill, which has just been laid before the Senate, having passed the House of Representatives yesterday. The minority, and I speak advisedly, are anxious that the child-labor bill, the immigration bill, and the workmen's compensation bill shall be considered at this session of Congress, but the burden for that legislation rests upon the majority and not upon the minority, as the minority is powerless to force any measure for consideration that the majority opposes, they having the votes and the power to dictate what shall be considered and what shall not be considered.

Mr. SMITH of Georgia. And the bill for national aid to vocational education.

Mr. GALLINGER. I am sure the minority will not oppose as good a bill as that if the majority think it desirable to bring it before the Senate, but we will, to the extent of our ability, aid in its passage if opportunity offers.

Mr. President, what I want particularly to say is that the minority do not propose to be put in the position of obstructing legislation at this session. We have not done so and have no disposition to do so. We would prefer not to remain here all summer. Some of us feel that we are entitled to a little vacation, but, as I said a moment ago, the program of legislation is not in our hands; it is in the hands of the majority of the Senate, and whatever they conclude is wise to do they will find the minority ready to cooperate with them, provided the proposed legislation is in the interest of the public welfare.

I will repeat, Mr. President, that the minority are warmly in favor of the child-labor bill; most of us are warmly in favor of the immigration bill, which I have heretofore advocated, and which I propose to advocate and vote for whenever I have an opportunity to do so. I think I can also truthfully say that we are substantially all in favor of the workmen's compensation bill, and we will not oppose the bill to which the Senator from Georgia has called attention. That the minority may not be misrepresented, speaking for them with some degree of authority, I say, Mr. President, it is our desire to cooperate with the majority and pass all the good legislation that it is possible for us to pass at this session and then adjourn.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Colorado?

Mr. GALLINGER. I yield to the Senator.

Mr. THOMAS. If the majority should determine to bring up the proposed constitutional amendment for equal suffrage, would the Senator, as representing the minority, give assurance that his side of the Chamber would support that measure also?

Mr. GALLINGER. I will give assurance that the Senator from New Hampshire will support it heartily; but I can not give assurance for my associates regarding that most excellent measure.

Now, Mr. President, I have said about all I care to say. I wanted to put this matter fairly, squarely, and honestly before the Senate and the country, and I trust that the newspapers which, whether they are inspired to make such statements or not, are constantly representing the minority as purposing to do certain things that they never contemplated doing will refrain from further statements along that line. Day after day it has been stated that the minority was determined to filibuster against the shipping bill, while it was never contemplated that we should do that. All we have claimed was that we ought to have the right to discuss that measure, and all other important measures, thoroughly and at sufficient length to represent to the country our views on the questions involved. That we shall insist on, but beyond that we do not propose to go.

Mr. SMOOT. Mr. President, I merely wish to occupy a moment. I wish to make another correction of a statement that has appeared in the public prints; and it is a correction which I think needs to be made.

I noticed in the speech delivered by the President on July 10, at Detroit, Mich., if the newspaper reports are correct, in referring to the Federal reserve act the President made this statement:

> And the very men who opposed that act, and opposed it conscientiously, now admit that it saved the country from a ruinous panic when the stress of war came on.

Mr. President, that statement has been repeated so many times in Democratic newspapers, on public platforms, and by stump speakers that some of the people of the United States no doubt are beginning to believe it. I do not think that there is a Senator who believes it. I am sure the Secretary of the Treasury does not believe it, and to prove this I call attention to the statement found in the annual report of Secretary McAdoo for the fiscal year 1914 upon this very question. He states in that report:

> The outbreak of the European war precipitated many grave problems. * * * It is a tribute to the economic strength and soundness of the country and to the patriotism of its people in every class and walk of life that the shock has been so admirably withstood. * * * This has been accomplished notwithstanding the fact that the Federal Reserve System authorized by the act of December 23, 1913, was at that time only in process of formation, and was therefore unable to render any service in the situation.

Mr. President, what really did take place and what really prevented the panic was the issue of nearly $400,000,000 of the Aldrich-Vreeland emergency currency. I think the time has come when statements such as made by the President, if it be true that he made it, ought to be corrected, and to hereafter cease, for it is not correct. It was months and months, Mr. President, after the Federal reserve act was in operation and its organization was effected that the Aldrich-Vreeland emergency currency was withdrawn from circulation. There is not a Senator who does not know that there were four hundred millions of dollars of this currency put in circulation, and the issuing of this vast sum is what prevented the threatened panic referred to by the President.

The currency issued under the Aldrich-Vreeland Act prevented the panic that would certainly otherwise have come and no doubt would have been the most disastrous in the history of our country.

In that connection, Mr. President, I am loath to take the time of the Senate, and so I ask to include, without reading it, an editorial found in the Philadelphia Inquirer of July 12, as a part of my remarks. It is very brief; it discusses this subject.

The VICE PRESIDENT. Without objection, permission to do so will be granted.

The editorial referred to is as follows:

WHAT PREVENTED A PANIC IN 1914.

In his address before the Detroit Athletic Club on Monday Mr. Wilson remarked that the very men who had most earnestly opposed the enactment of the Federal reserve law now admit that it saved the country from a ruinous panic at the outbreak of the war. It is surprising that the President should reiterate a statement which, although it has been frequently made by Democratic stump speakers and party organs, has absolutely no foundation in fact. As to the merits of the Federal Reserve System as it has been established, there is still a wide divergence of disinterested and intelligent opinion. Its best features were derived from the report made by Chairman Aldrich of the Monetary Commission, a body appointed under a Republican administration whose recommendations were based on an exhaustive investigation of financial conditions both in this country and in Europe. But the plan which a Democratic Congress adopted deviated in some important respects from the Aldrich measure, and the best opinion is that the changes which it embodied were nearly all for the worse.

Thus far the Federal Reserve System is on trial and its practical value can not as yet with any assurance be determined. Experience has already shown that in various important respects it needs amendment and that its operations are effecting an inflation of the currency whose ultimate consequences, should it be permitted to continue, are recognized by expert observers as occasion for serious concern. Yet its importance as a piece of constructive legislation may be acknowledged, and it is natural that the Democrats, who have so little legislation of that character to record, should take great credit to themselves for enacting the Federal reserve law, even though they did derive the fundamental idea of it from a Republican source. They at least proved thereby that they knew a good thing when they saw it, which for them is a very infrequent demonstration.

But whatever may be the value of the Federal reserve banking system, and whatever good may through its instrumentality have been accomplished, it won't do to credit it with having saved the country from a panic at the beginning of the war, and the reason why such a claim is inadmissible is as simple as it is conclusive. The reason is that when the war broke out the Federal reserve banks had not yet begun to do business. It was not until November, 1914, that the new financial system went into operation, and panic was averted by an agency with which neither the Democratic Party nor the Wilson administration had any connection.

What saved the situation in August, 1914, was the Vreeland-Aldrich law, enacted soon after the crisis of 1907, which authorized the issue of national-bank notes on collateral other than United States bonds. The Federal reserve law had nothing whatever to do with it.

Mr. SHAFROTH. Mr. President, I want to say just a few words with relation to this matter. The Federal reserve act was passed in December, 1913, and it is my contention that from that very day the confidence of the people was reestablished in the banks. They anticipated that the act would take effect, that the right to discount paper at the Federal reserve banks would soon exist, and that the right to issue money by the Federal reserve banks upon the paper discounted would also exist. An entirely different feeling began to prevail all over the United States from the day the President put his signature to that bill. It therefore seems to me that the passage of the Federal reserve act did cut an important figure at that time in preventing a panic. It is true that emergency currency was then issued, because, although the members of the Federal Reserve Board had been appointed at the time of the crisis, the Federal reserve banks had not been established. However, Mr. President, from the time that bill was passed an entirely different feeling as to the solvency of the banks and the manner in which they could meet the demands of their depositors began to be apparent in the entire United States. That, it seems to me, had a great deal to do with preventing any panic, because panics, as a general rule, come about by reason of the fear upon the part of depositors that they can not get their money out of the banks.

Mr. McCUMBER. Mr. President, will the Senator tell me, then, if there was such wonderful confidence, why it became necessary to inflate the currency by calling upon the emergency-currency law for nearly $500,000,000?

Mr. SHAFROTH. I will state that there was an extraordinary condition, the most extraordinary that the American people ever faced, incident to the breaking out of the European war; but the fact is that the people were willing to keep their money in the banks; and the records will show that deposits in the various banks increased from the very day the Federal reserve act was passed. Yet, notwithstanding that, the extraordinary war conditions did produce a feeling that there had to be more currency. Suddenly there was no market whatever for many products. The holders of notes secured by such products began to demand payment, and hence more money was needed. The emergency-currency act had been in existence for years, but had never been invoked, or at least there never had been confidence that the Government of the United States would follow it up with such a measure as the Federal reserve act; but the Secretary of the Treasury had advocated practically a similar principle of emergency currency in the Federal reserve act, and urged the issuance of as much money as was needed. It seems to me that that was the reason why the people were willing to keep their funds in the banks, and thereby prevent a panic.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. SHAFROTH. Yes.

Mr. BRANDEGEE. Mr. President, I call for the regular order.

The VICE PRESIDENT. The regular order is demanded. Petitions and memorials are in order.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6057) to amend section 14 of the reclamation extension act, approved August 13, 1914.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 449) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ALEXANDER, Mr. BURKE, and Mr. GREENE of Massachusetts, managers at the conference on the part of the House.

PETITIONS AND MEMORIALS.

Mr. SHEPPARD presented a petition of the Commercial Club, of Cuero, Tex., praying for an appropriation for the construction of a military highway from the Atlantic to the Pacific coasts, which was referred to the Committee on Military Affairs.

He also presented the memorial of Joel M. Coward, of Lufkin, Tex., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. SAULSBURY presented petitions of sundry citizens of Delaware, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. WORKS presented a memorial of the Miners and Homesteaders' Protective League, of Los Angeles, Cal., remonstrating against the passage of the so-called oil-land-leasing bill, which was ordered to lie on the table.

Mr. HOLLIS presented a petition of sundry citizens of Charlestown, N. H., praying for the passage of the so-called Ashbrook widows' pension bill, which was ordered to lie on the table.

Mr. PHELAN presented a petition of the Central Labor Union of San Mateo County, Cal., praying for the enactment of legislation to grant pensions to civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented petitions of sundry citizens of California, praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which were ordered to lie on the table.

Mr. CURTIS presented a memorial of the Western States Negro Republican Conference, held at Kansas City, Mo., remonstrating against alleged race discrimination in the Army, which was referred to the Committee on Military Affairs.

Mr. WEEKS presented petitions of sundry citizens of Massachusetts, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of J. Wiley Edmands Camp, Sons of Veterans, of Newtonville, Mass., praying for an increase in armaments, which was ordered to lie on the table.

He also presented a petition of the Massachusetts Congregational Conference, held at Cambridge, Mass., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Springfield, Mass., praying for the enactment of legislation providing for a reclassification of the employees of the Bureau of Animal Industry, which was referred to the Committee on Agriculture and Forestry.

Mr. KERN. I desire to present a letter in the nature of a petition received from the chairman of the legislative department of the General Federation of Women's Clubs. It pertains to the workmen's compensation bill, which is now pending in the Senate, and I will ask that it be read.

There being no objection, the letter was read and referred to the Committee on Education and Labor, as follows:

GENERAL FEDERATION OF WOMEN'S CLUBS, 1914–1916,
Pittsburgh, Pa., July 7, 1916.

Senator JOHN W. KERN,
Washington, D. C.

MY DEAR SIR: It is my duty, as well as my pleasure, to inform you that the General Federation of Women's Clubs in recent biennial session assembled, at which there were present thousands of delegates from all parts of the Union, representing an organization of more than 2,000,000 women, passed a resolution favoring the passage of the Kern-McGillicuddy bill (S. 5975) which provides for a much wider application of compensation to employees of the United States Government than is possible under the existing workmen's compensation law.

After a careful study of the proposed bill and a comparison with similar acts now in force in 32 of our States and two Territories, we believe that this is a wise and equitable measure and should be passed.

In advocating this law I desire to say that the General Federation of Women's Clubs urges the passage of but few bills, and then only after the most careful consideration.

We hope you will use your best endeavors to secure the passage of this measure at an early date.

Very respectfully, yours,

LUCY DORSEY IAMS,
Chairman Department Legislation.

REPORTS OF COMMITTEES.

Mr. HARDING, from the Committee on Claims, to which was referred the bill (H. R. 2052) for the relief of the estate of William D. Allen, reported it without amendment and submitted a report (No. 668) thereon.

Mr. WADSWORTH, from the Committee on Claims, to which was referred the bill (S. 3681) for the relief of the owners of the steamship *Esparta*, reported it with an amendment and submitted a report (No. 667) thereon.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, submitted a report (No. 666), accompanied by a bill (S. 6625) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls, which bill was read twice by its title.

Mr. OVERMAN, from the Committee on the Judiciary, to which was referred the bill (H. R. 3690) repealing certain sections contained in the urgent deficiency act, approved December 22, 1911, asked to be discharged from its further consideration and that it be referred to the Committee on Military Affairs, which was agreed to.

Mr. SMITH of Maryland. From the Committee on Appropriations I report back with amendments the bill (H. R. 15774) making appropriations to provide for the expenses of the Government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes, and I submit a report (No. 669) thereon. I desire to say that I shall endeavor to bring up the bill at the first opportunity.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FLETCHER:

A bill (S. 6626) to fix the rate of pay for compositors and bookbinders in the Government Printing Office; to the Committee on Printing.

A bill (S. 6627) providing for a site and building at Arcadia, Fla.; to the Committee on Public Buildings and Grounds.

A bill (S. 6628) granting a pension to Rebecca A. Beery; to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 6629) to consolidate certain forest lands within the Cache National Forest, Utah; to the Committee on Public Lands.

By Mr. SHEPPARD:

A bill (S. 6630) to prevent usury, provide penalties for its violation, and for other purposes; and

A bill (S. 6631) to amend section 5197, Revised Statutes of the United States, regulating the rate of interest which may be charged by national banking associations, and to raise revenue; to the Committee on Banking and Currency.

By Mr. CHILTON:

A bill (S. 6632) to give the District Court of the United States for the Northern District of West Virginia jurisdiction to determine the joint and several claims of the Kanawha Packet Co. and W. E. Roe against The United States; to the Committee on the Judiciary.

A bill (S. 6633) granting an increase of pension to Oscar N. Greer (with accompanying papers);

A bill (S. 6634) granting an increase of pension to Lucinda A. Perine (with accompanying papers);

A bill (S. 6635) granting an increase of pension to Rebecca J. Free (with accompanying papers); and

A bill (S. 6636) granting an increase of pension to David Wilhelm (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

(By request.) A bill (S. 6637) for the division of general or special taxes assessed against a parcel or parcels of land in the District of Columbia subdivided; to the Committee on the District of Columbia.

A bill (S. 6638) for the relief of James S. Huntington; to the Committee on Military Affairs.

By Mr. SAULSBURY:

A bill (S. 6639) granting an increase of pension to Charles W. Stigers; to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 6640) granting an increase of pension to Henry W. Gash; to the Committee on Pensions.

By Mr. HARDING:

A bill (S. 6641) for the relief of the Ohio Building & Loan Co., of Columbus, Ohio; to the Committee on Claims.

By Mr. TAGGART:

A bill (S. 6642) granting an increase of pension to Asa Bailey (with accompanying papers);

A bill (S. 6643) granting an increase of pension to Jonathan Yarian (with accompanying papers);

A bill (S. 6644) granting an increase of pension to Emma P. Reynolds (with accompanying papers);

A bill (S. 6645) granting an increase of pension to John C. Leonard (with accompanying papers);

A bill (S. 6646) granting an increase of pension to William Henry Fox;

A bill (S. 6647) granting an increase of pension to William W. Fraim (with accompanying papers);

A bill (S. 6648) granting an increase of pension to Joel Williams (with accompanying papers); and

A bill (S. 6649) granting a pension to Mary B. Orner; to the Committee on Pensions.

By Mr. MARTIN of Virginia:

A bill (S. 6650) to provide for preserving the list of the Commissary General of prisoners of war, or record of deaths of prisoners of war, 1861 to 1865, in the office of The Adjutant General, United States Army, Washington, D. C., and printing the same as a public document (with accompanying papers); to the Committee on Military Affairs.

By Mr. CURTIS:

A bill (S. 6651) granting an increase of pension to Johiel Bowers (with accompanying papers); and

A bill (S. 6652) granting an increase of pension to Evaline Washington (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH:

A bill (S. 6653) granting a pension to Kathryn C. Sterling (with accompanying papers); to the Committee on Pensions.

By Mr. BRYAN:

A bill (S. 6654) to validate a patent to certain lands heretofore issued to the State of Florida, to allow the said State to claim certain other lands, and for other purposes; to the Committee on Public Lands.

By Mr. THOMAS:

A bill (S. 6655) for the relief of Ella W. Denison, administratrix of the estate of Charles Denison, deceased; to the Committee on Claims.

EMPLOYMENT OF FEDERAL PRISONERS.

Mr. SMITH of Georgia. I send to the desk a proposed joint resolution authorizing the appointment of a special joint commission of the Senate and House of Representatives to investigate the employment of Federal prisoners. I ask that it be referred to the Committee on the Judiciary, and I also ask that it be printed in the RECORD.

The joint resolution (S. J. Res. 151) authorizing the appointment of a special joint commission of the Senate and House of Representatives to investigate the employment of Federal prisoners in industrial occupations for the benefit of the Government of the United States was read the first time by its title and the second time at length, as follows:

Resolved, etc., That a special joint commission to be composed of two Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is hereby created for the purpose of ascertaining:

1. To what industrial occupations the Federal prisoners of the Government of the United States can be most advantageously employed.

2. To what articles of manufacture now being used or in contemplation of use by the Government such prison labor is best adapted.

3. The extent to which the Government should engage in such industrial activities for the sole use and benefit of the Government.

4. The extent of the competition of such activities on the part of the Government with free labor in the country.

5. The feasibility and justice of compensation to Federal prisoners or their dependents while incarcerated in said prisons out of any profits that may accrue to the Government from such industrial activities.

6. The cost of installing the necessary machinery and the other equipment necessary to carry on such enterprises in said prisons.

That said special joint commission shall make said investigation during the interim of the adjournment of the present session of Congress and the convening of the second session of this Congress, filing its report not later than the second Monday in December next.

For the necessary expenses incident to the investigation aforesaid not to exceed $5,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended on vouchers approved by the chairman of the joint commission.

Mr. SMITH of Georgia. In connection with the joint resolution I present a letter from the Attorney General explaining the fact that the present employment will cease in the near future. The letter is very brief, and I ask that it be printed in the RECORD and referred, with the joint resolution, to the Committee on the Judiciary.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter referred to is as follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., July 13, 1916.

Hon. HOKE SMITH,
United States Senate.

DEAR SENATOR: The need for some organized plan by which the prison labor at the Atlanta and Leavenworth Penitentiaries may be utilized will confront us in a very few months. The construction of dormitories and other buildings at the penitentiaries will be largely completed within that time, and some 2,500 or 3,000 men heretofore employed on such work will be idle.

I have called this situation to the attention of Congress in my last annual report and have conferred with you and other friends in both Houses in regard to the necessity for as early action by Congress as possible. Bills have been introduced in both Houses intended to meet the situation, but it now appears that they will likely not be passed at the present session.

My department has devoted a large amount of time to a consideration of these problems, has accumulated a great deal of data, and is prepared to furnish Congress with all the details whenever called upon, and I earnestly hope that a joint resolution may be passed which will provide for a small committee of both Houses to consider before Congress meets in December the bills and data in my possession and determine the best methods to be pursued for facilitating the passage of the legislation during the short term.

This problem is one of very greatest importance, and I hope that the committee, if provided for, will be prepared by the time mentioned to approve measures which will make the penitentiaries largely self-supporting. The main purpose at this time is to have a legislative investigation made and the proposed committee ready to submit its matured views by December.

I have written Congressman HOWARD a similar letter, urging this course on him, and am sure he will be glad to cooperate with you in securing the passage of the joint resolution.

Respectfully,

T. W. GREGORY,
Attorney General.

The VICE PRESIDENT. The joint resolution and accompanying paper will be referred to the Committee on the Judiciary.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. CHAMBERLAIN (for Mr. LANE) submitted an amendment authorizing the Secretary of the Navy to secure a suitable site on the Columbia River, Oreg., for the construction of a submarine and torpedo boat base, etc., intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

Mr. JONES submitted an amendment proposing to appropriate $5,838.36 for the payment to Simon M. Preston, of Seattle, Wash., being the amount of defalcation of D. C. Kearns, a deputy collector, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. SWANSON submitted an amendment providing that hereafter the Chief of Ordnance, Inspector General, Judge Advocate General, Adjutant General, Chief Signal Officer shall have the rank, pay, and allowances of a major general, intended to be proposed by him to the Army appropriation bill (H. R. 16460), which was ordered to lie on the table and be printed.

Mr. NORRIS submitted an amendment providing for a permanent international court of arbitration, intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

THE REVENUE.

Mr. LODGE submitted an amendment intended to be proposed by him to the bill (H. R. 16763) to increase the revenue, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

WITHDRAWAL OF PAPERS—ELIZA BRACELIN.

On motion of Mr. JONES (for Mr. SMITH of Michigan), it was

Ordered, That the papers accompanying the bill S. 2151, Sixty-first Congress, granting a pension to Eliza Bracelin, be withdrawn from the files of the Senate, no adverse report having been made thereon.

TRADE AGREEMENTS ABROAD.

Mr. BRANDEGEE. Mr. President I have here a copy of Senate Document No. 491, Sixty-fourth Congress, first session, which was ordered printed by the Senate the other day, containing the response of the President to Senate resolution No. 220 in relation to certain alleged foreign-trade agreements. The resolution as it was passed by the Senate simply called for information upon such trade agreements as were made by the so-called allies abroad, the entente powers. I think it will be of equal value for the Senate to have information concerning any other trade agreements executed or contemplated by the other powers of Europe.

I therefore send to the desk a resolution, and ask that it may be read and referred to the Committee on Foreign Relations. I would ask action upon it this morning, but the chairman of the Committee on Foreign Relations is not here, I understand. Therefore I ask that it may be referred to the committee.

The resolution (S. 230) was read, as follows:

Resolved, That the President of the United States be, and hereby is, requested to ascertain and send to the Senate at the earliest practicable moment exact information, so far as may be possible, as to the precise character, form, and full purpose of any agreement, policy, or treaty contemplated, suggested, or made by the so-called Teutonic central powers of Europe in relation to economic policies in international commerce after the war, with a view of disclosing to the Senate whether, and to what extent, neutral nations, and especially the United States, may be affected thereby.

The VICE PRESIDENT. The resolution will be referred to the Committee on Foreign Relations.

WATERS OF THE PLATTE RIVER.

Mr. HITCHCOCK. I submit a resolution, which I ask to have read.

The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution (S. Res. 229), as follows:

Resolved, That the Secretary of the Interior be directed to inform the Senate to what extent the waters of the Platte River that would naturally be available for irrigating crops at this season of the year in western Nebraska as far east as Kearney have been impounded in the Pathfinder Reservoir, and to what extent farmers in the neighborhood of Kearney are being deprived of the natural supply of water at this time.

The VICE PRESIDENT. Does the Senator ask for the present consideration of the resolution?

Mr. HITCHCOCK. I do.

The VICE PRESIDENT. Is there any objection?

Mr. SMOOT. Mr. President, I did not hear the first part of the resolution. I should like to have it read again.

The Secretary again read the resolution.

The resolution was considered by unanimous consent and agreed to.

Mr. HITCHCOCK. In connection with the resolution, I ask to have printed in the RECORD a telegram received from the secretary of the Commercial Club, of Kearney, Nebr., setting forth the side of the farmers of that neighborhood as to the controversy involved in this investigation.

The VICE PRESIDENT. In the absence of objection, that may be done.

The matter referred to is as follows:

KEARNEY, NEBR., *July 13, 1916.*

G. M. HITCHCOCK,
United States Senate, Washington, D. C.:

Your telegram received. Unfortunately Pathfinder impounded natural flow water as late as July 3. It requires approximately three weeks for water to reach Kearney from Pathfinder. Had natural flow not been obstructed until in July, this section river would naturally have received ample quantity water for present needs for about three weeks longer. Actual amount water passing Bridgeport has been as low as 900 second-feet this month, when inflow Pathfinder exceeded 4,000 second-feet. Balance used by Reclamation Service for interstate and contract canals, with exception small quantity diverted by small ditches. If Pathfinder release natural flow present date those canals that have no storage contracts, then we could not complain, beyond the serious losses already incurred by unlawful impounding water last three weeks. Pathfinder should release sufficient quantity to quickly restore flow in river, and then at least quantity equal to present natural flow for those ditches that have prior rights to Pathfinder. Regarding purchase water, we in lower river can not secure water from Pathfinder by purchase, for reason water purchased is delivered at Nebraska-Wyoming State line and utterly impossible to protect the flow and receive it here. Pathfinder has always refused to sell water to Kearney Ditch because of its first priority, assuming natural flow will always supply it, reserving water for sale to junior ditches.

KEARNEY COMMERCIAL CLUB,
H. B. WATSON, *Secretary.*

THE FIVE CIVILIZED TRIBES.

Mr. ASHURST. Mr. President, I have a letter from Judge Allen, attorney for the Creek Nation, which I should like to have incorporated in the RECORD. It relates to a bill pending in the House of Representatives.

There being no objection, the letter was referred to the Committee on Indian Affairs and ordered to be printed in the RECORD, as follows:

ROOM NO. 209, INDIAN OFFICE,
Washington, D. C., July 6, 1916.

Hon. HENRY F. ASHURST,
Chairman of Committee on Indian Affairs,
United States Senate, Washington, D. C.

MY DEAR SENATOR: Some time ago I delivered to you a brief prepared by me in opposition to what is known as the Hastings bill. As I understand it, this measure is now pending before the House Committee on Indian Affairs and a similar measure has been introduced in the Senate by Senator OWEN and is now before your committee, and I

desire to offer some additional reasons why, in my judgment, your committee should not recommend this measure for passage.

The Hastings bill provides for a transference of the authority now vested by law in the Commissioner of Indian Affairs and the Secretary of the Interior to the Superintendent for the Five Civilized Tribes, in so far as that authority relates to the allotted lands and the individual moneys of the enrolled members of those tribes. It is limited, necessarily, in its operation to restricted Indians—citizens by blood.

I question seriously the merit of the change in system involved in this proposed measure. Its chief advantage, as insisted by those favoring it, seems to lie in the expedition which it affords in the administration of the affairs of the individual Indians, and yet I find no widely extended complaint preferred by individual Indians on that account. The complaint is made by those who deal with Indians, rather than by the Indians themselves, by those who negotiate for the purchase of their lands, or some interest in them. The intending purchaser, regardful of his own interest, but forgetful of the interest of the Indian, becomes impatient of delay, and, believing the delay unnecessary and obstructive, anathematizes the law and departmental rules and regulations governing the disposition of restricted Indian lands as the responsible cause.

I do not think that the records of the Superintendent for the Five Civilized Tribes and of the Department of the Interior, more especially those of the immediate past, justify any such visitation of reproachful criticism. It appears by those records that 15 days is the average period of time in which a departmental matter may be transmitted from the office of the superintendent at Muskogee to the department at Washington, acted upon by the department, and returned to the superintendent. This does not constitute an unreasonable delay, as it seems to me, but it is charged that in some instances a longer period of time is, and has been, required for that purpose. Presumably, in those instances matters of greater importance were under consideration, and a correspondingly greater length of time was required for their detemination, or that special reasons other than lack of time existed. However that may be, it may be pertinently inquired: Whose interest is it that is first to be considered? Is it that of the Indian or that of the prospective purchaser? If the Indian is content to wait until the Government shall have had a sufficient opportunity to examine fully into the subject under investigation, with a view to conserving his interest, has the other party to the transaction just and lawful right to complain? Surely no fair-minded man can or will find fault with a Government ruling or regulation containing such a requirement as to time.

Consider the parties to the transaction, their relative positions, and their relative acquaintance with modern business methods.

The citizenship of Oklahoma embraces men from every State in the Union, able, capable men, broadened and strengthened, quickened and awakened by the adventure of opening a new country and the building of a new State. Naturally they are anxious for the development of the resources by which they see themselves so abundantly surrounded, and some of them think that they see in the Indian ownership and possession of restricted lands an obstruction to that development. They resent, therefore, any and all governmental regulations that, in their opinion, retard the growth of the State in wealth and productive capacity. They are honest men, good citizens, conscientious and scrupulous of purpose, but to them Indian problems are new and not immediately understood. They chafe under what they conceive to be useless restraint, and feel that in the Hastings bill they will find a much-sought relief if it becomes a law. It is chiefly this class of our citizens who advocate the passage of the bill.

But the bill has advocates who are not citizens of the State in a strict sense, some of them not citizens in any sense. They come among us with a view to the quick accumulation of wealth and a speedy retirement from the State when their purpose shall have been accomplished. This class has no interest in the permanent welfare of the State and still less in the welfare of the Indians.

Then, there is a class who do not themselves come to the State at all, but seek rather to exploit Indian lands for speculative purposes through hired representatives whom they send here for that purpose. To this class it makes no sort of difference how soon or by what methods they separate the Indians from their lands, so long as they keep within the limits of the law and sufficiently close to its border to avoid punishment.

On the other hand, we have the Indians, owners of the restricted lands, and likewise parties to the transaction. Many of them are educated men, men of forceful character, and of splendid mental attainment. We find in their ranks farmers, doctors, lawyers, bankers, men representative in their respective spheres in business and professional life, and men in high official position in the councils of both State and Nation. These are fully equipped to defend themselves against encroachment, and to cope with members of other races in the business world.

But there are many others, and this number constitutes the majority, who are without education and intricate business experience. They have lived simple lives. Their wants have been simple and so limited in number as to be easily supplied from their tribal lands. They retain their aboriginal language and, to many of them, the English tongue is entirely foreign. Their contact with the civilization of the white race has not been so intimate as to acquaint them with its complex business methods. They are guileless, trusting, confiding. What chance has this unlettered and unlearned native of forest and prairie to assert and maintain his own in a contest for his rights against the superior skill and business judgment of members of the white race? If human nature were perfect, if men acted wholly from disinterested motives, if those dealing with the Indians had always a clear conception of the right and permitted themselves to be governed by it, then no governmental supervision over the affairs of the Indians would seem necessary, but, unfortunately, human nature is imperfect; men, desirous of accumulating wealth, are often prone to selfishness, and a clear understanding between right and wrong is not always present and evident in human transactions. The Indians have ever been regarded as a dependent people. The Supreme Court of the United States has so recognized them As long ago as 1831, Chief Justice Marshall, in the case of the Cherokee Nation v. Georgia (5 Pet., 1, 16), said:

"They (Indian tribes) may, more correctly, perhaps, be denominated domestic dependent nations. They occupy a territory to which we assert title independent of their will, which must take effect in point of possession when their right of possession ceases. Meanwhile, they are a state of pupilage. Their relation to the United States resembles that of a ward to his guardian."

Again, in Choctaw Nation v. United States (119 U. S., 1, 27), Mr. Justice Matthews, speaking for the court, said:

"The recognized relation between the parties to this controversy, therefore, is that between a superior and an inferior, whereby the latter is placed under the care and control of the former, and which, while it authorizes the adoption on the part of the United States of such policy as their own public interest may dictate, recognizes, on the other hand, such an interpretation of their acts and promises as justice and reason demand in all cases where power is exerted by the strong over those to whom they owe care and protection. The parties are not on an equal footing, and that inequality is to be made good by the superior justice which looks only to the substance of the right, without regard to technical rules framed under a system of municipal jurisprudence, formulating the rights and obligations of private persons, equally subject to the same laws."

How did the Indians acquire these lands, so fertile for agriculture, so rich in minerals, now so eagerly sought by members of other races?

In the early part of the last century the ancestors of the Five Civilized Tribes dwelt, with their families, east of the Mississippi River in that part of the United States now comprised in the Carolinas, Florida, Georgia, Alabama, Tennessee, and Mississippi. They adopted many of the customs and habits of their civilized white neighbors and associates, and so in time became known as the Five Civilized Tribes, a name which they retain to this day. In their treaties with the Federal Government Congress denominated them "nations." In the course of time hostile feelings between them and the white settlers developed, and there was consequent friction, more or less serious, due, in a large measure, to the erection of new States and the imposition of State laws and encroachment by the white race upon their lands. Hunting and fishing, as a rule, constituted their chief occupation. They had not then so far progressed in the knowledge of the pursuits of the white man as to enable them successfully to compete with him in those pursuits.

The Government of the United States at that time conceived the idea that the land occupied by the Indians was needed for purposes of new States and use for settlement by an increasingly growing white population, and so there was devised by the Government a comprehensive scheme or plan for their removal to some territory west of the Mississippi River, where they might live separate and apart from white influences and an opportunity be afforded them for peaceful conditions and the pursuit of their own modes of living. Accordingly, the Government entered into a series of treaties with them, by the terms of which they relinquished their title to their ancestral lands east of the Mississippi River in turn for a cession of lands made to them by the Government west of that river. The lands so ceded became known as the Indian Territory, and now constitutes the eastern part of the State of Oklahoma. The Indians removed to these lands and settled on them, understanding and believing that they were to be their very own, forever, homes for themselves, their wives, and their children; understanding and believing, too, that they might there live undisturbed by contact with the white race; might there seek their livelihood in their own primitive ways, and there make and be governed by their own laws. If to-day it should be asked of an Indian his definition of the title so granted to him by the Government, as respects the length of time it was to continue, he will say "as long as grass grows and water flows."

In considering the matter of the title held by the Indians, Judge Amidon, in the case of Shultis v. McDougal (170 Fed., 529, 534), in delivering the opinion of the court, said:

"The tribal lands belonged to the tribe. The legal title stood in the tribe as a political society; but those lands were not held by the tribe as the public lands of the United States are held by the Nation. They constituted the home or seat of the tribe. Every member, by virtue of his membership in the tribe, was entitled to dwell upon and share in the tribal property. It was granted to the tribe by the Federal Government not only as the home of the tribe but as a home for each of the members."

On this land the Indians experienced for many years that peace and quiet which they had sought. They instituted their own government, enacted their own laws, established their own courts, and followed and enjoyed their own customs. They hunted and fished, they cultivated the soil and harvested the products. They built and maintained their homes; they reared their families; they buried their dead. Thus, to them the land became, and was, consecrated ground.

By congressional act the Government of the United States made it inalienable, either by the tribe or by the individual citizen. Supposedly, it was at the same time a perpetual home for the living, and an imperishable mausoleum for the dead, so far as either was within human control.

But what happened? Again the seemingly inexhaustible reproductive resourcefulness of the white race asserted itself, and its issue demanded entrance for purposes of settlement for themselves and their families to these lands thus ceded to the Indians west of the Missis- under similar circumstances, demanded possession of their lands east of the Mississippi River. The Government of the United States, wisely or unwisely, assented, and by treaty provision and congressional act, partitioned their lands among the citizens of the several tribes and, subject to certain conditions, commonly called restrictions, enabled and authorized each individual partitioner to part with his title and possession to his respective share, by bargain and sale of his interest therein. Immediately thereupon the white race set its face and turned its steps in the direction of these lands—to some by description, to others by imagination, the land of milk and honey, the land of silvered promise, the coral strands of India and Afric's golden sands, the land of small financial investment, the least expenditure of physical energy, and fabulous returns of wealth. Nor was the blood of other races wanting. Black, brown, and yellow came, and but few nationalities were unrepresented. The Anglo-Saxon, the Celt, the Teuton, the Greek, the Italian, the Hun, the Chinaman, the Japanese, the Russian, the Frenchman, the Spaniard, the Mexican, the Swede, the Norwegian, the Turk, the Armenian, all joined in the exodus, and even far-away Persia was not without its quota. All these were in search of wealth, quick or slow, according to temperament, or homes wherein they might find support for life and contentment of mind for themselves and theirs.

Were they invited here by the Indians? Not at all. They came for purposes of self aggrandizement. Did the Indians ask them to buy their lands? Not at all. They came in search of Indian lands, their purpose being to reduce such lands to their possession as homes for themselves and their families.

What right, then, have they to object to protective measures and reasonable safeguards, such as have been thrown about the sale of Indian lands by the Federal Government? They extend no favor to the Indian by the purchase of his land. They are not actuated by motives of humanity in acquiring from the Indian his rights to his home. The Federal Government and the Indian have favored them by treaties and legislative enactment, such as to enable them to secure by purchase the lands and homes of the Indians, and this under regulations prescribed by law and the Interior Department.

But seemingly they are not satisfied with this. And why? Because those regulations require what is, in their view of the matter, an unseemly length of time for the consummation of the purchase.

What is the process by which restricted Indian lands may be sold? The Indian applies to a field clerk, directly under the supervision of the superintendent, or he may apply to the superintendent directly, for the removal of restrictions on the sale of his land. The superintendent, through the field clerk, and such other agencies and sources of information as may be at his command, collects all of the data available and required to a proper understanding of the facts and the advisability of granting or denying the application. The data is reduced to writing and summarized. The superintendent considers the facts so secured and summarized, reaches his conclusion thereon, and reports the same to the Commissioner of Indian Affairs, accompanied by the record evidence. In like manner the Commissioner of Indian Affairs passes on the question, and transmits the record, with his findings and conclusions thereon, to the Secretary of the Interior. The Secretary acts on the entire proceeding, and his action is final. The action of the Secretary is then communicated forthwith and directly to the superintendent who, in turn, communicates it to the applicant. And for this purpose, as I am reliably and credibly informed, 15 days usually, generally a period not exceeding 30 days, is required, save in rare instances involving and requiring exceptional examination, and in instances where delay is induced by questions of public policy.

By what right does a prospective purchaser complain of a delay of 15 days, or 30 days, or any other similar length of time? Is he here at the request of the Indian? Is he here by their invitation? Is he here for their financial profit? Is he here for their moral uplift? Is he here for any advantage that may accrue to the Indians by reason of his presence? Is he not here solely for his own individual selfish purposes? Is he not here to profit by the inexperience of the Indians and at the Indians' expense? This is Indian country, and he does not properly belong here, save and except he is here by the courtesy of the Indians, as expressed through their treaties with the Federal Government, and the authority of the Federal Government in the exercise of its jurisdiction over the Indians and their lands. Upon what fact, then, can he justly predicate his objection to a reasonable time for investigation by the Federal Government of his proposed purchase of their lands?

Here is his reason: I want this land; it suits my purpose. It is good agricultural land, or it is good oil and gas land, as the case may be. This Indian wants to sell it to me on terms that are mutually satisfactory. I want the land and he wants the money. Why should the Government of the United States interfere with this deal by the adoption and adherence to law and rules of procedure subversive of our wishes when we are both satisfied? What, indeed?

This question has been asked by thousands of honest, conscientious people, and by a still larger number of people who know and recognize no qualms of conscience. I think it has already been fairly and satisfactorily answered.

The Government can not too safely, too securely, guard and protect the Indians in their ownership and possession of these lands, lands constituting their homes and in most instances their only means of subsistence. The Indian did not and does not ask the white man for his money in exchange for his land. It is the white man who seeks out the Indian and presses the money upon him, often—too often—an inadequate sum and vastly disproportionate to the value of the land. If the Indian conveys the estate, the favor proceeds from him to the white man. The white man confers no marked favor on the Indian by the payment of the purchase price. The Indian receives the money, and, guided by an open-handed sense of generosity and a total want of understanding and appreciation of its value and meaning, dissipates it and soon wakes to a realization that his home and his lands have gone from him and that he has nothing left in their place to represent them.

And should not the Government, with this view, which is the generally accepted and recognized view in eastern Oklahoma, take time to investigate and determine what is best for the Indian? And has the white man just cause for complaint if the Government does take a sufficient time for that purpose?

But it is urged that the Superintendent for the Five Civilized Tribes is competent and capable of hearing, determining, and adjudicating rightly and equitably questions affecting the rights of Indians and of protecting and conserving their interests, and that his presence on the ground and his familiarity with immediate conditions peculiarly fits him for that work; that if these questions are left to him for hearing and determination, speedier results will be obtainable. Admitted, except with certain qualifications, which I shall presently mention, especially in the instance of the present superintendent, as to whose competency and capability, sense of justice, and equity no question is or has been raised by the opponents of this measure.

We have seen how the superintendent collects the evidence, reduces it to writing, summarizes it, draws his conclusion, and reports it to Washington, accompanied by his recommendation and all papers and exhibits relating to the matter, receiving from the Secretary of the Interior an affirmance or disaffirmance or a decision modifying his recommendation within the period of from 15 to 30 days, or a longer period of time proportionate to the importance of the question or in consonance with some matter of public policy. As the law now stands, final action devolves upon the Secretary of the Interior. He sits and acts as a court of review. This is entirely in harmony with our system of government. It is in accord with the method of checks and balances which have been adopted in our legislative and judicial departments. All accounting and bookkeeping are had and kept in conformity with it. It proceeds upon the theory that a possible error by the initial authority will be caught, checked, and corrected by the review power. The Congress of the United States is composed of a Senate and a House of Representatives, and the legislative bodies of the various States are similarly composed, to the end that the one may operate as a check and balance and for corrective purposes upon the other.

Our courts of justice comprise trial courts and courts of appeal. Trial courts of law hear the testimony, instruct the jury, and receive the verdict. Chancery courts both hear the testimony and determine the facts without the intervention of a jury. From both courts provision for an appeal to a reviewing tribunal is provided in the instance of the courts of the United States and most generally in the instance of State courts. If this be true of our judicial tribunals, if the action of the lower court, which collects the testimony and applies the law, is made reviewable by a court of appellate jurisdiction, why should not the recommendation of the Superintendent for the Five Civilized Tribes, who acts primarily as a trial court, be reviewable by the Secretary of the Interior, his superior officer? Cases come before the superintendent which are frequently of as vital importance or as great in point of magnitude of interest as are coming before our Federal or State courts. In fact, the very same questions that arise before the courts often arise first before the superintendent, but it is urged that the superintendent, being at the place and scene of action, may better judge and determine questions coming before him. Perhaps, but the Secretary has, for his guidance and assistance, on review, the full and complete benefit of the judgment and conclusions of the superintendent, in addition to his own calm and dispassionate analysis and examination of the facts. And so it happens that the interest of the Indian profits by the consideration of both tribunals.

It will hardly be contended that the Supreme Court of the United States could better decide an Indian question by holding a session of its court in the eastern part of the State of Oklahoma for the hearing.

And now, again, come the advocates of the Hastings bill and say, "But the review of the findings by the Secretary involve so much time—time shockingly and extravagantly wasted." This is the single, sole, solitary argument in favor of the bill. I lose patience with it. When it is remembered that the Indian is parting, possibly with his home, possibly with his surplus lands, his means of subsistence, possibly with both, posibly with all he owns of real estate, possibly with all he will ever own, is it asking too much that the Federal Government be given 15 days, or 30 days, or 60 days, or even longer to examine the terms and conditions of the sale, for purposes of approval or disapproval, as its superior judgment and wisdom may direct? How many private real estate transactions are completed in so brief a space of time, computing the time from the date of the offer of the property in the open market? Sometimes I feel that there are some members of the white race who are so inconsiderate, so selfish and blinded to all sense of justice, that they do not regard an Indian as having any right which they are bound to respect, and there are, in fact, members of that race whom I have known to act on that theory.

Fifteen days! Thirty days! Forty-five days! Sixty days! Tell me of a member of the white race whose necessities are such that he can not wait that long for an Indian's home. They and their ancestors have already waited something over 300 years for these same Indian homes. A wait of a few days longer, of a few weeks longer, will not hurt them, will not matter now. It will be but a little while, in the nature of things, until the Indians in the eastern part of Oklahoma shall have parted with their lands forever. Even if they are able to retain ownership and possession of their lands in the intervening years, in the face of opportunities afforded the white race by treaties and congressional acts to effect their separation, still the 26th day of April, 1931, the date fixed for the removal of all restrictions, is not far distant in the future.

What I have thus far said applies to the removal of restrictions on the alienation of Indian lands, and this embraces the sale of the lands and the making of oil and gas leases on them.

But it is said that the passage of the Hastings bill will alleviate other conditions attending Indian lands and Indian moneys equally as intolerable and burdensome as restrictions on their sale or their leasing for oil and gas purposes. It is objected that an Indian can not make an agricultural lease on his homestead for a period exceeding one year, or on his surplus for a period exceeding five years, without the approval of the authorities at Washington. Whether or not this objection was well founded in the first instance, whether or not it might now logically be urged in support of the bill, makes no difference. It is of no value at this time, because on the 29th day of January, 1916, a departmental order was made and issued authorizing the Superintendent for the Five Civilized Tribes to approve such leases at his office in Muskogee.

It is further objected that restricted moneys of Indians may not be used for their immediate personal needs or in payment of claims contracted for necessities of life without the approval of the Secretary of the Interior. But this contention likewise must fail. By departmental order, the superintendent may expend restricted Indian funds for the benefit and improvement of the estate of the Indians and in payment of emergency needs without specific authority from the Secretary of the Interior.

If it is found in practice and by experience that the needs of the Indian so require, further authority may, from time to time, be extended to the superintendent as those needs arise and as in the judgment of the Commissioner of Indian Affairs and the Secretary of the Interior may be thought advisable.

It is argued by the friends of this measure that the present superintendent is conscientious, capable, and efficient, and is, therefore, qualified to pass on Indian questions with wisdom and prudence. Granting this to be true, it is beside the question. There is nothing contained in this bill which proposes to perpetuate the tenure of office of the present incumbent; and while I do not assume that it would be true that any superintendent appointed by the Government would lack these qualifications, it is entirely probable that the successor of the present superintendent would not be as familiar with local affairs and conditions as is the case with Mr. Parker Even with the office in charge of a man so eminently qualified as is the present superintendent, it seems to me that to devolve all the powers of the Commissioner of Indian Affairs and the Secretary of the Interior, as contemplated by the bill, on a local officer having his office in the immediate proximity to the place where the questions to be decided have their origin, and there administering those questions, would be a fatal mistake. However much the local officer might seek to avoid the pressure of local influences, he could not escape it. His easy accessibility would necessarily subject him to it.

And I am not assuming that these influences will intentionally have for their purpose the subversion of justice. They may, and usually will, come from men thoroughly and honestly convinced of the righteousness of their cause and the merit of the proposition which they present. But they will be in an easy position, too, to be most insistent. "The constant dripping of the water will wear away the stone." It makes no difference how forceful of character the superintendent may be, how vigilantly and zealously he may seek to safeguard the rights of the Indians, yet such pressure, constantly and vigorously asserted, can not but have some weight and effect. It requires no great stretch of imagination to suppose instances in which third-degree methods might be applied to the superintendent. This is possible, too, at Washington; but it would not be so easy of accomplishment there, nor would the effort so probably be made. Both the distance and the formality attending investigations in Washington would render the exertion of pressure most difficult, if, indeed, it would not altogether preclude it.

I note that the Committee on Indian Affairs of the House of Representatives, in reporting this measure, has provided a right of appeal from any decision of the Superintendent for the Five Civilized Tribes by any party feeling aggrieved.

While I regard this provision as generous, in so far as the rights and interests of those dealing with the Indians are concerned, I am at a loss to understand how the provision will relieve the measure of the

objection that it deprives the Indian of the right to have his matters reviewed by the Secretary of the Interior. Nearly all of these matters are ex parte; that is, the Indian initiates a proceeding by filing with the superintendent an application to remove his restrictions, or for other purposes, and while this is generally done at the instance of the white man, the record does not disclose such interest. It is not reasonable to presume that an Indian thus urging the superintendent to act will, upon action being taken, feel aggrieved and appeal to the Secretary of the Interior. In so far as the Indian is concerned—and I am sure that your committee earnestly desires to protect this interest—I think that the operation of this act would be practically the same with or without the right of appeal.

For the information of your committee I am attaching hereto a photographic copy of a resolution adopted by a mass meeting of Creek Indians, assembled at Okmulgee, the capital of the Creek Nation, on the 14th day of June, 1916, which is, so far as I am advised, the only expression of opinion of any organized body of Indians concerning this proposed legislation.

Very respectfully,

R. C. ALLEN,
Creek National Attorney.

Resolution.

Be it resolved by the citizens of the Creek Nation, duly assembled in mass meeting at the capital of the Creek Nation, at Okmulgee, Okla., That we are opposed to the enactment by Congress of the bill introduced by Congressman HASTINGS to confer upon the Superintendent for the Five Civilized Tribes in Oklahoma the authority now conferred by law upon the Commissioner of Indian Affairs and the Secretary of the Interior respecting lands allotted to the enrolled members of the Five Civilized Tribes and their individual moneys, and do protest against the passage and enactment of said bill for the reason that we believe that it would be against the best interests of the citizens of the Creek Nation and to be in the interest of the land speculator and those who are seeking to obtain the lands of full-blood Indians: Be it further

Resolved, That a copy of this resolution be sent to each Senator and Congressman, and also a copy be sent to the Commissioner of Indian Affairs and the Secretary of the Interior.

Dated at Okmulgee, Okla., this 14th day of June, 1916.

LEWIS MCGILBRA,
Chairman of meeting.
GEO. W. STIDHAM,
Secretary of meeting.

ADDRESS BY HON. WILLIAM G. M'ADOO (S. DOC. NO. 498).

Mr. FLETCHER. Mr. President, I ask unanimous consent to have printed as a public document an address delivered by Hon. William G. McAdoo, Secretary of the Treasury, before the National Education Association at Madison Square Garden, New York, July 6, on the subject of "Some international aspects of public education."

The VICE PRESIDENT. Is there objection to the request of the Senator from Florida?

Mr. GALLINGER. Mr. President, I will inquire, is this another addres by the Secretary of the Treasury?

Mr. FLETCHER. It is an address delivered by him before the National Education Association in New York on the subject of "Some international aspects of public education." It has reference more particularly to the South American and Latin-American fields.

Mr. GALLINGER. We have been very liberal in placing in the RECORD and printing pretty nearly every utterance of Mr. McAdoo since he assumed office; and, while I am not going to object to this, I do really think that Mr. McAdoo has exhausted his privileges in that regard.

Mr. FLETCHER. I think, Mr. President, every address by Mr. McAdoo which we have printed has been certainly meritorious and of great value, and I think this address, bearing on our relations with our Latin American neighbors, is important.

The VICE PRESIDENT. The Chair understands the Senator asks to have it printed as a public document and not in the RECORD?

Mr. FLETCHER. That is correct; as a public document.

The VICE PRESIDENT. Without objection, it is so ordered.

TAX ON COPPER.

Mr. SMOOT. I have a telegram in the form of a petition from Hon. R. C. Gemmell, of Salt Lake City, Utah, and in answer to a telegram which I sent to him yesterday, advising the copper people that the Committee on Finance had decided to hold no hearings upon the revenue bill. I ask, Mr. President, that the telegram be read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read the telegram, as follows:

SALT LAKE CITY, UTAH, *July 13, 1916.*

Hon. REED SMOOT,
United States Senate, Washington, D. C.:

Your telegram of July 12 to Mr. Richmond has been referred to me. It is impossible for us to present statistics on such short notice, as the compilation of them would take weeks and probably months. This revenue measure provides for a drastic tax on the output of copper, which means that for the first time in the history of this country an output tax would be imposed. I presume that this tax is predicated upon the principle that it touches a few and will not be complained of by the many. But this is a principle contrary to every conception of right and justice, and one which would lead to reckless dissipation of public funds. In times of national distress all should be willing to make sacrifices, but to single out an industry in times of profound peace and make it bear an extraordinary and unusual burden is contrary to sound economical principles and repugnant to the spirit and purposes of our institutions. It may be said that the copper business has enjoyed extraordinary prosperity as a result of the war in Europe, and therefore that it is legitimate prey. But what of wheat and cotton and the output of the steel mills? Almost everything consumed in this country has been benefited in price by the war in Europe. Systems of taxation should not be based on temporary conditions but upon broad and universal principles, and the basis of all taxations should be a just and equitable distribution of the burdens of Government among those benefited. Why should this particular industry be singled out and made to bear an extraordinary and unjust burden of taxation? It may be because the States in which it flourishes are comparatively small and of minor political importance and because their voices are considered to be weak in the councils of the Nation. This proposition should be defeated because it is class legislation. It only affects to any considerable extent 7 States out of the 48 in the Union, namely, Arizona, California, Michigan, Montana, Nevada, New Mexico, and Utah. It would be unjust to burden these States with this special tax, as taxes should be general and not specific. Copper prices for the 10 years prior to 1915 averaged 13¼ cents per pound, while the average cost of producing copper is close to 11 cents per pound. The difference should not be considered entirely as profit, for the reason that mining dividends or profits represent a portion of the capital invested and stockholders know that they are getting back a part of their capital. When receiving dividends at the beginning of the war and for six months subsequent thereto, the copper companies were operating on a 50 per cent basis. The metal was selling at from 11 to 12 cents per pound, and many of the companies were losing instead of making money in an effort to keep their plants going and their men employed. This tax would seriously retard the electrification of railroads. It would affect every telephone, telegraph, and electric light company, and in ordinary times would put many copper companies operating on a close margin out of business, due to the increased price of copper. Wages have been advanced three times, so that employees have participated in the prosperity of the copper companies since the war began. Materials and supplies used by mining companies have advanced from 25 to 300 per cent, and this also has cut into the profits of the copper companies. Many mines heretofore idle are now producing because of the prevailing high prices of the metal, and when the price of copper decreases, as it surely will before long, to something approaching normal prices, these mines will have difficulty in operating at a profit and should not have a special and unjust burden imposed upon them. Nay, millions of dollars have been invested in the copper-mining business, and it must be remembered that in the cases of sole properties millions have been so invested without any return as yet to the investors. The prosperity of the seven States mentioned and the welfare of the inhabitants of those States would be disastrously affected if this unjust measure becomes a law. A great industry of the West that is temporarily prosperous has been attacked, and every possible effort should be made to defeat this proposed tax.

R. C. GEMMELL.

REPORTS ON TRANSPORTATION (S. DOC. NO. 497).

Mr. SIMMONS. Mr. President, I ask to have printed as a public document a summary of the reports on transportation made by the delegates to the First Pan American Financial Conference to the Secretary of the Treasury. It is a very valuable document, and discusses certain questions that will be very pertinent to legislation soon to come before the Senate.

The VICE PRESIDENT. Without objection, it is so ordered.

IMMIGRATION.

Mr. SMITH of South Carolina. I desire to give notice that immediately upon the conclusion of the consideration of the naval appropriation bill I shall move that the Senate proceed to the consideration of House bill 10384, known as the immigration bill. This bill should have been considered, and whatever action the Senate desired to take upon it should have been taken before this time, but, on account of certain complications with reference to several of the amendments, it was impossible earlier than this to get an opportunity to call it up.

AMENDMENT OF THE RULES.

Mr. JONES. I desire to present and have read a notice of an amendment intended to be proposed to the rules of the Senate.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

I hereby give notice of my intention to propose the following amendment to paragraph 3 of Rule XVI of the Standing Rules of the Senate, namely:

"Be it resolved by the Senate, That paragraph 3 of Rule XVI of the Standing Rules of the Senate be amended by inserting, after the words 'general legislation,' in line 1 of said paragraph, the words 'excepting legislation affecting the liquor traffic, which shall be in order at any time.'"

STEAMBOAT-INSPECTION SERVICE.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 449) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CHAMBERLAIN. I move that the Senate insist upon its amendments, and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Vice President appointed Mr. CHAMBERLAIN, Mr. FLETCHER, and Mr. NELSON conferees on the part of the Senate.

The VICE PRESIDENT. Morning business is closed.

AMENDMENT OF THE FEDERAL RESERVE ACT.

Mr. OWEN. I move that the Senate proceed to the consideration of the bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section.

Mr. SMOOT. Mr. President, I wish to say to the Senator that the junior Senator from Massachusetts [Mr. WEEKS], a member of the committee, can not reach the Chamber until about 10 minutes after 11. He wishes to be present when this bill is considered. I sent word to his office just 15 minutes ago, when I learned that the Senator from Oklahoma was going to make the motion. The office sent word to me that they will notify the Senator and that he will be here by 10 minutes past 11.

Mr. OWEN. By the time the bill is read, I take it that the Senator from Massachusetts will have reached the Chamber. He is familiar with the bill, and I think I am familiar with the point he wishes to raise; and I think that what he wishes will be readily acquiesced in. It relates to the question of branch banks in States which forbid the exercise of that right by State banks. On behalf of the committee, I will accept an amendment proposed by the Senator from Connecticut [Mr. MCLEAN], which will cover that point.

Mr. GALLINGER. Mr. President, does the Senator from Oklahoma intend to discuss the bill to any extent?

Mr. OWEN. No; only to explain it. There is nothing complicated about it at all. It will not take more than an hour to pass it.

Mr. SMOOT. I will say to the Senator that if the Senator from Massachusetts is not here——

Mr. OWEN. I shall then ask a postponement until he is present.

Mr. SMOOT. With that understanding, I have no objection to taking up the bill, although I thought that this morning we would take up the calendar and consider bills to which there was no objection.

Mr. OWEN. This bill passed the House in March, and it has been waiting here for quite a while. It bears on our financial relations with South America in quite an important way.

Mr. SMOOT. We have a good many bills on the calendar that passed the House even before that time.

The VICE PRESIDENT. The question is on the motion of the Senator from Oklahoma.

Mr. TILLMAN. Mr. President——

Mr. OWEN. I yield to the Senator from South Carolina.

Mr. TILLMAN. With the consent of the Senator from Oklahoma, I should like to have unanimous consent to consider three bills, two of them from the House and one a Senate bill. There will be no objection to any of them.

Mr. GALLINGER. Oh, that can not be done.

Mr. OWEN. I regret that I can not yield for that purpose.

The VICE PRESIDENT. The sole question now, according to the rules of the Senate, is to put the motion of the Senator from Oklahoma, without discussion. The Senator from Oklahoma moves that the Senate proceed to the consideration of House bill 13391.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal Reserve Act, by adding a new section.

The bill had been reported from the Committee on Banking and Currency, with an amendment, to strike out all after the enacting clause and insert:

That section 13 of the act approved December 23, 1913, known as the Federal Reserve Act, be amended to read as follows:

"Any Federal reserve bank may receive from any of its member banks and from the United States deposits of current funds in lawful money, national-bank notes, Federal-reserve notes, or checks and drafts, payable upon presentation, and also, for collection, maturing bills; or solely for purposes of exchange or of collection may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks upon other Federal reserve banks, and checks and drafts, payable upon presentation within its district, and maturing bills payable within its district.

"Upon the indorsement of any of its member banks, with a waiver of demand, notice, and protest by such bank, any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions—that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes—the Federal Reserve Board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days, exclusive of days of grace.

"*Provided*, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months, exclusive of days of grace, may be discounted in an amount to be limited to a percentage of the assets of the Federal reserve bank, to be ascertained and fixed by the Federal Reserve Board.

"The aggregate of such notes, drafts, and bills bearing the signature or indorsement of any one borrower, whether a person, company, firm, or corporation, rediscounted for any one bank shall at no time exceed 10 per cent of the unimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

"Any Federal reserve bank may discount acceptances of the kinds hereinafter described, which have a maturity at the time of discount of not more than three months' sight, exclusive of days of grace, and which are indorsed by at least one member bank.

"Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. No member bank shall accept, whether in a foreign or domestic transaction, for any one person, company, firm, or corporation to an amount equal at any time in the aggregate to more than 10 per cent of its paid-up and unimpaired capital stock and surplus unless the bank is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance, and no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-half of its paid-up and unimpaired capital stock and surplus, except by authority of the Federal Reserve Board, under such general regulations as said board may prescribe, but not to exceed the capital stock and surplus of such bank; and such regulations shall apply to all banks alike regardless of the amount of capital stock and surplus.

"Any Federal reserve bank may make advances to its member banks on their promissory notes for a period not exceeding 15 days at rates to be established by such Federal reserve banks, subject to the review and determination of the Federal Reserve Board, provided such promissory notes are secured by such notes, drafts, bills of exchange, or bankers' acceptances as are eligible for rediscount or for purchase by Federal reserve banks under the provisions of this act, or by the deposit or pledge of bonds or notes of the United States.

"Section 5202 of the Revised Statutes of the United States is hereby amended so as to read as follows: No national banking association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:

"First. Notes of circulation.

"Second. Moneys deposited with or collected by the association.

"Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association or due thereto.

"Fourth. Liabilities to the stockholders of the association for dividends and reserve profits.

"Fifth. Liabilities incurred under the provisions of the Federal reserve act.

"The discount and rediscount and the purchase and sale by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange, and of acceptances authorized by this act shall be subject to such restrictions, limitations, and regulations as may be imposed by the Federal Reserve Board."

Any member bank may accept drafts or bills of exchange drawn upon it having not more than three months' sight to run, exclusive of days of grace, drawn under regulations to be prescribed by the Federal Reserve Board by banks or bankers in foreign countries or dependencies or insular possessions of the United States for the purpose of furnishing dollar exchange as required by the usages of trade in the respective countries, dependencies, or insular possessions. And such drafts or bills may be acquired by Federal reserve banks in such amounts and subject to such regulations, restrictions, and limitations as may be prescribed by the Federal Reserve Board: *Provided, however*, That no member bank shall accept such drafts or bills of exchange referred to in this paragraph for any one bank to an amount exceeding in the aggregate 10 per cent of the paid-up and unimpaired capital and surplus of the accepting bank unless the draft or bill of exchange is accompanied by documents conveying or securing title or by some other adequate security: *Provided further*, That no member bank shall accept such drafts or bills in an amount exceeding at any time the aggregate of one-half of its paid-up and unimpaired capital and surplus except by authority of the Federal Reserve Board, but in no contingency to exceed the unimpaired capital and surplus of such accepting bank.

"That section 16, paragraphs 2, 3, 4, 5, 6, and 7 of the act approved December 23, 1913, known as the Federal reserve act, be amended and reenacted so as to read as follows:

"Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes, drafts, bills of exchange, or acceptances rediscounted under the provisions of section 13 of this act, or bills of exchange indorsed by a member bank of any Federal reserve district and purchased under the provisions of section 14 of this act, or bankers' acceptances purchased under the provisions of said section 14, or gold or gold certificates. The Federal reserve agent shall each day notify the Federal Reserve Board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal Reserve Board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to it.

"Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its Federal reserve notes in actual circulation: *Provided, however*, That when the Federal reserve agent holds gold or gold certificates as collateral for Federal reserve notes issued to the bank, such gold or gold certificates shall be counted as part of the gold reserve which such bank is required to maintain against its Federal reserve notes in actual circulation. Notes so paid out shall bear upon their faces a distinctive letter and serial number, which shall be assigned by the Federal Reserve Board to each Federal reserve bank. Whenever Federal reserve notes issued through one Federal reserve bank shall be received by another Federal reserve bank

they shall be promptly returned for credit or redemption to the Federal reserve bank through which they were originally issued, or, upon direction of such Federal reserve bank, they shall be forwarded direct to the Treasurer of the United States to be retired. No Federal reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the Treasury of the United States shall be paid out of the redemption fund and returned to the Federal reserve banks through which they were originally issued, and thereupon such Federal reserve bank shall, upon demand of the Secretary of the Treasury, reimburse such redemption fund in lawful money, or, if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasurer in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer. Federal reserve notes received by the Treasurer, otherwise than for redemption, may be exchanged for gold out of the redemption fund hereinafter provided and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States. Federal reserve notes unfit for circulation shall be returned by the Federal reserve agents to the Comptroller of the Currency for cancellation and destruction.

"The Federal Reserve Board shall require each Federal reserve bank to maintain on deposit in the Treasury of the United States a sum in gold sufficient, in the judgment of the Secretary of the Treasury, for the redemption of the Federal reserve notes issued to such bank, but in no event less than 5 per cent of the total amount of notes issued less the amount of gold or gold certificates held by the Federal reserve agent as collateral security; but such deposit of gold shall be counted and included as part of the 40 per cent reserve hereinbefore required and shall be counted and considered as if collateral security deposited with the Federal reserve agent. The board shall have the right, acting through the Federal reserve agent, to grant, in whole or in part or to reject entirely, the application of any Federal reserve bank for Federal reserve notes; but to the extent that such application may be granted the Federal Reserve Board shall, through its local Federal reserve agent, supply Federal reserve notes to the bank so applying, and such bank shall be charged with the amount of such notes issued to it and shall pay such rate of interest as may be established by the Federal Reserve Board on only that amount of such notes which equals the total amount of its outstanding Federal reserve notes less the amount of gold or gold certificates held by the Federal reserve agent as collateral security. Federal reserve notes issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

"Any Federal reserve bank may at any time reduce its liability for outstanding Federal reserve notes by depositing with the Federal reserve agent its Federal reserve notes, gold, gold certificates, or lawful money of the United States. Federal reserve notes so deposited shall not be reissued, except upon compliance with the conditions of an original issue.

"The Federal reserve agent shall hold such gold, gold certificates, or lawful money available exclusively for exchange for the outstanding Federal reserve notes when offered by the reserve bank of which he is a director.

"Upon the request of the Secretary of the Treasury the Federal Reserve Board shall require the Federal reserve agent to transmit to the Treasurer of the United States so much of the gold held by him as collateral security for Federal reserve notes as may be required for the exclusive purpose of the redemption of Federal reserve notes.

"Any Federal reserve bank may at its discretion withdraw collateral deposited with the local Federal reserve agent for the protection of its Federal reserve notes issued to it, and shall at the same time substitute therefor other collateral of equal amount with the approval of the Federal reserve agent under regulations to be prescribed by the Federal Reserve Board."

That section 24 of the act approved December 23, 1913, known as the Federal reserve act, be amended to read as follows:

LOANS ON FARM LANDS AND OTHER REAL ESTATE.

"Any national banking association not situated in a central reserve city may make loans secured by improved and unencumbered farm land situated within its Federal reserve district or within a radius of 100 miles of the place in which such bank is located, irrespective of district lines, and may also make loans secured by improved and unencumbered real estate located within 100 miles of the place in which such bank is located, irrespective of district lines; but no loan made upon the security of such farm land shall be made for a longer time than five years, and no loan made upon the security of such real estate as distinguished from farm land shall be made for a longer time than one year nor shall the amount of any such loan, whether upon such farm land or upon such real estate, exceed 50 per cent of the actual value of the property offered as security. Any such bank may make such loans, whether secured by such farm land or such real estate, in an aggregate sum equal to 25 per cent of its capital and surplus or to one-third of its time deposits and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

"The Federal Reserve Board shall have power from time to time to add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate in the manner described in this section."

That section 25 of the act approved December 23, 1913, known as the Federal reserve act, be amended to read as follows:

"SEC. 25. Any national banking association possessing a capital and surplus of $1,000,000 or more may file application with the Federal Reserve Board for permission to exercise, upon such conditions and under such regulations as may be prescribed by the said board, either or both of the following powers:

"First. To establish branches in foreign countries or dependencies or insular possessions of the United States for the furtherance of the foreign commerce of the United States, and to act if required to do so as fiscal agents of the United States.

"Second. To invest an amount not exceeding in the aggregate 10 per cent of its paid-in capital stock and surplus in the stock of one or more banks or corporations chartered or incorporated under the laws of the United States or of any State thereof, and principally engaged in international or foreign banking, or banking in a dependency or insular possession of the United States either directly or through the agency, ownership or control of local institutions in foreign countries, or in such dependencies or insular possessions.

"Such application shall specify the name and capital of the banking association filing it, the powers applied for, and the place or places where the banking operations proposed are to be carried on. The Federal Reserve Board shall have power to approve or to reject such application in whole or in part if for any reason the granting of such application is deemed inexpedient, and shall also have power from time to time to increase or decrease the number of places where such banking operations may be carried on.

"Every national banking association operating foreign branches shall be required to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and every member bank investing in the capital stock of banks or corporations described under subparagraph two of the first paragraph of this section shall be required to furnish information concerning the condition of such banks or corporations to the Federal Reserve Board upon demand, and the Federal Reserve Board may order special examinations of the said branches, banks, or corporations at such time or times as it may deem best.

"Before any national bank shall be permitted to purchase stock in any such corporation the said corporation shall enter into an agreement or undertaking with the Federal Reserve Board to restrict its operations or conduct its business in such manner or under such limitations and restrictions as the said board may prescribe for the place or places wherein such business is to be conducted. If at any time the Federal Reserve Board shall ascertain that the regulations prescribed by it are not being complied with, said board shall be authorized and shall have power to institute an investigation of the matter and to send for persons and papers, subpœna witnesses, and administer oaths in order to satisfy itself as to the actual nature of the transactions referred to. Should such investigation result in establishing the failure of the corporation in question, or of the national bank or bank which may be stockholders therein, to comply with the regulations laid down by the said Federal Reserve Board, such national banks may be required to dispose of stock holdings in the said corporation upon reasonable notice.

"Every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its home office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accruing at each branch as a separate item.

"Any director or other officer, agent, or employee of any member bank may, with the approval of the Federal Reserve Board, be a director or other officer, agent, or employee of any such bank or corporation above mentioned in the capital stock of which such member bank shall have invested as hereinbefore provided, without being subject to the provisions of section 8 of the act approved October 15, 1914, entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes.'"

That the act approved December 23, 1913, known as the Federal reserve act, be amended by adding a new section, as follows:

DOMESTIC BRANCHES.

"SEC. 25a. That any national banking association located in a city or incorporated town or village of more than 100,000 inhabitants and possessing a capital and surplus of $1,000,000 or more may, under such rules and regulations as the Federal Reserve Board may prescribe, establish branches, not to exceed 10 in number, within the corporate limits of the city, town, or village in which it is located.

"Any national banking association located in any other place may, with the approval of the Federal Reserve Board and under such rules and regulations as such board may prescribe, establish branches, not to exceed 10 in number, within the limits of the county in which it is located or within a radius of 25 miles of the place in which such bank is situated, irrespective of county lines: *Provided*, That no such branch shall be established outside of its State or of its Federal reserve district, nor shall such branch be established unless the capital of the parent bank is at least equal to the aggregate of the amounts which would be required of each branch under the provisions of section 5138, Revised Statutes, if it were organized as an independent association, together with the amount required of the parent bank itself by that section."

Mr. VARDAMAN. Mr. President, I should like to ask the Senator from Oklahoma a question with reference to the paragraph beginning on line 21, page 18:

Any national banking association located in any other place may—

And so forth. The amount of the capital stock of the bank does not control in the establishment of these branch banks? It is not necessary that they should have any definite amount but just enough to be a member of the association?

Mr. OWEN. The general statute in regard to the national banks requires a certain amount of capital. The general requirement of the statute fixes that.

Mr. VARDAMAN. Any member of the association may establish these branch banks?

Mr. OWEN. Yes. It is the purpose to modify that so as to exclude those States which forbid State banks to have branches.

Mr. VARDAMAN. I notice that where they are established in towns, villages, and cities it requires a capital stock of $1,000,000, but in the country they are not required to have any fixed amount of capital stock, just so they are members of the association. Is that true?

Mr. OWEN. Yes; that is true.

Mr. President, I wish to have put in the RECORD the various reports received from the Federal Reserve Board with regard to these suggested amendments. The amendments are best understood by taking the report of the committee, Report No. 481, in which the language of the existing statute is printed in ordinary type, the proposed amendments are printed in italics, and the words proposed to be stricken out are printed with a

line drawn through them. In that way any member of the Senate can immediately see what the changes proposed are.

If it be the desire of the Senate to hear the reports of the Federal Reserve Board read with regard to this measure, and the letter of the Comptroller of the Currency of June 8, 1916, I should be glad to have that done for the information of the Senate. Otherwise I shall ask simply that they be printed in the RECORD without reading, as the reports of the Federal Reserve Board have already been printed in the committee report for the use of the Senate.

The matter referred to is as follows:

FEDERAL RESERVE BOARD,
Washington, June 10, 1916.

Hon. ROBERT L. OWEN,
United States Senate.

DEAR SENATOR OWEN: I inclose a copy of a letter dated June 6, 1916, from Mr. Frederic H. Curtiss, Federal reserve agent of the Federal reserve bank of Boston, in which it is suggested that the amendment reported favorably by your committee, which authorizes national banks under certain specified conditions to establish domestic branches, be altered so as to provide that "any member bank" be afforded that privilege.

It is, of course, true that the Federal legislature can not of itself extend the corporate powers of a State corporation, but in view of the fact that certain States have passed special enabling acts to permit State banks and trust companies to become member banks and to exercise the privileges of member banks as defined in the Federal reserve act the suggestion contained in Mr. Curtiss's letter is most reasonable.

The Massachusetts law provides that every trust company which becomes a member bank "may have and exercise any and all of the corporate powers and privileges which may be exercised by member banks under the provisions * * *" of the Federal reserve act.

If the proposed change is made in the amendment relating to domestic branches, Massachusetts trust companies which have become members of the Federal Reserve System would, by virtue of this provision of the Massachusetts law, be entitled to establish branches under the conditions set forth in that amendment. This is also true of several other States which have passed similar laws. It may be mentioned in this connection that to modify the amendment so as to refer to member banks instead of solely to national banks might prove a great inducement to certain State banks to enter the Federal Reserve System.

The Federal Reserve Board, after carefully considering the entire matter, has directed me to write you that it is in favor of such an amendment, and I am inclosing herewith for your information a redraft of that amendment. The only changes are a substitution of the word "member bank" for the words "national banking association," in the first lines of both paragraphs of the amendment, and also slight changes in the wording of the proviso of the second paragraph which become necessary because of such substitutions.

Very respectfully, yours, C. S. HAMLIN, *Governor.*

FEDERAL RESERVE BANK OF BOSTON,
June 6, 1916.

Hon. CHARLES S. HAMLIN,
Governor, Federal Reserve Board, Washington, D. C.

DEAR MR. HAMLIN: The Old Colony Trust Co., a member of the Federal Reserve Bank of Boston, has called my attention to a bill now pending in Congress authorizing national banking associations, under certain conditions, to establish domestic branches.

Under chapter 537 of the Massachusetts acts of 1914, it is provided that every trust company "may have and exercise any and all of the corporate powers and privileges which may be exercised by member banks under the provisions, etc.," of the Federal reserve act.

It is pointed out that the proposed amendment to the Federal reserve act with reference to domestic branches, in that it specifically refers to national banking associations, would not permit the Old Colony Trust Co., for example, to establish branches in Massachusetts in accordance with this amendment.

A change therefore has been suggested to the effect that Congress authorize not only national banking associations but all member banks to establish such domestic branches where it would be consistent with State law. I understand that this matter has already been taken up by the Old Colony with Mr. Joseph Cotton in New York.

While I, of course, knew that the Federal Reserve Board intended to present to Congress a bill authorizing member banks to establish domestic branches, until my attention was called to it in the Commercial and Financial Chronicle of June 3, 1916, I had not seen the specific form in which this amendment was to be presented.

As these amendments affect the banking interests of each district, might it not be advisable to have copies of such bills sent to each of the Federal reserve banks in order that they may keep in touch with the proposed legislation affecting them?

Yours, very respectfully,

(Signed) FREDERIC H. CURTISS,
Federal Reserve Agent.

DOMESTIC BRANCHES.

SEC. 25a. That any member bank located in a city or incorporated town or village of more than 100,000 inhabitants and possessing a capital and surplus of $1,000,000 or more may, under such rules and regulations as the Federal Reserve Board may prescribe, establish branches, not to exceed 10 in number, within the corporate limits of the city, town, or village in which it is located.

Any member bank located in any other place may, with the approval of the Federal Reserve Board and under such rules and regulations as such board may prescribe, establish branches, not to exceed 10 in number, within the limits of the county in which it is located or within a radius of 25 miles of the place in which such bank is situated, irrespective of county lines: *Provided*, That no such branch shall be established outside of its State or of its Federal reserve district, nor shall such branch be established unless the capital of the parent bank is at least equal to the aggregate of the amounts which would be required of each branch under the provisions of section 5138, Revised Statutes, if it were organized as an independent national banking association, together with the amount fixed by that section as a minimum capitalization for a national banking association located in the same place as the parent bank.

FEDERAL RESERVE BOARD,
Washington, June 29, 1916.

DEAR SIR: In addition to the amendments which the Federal Reserve Board has taken the liberty of suggesting for your consideration, the board makes free to recommend to you the following amendment:

Amend section 11, by adding a clause "m," as follows:

"(m) Upon the affirmative vote of not less than five of its members, the Federal Reserve Board shall have power, from time to time, by general ruling, covering all districts alike, to permit member banks, (1) to carry in the Federal reserve banks of their respective districts any portion of their reserves now required by section 19 of this act to be held in their own vaults; (2) to count as part of their lawful reserves Federal reserve notes of their own district not exceeding in the aggregate an amount equal to 5 per cent of their net demand deposits."

The amendment above proposed is substantially the same as recommended by the board to both Houses in September, 1914, when a committee of the board appeared before you and gave the reasons which prompted the board to urge the amendments, and was reported favorably by the Senate Committee on Banking and Currency, August 25, 1914 (calendar day, Sept. 3, 1914). (S. 6439, Rept. No. 777, 63d Cong., 2d sess.) Proposition (1) above, was also contained in S. 6505, which passed the Senate September 18, 1914, and was reported by the House Committee on Banking and Currency, September 24, 1914, with an amendment limiting the period to 36 months after the establishment of the Federal reserve banks. (House Rept. 1166, 63d Cong., 2d sess.)

The board felt at that time, which was before the opening of the Federal reserve banks, that the position of the Federal reserve banks would be strengthened and the confidence of the member banks and the country still further increased, if the Federal Reserve Board were given the powers suggested in the amendments.

Subsequent events—particularly the turn in the tide of European trade, which eliminated for the time being the danger of substantial gold withdrawals—removed the immediate necessity for securing the amendment.

The board feels, however, that the country would be better protected if Congress before adjourning should give to the Federal Reserve Board the additional powers of defense outlined in the amendments.

The effect of these powers would be that the member banks would be placed in a position where, in case of desirability, they could respond to a suggestion when made by the Federal reserve banks or the board, to increase their optional balances with the Federal reserve banks, so as to enable the Federal reserve banks to accumulate a larger percentage of the country's gold holdings and thereby enable the Federal reserve system to withstand withdrawals of gold with greater ease and without the necessity of early or drastic protective increases of interest rates.

In order to enable the member banks freely to respond to such demand, it would be necessary for them to be permitted, to a certain extent, to count Federal reserve notes as reserve money and thus to permit a portion, at least, of the gold certificates held by them to flow into the Federal reserve banks, taking in substitution therefor the Federal reserve notes.

Up to this time our enormous exports have been sufficient to offset the great volume of securities sold back to the United States by Europe and credits opened by the United States to foreign countries. If for any reason, however, there should be a temporary halt or substantial decrease in the exports of the United States (such as might be caused by a larger home demand for the articles that now constitute to a large extent the substance of our exports), or if our imports might increase while foreign securities remain massed and ready to be returned to the United States, the country should be prepared to meet such temporary derangements without being forced to submit to drastic changes in our interest rates.

Conditions as here outlined may occur or may not occur. But the board feels that it should have the means of meeting them whenever they shall arise—whether in the near future or at any later period.

The board therefore earnestly recommends to Congress the enactment of the amendments here suggested, inasmuch as they will tend greatly to strengthen the power of and the confidence in the Federal reserve system.

Respectfully,

C. S. HAMLIN, *Governor.*

Hon. ROBERT L. OWEN,
Chairman Committee on Banking and Currency,
United States Senate.

FEDERAL RESERVE BOARD,
Washington, June 13, 1916.

Hon. ROBERT L. OWEN,
United States Senate.

DEAR SENATOR OWEN: In looking over the amendments to the Federal reserve act reported by your committee I notice that the proposed power to the Federal reserve banks to open and maintain on their books banking accounts for their foreign correspondents or agencies is omitted. At a meeting of the Federal Reserve Board this morning Mr. Warburg stated that according to his recollection the committee voted to report this amendment during the hearing at which Mr. Warburg and I were present. Of course, it is possible that later you voted not to report it, but if it was reported I thought I would call your attention to the fact that it does not appear in the bill as reported to the Senate.

I inclose a copy of a letter sent to you by Mr. Warburg, dated May 19, 1916, with regard to this.

Very sincerely, yours,

C. S. HAMLIN, *Governor.*

MAY 19, 1916.

Hon. ROBERT L. OWEN,
United States Senate.

DEAR SENATOR OWEN: In developing the program of appointing foreign correspondents or agencies for the Federal reserve banks, it has occurred to the Federal Reserve Board that while Federal reserve banks may open accounts in foreign countries they have not the power to act in a similar way for such foreign correspondents or agencies if these should wish to have the Federal reserve banks open accounts for them.

This difficulty could be met by inserting at the end of subsection (e) of section 14 the following words:

"and with the consent of the Federal Reserve Board to open and maintain banking accounts for such foreign correspondents or agencies."

The same effect might possibly be reached by simply inserting the word "reciprocal," so as to make the beginning of the paragraph read:

"To establish accounts with other Federal reserve banks for exchange purposes, and, with the consent of the Federal Reserve Board, to open and maintain reciprocal banking accounts in foreign countries," etc.

This might, however, lend itself to a construction as if the Federal reserve banks might open only reciprocal accounts, and it might therefore be better to add a special paragraph at the end of the section, as above suggested.

Very faithfully, yours,

PAUL M. WARBURG.

TREASURY DEPARTMENT,
COMPTROLLER OF THE CURRENCY,
Washington, June 8, 1916.

MY DEAR SENATOR: The original national-bank act of February 25, 1863, as reenacted by the act of June 3, 1864, authorizing the formation of national banks throughout the country, provided that no national bank should be authorized with a capital of less than $50,000 in any place; that in a place with a population exceeding 6,000 the capital of the bank should not be less than $100,000, and further provided that no national bank with a capital of less than $200,000 should be organized in any place having a population of over 50,000.

Later on it became manifest that there were many country towns and villages which needed banking facilities but which did not have sufficient business to justify the organization of national banks with a capital of as much as $50,000. To extend the benefits of banking facilities to these small places the national-bank act was amended by the act of March 14, 1900, so as to authorize the organization in towns and villages with a population not exceeding 3,000 of banks with a minimum capital of $25,000.

Since this amendment to the bank act went into effect there have been organized throughout the country 3,084 national banks having a capital of $25,000. Four hundred and thirty-eight of these $25,000 banks have either failed or gone into liquidation, some have increased their capital, and the number of such banks with a capital of $25,000 now in operation is 2,079, or 27 per cent of the total number of national banks.

The average deposits (individual and bank) at this time of all $25,000 banks is $178,138, or 7.13 times their capital and 4.6 times their capital, surplus, and profits. A country bank with $25,000 capital and with the average deposits is able, with good management, to lend its money at rates authorized by law and at the same time to return a reasonable dividend to its shareholders. But there are many banks located in country communities where the small deposits which the banks receive may make it somewhat difficult for the banks to charge on their loans only the rates of interest permitted by law and at the same time yield a satisfactory return to shareholders, and in many such cases banks have been tempted to exact excessive and in some cases grossly usurious rates on accommodations which they extend to local borrowers. It is unfortunately true that in many other cases banks have been demanding usurious rates of interest even though they had more than the average deposits and although adherence to the legal rates would still yield them liberal dividends on their shares.

For some time I have been giving careful consideration to the question as to how the powers of these small national banks might be enlarged so as to provide them with additional sources of revenue and place them in a position where they could better compete with local State banks and trust companies which are sometimes authorized under the law to do a class of business not strictly that of commercial banking.

Under section 5736, United States Revised Statutes, the business of national banks at this time is limited to the exercise of "such incidental powers as shall be necessary to carry on the business of banking by (a) discounting and negotiating promissory notes, drafts, bills of exchange or other evidences of debt; (b) receiving deposts; (c) buying and selling exchange, coin, and bullion; (d) loaning money on personal security; (e) obtaining, issuing, and circulating notes according to the provisions of this title."

Under the Federal reserve act the banks are further authorized under specified restrictions to make certain loans on real estate.

National banks are not given either expressly nor by necessary implication the power to act as agents for insurance companies or as brokers or agents for others in procuring or making real estate loans.

The courts have uniformly held that such corporations can exercise only those powers which are expressly granted or which are necessarily incidental to powers that are granted.

As stated by Mr. Justice Harlan, in delivering the opinion of the United States Supreme Court in the case of Logan County National Bank *v.* Townsend (139 U. S., 67):

"It is undoubtedly true, as contended by the defendant, that the national banking act is an enabling act for all associations organized under it, and that a national bank can not rightfully exercise any powers except those expressly granted by that act, or such incidental powers as are necessary to carry on the business of banking for which it was established."

Again in the case of National Bank *v.* Matthews (98 U. S., 625), Mr. Justice Swan, in delivering the opinion of the court, said:

"Section 5136 does not in terms prohibit a loan on real estate, but the implication to that effect is clear. What is so implied is as effectual as if it were expressed."

It is certainly clear that the Comptroller of the Currency has no right to authorize or permit a national bank to exercise powers not conferred upon it by law.

My investigations lead me respectfully to recommend to Congress an amendment to the national-bank act by which national banks located in villages and towns having a population of not exceeding 3,000 may be permitted to act as agents for insurance companies in the placing of policies of insurance—fire, life, etc.—and that they may also be authorized to act as agents for the negotiation of loans on farms or other real estate in their respective sections of the country, where they may be in position to have some direct knowledge as to the value of the property upon which such loans are to be secured.

It seems desirable from the standpoint of public policy and banking efficiency that this authority should be limited to banks in small communities. This additional income will strengthen them and increase their ability to make a fair return to their shareholders, while the new business is not likely to assume such proportions as to distract the officers of the bank from the principal business of banking. Furthermore in many small places the amount of insurance policies written or mortgages to be placed on commission is not sufficient to take up the entire time of an insurance broker, and the bank is not therefore likely to trespass upon outside business naturally belonging to others.

I think it would be unwise and therefore undesirable to confer this privilege generally upon banks in large cities where the legitimate business of banking affords ample scope for the energies of trained and expert bankers. I think it would be unfortunate if any movement should be made in the direction of placing the banks of the country in the category of department stores. The business is one requiring training, skill, and application, and I think that the profession of banking would suffer if there should be a departure from the principles which should govern and have heretofore governed.

I inclose with this a draft of a proposed amendment to the national-banking act designed to empower national banks located in towns of not over 3,000 population, under such regulations and restrictions as may from time to time be approved and promulgated by the Comptroller of the Currency, to act as agents for the placing of insurance policies and also to act as agent in making or procuring loans on real estate.

I respectfully recommend and urge the adoption of such an amendment for the reasons I have given.

I am to-day writing a letter similar to this to Congressman GLASS, chairman of the Banking and Currency Committee of the House of Representatives.

Respectfully,

JNO. SKELTON WILLIAMS,
Comptroller.

Hon. ROBERT L. OWEN,
United States Senate.

Mr. SMOOT. Would it not be just as well for the Senator to take up the amendments, without reading the whole of the report, and explain them briefly?

Mr. OWEN. That is my purpose. The first of these proposed amendments deals with domestic acceptances. The words "upon solvent member banks" are stricken out and there are inserted the words "and also, for collection, maturing bills." The existing law does not provide clearly for the collection of maturing bills, and it is obvious that it ought to be covered by the statute, and so be beyond any possible doubt or question.

The other amendments under the heading of domestic acceptances are along the same line, inserting the words "and checks and drafts" before "payable upon presentation," and after those words inserting "within its district, and maturing bills payable within its district." The insertion of those words is intended to preclude any possible misunderstanding with regard to the function of the bank in handling maturing bills payable within the district.

The next amendment I call attention to is that striking out the words:

Any Federal reserve bank may discount acceptances which are based on the importation or exportation of goods—

And so forth, as appears on page 2 of the report, and inserting in lieu thereof the words printed in italics in the last paragraph on the page, so as to read:

Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. No member bank shall accept, whether in a foreign or domestic transaction, for any one person, company, firm, or corporation to an amount equal at any time in the aggregate to more than 10 per cent of its paid up and unimpaired capital stock and surplus unless the bank is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance—

And so forth.

The purpose of that is to permit a limited use of domestic acceptances, where those acceptances are covered by documents conveying or securing title to readily marketable staples, and then confining it further, so that the bank may not make acceptances to over 10 per cent of its paid up and unimpaired capital stock to any particular individual, company, firm, or corporation. That latter limitation is the general principle of the national banking act as applied to other loans than domestic acceptances. On page 3 of the report is another amendment, in which are inserted the words:

Any Federal reserve bank may make advances to its member banks on their promissory notes for a period not exceeding 15 days, at rates to be established by such Federal reserve banks, subject to the review and determination of the Federal Reserve Board, provided such promissory notes are secured by such notes, drafts, bills of exchange, or bankers' acceptances as are eligible for rediscount or for purchase by Federal reserve banks under the provisions of this act, or by the deposit or pledge of bonds or notes of the United States.

Mr. VARDAMAN. Mr. President, I desire to ask the Senator from Oklahoma what is the purpose of making the time so short—15 days?

Mr. OWEN. It does not make the time short. I was just going to explain the purpose of this amendment. At present, under the existing law, these bills, drafts, and so forth, which are used as collateral are actually transferred to the possession of the Federal reserve agent. This is intended to provide an easier method of administration, so that these various notes,

maturing in a short time, shall not themselves be necessarily transferred, but may be merely held in the portfolio as collateral, thus permitting the bank to put up its own note, secured by this collateral, without transferring the individual notes. It is merely an administrative detail which makes more convenient the operation of the bank.

Mr. SMITH of South Carolina. Mr. President, if the Senator from Oklahoma will pardon me, on page 2 of the report, in the proviso having reference to notes, drafts, and bills drawn or issued for agricultural purposes, I see there is a proposed amendment striking out the word "capital" and inserting in lieu thereof the word "assets." I should like to have the Senator from Oklahoma explain that, for I am particularly interested in that part of the bill.

Mr. OWEN. That expands the permission there from the bare capital to the assets, which are larger than the capital, and is intended to liberalize the provision of the law.

Mr. SMITH of South Carolina. I desired to have that explanation in the RECORD, so that the matter might be understood.

Mr. OWEN. Mr. President, at the bottom of page 3 of the report will be found the insertion of these words:

Any member bank may accept drafts or bills of exchange drawn upon it having not more than three months' sight to run, exclusive of days of grace, drawn under regulations to be prescribed by the Federal Reserve Board by banks or bankers in foreign countries or dependencies or insular possessions of the United States for the purpose of furnishing dollar exchange as required by the usages of trade in the respective countries, dependencies, or insular possessions. And such drafts or bills may be acquired by Federal reserve banks in such amounts and subject to such regulations, restrictions, and limitations as may be prescribed by the Federal Reserve Board: *Provided, however,* That no member bank shall accept such drafts or bills of exchange referred to in this paragraph for any one bank to an amount exceeding in the aggregate 10 per cent of the paid-up and unimpaired capital and surplus of the accepting bank unless the draft or bill of exchange is accompanied by documents conveying or securing title or by some other adequate security: *Provided further,* That no member bank shall accept such drafts or bills in an amount exceeding at any time the aggregate of one-half of its paid-up and unimpaired capital and surplus except by authority of the Federal Reserve Board, but in no contingency to exceed the unimpaired capital and surplus of such accepting bank.

At present exchange passing from the Argentine to the United States passes through London by sterling exchange. By this it is proposed to permit these exchanges to be expressed in dollars, so as in that way to establish a direct communication between the South American and other foreign countries and the United States, and to make it unnecessary, in transmitting credits, to transmit them through London in sterling exchange or through other European countries in terms of money of the foreign country through which the exchanges are transmitted. The purpose is to establish the dollar exchange, so as to make the United States a financial center for the transaction of foreign business, and to make this country what it is destined to be—the financial center of the world.

Under the head of "Federal reserve notes," on page 4, there are certain changes made. For instance, in the center of the page, is this provision:

Provided, however, That when the Federal reserve agent holds gold or gold certificates as collateral for Federal reserve notes issued to the bank such gold or gold certificates shall be counted as part of the gold reserve which such bank is required to maintain against its Federal reserve notes in actual circulation.

Of course the Federal reserve bank could transfer its reserve notes over and take that gold back into its own vaults, but for administrative purposes it is more convenient to allow the gold, which is already in the hands of the Federal reserve agent covering outstanding notes, to be counted as if it were owned by the bank, which, in fact, it is, though it is not so in form.

The other changes which were made in section 16 with regard to this matter are for the purpose of making the section harmonious with this end in view. This is more fully explained in the letter from the Federal Reserve Board, which I have already placed in the RECORD.

On page 6, under the head of "Loans on farm lands and other real estate," will be found this provision:

Any national banking association not situated in a central reserve city may make loans, secured by improved and unencumbered farm land situated within its Federal reserve district—

It is proposed there to insert:

or within a radius of 100 miles of the place in which such bank is located, irrespective of district lines, and may also make loans secured by improved and unencumbered real estate located within 100 miles of the place in which such bank is located, irrespective of district lines.

The purpose of that is to permit a bank which happens to be upon the border or edge of one of the Federal reserve districts to exercise its ordinary function in the territory immediately contiguous, which it has heretofore been exercising, and which might appear to have been excluded by the existing statute unless this amendment were inserted.

Under the head of "Banking corporations authorized to do foreign banking business" we have struck out certain words in section 25 and inserted these words in lieu thereof:

First. To establish branches in foreign countries or dependencies or insular possessions of the United States for the furtherance of the foreign commerce of the United States, and to act if required to do so as fiscal agents of the United States.

Second. To invest an amount not exceeding in the aggregate 10 per cent of its paid-in capital stock and surplus in the stock of one or more banks or corporations chartered or incorporated under the laws of the United States or of any State thereof, and principally engaged in international or foreign banking, or banking in a dependency or insular possession of the United States, either directly or through the agency, ownership, or control of local institutions in foreign countries, or in such dependencies or insular possessions.

Such applications shall specify the name and capital of the banking associations filing it, the powers applied for, and the place or places where the banking operations proposed are to be carried on—

And so forth.

The purpose of that provision is to permit the various banks of the United States, if they so wish, to cooperate together in establishing or taking stock in a bank which shall act as a medium for them in dealing with foreign financial affairs and through which they can transact their business, if they please, by establishing a bank in which they will take stock. That is explained also in the letter of the Federal Reserve Board at considerable length.

Under the head of "Domestic Branches," on page 8, section 25a, it is proposed:

That any national banking association located in a city or incorporated town or village of more than 100,000 inhabitants and possessing a capital and surplus of $1,000,000 or more may, under such rules and regulations as the Federal Reserve Board may prescribe, establish branches not to exceed 10 in number within the corporate limits of the city, town, or village in which it is located.

It is my wish to further amend this by providing that it shall not apply to those States which forbid the extension of such rights to State banks or to apply only in States which affirmatively provide for branch banks. The purpose of this is to put the national banks upon a parity with the State banks in those States which permit limited branch banking.

It is the purpose also of this provision to permit banks in a county seat to have branches throughout the county. There are throughout the United States a number of petty State banks, with $10,000 capital, which, it will be found, are in many cases owned by the same men who run a national bank at the county seat. They establish little banks in the different parts of the county and transact business there as an independently organized bank. This method is more expensive than if the small banks were direct branches of some existing bank employing one system of accounting and with limited local authority handled by a clerk; and if there is no State law prohibiting, it is thought it would be desirable to do this.

Mr. THOMAS. Mr. President——

Mr. OWEN. I yield to the Senator from Colorado.

Mr. THOMAS. I think, Mr. President, the section to which the Senator is addressing himself should be amended by limiting its application to those States which permit State banks to have branch banks.

Mr. OWEN. It is proposed, Mr. President, to present an amendment to that effect either negatively or affirmatively, and I will offer it at the proper moment.

Mr. President, the amendments have now been presented and read to the Senate. There are some verbal modifications which are necessary and one or two other amendments which I propose, with the consent of the Senate, to offer, one particularly with regard to giving some additional powers to the small banks to act as agents in insurance matters. Such an amendment has been reported favorably by the Comptroller of the Currency in the letter which I have had inserted in the RECORD, and which I will explain at the proper moment. Before asking the Senate to actually pass upon these items, I wanted to call attention to these few additional proposals which I will present at the proper moment. If there is any question that any Senator would like to ask me with regard to this matter, I would be very pleased to answer it now.

Mr. SMITH of South Carolina. Mr. President, I should like to ask the Senator for a further explanation of the amendment on page 8, section 25a. I listened to his explanation in reference to the establishment of branch banks. The wording to which I call attention is this:

That any national banking association located in a city or incorporated town or village——

Mr. OWEN. I will say to the Senator that I intend to move as an amendment the insertion of the words "any member bank" instead of "national banking association." It would then apply to any State bank that might care to exercise the privilege after joining the Federal Reserve System.

Mr. SMITH of South Carolina. I wanted to call the attention of the Senator to that and also to the fact that the same section provides, reading further:

And possessing a capital and surplus of $1,000,000 or more may, under such rules and regulations as the Federal Reserve Board may prescribe, establish branches, not to exceed 10 in number, within the corporate limits of the city, town, or village in which it is located.

That refers to a banking association. Does it mean that the branches will have to be established within the city in which the association is incorporated, or is it the contemplation of this provision to enable the associations to establish branch banks within the district in which they are situated?

Mr. OWEN. I will explain to the Senator that in New York the Corn Exchange Bank, for example, which is a State institution, has a number of branches, and it has in that way some advantage over the national banks located in the city of New York. It is proposed to give the national banks in the city of New York an opportunity to compete with the Corn Exchange Bank to that extent, if they find it desirable to do so. In the meantime the Corn Exchange Bank has happened within the last few days to express its purpose to join the Federal Reserve System, and that will bring into the system a very large and important element.

Mr. CLAPP. Mr. President, I only want to say a word on this subject. I have the most unbounded confidence in the ability of the chairman of the committee, but I have received a great many letters from my own State protesting against the provision for branch banks. Now, I understand the committee has determined to accept an amendment which excludes from the operation of this bill the State which I have part of the honor to represent.

Mr. OWEN. I will advise the Senator that the proposed amendment is to exclude from the operations of this provision any State whose laws prohibit the establishment of branches by banks chartered by the laws of the State. That would cover the Minnesota case.

Mr. CLAPP. Mr. President, I want to suggest that that, to my mind, is a very good reason for entering a protest—which I realize will probably be futile, for I presume that the bill will pass—against the enactment of so important a measure as this in the manner which is proposed. The fact that the committee has already recognized the importance of such an amendment, which will except Minnesota and other States, the fact that the committee itself now is reporting a number of amendments which certainly can not be thoroughly understood in the hasty consideration of the bill, impels me, fruitless as I know the effort will be, to enter my feeble protest against the passage of legislation of this kind in this manner.

The purpose of this legislation is far-reaching. It is designed to enable the United States to take advantage of that wreck and ruin financially which will come to many countries after the European war is over, and to extend the financial influence of this country. No one can question the merit of that purpose. A great opportunity undoubtedly lies before the American people, and I think perhaps there is no man in the Senate who is better able to meet that opportunity as the chairman of a committee having that matter in hand than the eminent chairman of the Committee on Banking and Currency. But I do not believe, Mr. President, that legislation designed to be as far-reaching as this legislation is with reference to foreign affairs and also to our domestic affairs should ever be passed through the Senate in this manner; and, while opposition is futile—for I realize that it is predetermined that this legislation shall be enacted—and while my opposition, I repeat, is in nowise based upon any suggestion of want of ability or purpose on the part of the chairman—for, as I have said, few men are better qualified than he—yet I do not believe any one man or any one committee possesses the ability to forecast and prepare in this manner as far-reaching and sweeping a piece of legislation as this legislation is. Therefore, although the amendment proposed to be accepted covers the objection that comes from the State that I in part represent, still I, for one, propose to vote against the passage of his far-reaching bill, thus hastily considered by the Senate.

Mr. CURTIS. Mr. President——

Mr. OWEN. Mr. President, if the Senator will pardon me just a moment, I will say just one word in response to the Senator from Minnesota, and then I will yield to the Senator from Kansas. I will take only one minute.

These amendments, of course, have been passed upon by the committee after numerous meetings. The committee has had this general question under its active attention now for over two years. The members of the committee have been studying this matter since 1913—three years. These particular amendments have been under consideration by the committee on numerous occasions. The report has been before the Senate now for nearly 60 days, so that any Senator desiring to comment upon it would have abundant opportunity to do it.

I realize, and every man must realize, that no human sagacity can absolutely and completely preclude the possibility of some particular error. These amendments, for the most part, are amending what has been discovered now in the last two years of operations—some points in the bill which could be improved. They have been carefully considered by the Federal Reserve Board in extended discussions among themselves. Finally, the Federal Reserve Board came before the Banking and Currency Committee and discussed this matter at great length; and the committee itself then discussed it, and finally determined on this report, which represents whatever of capacity the committee has.

Of course, the committee does not pretend to be absolutely perfect in regard to the matter. There may be still found some way in which it could be improved; but we hope, if that occurs, that then we may bring the matter to the attention of the Senate, and continue to improve the bill.

Mr. CLAPP. Mr. President, I am not criticizing the committee. I think the committee is a very able one. I think it has given a great deal of thought and consideration to this subject; but every amendment that the committee has adopted or proposes to adopt is evidence that the original concept of the committee was at fault.

It is true that this report has been lying before the Senate; but reports do not attract the attention which debate attracts. I firmly believe that a great measure like this, after being presented to the Senate as this has been, ought to remain before the Senate for a time, in order that the discussion may proceed, and that the suggestions that arise from the discussion may be considered.

Mr. President, I believe that the time is going to come when we will realize that during the last two years we have passed a great deal of very unfortunate legislation under the whip and spur of exigency, and too often attributed to a condition of war which had no relation whatever to the subject of the legislation. While, as I say, I do not expect my protest to result in postponing action and result in a more deliberate consideration, I felt that I ought to make it. I believe that it is an unwise way of enacting great legislation designed, as this is, not only to affect us in a measure at home, but to be the basis upon which American enterprise and credit and capital may project itself into a world-wide activity.

Mr. CURTIS. Mr. President, the experience of 1907 convinced the Republicans who were then in power, having the President and a majority in each branch of Congress, that provision should be made for the issuance of an emergency currency, and they determined to enact a short and simple law which would prevent panics in the future by providing an emergency currency to be issued when needed and to be returned when the demand had ceased.

So the Republicans in Congress agreed upon and enacted into law what has since been known as the Aldrich-Vreeland Act of May 30, 1908; and it must be remembered that this law was enacted over the protest of the then Democratic minority in Congress.

There was no occasion to test this law during the remainder of the time the Republicans were in control of the national administration. The first real test was had in 1913, during the first year of President Wilson's administration. The Democratic Party having succeeded in electing a President and a majority in the House and Senate, an extra session of Congress was called, and the Democratic majority began its old tactics of changing the tariff and tinkering with the financial policy of the country. The result can be best told by reading the report of the Secretary of the Treasury for the year 1913.

Before I read that, however, I want to say that I was very much surprised at the remarks of the Senator from Colorado [Mr. SHAFROTH] this morning, when he said:

The emergency currency act had been in existence for years, but it had never been invoked, or at least there never had been enough confidence that the Government of the United States could follow it.

The Secretary, in his report of 1913, says as follows:

A special session of Congress convened on April 7, 1913, and immediately began to consider the important questions of tariff and currency reform. The vast economic changes involved in these two important questions had the natural effect of causing in many quarters apprehension as to the possible effects of the anticipated legislation. A feeling of unrest began to pervade business circles. This was accentuated by a certain propaganda of pessimism which, whether designedly or not, produced a condition of extreme nervousness and tension. In the early part of June this assumed a serious aspect. Complaints began to reach the department from many parts of the country that credits were being restricted and that it was increasingly difficult to secure funds for the normal needs of legitimate business. To what extent these reports were justified there was no exact means of ascertaining,

but the general conditions indicated a more or less acute state of affairs. In order to relieve anxiety and let the business interests of the country understand that there was no occasion for unreasonable restriction of credits and to destroy apprehension based upon unjustifiable fears and to assure the country that the means were at hand to cope successfully with any situation that might arise, the Secretary announced that there was actually on hand in the Treasury and ready for immediate delivery to any and every bank complying with the requirements of the law $500,000,000 in new national-bank note currency, which the Secretary said he would not hesitate to issue under the provisions of the Aldrich-Vreeland Act of May 30, 1908, to banks making application therefor in accordance with the terms of that act. The relief occasioned by this announcement was instantaneous. Confidence of the banks in their ability to meet the demands of their customers was largely restored and the unfavorable symptoms promptly disappeared. So completely effective was this action that none of the $500,000,000 of currency was applied for by the banks.

So this Democratic administration, by offering to give relief under the Republican emergency currency law, was able to restore confidence and prevented a panic.

Early in 1913 the exportation of gold from the United States began to increase to an alarming extent. In the last six months of 1912 the exportation of gold only amounted to $13,978,006, while the gold exported in the first six months of 1913 amounted to $63,784,616. The exportation of gold for the year ending June 30, 1914, amounted to $112,038,529, and that exported for the year ending June 30, 1915, amounted to $146,224,148, and the exportation of gold did not decrease until several months after the opening of the European war.

The large exportation of gold in 1913 and 1914, the effect of the new tariff law on the business of the country, the men without jobs, the silent factories, the idle freight cars, and the breaking out of the European war late in the summer of 1914 caused a great demand for the issuance of emergency currency, and again the Secretary of the Treasury, in his report of December 7, 1914, tells us of the condition of the country in the summer and fall of that year in the following language:

> The outbreak of the European war precipitated many grave problems. International credits and exchanges were completely disorganized, ocean transportation was for a time partially paralyzed, the entire business and economic structure of this country was shaken to its foundations, and a catastrophe of calamitous proportions was narrowly averted. * * * A panic * * * might easily have resulted, and if it had the injury to the country would have been incalculable and many years would have been required to overcome its effects. * * * Confidence has been restored and specie payments have been maintained in the face of the world. * * * There is every reason why the country should look to the future with confidence so far as its trade, commerce, and industry are concerned. This has been accomplished notwithstanding the fact that the Federal Reserve System authorized by the act of December 23, 1913, was at that time only in process of formation and was therefore unable to render any service in the situation.

Yet, in the face of that statement, made by one of the members of the President's official family, the President stated, in his speech in Detroit a few days ago that those who opposed the Federal reserve act—

> now admit that it saved the country from a ruinous panic when the stress of war came on.

When his Secretary of the Treasury says the panic was prevented by the Republican emergency act of May 30, 1908.

So the Republican act of May 30, 1908, was again resorted to in order to relieve the situation and between the dates of August 4, 1914, and February 15, 1915, inclusive, the sum of $382,502,645, was issued and, by issuing this amount of emergency currency, the Secretary of the Treasury tells us:

> A country-wide panic of appalling proportions was threatened, but averted. We had emerged with our credit not only unimpaired but strengthened.

So much from the Democratic Secretary of the Treasury for this Republican measure that the Senator from Colorado said had not been put in force, and more. If this Democratic measure was so beneficial, why was it that this act was resorted to and the money issued under it up until February, 1915, more than a year after the act of December, 1913, had been enacted?

So the Republican Aldrich-Vreeland law, that was so loudly condemned by our Democratic friends in Congress in 1908, was used by their administration upon two occasions within two years to avert a panic and bring relief to and restore confidence among the people of the United States; and the total cost of the issue was only $1,390,764 and the interest collected from the issue exceeded the expenses by $1,588,258.85.

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. CURTIS. Certainly.

Mr. NELSON. I want to call his attention to the fact that by section 27 of the Federal reserve act the life of the Vreeland-Aldrich Act was extended to June 30, 1915; in other words, that at the time when that act was being formulated and prepared the Aldrich-Vreeland Act was deemed of such importance that its life was extended to 1915.

Mr. CURTIS. I intended to call the attention of the Senate to that fact, and I am very glad the Senator interrupted.

Mr. SHAFROTH. Mr. President, will the Senator yield as to that matter?

Mr. CURTIS. For a question only.

Mr. SHAFROTH. Is it not a fact that everybody recognized that the Federal reserve act could not be put in operation for months, and that it was the belief of everybody at the time of the passage of the act that the date of June 30 would arrive long before the Federal reserve act would be put into effect, and the banks were not established under it until, I think, about November 15, 1914?

Mr. CURTIS. It is not a fact that the people realized that the act could not be put in operation. The act was not put in operation for the simple reason that the Democratic Party, then in power, did not have sufficient confidence in it, and they did know that the emergency law of the Republicans had prevented a panic, and they were willing to trust that law. It was charged by the Republicans in Congress and upon the stump that the Democratic majority would not organize under that law until after the election of 1914.

Thus the Republicans gave you a simple, inexpensive remedy bringing relief to the people, and the Government making a profit out of the transaction.

Now, what has the Democratic administration given the country to take the place of the workable and successful Aldrich-Vreeland Emergency Act of 1908? Why, the Federal Reserve System, which provides for 12 Federal reserve banks in different sections of the country and gives employment to 593 new officeholders.

There has been no threatened panic, no chance to test the efficiency of the new system, but we do know that it has cost the Government a large sum to establish, operate, and maintain the 12 reserve banks to date. The organization expenses amounted to $493,960; the cost of the note issue was $804,705; the furniture and equipment cost $284,600; salaries of officers and employees of the Federal Reserve Board to December 31, 1915, amounted to $108,650; the salaries paid to the bank examiners amounted to $396,000; and the current expenses of the 12 Federal reserve banks amounted to $1,677,639. So you have a total expenditure from the date the banks opened for business to December 31, 1915, of $3,765,554, and the earnings of the banks were $2,130,610, or a cost to the Government to that date of $1,634,944.

Now, there has been no threatened panic since the banks were opened for business. The great European war has given the people of this country a great market, and our exports since the beginning of the war have exceeded those of any other period in the history of the country. Yet the Government has maintained this expensive system when it has been demonstrated that the simple plan provided by the Aldrich-Vreeland law would have answered the purpose, and the expense would have been very small, and the interest collected on the notes issued would more than have covered such expenses.

Mr. SHAFROTH. Mr. President, I should like to ask the Senator a question.

Mr. CURTIS Certainly.

Mr. SHAFROTH. That is, whether he believes that the Federal reserve act ought to be repealed now.

Mr. CURTIS. I do not believe it ought to be repealed, but I believe it should be very materially amended and changed and simplified. You now simply have an organization which provides for a horde of officeholders. You have an expensive proposition that could be changed, and the law should be amended so as to give us a simple banking act that would give relief to the people when they need it.

Mr. SHAFROTH. That is just what we are doing right now.

Mr. SMOOT. They have been amending it ever since it was passed.

Mr. CURTIS. This, I understand, is the fifth time the law has been amended since its enactment in December, 1913, and they will keep amending it right along until we get a Republican Senate and House, when it will be amended and be put in workable shape, and will be maintained and operated at a very small cost.

Mr. SHAFROTH. I should like to ask the Senator another question, and that is whether he believes that the Aldrich-Vreeland Act now ought to be in existence.

Mr. CURTIS. Yes. If the Aldrich-Vreeland Act were now upon the statute books of this country there never would be any danger of a panic, because the country would know that they could be relieved from it, as they have been twice before.

Mr. SHAFROTH. But they were relieved at the time the panic did occur.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is House bill 15947.

LANDS OF BUREAU OF MINES, PITTSBURGH, PA.

Mr. WALSH. I should like leave to submit a report from the Committee on Mines and Mining for consideration. It will not delay the Senate more than a moment.

I am directed by the Committee on Mines and Mining, to which was referred the joint resolution (S. J. Res. 150) to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area, to report it favorably with amendments, and I submit a report (No. 670) thereon. I ask for the present consideration of the bill.

Mr. SMOOT. I will ask the Senator if they are public lands which are to be exchanged?

Mr. WALSH. The Bureau of Mines owns certain lands, as the Senator knows, in the city of Pittsburgh.

Mr. SWANSON. I can not yield if the joint resolution is going to lead to debate.

Mr. WALSH. Adjacent to those are lands owned by the city, and it is proposed to run a street through one side. The city gives land of the city for land at the end of the street.

Mr. SWANSON. I can not yield for any purpose that will lead to discussion.

Mr. OLIVER. I hope the Senator from Virginia will not object to the consideration of this joint resolution. It is a mere formal matter for the exchange of lands.

Mr. SWANSON. I must call for the regular order. Many Senators have requested me to yield and I can not discriminate. I have had nearly a dozen applications to yield for the consideration of measures.

Mr. OLIVER. Then I ask that the report may lie on the table.

Mr. SWANSON. The Senate will have another morning hour in a few days, and the joint resolution can then be called up.

Mr. OLIVER. I will state to the Senator that I expect to be called away by sickness at any moment, and I may not be here when the next morning hour is had. This is a matter which is vital to the city of Pittsburgh, it is a mere formal matter, and in the time we have been talking about it, the joint resolution could have been passed.

The VICE PRESIDENT. The Chair thinks the Senator from Virginia withdraws his objection.

Mr. SWANSON. I withdraw my objection.

Mr. OLIVER. I thank the Senator.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The amendments were, on page 1, line 12, after the word "south," to insert the words "fifteen degrees"; in line 13, before the word "minutes," to strike out "degrees fifty-five"; and in the same line, after the word "minutes," to insert "fifty-five seconds," so as to make the joint resolution read:

Resolved, etc., That the Secretary of the Treasury be, and he is hereby, authorized to accept from the city of Pittsburgh, State of Pennsylvania, that certain lot or parcel of land bounded and described as follows:

Beginning at a point on the line dividing the properties owned by the city of Pittsburgh and the United States of America, occupied by the Bureau of Mines, at a point north 76° 45′ west 42.8 feet from the southeast corner of the said property of the United States of America; thence south 15° 24′ 55″ west 18.44 feet to a point; thence north 74° 36′ 55″ west 457.06 feet to a point; thence south 15° 28′ 45″ west 37.087 feet to a point; thence north 74° 36′ 55″ west 449.66 feet to a point; thence north 15° 28′ 45″ east 21.727 feet to a point on the said line dividing the properties of the city of Pittsburgh and the United States of America; thence south 76° 45′ east 907.39 feet to the place of beginning, containing 18,000 square feet, more or less, for the use of the Bureau of Mines of the Department of the Interior, and to transfer to the city of Pittsburgh in exchange therefor that certain lot or parcel of land now constituting a part of the grounds of the Bureau of Mines of the Department of the Interior bounded and described as follows:

Beginning at a point on the line dividing the properties owned by the city of Pittsburgh and the United States of America, occupied by the Bureau of Mines, at a point north 76° 45′ west 42.8 feet from the southeast corner of said property of the United States of America; thence north 15° 24′ 55″ east 347.8 feet to a point on the dividing line between the properties of the United States of America and the Carnegie Institute of Technology, a Pennsylvania corporation; thence along said dividing line south 50° 41′ 15″ east 47.18 feet to a point; thence along the line dividing the property of the United States of America from the property of the said Carnegie Institute of Technology and the city of Pittsburgh south 15° 28′ 45″ west 327.08 feet to a point; thence north 76° 45′ west 42.8 feet to the place of beginning; together with that part of a circular tract lying west of the above-described tract of land and included within an arc struck with a radius of 51 feet from a point 5 feet east of a point on the westerly line 257 feet from the southwest corner of the above-described tract; said lot or parcel of ground comprising 18,000 square feet, more or less.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

MEMORIAL TABLET TO COL. DAVID DU B. GAILLARD.

Mr. RANSDELL. Mr. President——

Mr. SWANSON. The Senator from Louisiana gave notice that he would address the Senate at this time.

Mr. TILLMAN. Will the Senator from Louisiana yield to me for a moment?

Mr. RANSDELL. Certainly.

Mr. TILLMAN. I ask unanimous consent that the Senate may pass three little bills. If they were important bills, I would not ask for their consideration now.

I ask the Senate to proceed to the consideration of the bill (S. 5752) granting to the widow of Col. David du B. Gaillard authority to place in his memory a tablet in the Memorial Amphitheater at Arlington, Va.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Library with an amendment, to strike out all after the enacting clause and insert:

That Katherine D. Gaillard, widow of Col. David du B. Gaillard, deceased, of the Corps of Engineers, United States Army, is hereby authorized to place a tablet in the Memorial Amphitheater in the Arlington National Cemetery, Va. The design, character, and location of the tablet shall be subject to the approval of the commission under whose direction the building is being erected.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MARY S. CORBIN.

Mr. TILLMAN. I ask the Senate to proceed to the consideration of the bill (H. R. 11261) for the relief of Mary S. Corbin.

There being no objection, the bill was considered as in Committee of the Whole. It proposes to pay to Mary S. Corbin, of Oconee County, S. C., widow of W. B. F. Corbin, who while in the discharge of his duty as a deputy United States marshal was murdered by Robert Belcher, Lou Belcher, J. B. Palmer, and Charles Palmer, violators of the United States postal laws and regulations, on the 8th day of March, 1909, the sum of $1,000, on account of the murder of her said husband while in the service of the Government of the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MRS. C. D. CORBIN.

Mr. TILLMAN. I ask the Senate to proceed to the consideration of the bill (H. R. 11262) for the relief of Mrs. C. D. Corbin.

There being no objection, the bill was considered as in Committee of the Whole. It proposes to pay to Mrs. C. D. Corbin, of Oconee County, S. C., widow of C. D. Corbin, who, while in the discharge of his duty as a deputy United States marshal, was murdered by Robert Belcher, Lou Belcher, J. B. Palmer, and Charles Palmer, violators of the United States postal laws and regulations, on the 8th day of March, 1909, the sum of $1,000, on account of the murder of her said husband while in the service of the Government of the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RURAL HEALTH—THE NATION'S FIRST DUTY.

Mr. RANSDELL. Mr. President, the pending naval bill carries an appropriation of over $315,000,000, and the Army bill, which is to be taken up next, over $330,000,000, while the coast fortifications law, already passed, provides over $34,000,000, making a total of more than $680,000,000 for the protection of our country against foreign foes and for military preparedness against enemies who perchance may never assail us. I am in favor of these three great measures. I believe them to be dictated by wise, farseeing statesmanship, but they are all framed for the destruction of human life should it become necessary; and while we are about to spend such colossal sums to prepare for killing men by wholesale like our brethren of the Old World have been doing for the past two years, it is high time to pay some attention to the preservation of life by eradicating preventable diseases which sap our national vitality and destroy every year hundreds of thousands of American citizens. If we are to reap full measure of success in our program of preparation, it is necessary to begin at the fountainhead and look well to the health and physical condition of our people. No matter how numerous and strong are our ships and fortifications, nor how many soldiers we have, they will be of little avail unless the men behind the guns are healthy, vigorous, and capable of great exertion.

At this moment, when the summer heats are fiercest, we have a large army in Mexico and in camps near the Mexican border, and the greatest precautions are necessary to protect these

soldiers from disease, especially typhoid fever and malaria, which caused such sad havoc during our War with Spain. Harrington, in his work on practical hygiene, page 615, says:

The various forms of malarial disease are always a curse to armies, especially those operating in hot climates. Though the death roll from malaria may not be great, sickness and consequent invaliding are commonly enormous in amount, and an army stricken with malaria is an army unfit for field operations.

Mr. President, I fear we are not as well prepared in the matter of public health as the enlightened countries of Europe, and desire to present some thoughts on the subject which are very pertinent at this time.

Several months ago I introduced a bill, S. 2214, which I am sorry to say is still in the committee, as I have been unable to secure a favorable report upon it.

Briefly, the bill appropriates $500,000 for the use of the United States Public Health Service in investigating and encouraging the adoption of improved methods of rural sanitation, particularly with reference to the prevention of malaria and typhoid fever, and stating the necessary steps to be taken in cooperation with State and local authorities in the rural districts of the United States.

The great English author and statesman, Benjamin Disraeli, very truly said:

Public health is the foundation on which reposes the happiness of a people and the power of a country. The care of the public health is the first duty of a statesman.

Many years later President Taft said:

It may well be claimed that the care of individual and family health is the first and most patriotic duty of a citizen.

It is with these thoughts in mind that I desire to bring to the attention of the Senate the necessity for increased public-health activities on the part of the Federal Government, particularly with relation to those measures which may be undertaken in cooperation with the States, looking to the increase of health for the rural dweller of our country. It should be borne in mind that at the present time approximately 54 per cent of the total population in our country is rural and that the enactment and enforcement of those measures which will bring greater health to the country dweller will react to the benefit of the entire citizenship of the Union, both in a physical and an economic way.

The Congress of the United States has been slow in realizing the necessity for active and intensive operations for the prevention of disease and the consequent increase of healthfulness and longevity. That sacred document, the Constitution of the United States, if we except the phrase in the preamble relating to the promotion "of the general welfare," makes no mention of health or health activities, and for the most part health laws which were subsequently enacted by Congress had as their stimulus an immediate and pressing danger, such as the presence of epidemic disease or its threatened importation.

A brief review of the health laws of the United States shows that there has been a gradually increasing attention to the governmental protection of the public health. This is a movement which found expression in the act approved August 14, 1912, entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service." This gave additional powers to and laid additional duties upon this important branch of our Government and reaffirmed powers and duties of prior existence.

The earlier attempts at colonization in the United States were marked by a series of disastrous epidemics. In fact it may be said that practically every attempt at exploration or colonization has entailed a struggle against some communicable disease. In each of the wars in which our country has engaged, more men have perished from disease than from the violence of war, and it may be said that the political history and geography of our Nation has suffered alteration because of ignorance of the causes and methods of spread of disease and because of failure to apply and bring into action the limited knowledge of which we were possessed.

The health enactments of colonial days were entirely local in their character and did little toward checking the spread of disease. By the time the Revolutionary War ended and our Nation, still in swaddling clothes though it was, was endeavoring to take the first steps toward its place among the great nations of the world, we began to realize that it was the duty of the Nation to control and manage the works and instruments which were to be used in the exclusion of disease from the Nation. And thus the child among the world's governments had its first instruction in the principle "Salus populi suprema est lex." This feeling assumed concrete form in a bill which was introduced into the First Congress providing for the assumption of quarantine functions by the General Government. Unfortunately this measure failed of passage because of the then existent jealousies between the various local ports and the fear that through some unforeseen contingency the Federal operation of quarantine might react against the commercial advantage of some State or port. For the next hundred years, almost, maritime quarantine was administered as a State function until it became apparent that the protection of all the States against the diseases of the world was a matter for the General Government, and not for the communities entering into the formation of that General Government. It was seen that since commerce between the States and with the outside world is controlled by the Federal Government, it is the duty of the Federal Government to so wisely conduct the operations of commerce that the individual States may receive health protection against the other States, and that the entire collection of sovereign States shall be protected against the invasion of disease from abroad. As a result, all of the maritime quarantines of the United States, with the exception of those of New York, Philadelphia, and Baltimore, have been ceded by the States to the General Government, and Congress has enacted wise laws looking to the prevention of the interstate spread of disease and to the cooperation of the Federal Health Service with State and municipal health authorities.

Within the past two months an officer of the United States Public Health Service has been appointed quarantine officer of the port of New York and the legislature of that State, by authorizing the governor to appoint a commission to consider the matter has taken the first steps toward cession of the quarantine function of the Empire State to the Federal Government. This marks a very important advance in the public-health movement in America, and the State of New York is to be commended for the stand which it has taken in this regard.

But this state of affairs was not arrived at spontaneously or by reason of a single law. It has been reached step by step and by the enactment of measures following along the general lines of that of which I am now speaking, measures for the most part prompted by the fear of pestilence or as a result of bitter lessons learned from its ravages. In fact it may be said that the public-health policy of the United States has passed through two developmental stages and is now in the third.

In the first stage the General Government assumed no authority or responsibility whatsoever. It was held that all of the authority was vested in the sovereign States and that the General Government had fulfilled its public-health function when it placed at the disposal of the States such officers and equipment as could be temporarily utilized for public-health duties. Thus in the act approved May 27, 1796, entitled "An act relative to quarantine," the President was authorized to direct revenue officers and officers commanding forts and revenue cutters to aid in the execution of quarantine and the health laws of the States. It is entirely probable that this law had its inspiration in the outbreaks of yellow fever at Charleston, S. C., Philadelphia, New York, Newport, and Boston. This is, however, the first national public-health law. Congress had previously, on April 3, 1794, authorized the President to alter the place for holding the sessions of Congress if in his judgment there existed a prevalence of contagious sickness which would be hazardous to the lives or health of Members of Congress, and important though it is for the legislative body of the United States to enact laws looking to the sanitary salvation of its Members, it is rather remarkable that Congress waited two years before it passed a health law for the country as a whole. It may be noted in passing that the act of May 27, 1796, was repealed by the act of February 25, 1799, but Congress was so well satisfied by the operation of the law of 1796 that the act of 1799 went much further and authorized the Secretary of the Treasury to make regulations governing the cooperation between revenue officers of the Government and State health authorities and provided for the erection of warehouses in which to store goods and commodities held in quarantine. It also authorized the changing of ports of entry on account of contagious or epidemic diseases, for the removal of places of sitting of the United States district courts, and for the removal of the seat of government and the Supreme Court of the United States on account of epidemic outbreaks.

No very great progress was made in the increase of governmental health functions, if we expect the act to encourage vaccination, which was approved February 27, 1813, until the act of May 26, 1866, which authorized the Secretary of War and the Secretary of the Navy to place gratuitously at the disposal of the commissioners of quarantine, or the proper authorities of any of the ports of the United States, vessels and hulks to be used temporarily for quarantine purposes, and under the joint resolution approved the same day authorized

the Secretary of the Treasury to make and carry into effect such orders and regulations of quarantine as in his opinion may be necessary and proper in aid of State or municipal authorities to guard against the introduction of cholera into the ports of the United States. It is not improbable that this law was enacted as the result of cholera, which was then epidemic in the United States.

It is interesting to note that cholera epidemics occurred in our country in 1817, 1819, 1832, 1833, 1848, 1849, 1850, and 1855; but apparently it required this last devastating outbreak to bring home to the American people forcefully the realization that safety from cholera means its exclusion from abroad. The following year Congress again authorized the loan of vessels and hulks to the quarantine authorities of the States.

The memory of the frightful yellow-fever epidemic of 1878 still lingers in the minds of many within the hearing of my voice. It attacked the entire South and for a time completely paralyzed its external commerce and its internal administration. At least 30,000 people were stricken, of whom fully 15,000 lost their lives. Just 25 years before, during the months of June, July, and August, of 1853, 16,000 persons, of whom 8,000 died, were attacked by yellow fever in New Orleans. The outbreak of 1878 swept up and down the Southern States like wildfire. But, thank God, yellow fever has disappeared from our country never to return, and we are entirely safe from the ravages of this awful disease.

Congress was impressed with the fact that the let-alone sanitary policy which was then being pursued was neither wise nor proper, and that the Federal Government must discharge in a better way its health responsibility to the Nation if we were to dwell in prosperity and security from disease. As a result, the act approved April 29, 1878, to prevent the introduction of contagious or infectious diseases into the United States, passed this body. This act provided for consular bills of health and for reports by consular officers on the sanitary condition of the ports at which they were stationed. These reports were to be made to the Surgeon General of the Marine Hospital Service, who was charged, under the direction of the Secretary of the Treasury, with the execution of the provisions of the law and the promulgation of rules and regulations necessary for the conduct of quarantine. It was expressly provided in this act that these rules and regulations should not conflict with or impair any sanitary or quarantine laws or regulations of any State or municipality. The enforcement of the national quarantine rules and regulations was made a duty of the officers of the Marine Hospital Service, and the policy was thus adopted that the protection of all the States against disease from foreign countries or from one another was the function of the General Government.

The issuance of bulletins on health had been authorized by a previous act of Congress, but in an act approved March 3, 1879, an appropriation was made for the publication of these bulletins. This may be said to be the beginning of the Government's policy of issuing from time to time for general distribution information of a public-health character. In reality this was the second stage in our sanitary progress, the basic idea of which is the protection of the individual citizen, locality, or State by the State and municipal health authorities and the protection of all of the States against foreign and domestic disease by the General Government. This policy takes cognizance of the pride of the States and their unwillingness to surrender to the General Government or to lay upon its shoulders any duty or function which they can satisfactorily perform. It imposes on the National Government the protection of the States, one against the other, the assumption of the burden when an epidemic exists in more than one State or is apt to spread beyond the borders of a State and the throwing about interstate commerce those health safeguards which will make such commerce safe and without health hazard to the integral units of our Nation. This policy recognizes the duty of the States to attack and solve problems which are purely intrastate, but it demands that the General Government shall undertake the study and investigation of matters which concern all of the States or which demand the services of Federal experts for the conduct of experiments which will react to the benefit of the various States and the body politic.

In pursuance of this policy, the United States Public Health Service, an organization which has grown out of the Marine-Hospital Service, has been charged with the duty of the study and investigation of the diseases of man. The officers of this organization have opportunities for study and investigation which are entirely closed to the local practitioner. These officers travel over the various parts of the United States, and in many other parts of the world, in the discharge of health functions and they secure in this way a broad viewpoint as well as an extensive experience in the prevention of the spread of communicable disease. As a result, the Public Health Service has become a clearing house of health information, which is ever at its command. The knowledge of all in effect is at the command of each.

An appropriation act approved August 7, 1882, created a fund "for the prevention of the introduction and spread of contagious diseases," which has been continued ever since and which has come to bear a very important relation to our sanitary defenses. This is in effect an emergency fund which the President may expend in aid of State and local boards or otherwise in his discretion in the prevention and suppression of cholera, typhus fever, yellow fever, smallpox, bubonic plague, and trachoma, and in such emergencies in the execution of any quarantine laws which are in force.

The first session of the Fifty-first Congress enacted a law which was approved March 27, 1890, which marked the beginning of a new phase in our national public-health policy. Prior to this time aside from the work of eradicating epidemics the national health authorities had as their function the exclusion of disease from abroad rather than the prevention of the interstate spread of communicable diseases. The act approved March 27, 1890, had to do with cholera, yellow fever, smallpox, and bubonic plague. This act provides that when it is made to appear to the satisfaction of the President that cholera, yellow fever, smallpox, or plague exist in any State or Territory or the District of Columbia, and that there is danger of their spread into other States, Territories, or the District of Columbia, he is authorized to cause the Secretary of the Treasury to promulgate such rules and regulations as will control and prevent such spread. The preparation of these regulations is a duty of the Surgeon General of the Public Health Service, and penalties are imposed for the infraction of these rules and regulations by common carriers, their servants, and the general public. This was the beginning of the policy of governmental control of the spread of disease in interstate traffic. It has grown until it includes other diseases than the major pestilences, and the act approved February 15, 1893, extended and expanded this policy.

The Fifty-first Congress, in its second session, passed an act which was approved March 3, 1891, providing for the medical examination of arriving alien immigrants by the Marine-Hospital Service. This was in reality a further attempt at the prevention of the introduction of exotic disease, and this act and the subsequent amendments thereto has not only served to exclude from our country acute communicable diseases but also to provide a more healthy stock from which to breed the future generations of our Nation.

It will be recalled that in 1892 there was a fulminant outbreak of cholera in Hamburg, Germany, and our Nation was at that time in great danger of the importation of that dread disease into the United States. During the course of this widespread devastating epidemic, which in its journey from the valley of the Ganges through Persia claimed 20,000 victims in Teheran alone, and in its course through Russia destroyed 215,157 more, and which extended through Germany, Austria, France, Belgium, Holland, and even to the harbors of the Western Hemisphere, no more instructive example of the connection between the disease and polluted water and of the immunity conferred by the use of a pure supply could have been yielded or desired than the experience of Hamburg, Altona, and Wandsbek. These three cities adjoin one another so closely that there is no visible line of demarcation, and in a geographical sense might be regarded as one place.

In one important respect, however, the three places differ very materially, namely, their public water supplies. Wandsbek was supplied with filtered water from a lake but little subject to pollution; Altona drew upon the Elbe at a point below the entrance of the sewage of Hamburg, but filtered the water through sand; Hamburg used unfiltered water from the Elbe above the city. During the summer of 1892, or between August 17 and October 23, Hamburg, with a population of 640,000, had nearly 17,000 cases of cholera, of which slightly more than half terminated fatally; Altona, with a population about a quarter as large, had but 500 cases, or only one thirty-fourth as many—400 of these are supposed to have come from Hamburg—and Wandsbek had practically none.

Very noticeable was the fact that where Hamburg and Altona come together the Hamburg side was plentifully sprinkled with cases while the other was comparatively free, and this was still more particularly remarked along a certain street that for a distance formed the boundary line, in which the houses on the Hamburg side had plenty of cases and those opposite had none. Almost as though intended for the purpose of marking more sharply yet the distribution of the two kinds of water, it hap-

pened that a group of tenement houses on the Hamburg side of the boundary was supplied with water from the Altona mains, and in these houses, densely peopled by the laboring class, not a single case occurred, while in neighboring houses the disease was raging.

Thus we have a most eloquent instance of the value of filtration and of the danger of using polluted supplies. Hamburg's unfiltered water came from above the city, while Altona had to depend upon water which before being filtered had received the entire sewage of over three-quarters of a million people.

Congress, fully alive to the danger of the spread of the cholera epidemic to our country, passed an act, which was approved February 15, 1893, creating further barriers against the importation of diseased persons and things from abroad. This act is of great importance. In fact, it may be said to be one of the organic public health laws of the United States, because it not only contemplates the exclusion of epidemic diseases from abroad but also the prevention of the interstate spread of communicable maladies. Under this act the interstate quarantine regulations are promulgated, regulations which have to do not only with the carriage of diseased persons and things but also with regard to the purity of water served to passengers during transportation in interstate traffic and the abolition of common roller towels and common drinking cups on the vessels and vehicles *of common* carriers. The law referred to provides for the publication of the public health reports and for the collection of morbidity and mortality statistics by the Public Health Service.

In 1900 the quarantine function of the United States was extended to Porto Rico and to the Territory of Hawaii, and in 1906, following the 1905 outbreak of yellow fever in the Southern States, Congress passed another act to further protect the public health and to make more effective the national quarantine. This act was approved June 19, 1906, and resulted in the cession to the United States of practically all of the quarantines of the Southern States.

Up to 1893 the public-health function of the United States was entirely administrative. It undertook, by the enforcement of rules and regulations, the exclusion of disease from abroad and the prevention of its interstate spread. It undertook the eradication of epidemics of the major pestilences in cooperation with State and local health authorities. The act of 1893 added another function—namely, of education. The law provided for the collection of data relative to the prevalence and distribution of disease from all available sources, including State and municipal sanitary authorities throughout the United States, and for the preparation and publication of this information so that it might be transmitted to collectors of customs and to State and municipal health officers and other sanitarians. More than this, the law specifically provided that information should be collected from State and municipal health authorities, public associations, and private persons relating to the climatic and other conditions affecting the public health. This was the beginning of the policy that "education is the handmaiden of public health," and it brought to the people of the country and their public-health officers increased information as to the prevalence and distribution of disease and the means of avoiding, preventing, and eradicating such diseases.

In 1902, in an act approved July 1, 1902, a third function was added, that of investigation. That act provided for the advisory board of the Hygienic Laboratory, and established divisions of chemistry, zoology, and pharmacology in this important institution, an institution which has added enormously to the world's store of sanitary knowledge and which has become one of the most important health-research institutions in the entire world.

An act was approved on the same day to regulate the sale of viruses, serums, toxins, and analogous products in the District of Columbia and to regulate interstate traffic in such articles. The application of this act has brought about the licensing of the manufacturers of the various biologic products which are used in the treatment of disease, the establishment of standards of potency for diphtheria and tetanus antitoxin, and has acted as a public-health measure of far-reaching importance, in spite of the fact that Congress has not appropriated any funds whatsoever for the carrying out of this law. This is the more remarkable when we consider that the Sixty-third Congress, in the act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1916, appropriated $607,780 for the general expenses of the Bureau of Animal Industry, said act specifying that a part of this appropriation was to be used for carrying out the provisions of the act approved March 4, 1913, regulating the preparation, sale, barter, exchange, and shipment of viruses, toxins, or analogous products manufactured in the United States and the importation of such products intended for use in the treatment of domestic animals.

Finally, the third stage of the developmental cycle of the public-health activities of the General Government was begun by the passage of the act approved August 14, 1912, which changed the name of the Public Health and Marine-Hospital Service to that of the Public Health Service, and specified among its functions the study and investigation of the diseases of man and conditions influencing the propagation and spread thereof, including sanitation and sewage and the pollution, either directly or indirectly, of the navigable streams and lakes of the United States and the issuance, from time to time, of information in the form of publications for the use of the public.

This short résumé of the public-health acts of the Congress of the United States shows that the public-health functions of the National Government are administrative, investigative, and educational. The machinery for carrying on the administrative functions is the Public Health Service of the United States, a corps of 186 commissioned medical officers, assisted by acting assistant surgeons, research workers, and employees. This administrative function is discharged directly, in so far as it relates to the prevention of the introduction of disease from abroad, the prevention of the interstate spread of disease, the examination of arriving alien immigrants, the regulation of the interstate sale of serums, viruses, and antitoxins used for the treatment of the diseases of man, and indirectly, in cooperation with State and municipal health authorities, in the eradication and prevention of the interstate spread of the major pestilences.

It was in the discharge of this function that Surg. J. H. White carried on the magnificent campaign which freed New Orleans of yellow fever, a campaign which was the more remarkable in that the disease was completely eradicated prior to the appearance of frost.

It used to be thought that the climate of our Gulf States predisposed to this dread disease, but, thanks to the campaign to which I have just referred, and to the efficient application of the quarantine laws by the Public Health Service, not one single case of yellow fever has occurred within the borders of the continental United States since 1905, and the traveler visiting Louisiana and the other Southern States to-day runs absolutely no danger whatsoever from this disease.

Similarly, when bubonic plague made its appearance in the city of San Francisco, just struggling phœnixlike to its feet from the ashes of a great conflagration following upon an earthquake, Rupert Blue, the present Surgeon General of the Public Health Service, attacked the pestilence and by his skillful administration of scientific principles set the standard for plague campaigns for all future time. In much the same manner Surg. R. H. Creel eradicated plague from Porto Rico, thus saving one of our fairest insular possessions from the devastation of a great epidemic; and later, when plague raised its venomous head in New Orleans, threatening not only the Crescent City but Louisiana and the entire Mississippi Valley as well, it was another officer of the Public Health Service—Asst. Surg. Gen. W. C. Rucker—who conducted the measures which so speedily and effectually throttled and evicted the pestilence which walketh in darkness and striketh at noonday.

I doubt if we will ever realize the great and lasting value of the work to which I have just referred. Aside from the loss of human life which it entails, bubonic plague produces an enormous economic loss once it fastens itself upon a community. It paralyzes commerce; it spreads that fear which disrupts business; and the expense of eradicating the disease is very great. As a result of the work of such men as Blue and Rucker and Creel, San Francisco, New Orleans, and San Juan are now rat-proof cities; and being rat-proof cities, they no longer have any fear of plague, because plague is a disease of rats and carried from the sick rats to mankind by fleas. Therefore, if we exclude rats from the home and workshop of man, we protect man against the disease. Never again will there be an epidemic of bubonic plague in New Orleans.

The people of that city realized that the conquest of this disease was one for the Federal Government, and, having before our eyes the wonderful record which Rupert Blue had made at San Francisco, we felt that the Public Health Service could give us the most expert assistance. Our request for aid was met promptly, and so well was the campaign organized and administered, and so sound were the scientific principles upon which it was based, that the epidemic was very speedily stamped out, almost before it had gotten a good start. But this was not enough. We realized that while the present danger was passed, that unless we erected barriers against the rats it would only be a matter of time until the disease reappeared. A great port like New Orleans, having intimate commercial relations with all the world, is, of course, liable to the importation of plague-infected rats, because the best quarantine yet devised by man can not exclude all plague rats without

serious hindrance to shipping. The city of New Orleans passed an ordinance requiring the rat-proofing of buildings, and the warehouses, the docks, the public buildings, the stores, and the factories and residences have been rat-proofed in a way which is remarkable, and to-day, as a result of the campaign against yellow fever and the campaign against bubonic plague, New Orleans is one of the healthiest cities in the world. I have spoken of the eradication of plague from Porto Rico. Dr. Blue had shown in California that plague was capable of eradication. He had laid down the administrative and scientific principles upon which this was to be accomplished. This, however, had never been tried in the Tropics on a large scale until bubonic plague broke out in San Juan and subsequently appeared at one or two other places in Porto Rico. So effectual was the work that the disease was not only speedily wiped out but has never recurred, no case of human plague having occurred in Porto Rico since 1912.

Time does not suffice to mention by name the many officers of the Public Health Service who, on lonely quarantine stations in the Philippines, Alaska, and Porto Rico, have attacked and conquered disease problems, or to tell the story of those officers on the sanitary outposts in the Mexican littoral, Central America, the Canal Zone, and the maritime nations of South America who so ardently have devoted themselves to the protection of their country against disease. This has been of material assistance not only in the protection of the health of the continental United States but in the sanitation of the Panama Canal Zone as well.

Suffice it to say that in proportion to the number of its commissioned personnel the Public Health Service has lost as many officers in the combat against disease as have the strictly military arms of our Government in fighting the battles of our country against human foes.

Some day when the history of sanitation has been written the story will be told of Surg. John McMullen, who, by his field investigations of trachoma, has returned the sight to thousands of eyes which were destined to look out unseeing on the beautiful mountains of Kentucky and Tennessee, and future generations will read of the way in which Surg. L. L. Lumsden has eradicated epidemics of typhoid fever and raised the standard of health in many American communities.

The investigative functions of the Federal health service cover a wide and interesting field and have added large stores of knowledge to science. It was Asst. Surg. Gen. Henry R. Carter, an officer of the Public Health Service, who made the first discovery in the chain of investigations which led to the conquest of yellow fever. Another, Surg. Joseph Goldberger, by his researches in the laboratory and in the field, placed in the hands of science a sure weapon for the prevention, eradication, and cure of pellagra, a disease which in recent years has spread alarmingly on American soil.

Pellagra has been increasing throughout the United States during the past eight years, and it is estimated that 75,000 cases of this disease occurred in the United States in 1915, and of this number at least 7,500 died. In many sections of our country only tuberculosis and pneumonia exceed it as a cause of death. It was Prof. C. W. Stiles, of the Hygienic Laboratory, who discovered the American hookworm, a parasite which has sapped the vitality, lowered the efficiency, and caused the death of large numbers of people in America. Prof. Stiles estimates that in this country 2,000,000 individuals, residing in the zone from the Potomac to the Mississippi and along the Atlantic littoral and Gulf States, suffer from hookworm infection. Hookworm is essentially a rural disease. Its prevention consists in preventing soil pollution and in treating existing cases so as to diminish the amount of infection. The suppression of hookworm disease, according to Prof. Rosenau, of Harvard University, means the social and economic uplift of a large section of this country, the education of millions of people, and an entire change in their daily hygienic habits. Education of the masses, particularly of the rural dweller, is an important factor, calling for cooperation between the Federal, State, and local health authorities, the civic forces, the medical profession, schools, and philanthropic agencies. The disease is very easy to cure and also very cheap to cure. The suppression of hookworm disease, quoting Prof. Rosenau again—

> will diminish the amount of tuberculosis, typhoid fever, and other infections. The prevention of tuberculosis deals especially with personal hygiene and the prevention of typhoid fever and hookworm with the sanitation of the environment. With the combination of improved personal hygiene and improved sanitation we may confidently expect a very great improvement in the standards of health in communities which are at present infected with hookworm disease.

Anderson and Goldberger, two other officers of the Public Health Service, working together, discovered the method of transmission of typhus fever, while Fricks, another officer, evolved by careful scientific study a simple method for the ridding of land of the ticks which carry Rocky Mountain spotted fever. This is essentially an American disease, occurring only in the Rocky Mountain region of the United States. It is transmitted to man through the bite of wood ticks. In some localilties only about 5 per cent of those who receive the infection die from it, but in other localities the death rate has been as high as 95 per cent of those infected.

In its investigations of rural sanitation the Public Health Service has reduced typhoid fever 80 per cent in some counties, and malaria has fallen off in those places in which the Public Health Service has worked as much as 50 per cent in a single year. These facts are not told with the idea of praising the Public Health Service or for the purpose of bringing to the attention of the Senate those facts which may be found in the annual report of the Surgeon General of the Public Health Service. I merely speak of them here to emphasize the point that this work has been carried on—this work for the protection of the health of American citizens—on appropriations which are less than have been expended by other departments in the effort to control a single disease of the lower animals. The legacy of health is the most valuable of all worldly possessions, and the cultivation of a strong, virile, able-bodied citizenship will endow our Nation with the greatest asset which mankind can have. I do not decry the expenditure of money for the protection of the health of live stock or for the prevention and eradication of the diseases of plants, but I desire to leave with the Senate the thought that the health of human beings is of at least as great value to the Republic as that of animals and vegetables, and too great an effort can not be made in protecting and maintaining the people of the United States in a condition of physical vigor. The question of the preservation of life and health lies at the root of individual and national happiness and prosperity. I shall recur to this subject in a few moments and shall by comparisons show that we have in the past made appropriations for the conservation of the health of animal and vegetable life in the United States many times greater than the appropriations for the conservation of American public health.

I have spoken of the administrative public health functions of the Government. I have referred to its investigative functions, and, lastly, I desire to speak of its third duty—that is, the health education of the general public. If the American people as a race have a single characteristic which differentiates them from the other peoples of the world, it is their belief in education. Ours is not the only people who love freedom or who believe in the blessings of liberty. Ours is not the only great Commonwealth which has as its basis the equality of all mankind, but ours is the only nation in the world which endeavors in every possible manner to bring to its people the benefits of education throughout their entire period of existence, from the moment of the first glimmerings of intelligence until the eventide of old age. One of the things which marks the highest advance in sanitation and hygiene is the fact that it has become generally recognized that it is not only necessary that the American citizen shall receive training in the ordinary curriculum of arts and sciences but that he shall learn to conserve and care for that most valuable of all American possessions, the physical body of the American citizen, and it is necessary that this lesson shall be so thoroughly ingrained in the very essence of his nature that in time the maintenance of health and obedience to the rules of sanitation and hygiene shall become so much a matter of habit that they will be as automatically observed as are the rules of propriety and devotion.

The General Government undertakes, first of all, to determine with as great accuracy as possible the distribution of communicable diseases both at home and abroad. This takes the form of morbidity; that is, sickness and mortality; that is, death statistics. From this information it is possible to take measures against such diseases, to take an accurate count of the results of such measures and to point an educational moral. This material is published weekly in the public-health reports. The other publications of the Public Health Service give to the American people the results of investigations and point out methods and means of preserving health and avoiding disease. In this way the American people have been the recipient of a vast fund of information dealing with a great variety of health subjects in a practical manner, and in such a way as will make them of increasing value in the days to come.

In the future this health education must take two forms. The first of these is through the medium of the written page. Not only must our Government health service bring to the citizen information by means of bulletins regarding the methods

of conserving health, but it must also, through the public prints, afford timely and practical instruction in hygiene and sanitation. Congress has already granted authority, in the act approved August 14, 1912, for the issuance of health bulletins for the general public, and this work is progressing as it should. Any careful study of the daily papers and periodicals will show that there is an increasing amount of space devoted to health subjects. Much of this material has been prepared with the assistance of the Public Health Service; in fact, it may be said that the entire public-health movement in America has received a great stimulus from the work of that important service. But this is not enough. In many situations the instruction must come, not by the printed page, but by actual demonstration, and such demonstrations find as their most practical basis scientific field investigations. These are necessary in practically all the rural districts of this country, more peculiarly with regard to typhoid fever and malaria, which are essentially rural diseases.

A careful study of the mortality statistics in the registration area of the United States shows that while there has been a decline in the death rates throughout the Nation as a whole, that the death rate in the country has not fallen as rapidly as that in the urban districts.

The States included in the registration area for deaths for 1913 are as follows:

California, Colorado, Connecticut, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, New Hampshire, New Jersey, New York, North Carolina (municipalities of 1,000 population or over in 1900), Ohio, Pennsylvania, Rhode Island, Utah, Vermont, Virginia, Washington, and Wisconsin.

The following registration cities in nonregistration States, with the registration States previously listed and the District of Columbia, constitute the registration area for deaths in 1913:

Alabama: Birmingham, Mobile, and Montgomery.
Delaware: Wilmington.
Florida: Jacksonville, Key West, and Pensacola.
Georgia: Atlanta, Augusta, and Savannah.
Illinois: Aurora, Belleville, Chicago, Decatur, Evanston, Jacksonville, Quincy, and Springfield.
Kansas: Atchison, Coffeyville, Fort Scott, Hutchinson, Independence, Kansas City, Lawrence, Leavenworth, Parsons, Pittsburg, Topeka, and Wichita.
Louisiana: New Orleans.
Nebraska: Lincoln and Omaha.
Oregon: Portland.
South Carolina: Charleston.
Tennessee: Memphis and Nashville.
Texas: El Paso, Galveston, and San Antonio.
West Virginia: Wheeling.

In 1900 the death rate was 17.2 per 1,000 living in the registration States, and in 1912 the rate for the same States was only 14.6, a reduction of 2.6 per 1,000, or 15.1 per cent. This decline in mortality, however, was much more pronounced in the cities in the registration area. In these cities the death rate in 1900 was 18.9 per 1,000, while in 1912 it had fallen to 14.9, a reduction of 21.2 per cent in the 12 years under discussion.

In the rural part of the registration States it fell only 8.6 per cent. In this connection it should be borne in mind that the country districts are the homes of the native American stock, while the cities receive annually hordes of immigrants from Europe whose mortality rate is and has been for years much higher than that of our American stock, in spite of the efforts which have been made to exclude the unfit. In like manner the colored race, with its high mortality rate, is almost twice as largely represented in the cities of the registration States as in the rural sections. If, therefore, a complete standardization was made of the death rates which I have just mentioned, it would be found that while the average death rate in the country is a little lower than it is in the city, that the conditions mentioned above would more than overbalance this point in favor of the country. In spite of all our preconceived ideas as to the healthfulness of the country—and by the country I mean those centers with a population under 2,500—the rural sections suffer severely from the ravages of tuberculosis. Such typically rural States as Kentucky and North Carolina—and these are but examples of the other States having a large rural population—suffer a death rate from tuberculosis higher than that for the registration States taken as a whole and higher than for the registration cities.

The typhoid problem is, however, one requiring the greatest attention. In 1911 the death rate from this disease was 22.2 per 100,000 in the rural sections as against 18.6 in the cities of the registration States. These figures in themselves clearly indicate the necessity for carrying on careful typhoid-fever investigations, because typhoid fever is always an unfailing signal of the existence of polluted water supplies, infected food products, and unsupervised typhoid carriers. These are a constant menace to the entire State and the neighboring States as well, through their effect on milk and other food supplies. When such progressive States as Colorado, Kentucky, Maryland, Missouri, New York, and Utah have a higher death rate from typhoid fever in the rural districts than in the cities it is a clear indication of the state of affairs in the country districts. It should be borne in mind that typhoid fever is a disease which is received through one route only—that is, through the mouth. Typhoid fever is a disease which is peculiar to man. It does not occur in the lower animals. It is caused by a minute vegetable organism, known as the typhoid bacillus. This bacillus leaves the bodies of infected persons in their excretions. It is taken into the bodies of well persons in polluted water and infected food. Sometimes persons who have had the disease continue to excrete the bacilli for a considerable period of time after their recovery. These are known as chronic carriers, and they may, as for example, in the case of the famous Typhoid Mary, infect many people during their lives. Flies, by reason of their filthy habits, are great distributors of the germ of typhoid fever. They act usually by infecting foodstuffs. When we stop and consider the country as the commissary of the city, when we realize that food products which are in constant movement toward the congested centers of population may have been exposed to infection with the typhoid bacillus, we begin to appreciate that the typhoid problem is not alone the problem of the country, not alone the problem of the State in which it exists, but a problem for the entire Nation.

The problem of rural sanitation calls for consideration from two points of view—that of the possible danger of objectionable surroundings and unhygienic practices to the individual on the farm and to his immediate neighbors; and that of the menace which insanitary farm conditions may present indirectly to urban communities. The sanitary relation of the farm to the city involves almost entirely the possibility of the spread of actual infection from country to city through milk, meat, vegetables, and other farm products.

The milk supply for the average American city is obtained from a large number of dairy farms and the liability of cases of typhoid fever developing among persons living on farms may be readily appreciated. The city of Washington, for example, obtains its milk supply from about 1,000 dairy farms.

When cases of typhoid fever exist on dairy farms there is, in many instances, the likelihood of the infection being conveyed from the patients to the milk. Frequently the cases are not recognized as typhoid fever until the second or third week of illness and during this period no precautions are taken whatsoever. When the germ is not destroyed as it leaves the body of the typhoid-fever patient, there are many ways in which it may be carried from the patient on a dairy farm to the milk, and thus to the city dweller. Thus those caring for the sick or handling the soiled bedding or excreta of the patient may convey the infection on their hands or clothing. In other instances the person who has the disease recovers only to become a chronic carrier. One of these carriers working in milk at a dairy farm or in a dairy may contaminate a can of milk from time to time and may be the source of infection of a great number of cases. For example, at Cedar Falls, Iowa, in October, 1907, 13 cases of typhoid fever occurred in 3 families, all of which received milk from the same source. The man who owned the cow and did the milking had had typhoid fever one year previous to the outbreak. He was found to be a chronic typhoid bacillus carrier. Drs. Lumsden and Woodward have reported an outbreak of typhoid fever in September and October, 1908, in Washington, D. C., in which 54 cases occurred. The cases were among the customers of two different dairymen, both of whom received a part of their milk supply from a certain farm. All the evidence pointed to this farm as the source of the infection in the milk. No history of recent sickness on the farm could be ascertained. A search for bacillus carriers among the persons on the farm was made, and in the specimen of feces obtained from one of the milkers, a woman who had had an attack of typhoid fever about 18 years before the time of the outbreak, typhoid bacilli were found in large numbers. No source other than the feces of this woman could be discovered to account for the infection of the milk.

At Palo Alto, Cal., in 1903, an outbreak of typhoid fever was traced to milk by Fish, Mosher, and Snow. Of 900 persons who used milk from the infected supply, 232 had typhoid fever. In this instance it was determined that the milk became infected through the water used for washing the cans and also at times for diluting the milk. This water was obtained from a creek which received the drainage from several houses in which there were patients with typhoid fever.

A few years ago it was not uncommon for farmers to meet with a spirit of resistance any suggestion of hygienic improvements which were planned to diminish the danger of the farm as a starting point for the spread of disease. At times there

has actually been aggressive opposition to proposed regulations, the object of which was defensible from every unbiased point of view. The milk industry could furnish many instances in recent times of actual refusal on the part of farm communities to supply an essential food to the market under conditions that to-day are everywhere accepted as rational and necessary.

A few years ago the apparent indifference of the rural community to the needs of the urban population dependent on the farm for a healthful food supply could be excused on the basis of ignorance. To-day there is no excuse for apathy toward the teachings of modern sanitation.

Mr. FLETCHER. Mr. President, if the Senator has not already covered it, I should like to call his attention to the ordinary house fly as a carrier of typhoid germs and other bacilli.

Mr. RANSDELL. I will say to the Senator that before he came into the Chamber I did refer to the house fly as one of the most fruitful carriers of disease, and one of the pests that we should use the most strenuous means to destroy.

The campaign of education that is being waged throughout the United States by all manner of forces—municipal, State, and National—by agencies connected with the Public Health Service, the Department of Agriculture, the experiment stations, the State universities, boards of health, civic organizations, and the public press ought to win its way into every rural home that has any ties whatever with civilized communities.

The better understanding of the farmer's unavoidable responsibility toward his distant fellow citizen has in turn reacted to advantage in respect to his own environment. Fortunately, with the general advance in rural standards of living in recent years, there has come about a considerable awakening of interest among farmers and representatives of rural communities along these lines, as well as among the public, as a whole. Modern methods of communication and travel have to a great extent brought the rural districts into closer relationship with the towns and cities. The farmer learns of the improved general health and reduction in the death rate resulting from the decrease of the ravages of contagious disease, which has been brought about through the introduction of such preventive measures as a sanitary water supply, proper methods for the disposal of sewage and garbage, and mosquito and fly extermination, and wishes to avail himself of these benefits.

The trained Federal sanitarian well realizes the futile idealism of much that emanates from an urban desk. Sometimes the most elementary sanitary conditions offer puzzling problems when the expense and feasibility of the proposed remedies are carefully studied. Too often the city reformer forgets the enforced monotony of diet, the lack of recreation, and the excessive hours of work which farm conditions may entail in some sections and at certain seasons. There are social as well as economic forces involved in farm life. The reform of rural sanitation, which is undeniably called for in some parts of the United States, must not overlook the personal element so strong in the country dweller. With the exigencies of the situation kept in mind, the campaign for improvement in rural sanitation is likely to do much to make farm life at once more profitable, more healthful, and more attractive, and by so doing contribute to safeguard the food supply, and therefore the health and the efficiency, of the Nation.

In 1909 the Commission on Country Life reported that—

> The farm should be the most healthful place in which to live, and there are numberless farmhouses, especially of the farm-owner class, that possess most excellent modern sanitary conveniences. Still, it is a fact that there are also numberless other farmhouses, especially of the tenant class, and even numerous rural schoolhouses, that do not have the rudiments of sanitary arrangement. Health conditions in many parts of the open country therefore are in urgent need of betterment.

This is in entire accord with the findings of the United States Public Health Service. In 1914 this service conducted rural sanitation studies in Berkeley County, W. Va.; Lawrence County, Ind.; Union County, Miss.; and Dorchester County, Md. In these four counties it was found on the original survey that at less than one-half of 1 per cent of the homes were sanitary toilets in use. In one of the counties 78 per cent of the rural homes were found to be unprovided with privies of any kind. In all four counties the vast majority of the privies in use were of the surface, open-in-the-back variety, in and about which there was gross soil pollution, with all of its attendant dangers, in the immediate vicinity of the homes. At over 50 per cent of the homes the water supplies in use were obviously polluted or of a very suspicious character. Taking the conditions found in these four counties as fairly representative of those obtaining in the rural districts generally throughout the United States, rural sanitation looks large among the matters vitally affecting the welfare of the Nation.

The bill under consideration contemplates the investigation and encouragement of the adoption of improved methods of rural sanitation, particularly with reference to the prevention of malaria and typhoid fever. It would therefore seem proper for us to step aside for a moment and consider what typhoid fever is doing in the United States. It is estimated from the statistics for the registration States that during the year 1914 there occurred in the United States 156,436 cases of typhoid fever. Of this number it is estimated that 15,643 persons lost their lives. When we take into consideration that the average age of these more than 15,000 persons was about 25 years, the enormous loss to the Nation begins to be apparent. We read with horror how in the engagements of the great European war one, two, three regiments are completely wiped out in a single day, and yet we pass by with indifference the fact that every year in the United States more than 15 regiments of people of an average age of 25 lose their lives from a disease which is wholly and entirely preventable, a disease whose causative agent is definitely known to science, a disease in which the route which this bacterium takes from the body of the sick man into the mouth of the well man has been definitely mapped out; a disease which has been called the great American disease, because, as compared with the other great nations of the world, our rate is unusually high. It is true that the typhoid-fever rate has fallen from 35.9 per 100,000 of population in 1900 to 15.4 in 1914, but this marked decrease has been largely due to improvement in the water supply and in the sewerage systems, the protection of milk, meats, and vegetables from contamination by flies, and other sanitary precautions in the large urban centers. A careful study of the statistics will show that the highest mortality from typhoid fever is from the rural part of our country.

It will also be of value for us to estimate the economic loss from typhoid fever. It is, of course, impossible to express in terms of dollars and cents the misery, the suffering, and the sorrow, which this disease has brought to our country, and it should, of course, be understood that any estimate expressed in terms of dollars and cents must in the very nature of things be only an approximation. When it is considered that only 65.1 per cent of the population of the United States is included in the registration area for vital statistics, it is seen how difficult it is to secure accurate information, in the first place, as to the number of deaths from typhoid fever, and when we consider, further, that there is no registration area for morbidity statistics in the United States, it is seen that the number of cases can only be estimated by considering the average mortality from the disease. On the basis, then, of 15,643 deaths, it may be estimated that the present value of the lives lost in the year 1914 from typhoid fever was $45,364,700. This estimate computes the average present value of a life lost from typhoid fever at $2,900.

In addition to the present value of the lives lost, it should be taken into account that every life lost in this way has a potential value. This is estimated at $12,600 each, which, multiplied by the number of deaths—15,643—gives the potential value of the lives lost at $197,101,800.

A certain proportion of these persons who lost their lives from this wholly preventable disease were wage earners. It is impossible to more than guess at the amount of wages lost by them in the period prior to their death, but $35 per death may be estimated as a conservative figure. This would give a total loss in this way of $547,505.

The medical attention, nursing, undertaker's fees, and so forth, of those who died must also be estimated. Figured at $150 per death, it gives a figure of $2,346,450.

In addition, those who died did not produce during the time that they were sick and it is estimated, figuring this at $40 per death, that the amount of money lost in this way was $617,440.

In other words, the total loss to the United States for the 15,643 people who died from typhoid fever during 1914 reached a grand total of $245,977,895, or $15,718 per death.

Let us now consider the economic loss resulting from those cases which had typhoid fever and did not die. The average death rate from typhoid fever is 10 per cent. Figured on the number of deaths, the number of cases of typhoid fever in the United States during 1914 would be 156,436. If we take from this the 15,643 deaths, we have left 140,793 persons who had the disease, but did not die. The loss incurred by these cases would be, first, loss of wages, which may be estimated at $70, and would give a total figure of $9,855,510.

Medical attention, nursing, and other attention for those who were sick, but did not die may be estimated at $75 per case, giving a total loss in this way of $10,559,475.

The loss of production for those cases which were sick, but did not die, may be estimated at $40 per case, giving a total figure of $2,631,720

In other words, the 140,793 cases which had typhoid fever and did not die cost the United States $23,460,705, or $163.69 per case.

If we add to the loss for the deaths the loss for the cases which recovered, we get a grand total of $271,932,880. If this amount were distributed throughout the inhabitants of our country it would give every man, woman, and child in the United States $2.65. In the face of such loss, it would seem as though every dollar which the United States Government could spend for the eradication of this disease would be money well invested.

Mr. President, let us now consider the economic losses to the Nation from malaria. Again, I desire to state that these figures can only be a very rough approximation. It is even more difficult to secure statistics regarding the incidence of malaria than the incidence of typhoid fever, because while the persons suffering from malaria are to a certain extent incapacitated this incapacity does not obtain to the same degree that it does in typhoid fever. This, perhaps, is balanced by the fact that malaria is a long-drawn-out disease, marked by a lowering of efficiency throughout its entire course, with almost complete disability during the period of its acute crises. These may occur every day, every other day, every fourth day, or at irregular intervals, and during the period of the chill, the fever, and the sweat, the malaria sufferer can do little if any work. It is extremely difficult to determine the average age of the persons attacked with the disease, and this makes it hard to estimate the number of persons having malaria who are wage earners. Therefore the figures which I give you can not be other than a rough guess. They are, however, suggestive, and I believe that I have underemphasized them rather than exaggerated them.

In 1913, 1,565 deaths from malaria occurred in the registration area. Assuming that the same rate prevailed in the remaining 34.9 per cent of the country, and this is an unfair assumption, for most of the malarial portion of the United States unfortunately is not in the registration area, the total deaths from malaria in the United States may be estimated at 2,404.

On the basis of 2,404 deaths, it may be estimated that the present value of the lives lost in the year 1913 from malaria was $7,871,600. This estimate computes the average present value of a life lost from malaria at $2,900, the same as in the case of those dying from typhoid fever.

If we estimate the potential value of a life lost from malaria at $12,600, the same as in typhoid fever, the total potential value of the lives lost from malaria is $30,290,400.

It is estimated that half of the persons who lost their lives from malaria during 1913 were wage earners, and that each person who died of malaria lost at least $35 in wages prior to his death. This would give 1,202 wage earners each losing $35, or a total loss of wages of $42,070.

The cost of medical attention, nursing, undertakers' fees, and so forth, of those who died is not less than in the case of typhoid fever, or $150 per death, giving a total of $360,600 for 2,404 deaths.

The loss of production occasioned by the illness of those who died during the year, upon the assumption that half of those who died were producers, is estimated at $48,080, or $40 each for 1,202 persons.

The total loss to the United States for the 2,404 people who died from malaria during 1913 reached a total of $38,612,750, or $16,061.88 per death.

It is estimated that there are 3,000 cases of malaria to every death from that cause. On this basis there were in the United States 7,212,000 cases in 1913.

The loss of wages, assuming that half the cases occurred among wage earners, and that the average loss to each was $25, was $90,150,000.

Medical attention, nursing, and other attention for those who were sick with malaria may be estimated at $5 per case, or a total of $36,060,000.

The loss of production, assuming that half the cases were among wage earners and that the disease both through loss of time and decrease of individual efficiency, reduced production one-fourth, is $145 per case, or $522,870,000 in all.

The total loss, then, of cases which had malaria but did not die was $656,292,000, or $91 for each person sick with malaria. The total loss by reason of both sickness and death caused by malaria was $694,904,750, or $6.81 per capita, for every inhabitant of the United States.

In other words, the estimated economic loss which our Nation suffers each year from typhoid fever and malaria alone aggregates $928,224,880, leaving out of entire account the sorrow, the unhappiness, the misery, and the inefficiency which follows in their train. Over $900,000,000 lost every year! A sum which is sufficient to put our country in a state of preparedness equal to that of any nation in the world, enough money to give us the largest Navy afloat and the most efficient Army which the world has ever seen is annually offered up as a sacrifice to two diseases which are entirely preventable. Enough money to pay the annual expenses of every college student in the United States is absolutely thrown away every year.

If we can assist the States to search out every case of typhoid fever and to destroy the discharges therefrom before they have had opportunity to be transferred through the intermediation or fingers, flies, food, and water supplies to healthy persons; if we can so educate the citizenship of this country that a person maintaining an insanitary toilet will be considered a public danger; if we can stimulate communities so that they will take the measures looking to the eradication of the anopheles mosquito, which is the distributor of malaria; if we will cure those persons suffering from malaria so that they will not be able to transmit their infection to mosquitoes, which in turn may transmit it to other people, we will be the means of sparing our Nation this tremendous annual economic loss.

But other benefits will follow in the train of such an action. It is a well-recognized principle of sanitary science that those measures which are taken to stamp out and prevent typhoid fever also have a remarkable effect in reducing the incidence of the other communicable diseases in a community, particularly those which are caused by the ingestion of the intestinal discharges of other persons. The amelioration in the death rate which follows the installation of water-purification plants is so well known that it has received a specific name, "the Mills-Reincke phenomenon."

In 1904 Mr. Allan Hazen, a sanitary engineer of international reputation, said:

> When one death from typhoid fever has been avoided by the use of better water a certain number of deaths, probably two or three, from other causes have been avoided. Not only is there a reduction in the typhoid mortality rate, but there has been a marked falling off in the diarrhea and gastrointestinal disorders which cause such a heavy infant mortality.

Following the improvement of the water supply of Lawrence and Lowell, Mass., there was a great falling off in the tuberculosis rate, and two very careful investigators, Profs. Sedgewick and McNutt, of the Massachusetts Institute of Technology, in commenting on this fact, state that—

> Inasmuch as we have been unable, even after the most careful investigation, to discover any other possible explanation of the figures, we are forced to the conclusion that a considerable proportion of the decline in mortality from tuberculosis in Lawrence and Lowell during the years immediately following the change from a polluted water supply was due to that change, and in line with this a similar explanation appears more than possible for Hamburg. A somewhat similar relation stands for pneumonia, bronchitis, and the acute respiratory diseases.

In view of these facts it seems to me that the sum of $500,000, which it is proposed by this bill to appropriate, is insignificant in comparison with the good which will follow.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER (Mr. LEWIS in the chair). Does the Senator from Louisiana yield to the Senator from Oklahoma?

Mr. RANSDELL. I shall be delighted to yield.

Mr. OWEN. I will ask the Senator if he would not be willing to put in, as an exhibit to his remarks, the compilation, in the Irving Fisher report on national vitality, of the various diseases which are preventable? It is not long at all, and it is very persuasive, and is fully confirmatory of what the Senator is now saying.

Mr. RANSDELL. I shall be delighted to put it in. I will say to the Senator that I was trying to speak merely of two diseases at this time, typhoid and malaria, which are supposed to be strictly preventable diseases; but I think the addition of that table will be a genuine contribution, and I shall be delighted to add it to my remarks.

Mr. OWEN. I will say to the Senator that that table demonstrates that with a reasonable publicity the average of human life in the United States could be prolonged 14 years.

Mr. RANSDELL. I thank the Senator for the suggestion. [See appendix.]

Legislation for the benefit of the farmer is being agitated at this session of Congress. The problem of rural credits has occupied the attention of Congress and of the country

for many years, and I am heartily in favor of a rural-credit system. We should, however, not only help the farmer in his financial troubles, but also in his health problems. The agriculturist is the foundation and backbone of the Nation, for he produces the food that feeds our hundred million people, and the conservation of his energy and the preservation of his health are matters of the greatest moment to the entire country. The fact that millions of urban dwellers are exposed to serious diseases owing to the contamination of farm products brings home to all of us in a peculiarly personal manner the necessity for sanitary rural conditions.

Congress has never been slow in appropriating funds for the prevention of the diseases of animals and plant life. The urgent deficiency act approved January 25, 1915, carried an item of $2,500,000 for the arrest and eradication of foot-and-mouth disease, the payment of claims arising out of past and future purchases and destruction of animals affected by or exposed to foot-and-mouth disease, and for a deficiency in the objects specified under the head "General expenses, Bureau of Animal Industry," in the Department of Agriculture appropriation act for the fiscal year 1915. The same act carried an appropriation of $35,000 for the emergency caused by the infectious nature and continued spread of the destructive disease of citrus trees known as citrus canker and for conducting such investigations of the nature and means of communication of the disease and by applying such methods of eradication and control of the disease as in the judgment of the Secretary of Agriculture may be necessary.

Here we have in one act $2,535,000 appropriated for the prevention of animal and plant-life diseases. In the same act $220,000 was appropriated for the prevention of human epidemics and $23,620 was appropriated for the completion of a quarantine station at Portland, Me. Is this to be taken as an indication of the relative value which we place on human life and the lives of domestic animals and plants?

The following table shows the specific appropriations by Congress for the fiscal year 1915 for the investigation and prevention of diseases of man as compared with the appropriations for the investigation and prevention of diseases of animal and vegetable life:

Diseases of man.

TREASURY DEPARTMENT.

Public Health Service:	
Maintenance of Hygienic Laboratory	$20,000
Quarantine Service	155,000
Interstate Quarantine Service	15,000
Preventing spread of epidemic diseases	300,000
Field investigations of public health	200,000
Special studies of pellagra	47,000

DEPARTMENT OF AGRICULTURE.

Bureau of Animal Industry:	
Meat inspection	375,000
Bureau of Chemistry:	
Enforcement of the food and drugs act	644,301

DEPARTMENT OF LABOR.

Children's Bureau:	
Total appropriation	161,265
Total	1,917,566

Diseases and development of animal and plant life.

DEPARTMENT OF AGRICULTURE.

Bureau of Animal Industry:	
For inspection and quarantine work, including the necessary expenses for the eradication of scabies in sheep and cattle, the inspection of southern cattle, the supervision of the transportation of live stock, and the inspection of vessels, the execution of the 28-hour law, the inspection and quarantine of imported animals, including the establishment and maintenance of quarantine stations and buildings thereon; the inspection of work relative to the existence of contagious diseases, and the tuberculin and mallein testing of animals	$625,520
For all expenses for the eradication of the southern cattle tick	400,000
For all necessary expenses for investigations and experiments in animal husbandry; for experiments in animal feeding and breeding	182,840
For all necessary expenses for scientific investigations of diseases of animals	77,360
Bureau of Plant Industry:	
For investigation of plant diseases	37,000
For control of diseases of orchard and other fruits	52,675
For control of diseases of forest and ornamental trees	69,510
For control of diseases of cotton, potatoes, truck crops, forage crops, drug and related plants	46,000
For investigating the physiology of crop plants, and for testing and breeding varieties thereof	44,540
For soil bacteriology and plant nutrition investigations	35,000
For acclimatization and adaptation investigations of cotton, corn, and other crops introduced from tropical regions, and for the improvement of cotton by cultural methods	38,000
Bureau of Plant Industry—Continued.	
For investigation, testing, and improvement of plants yielding drugs, spices, poisons, oils, and related products and by-products, and for general physiological and fermentation investigations	$55,380
For biophysical investigations in connection with the various lines of work done by the bureau	25,000
For investigations and improvement of cereals and methods of cereal production, and the study of cereal diseases, and for the investigation of the cultivation and breeding of flax, including a study of flax diseases, and for the investigation and improvement of broom corn and broom-corn production	135,405
For the investigation and improvement of tobacco and the methods of tobacco production and handling	25,000
For testing and breeding fibrous plants	10,840
For breeding and physiological study of alkali-resistant and drought-resistant crops	22,280
For sugar-beet investigations, including studies of diseases and the improvement of the beet and methods of culture	41,495
For investigations in economic and systematic botany and the improvement and utilization of wild plants and grazing lands	24,000
For farmers' cooperative demonstration work outside of the cotton belt	400,000
For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil	673,240
For the investigation and improvement of methods of crop production under subhumid, semiarid, or dry-land conditions	160,000
For the investigation and improvement of fruits and methods of fruit growing, harvesting, packing, storing, handling, and shipping, and for experimental shipments of fruit within the United States and to foreign countries	107,500
For the purchase, propagation, testing, and distribution of rare seeds, and for the investigation and improvement of grasses, alfalfa, clover, and other forage crops	166,500
Bureau of Entomology:	
For investigations of insects affecting deciduous fruits	58,000
For investigations of insects affecting cereal and forage crops	114,500
For investigations of insects affecting southern field crops	59,000
For investigation of insects affecting forests	54,790
For investigations of insects affecting truck crops	41,500
For investigations in bee culture	15,000
For investigations affecting tropical and subtropical fruits	20,100
For investigations of the Mediterranean fruit fly	33,200
Preventing the spread of moths	310,000
Miscellaneous:	
Enforcement of the insecticide act	95,000
Enforcement of plant quarantine act	50,000
Domestic potato quarantine	50,000
Experiments and demonstrations in live-stock production	60,000
Investigations, etc., of hog cholera and dourine	600,000
Total	5,016,175

A study of this table shows that it includes only specific appropriations, not those appropriations which have to do with the salaries of the administrative forces of the Government nor those appropriations which are made for the Army and the Navy, but for the country as a whole. It will be noted that while $5,016,175 was appropriated for the investigation and prevention of the diseases of animal and plant life, only $1,917,566 was appropriated for the investigation and prevention of the diseases of man. I would not reduce by one single cent the appropriations for the conservation of plant and animal life in this country. These appropriations are very vital to the economy of our Nation. It is a worthy thing for the Federal Government to assist and aid the agriculturist in every way that is compatible with the laws and policy of our Government, but it seems to me that it is a sad commentary on the value which we place on human life when we appropriated over $5,000,000 for plant and animal life and less than $2,000,000 for the conservation of the health of man.

The greatest asset which our country can have is the healthy American citizen, and, valuable as it may be to increase the health of live stock and vegetation, it is of far greater importance that we throw every possible safeguard about the health of the man who is responsible for that live stock and vegetation. The argument has been advanced that since the States at the time of their entry into the Union reserved to themselves their police powers and since the administration of health is one of the police powers, that the States should themselves grapple with their own health problems and conquer them, and that it is therefore improper for the Federal Government to make appropriations the application of which will react to the health of States. This argument is fallacious in the extreme. As I have previously pointed out, this problem is not a purely intrastate problem. Milk which is produced under insanitary conditions in New Jersey may produce an epidemic in New York. Butter or cheese which is made under insanitary conditions or from polluted milk in Wisconsin or Illinois may produce disease in Virginia or the District of Columbia. Lettuce or

watercress which is grown in soil which is polluted with human excrement may be shipped in refrigerator cars to a distant point and there produce an epidemic of typhoid fever. The man who contracts typhoid fever on a farm in Texas may become a chronic typhoid bacillus carrier and distribute the disease wherever he goes no matter what the State or what the city. Disease has absolutely no regard for State lines whatsoever. Disease is equally uninterested in States' rights. Sewage poured into a river in one State is easily carried by that stream to another State. So I say to you that the problem of rural sanitation is not a local problem but one which concerns the health and the physical integrity of our entire Nation.

I have referred to the disparity between the typhoid-fever death rate in this country as compared with that of other great nations and it may be of interest for us to stop a moment and consider this in more detail. In 1903 the typhoid death rate in Germany was 7.3 per 100,000, while in the United States it was 34.1 per 100,000. In other words, the difference in the typhoid-fever rate showed a balance of 26.8 per 100,000 of population. In other words, Germany by her typhoid-fever investigations and the improvements which followed them saved in that single year 14,729 lives. In 1912 the death rate for typhoid fever in Germany was 3.3 per 100,000, while in the United States it was 16.5, a balance of 13.2 per 100,000 in favor of Germany. This meant a saving of 8,730 German citizens. In the 10 years from 1903 to 1912 Germany saved in this way 127,598 lives. This does not take into account the enormous saving in cases, the number of which may be estimated at 10 times the number of deaths. In other words, 1,275,980 people were spared the suffering, the misery, the sorrow, and the expense of typhoid fever.

Lives saved in Germany during 10-year period from typhoid fever.

	German rate.	United States rate.	Difference.	Population of Germany.	Lives saved.
1903	7.3	34.1	26.8	54,969,000	14,729
1904	7.4	31.7	24.3	58,433,000	14,199
1905	6.3	27.8	21.5	59,413,000	12,773
1906	5.7	31.3	25.6	61,153,000	15,654
1907	4.8	29.5	24.7	62,013,000	15,316
1908	4.7	24.3	19.6	62,863,000	12,320
1909	4.2	21.1	16.9	63,717,000	10,767
1910	4.0	23.5	19.5	64,568,000	12,589
1911	4.9	21.0	16.1	65,359,000	10,521
1912	3.3	16.5	13.2	66,145,000	8,730
Total					127,598

Lives saved in England and Wales during 10-year period from typhoid fever.

	English rate.	United States rate.	Difference.	Population of England.	Lives saved.
1903	10.1	34.1	24.0	33,293,000	7,990
1904	9.4	31.7	22.3	33,639,000	7,501
1905	8.9	27.8	18.9	33,989,000	6,424
1906	9.2	31.3	22.1	34,342,000	7,590
1907	6.7	29.5	22.8	34,699,000	7,911
1908	7.5	24.3	16.8	35,059,000	5,890
1909	6.0	21.1	15.1	35,424,000	5,349
1910	5.3	23.5	18.2	35,792,000	6,514
1911	6.7	21.0	14.3	36,190,000	5,175
1912	4.4	16.5	12.1	36,382,000	4,402
1913	4.1	17.9	13.8	36,606,000	5,058
Total					69,804

We can do the same in this country. There is no reason why we can not reduce our typhoid-fever rate so that it is as small as that of any country in the world, but in order to do this it is necessary that we take prompt measures. If we put it off until to-morrow, we are bequeathing a heritage of suffering and economic loss to our descendants. If we temporize, if we only use halfway measures, we will not conquer the problem, but if we lay out a broad, constructive policy along practical scientific lines, we will be assured of ultimate and complete success.

Taking the statistics for the registration area as a basis, it is estimated that for the 10 years of 1904 to 1913, inclusive, there died in the United States 217,620 persons from typhoid fever alone:

1904	26,148.2
1905	23,413.1
1906	26,865.8
1907	25,797.8
1908	21,651.3
1909	19,137.7
1910	21,690.5
1911	19,724.0
1912	15,765.8
1913	17,389.9
Total for 10 years	217,620.1

Think of it! In 10 years more people died from typhoid fever than the entire Army of the United States. Of course, not all of these were males, but the average age of these more than 200,000 persons was 25 years, the period which is called the military age. It would seem as though the basis of preparedness in our country should be the conservation of the lives of the persons who are to supply the living, active production of our country.

Death rates from typhoid fever, per 100,000 population.

[1] Not available.

The foregoing table shows the rate of deaths from typhoid fever per 100,000 population in the leading countries of the world. The high mortality rate for the United States is a disgrace to the Nation. In 1911 and 1912 our typhoid death rate, which was 21 and 16.5 per 100,000 population, respectively, was exceeded only by that of seven countries—Chile, Hungary, Italy, Spain, Serbia, Jamaica, and the Province of Ontario, Canada—while in 1913 Ontario reduced its rate below ours. Our mortality rate was very materially higher than that of such great nations as Austria, Belgium, England, Ireland, Scotland, Germany, France, and Japan.

These figures speak in accusing tones, especially in view of our boasted position among the nations of the world. The tens of thousands of American citizens who die unnecessarily from this dread disease are victims to our criminal neglect. Our medical science is as far advanced as that of any people, the principles of sanitation and prevention of disease are well understood; but we have failed to convey this knowledge to the individual citizen—knowledge that may mean the preservation of his or his neighbor's life. Typhoid is a disease which the experience of the world teaches is entirely preventable.

Rural conditions can not be improved to any very great extent by any other method than field investigation. When a community has gotten to the point where it desires the Federal Government to investigate the conditions of its rural health it has already made a step in the right direction, and if the

Government accedes to this request and sends to that place officers and employees of the Public Health Service, the rural dweller then comes into intimate personal touch with the ideas of health and there is an opportunity to give him by visual demonstration the lesson of the protection of his body against disease. For example, let us consider the demonstration of malarial control which was carried on at Roanoke Rapids, a small town on the Roanoke River in Halifax County, in the northern part of North Carolina. The population is about 1,800, the total number of people living in the immediate vicinity being about 4,100. A careful malaria survey was made and certain measures of ditching, land clearing, oiling, and general clean-up were put into effect. This work was done in 1914. During October 1 to 5, 1913, it was estimated that there were 200 persons sick in bed with malaria; on October 1, 1914, only 1 person, and on September 24 to 28, 1915, none. In 1913 the blood examinations of 400 persons showed that 13.75 per cent were infected with malaria. In 1914 of 780 persons examined 4.48 per cent were found infected. In 1915 of 968 persons examined only 3.51 per cent were found infected. A house to house inspection, taken of persons residing on four blocks in Roanoke Rapids, showed that 48.9 per cent gave a history of having had chills and fever during the period June 1, 1913, to October 15, 1913. In 1914 the number was 33 per cent for the same period and 19 per cent for the same period in 1915. It is thus seen that there was a reduction of 61.1 per cent in the incidence of sickness for two years. The cost of the malaria work in 1914 was $3,600, and for 1915, $1,500. We thus see that as a result of two years' work and the expenditure of $5,100, malaria has been reduced in this community to an almost negligible quantity. It is reported that the efficiency of employees as rated by the Roanoke Rapids mills has increased each year since the community malaria work was instituted. The bulk of the expense was borne locally, the Government expenditure merely including the salaries of the officers who directed and stimulated the work. What has been done in this community can be repeated in practically every malaria-ridden community in this country.

Immediately to the east of the Cascade Mountains, in the State of Washington, there is a wonderfully rich valley known as Yakima County. From 1907 to 1912 the annual typhoid-fever rate averaged 150 per 100,000, and, as was subsequently shown, this very high rate was due for the most part to the insanitary rural conditions. The occurrence of an explosive outbreak of typhoid fever in North Yakima in May, 1911, caused a keen awakening of the people to the seriousness of the situation. At the request of the city, county, and State authorities, an officer of the Public Health Service was detailed to make an investigation of the outbreak with a view to determining the causes of the prevalence of the disease and the measures necessary for its eradication and prevention. I will not take the time of the Senate by repeating matter which is already published in a Government document (Public Health Bulletin No. 51), but it will be interesting to note that the investigation showed that the high rate of prevalence of typhoid fever during the summer and fall of the years 1908, 1909, and 1910 was due for the most part to the insanitary conditions which resulted from the local dissemination of human excreta. As a result of an investigation by the Public Health Service and of the public education which accrued coincident therewith, the prevalence of typhoid fever in Yakima for the summer and early fall of 1911 was reduced by about 90 per cent, as compared with the rate for the corresponding period in previous years. This was accomplished at the expenditure of a very small sum of money, and so fruitful were the results that since 1911 typhoid fever has practically ceased to exist in the Yakima Valley. This example may be repeated in any portion of the United States.

The bill which I am discussing has for its object the encouragement of improved rural health through the work of trained investigators. It does not purpose the curtailment of the liberty of any citizen in this country. It does not purpose the treatment or cure of disease by any method whatsoever. Its entire intent and purpose is the prevention of disease and the increase in the standard of healthfulness in the rural districts of America, to the eternal and everlasting betterment of our country. The dissemination of the gospel of cleanliness, the application of the simple measures of sanitation, and the inculcation of the hygienic conscience, all will follow the enactment of this bill. It is a necessary measure. It is a measure which is aimed directly at two diseases which, as I have already shown, bring death, sickness, unhappiness, inefficiency, and financial loss to our people every year. If the Government of the United States believes in the sacredness of human life, if it believes in the conservation of the vital resources of man, if it believes that the health of a human being is of at least as great importance as the health of a domestic animal, this measure will become law; and when the provisions of this bill shall have been carried into effect, when this annual loss from typhoid fever and malaria and other preventable rural diseases shall have been stopped, then, indeed, may the people rise up and call our Nation blessed.

APPENDIX.

[From Bulletin 30 of the Committee of One Hundred on National Health, being a Report on National Vitality: Its Wastes and Conservation, prepared for the National Conservation Commission by Prof. Irving Fisher, of Yale University, member of the commission. Printed at the Government Printing Office in 1909.]

Part IV.—Results of conserving life.

CHAPTER XI.—PROLONGATION OF LIFE.

SECTION 1.—LIFE IS LENGTHENING.

We have already seen evidence of the possibility of prolonging life. In Europe the life span is double what it is in India. The death rate of Dublin is over twice that of Amsterdam and three times that of rural Michigan. Again, making every allowance for inaccuracies of old records, we have strong reason to believe that life is twice as long as three or four centuries ago, and modern accurate records show that it is to-day increasing more rapidly than ever. The rate at which this lengthening proceeds per century is shown in the following table, based on Chapter I:

Rate of lengthening life (in years, per century).

Country.	Periods.	Males.	Females.
England	1838–1854 to 1871–1881, or 30 years	5	9
Do	1871–1881 to 1891–1900, or 20 years	14	16
France	1817–1831 to 1898–1903, or 76 years	10	11
Prussia	1867–1877 to 1891–1900, or 23 years	25	29
Denmark	1835–1844 to 1895–1900, or 57 years	13	15
Sweden	1816–1840 to 1891–1900, or 67 years	17	15
United States:			
Massachusetts	1789 to 1855, or 66 years	7	
Do	1855 to 1893–1897, or 40 years	14	
India	1881 to 1901, or 20 years	0	

From this table we observe:

First. That the rate of progress is extremely variable in different countries. It is perhaps no accident that the maximum rate obtains in Prussia, which is probably the most progressive country in the discovery and application of scientific medicine. If progress continues for a century at merely the present rate, human life in Prussia will be 25 to 29 years longer than at present. The average rate of improvement for all the countries, excepting India, is about 15 years per century.

Second. It is noticeable that in practically all cases the improvement is more among females than males. This is one expression of the progress which womankind is now making in all lands.

Third. This table, as well as the estimate of Prof. Finkelnburg already quoted, shows that not only is the average duration of human life increasing, but that the rate of increase is also increasing. The estimate of Finkelnburg that the lengthening of life during the interval between the sixteenth century and the end of the eighteenth century was from 18 or 20 years to a little over 30 years shows a rate of increase of about 4 years per century. During the following century he estimated that the life span increased from a little over 30 to 38 or 40 years, or about 9 years per century. In the table we see that in England the length of life was increasing in the middle of the nineteenth century at a rate of from 5 to 9 years per century, while during the last quarter it was increasing at from 14 to 16 years per century. In Massachusetts the imperfect data indicate that life lengthened in the first half of the eighteenth century at the rate of about 7 years a century. The indication for the last part of the nineteenth century is that it increased at the rate of 14 years per century.

We may briefly summarize chronologically the general rate of increase as follows:

Lengthening of human life per century.	Years.
During seventeenth and eighteenth centuries	4
During first three quarters of the nineteenth century	9
Present rate in Massachusetts	14
Present rate in Europe	17
Present rate in Prussia	27

SECTION 2.—TABLE SHOWING FURTHER PRACTICABLE PROLONGATION.

It would be surprising if the future should not witness a further lengthening of human life, and at an increasing rate. Of course there is a limit to the further increase of human life, but there is good reason to believe that the limit is still far off.

The following table shows that at least 14 years could be added to human life by the partial elimination of preventable diseases according to the stated ratios of preventability. This is equivalent to a reduction in the death rate of about 25 per cent. The table is based on the causes of death given in the census volume for mortality statistics for 1906. These causes are arranged according to the average, or rather median, age at death from the disease. This median age is given in the second column. The order in this column shows at a glance the successive onslaught of, or rather fatality from, the various causes of death. The table shows the successive bombardments of disease to which human life is subject.

The third column gives the average lost "expectation of life"; that is, the expectation cut off by each particular cause of death.

The fourth column represents the percentage which the deaths from each particular cause bear to the total number of deaths in 1906 in the registration area. It shows the relative importance of the different causes of death in the present death rate, but has no reference to the age at death.

The fifth column contains an estimate, made by physicians, of the ratio of preventability of deaths from each cause named.

The items in the sixth column are found by multiplying together those in the fourth and fifth columns, and express the percentage which the preventable deaths from each cause named bears to the total number of deaths from all causes.

The seventh and last column gives the figures for which the table is constructed, namely, the amount of prolongation of life which would come about through preventing deaths according to the ratios of preventability in column 5. When it is said that a death is preventable, it is not, of course, meant that the person saved from it will never die, but merely that his death is postponed. The term "postponable" would avoid a great deal of confusion on the subject.

The principle on which the last column is constructed is simply the principle of averages. The column shows the prolongation of life which would be caused by postponing the "postponable" deaths by the amounts indicated in column 3. To illustrate this principle, suppose 10 magnitudes to be averaged arithmetically, and that their average is 30. To fix our ideas, we may suppose these 10 magnitudes to be represented by 10 lines drawn on a sheet of paper. It is evident that if one of these 10 lines is prolonged the average of the 10 will be thereby increased by exactly one-tenth of the prolongation of that one line.

Possible prolongation of life.

(1) Cause of death.	(2) A. Median age of deaths from causes named.	(3) B. Expectation of life at median age.	(4) C. Deaths due to cause named as percentage of all deaths.	(5) D. Ratio of preventability (postponability), i. e., ratio of "preventable" deaths from cause named to all deaths from cause named.	(6) E=CD. Ratio of "preventable" deaths from cause named to all deaths from all causes.	(7) F=BE. Years added to average lifetime if deaths were prevented in the ratio of preventability of column 5.

[1] Although this is the ratio of general preventability of deaths under existing conditions, the death rate, i. e., deaths in relation to population, will not in the end be affected in this ratio but by only about 25 per cent. The reason for this paradox is that deaths prevented lead to a larger population.

Similarly, if of the 10 lines 3 are prolonged each a certan stated amount or are prolonged that amount on the average, the average of the whole 10 will be increased by three-tenths of this amount. Consequently, if the saved lives from typhoid fever (No. 24 in the table) are, on an average, prolonged 38 years, and these saved lives represent 1.7 per cent of all lives, the average life will be prolonged by 1.7 per cent of 38 years. This is 0.65, or two-thirds of a year.

All the calculations are on the assumption of expectations of life, such that the saved lives will die according to the present law of mortality. Consequently, if the table should be corrected by substituting in each case such an expectation of life as would conform to the improved mortality, the result would be an addition [2.1 years] (best estimated graphically, as shown in appendix to this chapter) to the estimate of possible prolongation, which would therefore become 16.2 years. The résumé of the table shows that of the 14 years of possible prolongation of life 4.4 would be caused by reducing infant deaths under or near 1 year, 1.51 by reducing mortality from children's diseases, 6.82 from reducing the diseases of middle life, especially tuberculosis and typhoid, and only 1.33 by reducing the mortality of diseases the deaths from which usually come after 50 years of age.

The table shows that seven of the 90 causes of death are responsible for over half of the shortening of life, namely, diarrhea and enteritis (No. 7), broncho-pneumania (No. 10), meningitis (No. 13), typhoid (No. 24), tuberculosis of lungs (No. 31), violence (No. 32), and pneumonia (No. 38). These alone shorten life needlessly by more than eight years. Against these seven causes, therefore, our special efforts should be directed. Pure milk, pure water, pure air, and reasonable protection from accident are the chief means known at present. When the public makes up its mind no longer to endure impure milk, impure water, and impure air, and unreasonable dangers to life and limb, life will lengthen eight years, and probably a great deal more.

In the résumé of the table, columns 4, 6, and 7 are found from the original table by simple addition. Each figure in the fifth column is found by dividing the figure in the sixth by that in the fourth. (The result is in each case a weighted average of the individual ratios of preventability for the individual cause of death.)

The final figure in this column, 42.3, is the same as the sum of column 6, and means that according to medical opinion 42.3 per cent of the deaths which occur under present conditions are preventable (postponable). The death rate, however, will ultimately be reduced, not in this proportion, but by about 25 per cent, while the average duration of life will be increased about 33⅓ per cent.

THE ASIATIC PROBLEM, IMMIGRATION, NATIONAL DEFENSE.

Mr. WORKS. Mr. President, I have been intending for some time to address the Senate on the subject of our relations to the oriental nations, especially Japan. It is a subject in which the people of my State are directly and gravely interested. As one of the reasons or excuses advanced for the increase of the Navy which is now proposed is the fear that we may have war with Japan, this seems to be an appropriate time to discuss that question. I have myself no such fear; I do not believe we are in any such danger; but there are complications between this country and Japan that must be settled in some way, and they should be speedily settled. It is my purpose now to point out what those complications and difficulties are that may lead to trouble in the future and to suggest means by which I think war can be avoided and the settlement of those questions between this country and Japan brought about by peaceful means.

Mr. President, the Asiatic problem enters into the questions of immigration and national defense as these questions are presented by bills now pending in Congress. It is a problem that has been presenting itself in various ways to the nations interested in its solution for many years. It is a problem that might and should have been settled long ago if the countries concerned had not been, and are now, afraid to meet and settle it in the only way that it ever can or will be settled. It has been settled practically as between the United States and China. The status of the subjects of China in this country has been definitely fixed by our laws and treaties between the two countries. The Chinese exclusion act is recognized by both countries as necessary and is observed as being so. The individual Chinaman often has just reason to complain of the unjust and harsh manner in which the exclusion act is enforced, but this is the result of the manner of its administration and enforcement by inconsiderate and often brutal officers who have no respect for the rights or consideration for the feelings of a human being only because he is a Chinaman, and not the fault of the law itself. I shall say but little therefore about our relations with China. The relations between the two nations are friendly and there is no reason to suppose they will not continue to be so.

With Japan the situation is entirely different. We have not been able to deal with that country as we have with China for obvious but not satisfactory reasons. Japan is a proud and sensitive nation. She values her standing among nations and insists, as she has every reason to do, that her standing as a nation and a race of people shall be regarded and treated as second to none. To this claim this Nation takes no exception. We not only regard her as entitled to the same standard and the same treatment as other nations, but are anxious to extend to her the same treatment we extend to others. But, sir, there are differences of race and color—fundamental differences that must be recognized and taken into account by both nations if peace and harmony are to be maintained between them. The Japanese nation must recognize and accept the unalterable fact that unlimited immigration of her people into this country can not and will not be permitted. The fact must not only be admitted but intercourse between the two nations must be settled on that basis and can not be settled on any other basis.

The question is, and this question must be settled between the two nations sooner or later, How can the future relations of the two countries be settled without infringing upon the rights of Japan as compared with other nations and without offending the just race and national pride of her people?

Mr. President, Japan has recognized and acted upon the necessity of restricted emigration of her people to this country by en-

tering into what is called a "gentleman's agreement" to herself restrict such emigration. She was not willing to allow this to be done by us under treaty between the two nations because, as she asserts, it would amount to a discrimination as between her and other nations on account of race.

Now, sir, this is the real problem that is confronting the United States and Japan. It is a problem that must be solved. Shall it be solved by peaceful means or by war? It must be settled one way or the other. That must be taken as a fixed and unalterable fact. The great trouble is that these two friendly nations who should continue to be friendly upon every consideration and for every reason affecting the good of both of them have not met the question frankly and fearlessly. They have both been afraid. The specter of war looms up every time the question arises. But why should the thought of war accompany laws enacted or treaties entered into affecting the right of Japanese subjects to come to this country any more than any other question that may arise between the two nations. The United States has the unquestionable and the unquestioned right to say who shall come within her borders. She has the right to say that no subject or citizen of any other nation shall come here. What Japan maintains is that her people shall not be excluded when the subjects of other nations are admitted. As a matter of law, of course this position is untenable. This country has the undoubted right to invite immigration from one country and forbid it from another. This, I have no doubt, Japan will concede, and, in fact, we have done this very thing. The trouble is not that we limit Japanese immigration but why, or the reason for excluding certain Japanese subjects and not those of other nations. This is the crux of the whole matter. This is the problem that must ultimately be met and solved if the United States and Japan are to continue at peace with each other. The vital question is, Are we excluding Japanese subjects from this country because we regard the Japanese as an inferior and objectionable race? And secondary to it and resulting from it is the further question, If so, are we justified in taking that position as between us and that country and acting upon it?

Mr. President, these are not only very vital but very delicate questions. They are vital because they affect in large degree the future prosperity and happiness of a large portion, if not all, of our own country. They are delicate because, in the estimation of Japan, they touch the pride and national honor of that country if—and I want the Senate to mark the if—the course we must take for our own protection is a reflection upon the people of that country because we claim, or believe, in their inferiority as a race and exclude them for that reason. That we must and will continue to exclude them, or limit their coming as we have done in the past, must be accepted as a certainty.

Therefore, Mr. President, it is due to Japan, it is due to ourselves as a people and as a nation, to search our motives and satisfy ourselves as to the reason why we are insisting and shall continue to insist that certain of the subjects of Japan shall not come to this country and become permanent residents and landowners within any of the States of the Union.

We may just as well deal with this question freely and frankly. It can not be settled by beating about the bush, by evasion of the real problem, or by compromises or temporizing. Such a course only makes matters worse for both countries and keeps the people thinking about and anticipating war as the only and inevitable means of settling it. The American people do not want war with Japan. The people of Japan do not want war with this country. They are not going to have war if they deal with this question with right motives and the desire to settle it fairly and justly to both countries.

Now, Mr. President, why do the people of this country—why, especially, do the people of the Pacific Coast States—object to Japanese of the laboring classes coming to this country and becoming permanent residents and landowners? Is it because they regard the Japanese as an inferior race of people, and therefore objectionable? Does Japan really think so? I am sure that is not the reason, and I do not believe the intelligent Japanese think or believe it is the reason. The people of the Pacific Coast States who speak and act from knowledge do not object to the Japanese because they are inferior as a race, but because they are different. Their color, their manner of living, their habits and customs, their regard or disregard of personal obligations, social and contractual, are different. These differences are such that in the nature of things there can be no amalgamation of the two races or assimilation by our people of a race different in the vital things of life and to national progress and advancement. Looking at it as a purely business or commercial problem, there is serious objection by our own laboring classes to the incoming of Japanese laborers because it is claimed that American labor can not compete with Japanese, sometimes called cheap Japanese labor. This claim is not without foundation, not because Japanese laborers work for less wages than American laborers, but because on account of their different manner of living they can exist and prosper on less wages than our own wage earners, the tendency of which is to degrade labor and force the American laborer to debase himself to the manner of living of his Japanese competitor or abandon the field to him. It will be found also that similar grounds of complaint enter into the objections made to the right of the Japanese immigrants to becoming landowners alongside of and in competition with the American farmer.

The relations between the oriental and occidental nations and the problems presented by them have been the subject of consideration and study by many people on both sides and have resulted in the writing of many books dealing with the problem. In addition to my own views, the result of no little conscientious consideration and study of the subject and its probable consequences, I am going to refer to some of the things that have been said and written about it by others who have made a greater and more painstaken study of conditions than I have been able to do.

The question of our relations with Japan has become more than usually acute on two occasions in my own State by the action of the State authorities, resulting first in the exclusion of Japanese from the public schools of San Francisco and later in the enactment of the alien-land act to which I shall refer later on. When it was proposed to enact this law it was opposed by selfish home interests that it was supposed would be injuriously affected by its passage. One of these was the Panama-Pacific Exposition. A hearing was had on the bill before a joint meeting of the two houses of the legislature.

Subsequently, Mr. Chester H. Rowell, one of the leading newspaper men of the State and of the country, editor of the Fresno Republican, and one of the profound thinkers on this and other questions of national and international importance, in an article in the World's Work, of June, 1913, entitled, "The Japanese in California—Why Californians regard their presence as the beginning of the biggest problem that ever faced the American people," described the scene at this hearing and gave the country his views of the situation. Listen to what he says:

> The California Legislature was assembled in the senate chamber for joint hearing on the Japanese bills, whose recurrent agitation brings California biennially into the spotlight of the world. Directors of the Panama-Pacific Exposition (the writer among them) were pleading for conservative action, or inaction. A gaunt farmer rose to reply: "Up at Elk Grove, where I live," he said, "on the next farm a Japanese man lives, and a white woman. That woman is carrying around a baby in her arms. What is that baby? It isn't white. It isn't Japanese. I'll tell you what it is—it is the beginning of the biggest problem that ever faced the American people."
>
> Psychologically this epitomized the whole question—the beginning of a race problem multiplied in imagination by the possibilities of all the future; the challenge, which sort of baby shall prefigure the future Californian.
>
> * * * * * * *
>
> And, dealing with the problem wide and long, no far-sighted man can dismiss the farmer's challenge as a mere figment of fancy. Let only that happen in California which has already happened in Hawaii; let only an awakening Orient pour through the Golden Gate a stream comparable to that which Europe has poured through Hell Gate, and that baby will have increased to the exact problem the Elk Grove farmer pictured. Injustice has been the only American way of meeting a race problem. We dealt unjustly by the Indian, and he died. We dealt unjustly with the negro, and he submits. If Japanese ever come in sufficient numbers to constitute a race problem, we shall deal unjustly with them, and they will neither die nor submit. This is the bigness of the problem, seen in the telescope of the imagination, and is the whole reason for the emotional intensity of California's agitation over a situation whose present practical dimensions are relatively insignificant. Californians are vividly conscious of their position as the wardens of the western march. They hold not merely a political and geographic but a racial frontier—the border between the white man's and the brown man's world. To a keen sense of this trust, the possible crisis takes on the significance of a new Thermopylæ. Psychologically this is the Japanese problem in California, and no view of the situation would be just to California if it omitted a sympathetic appreciation of this state of mind and of its possible ultimate justification.
>
> It is equally necessary to recognize that the question has a psychological aspect on the Japanese side also. At this very moment, while this is being written, 20,000 people are surging through the streets of Tokyo, clamoring for war with America, all because the California Legislature is considering a measure which is already the unprotested law of the United States by three separate Federal statutes, which is the law of five States, and has been immemorial law in Japan itself. Even a mob would not be so irrational on merely practical provocation. It is the whole revulsion of the brown man's race pride against the white man's race exclusiveness, concentrated for the moment on an otherwise inconsequential act of the white man's outpost province. It is a mutual state of emotional hyperesthesia.

Mr. Rowell then proceeds to depict the conditions as they exist in California. I shall come to that further along.

As touching the phase of the subject I am now considering, he had this further to say of the Japanese:

> When not in the fields the California Japanese congregate in the "Japtown" districts of the principal cities. "Japtown" is usually adjacent to the dwindling Chinatown, which it partly absorbs. But the Japanese build decent houses, admitting light and air, and with chimneys to let out the smoke. Their shops resemble American stores and sometimes grow to be considerable establishments. There are moving-

picture shows, pool rooms, and other places of amusement. Sanitary conditions are usually good, and the general look of life is bright and cheerful. They are a polite, vivacious, and delightfully likable people. And the bitterest anti-Japanese agitator in California has never once suggested that they are an inferior race. They are of a different and physically unassimilable race; that is all.

His final summing up of the situation is as follows:

Whether 10,000 acres of Japanese farms shall become 20,000 is not overwhelmingly important. That the two chief races of mankind shall stay each on its own side of the Pacific, there to conduct in peace and friendship the commerce of goods and ideas and of the things of the spirit, but without general interpenetration of population or commingling of blood—that is precisely the greatest thing in the world.

Mr. President, as Mr. Rowell so graphically sets out in this article, and as I have already said, it is not a question of inferiority of race but of a fundamental difference in the two races that makes it impossible for them to commingle, amalgamate, and live together in peace and harmony. And if this question is ever finally and rightly settled between the two nations, it must, as I have said, be settled on this basis.

The question can not be settled on sentimental grounds or any solution of it founded on personal or national pride. It is an intensely practical question, the solution of which can not rest upon any such unsubstantial foundation. But this country in dealing with the subject should respect the just pride of the Japanese people in their race and their country and endeavor in every reasonable way not inconsistent with our own rights and interests as a nation not to wound the pride or the sensibilities of this great, prosperous, and growing nation with whom we should in the interest of both countries be at peace.

The distinguished Senator from Nevada [Mr. NEWLANDS], in an article in the Annals of the American Academy of Political and Social Science, volume 34, page 269, on "A western view of the race question," says:

The race question is the most important one now confronting the Nation.

* * * * * * *

Confronting our Pacific coast lies Asia, with nearly a billion people of the yellow and brown races, who, if there were no restrictions, would quickly settle upon and take possession of our entire western coast and intermountain region.

History teaches that it is impossible to make a homogeneous people by the juxtaposition upon the same soil of races differing in color. Race tolerance under such conditions means race amalgamation, and this is undesirable. Race intolerance means ultimately race war and mutual destruction or the reduction of one race to servitude. The admission of a race of a different color in a condition of servitude is foreign to the spirit of our institutions, which demands equal rights to all within our jurisdiction.

* * * * * * *

Japan can not justly take offense at such restrictive domestic legislation upon our part. She would be the first to take such action against the white race were it necessary to do so in order to maintain the integrity of her race and her institutions. She is at liberty to pursue a similar course. Such action constitutes no implication of inferiority of the race excluded. It may even be a confession of inferiority by the excluding race in its ability to cope economically with the race excluded. It involves neither insult nor the possibility of war, for Japan could not possibly sustain a war, even were her finances in better condition than they are, without the sympathy of the world as to the justness of her cause.

* * * * * * *

The time has come, in my judgment, when the United States, as a matter of self-protection and self-preservation, must declare by statutory enactment that it will not tolerate further race complications upon our soil. Our country, by law to take effect upon the expiration of existing treaties, should prevent the immigration of all peoples other than those of the white race, except under restricted conditions relating to international commerce, travel, and education.

In the same publication, at page 239, will be found this statement by Walter Macarthur, editor Coast Seamen's Journal, as to what is the foundation of opposition to oriental immigration:

The opposition to oriental immigration is justified upon the single ground of race. Whether the incompatibility of the peoples of Asia and America can be attributed to race repulsion, race antipodalism, or race prejudice, one indisputable ground of race conflict remains, namely, that of race difference. The race difference between these people is radical and irreconcilable, because it reaches to the most fundamental characteristics of each.

* * * * * * *

Only upon the race ground can we comprehend the real nature and dimensions of the subject. Considered from this standpoint, exclusion follows as the inescapable law of our national safety and progress. Considered from any other standpoint—that is, with any other point as the basis of reasoning—the subject becomes involved in matters of detail, which, being in themselves matters of dispute, lead only to interminable discussion. Recognizing the race aspect of the subject as the main ground of exclusion, the minor grounds, such as those of an economic or political nature, serve to reinforce the argument as so many corollaries.

Mr. Macarthur is one of the able men of California who has given the subject much intelligent thought and study, looking at it from the point of view of the laboring man. His whole article on the subject is interesting and instructive, and may be read with profit.

The Japanese sentiment on the subject may be found in a series of articles written by Japanese subjects and bound in book form under the title "Japan to America." In one of these, by Kentaro Kaneko, "The spirit of Japan," his pride in the fact that she is the equal if not the superior of any other nation, and the belief that the advancement and success of the Japanese nation has created jealousy in the minds of other nations, is clearly disclosed. He says:

In our own times one of the greatest problems in the world is the race problem. It has arisen in Australia, in America, in Europe, in China, in Korea—indeed, almost everywhere on the surface of the globe; and the true cause of this omnipresent problem is Japan's great development. Had our nation remained a China or a Korea in its progress, the clamor of the race problem would not have been raised to so high a pitch. As it is, Japan has emerged out of her two foreign wars as a nation with a splendid organization and as civilized as the foremost countries in Europe and America, imposing respectful consideration upon them and breaking, to the resentment of some of them, their traditional assumption that the white race is essentially superior to the yellow. Consequently, Japan was allowed a membership in the council of nations, which position had been long denied her. Not all the older members liked to admit her, but she demanded such admission from them on the strength of her achievement and was given it.

* * * * * * *

Young Japan is coping with modern learning, just as young America, young England, young France, or young Germany is doing. In the matter of intellectual life, our second generation is under the same process of fermentation as that of every other civilized nation. Supposing that the Japan of to-day is not on an equal basis with her white competitors? The Japan of to-morrow will be, in all probability. If, therefore, there is anything she has to teach them, it is the fact that mankind is a one and indivisible whole, that the yellow race is not inferior to the white, that all the races should cooperate in perfect harmony for the development of the world's civilization. We have obtained a voice in the parliament of man at the cost of blood and money; we must use that new right to good purpose.

* * * * * * *

Upon the solution of the race problem the future of Japan, nay, the future of human progress, largely depends.

The last advice that Alexander Hamilton received from his mother on her deathbed—and it is the best and greatest advice, in my opinion, that a son has ever been given by a parent—has been my own constant guide since I, in my boyhood, read the words in the life of Hamilton. And to-day, to young Japan, upon whose shoulders rests the heavy responsibility of teaching the occidentals, do I give the same advice. It is this: "My son, never aim at the second best. It is not worthy of you. Your powers are in harmony with the everlasting principle of the universe."

These declarations by one of the leading men of Japan, who claims Col. Roosevelt as his intimate friend, breathe the independence and superiority of the new Japan. No well-informed and candid citizen of this country will deny to Japan the right of equality with all other nations. America is not jealous of her growth of power, intelligence, courage, and all the things that make a great nation.

No one who knows what Japan has accomplished will advance the claim of inferiority of her people as a reason for excluding some of her subjects from this country. That is not the question. Even if it were true that she is not the equal but the superior of the white races, the problem would be precisely the same. It is not a question of inferiority or equality on either side. The bald fact is—and nothing can change it—the two races are different in such way as to make their amalgamation or assimilation impossible. Both our own country and Japan must come to know this, cease to cover it up by nice speeches, and, as wise and patriotic citizens of two great nations, their rulers and representatives must face the fact calmly and without evasion and act accordingly. By recognizing this unalterable fact and acting up to it, Japan will show her greatness as she can do in no other way. The effort to force her people on another nation, either as equals or superiors, is an evidence of national and racial weakness. If Japan really wants to show herself as great and as magnanimous as her people believe and claim her to be, she has the opportunity to prove it by recognizing the fact that the two races can not live together in peace and unity and keeping at home her people who seek permanent residence here. This example should be followed by the United States. Our people have no better reason for locating in Japan for permanent residence than have the Japanese for coming here. The responsibility to prevent the intermingling of the two races should be and is just as binding on one nation as the other. Excluding as we must the question of inferiority or superiority of either nation, there is no escape from this equal and mutual duty and responsibility. Let each nation maintain its superiority over the other at will. That does not alter the situation. The mutual duty is to keep the two races apart. It is a duty not only to the two nations immediately concerned but to the whole of humanity.

In an article by Dean C. Worcester, "Our Near Neighbor in the Far East," he very well says, in addressing himself to Japan:

It would be idle to deny that in many ways the great mass of your people and that of ours differ from each other profoundly. It is fair to assume that present conditions will not always endure, but the change will necessarily be very gradual. Meanwhile we must look the facts in the face. The questions which have arisen between us do not in reality involve the superiority of the one people or the other. You, who represent an ancient civilization successfully modified and adapted to modern conditions, can well afford to smile at the temerity of those who boast too loudly of the virtues of a social system so short lived as is that of the United States. Each has its advantages and its

defects, and the adherents of the one can ill afford to show contempt for the adherents of the other, yet until human nature changes profoundly for the better the masses in each country will probably continue to maintain that "Orthodoxy is my 'doxy and heterodoxy is your 'doxy."

Suffice 't, therefore, that we are different, and that where representatives of two very distinct peoples which do not readily assimilate live in close contact with each other troubles sometimes necessarily arise. In meeting them we should employ that good sense often called "common" which fortunately is common to educated and intelligent Americans and Japanese. When you are inclined to grow indignant over the treatment accorded your laborers and your school children in California—and I confess to the belief that you have sometimes had ground for indignation—ask yourselves whether you have extended or could extend to Americans in Japan all of the privileges which you have sought for your citizens in the western part of our country. Would not colonies of Americans owning land, living apart from your people and retaining their own language and customs, create some problems for you in Japan?

What a victory it would be for civilization if our two nations, of different races—the easterners of the Orient and the westerners of the Occident—the representatives of a very ancient civilization and those of a civilization of comparatively recent growth, could continue to settle their differences honorably and amicably in mutual respect and esteem! (America to Japan, 189.)

The exchange of sentiments of mutual good will and esteem found in "Japan to America" and, in return, "America to Japan," shows with reasonable accuracy the feeling toward each other of the two nations as entertained by the leading statesmen, educators, and business men of each. That the expressions of good will and friendship on both sides are sincere I have no doubt. But, sir, this does not by any means meet the situation. The United States and Japan are not only at peace, but they entertain for each other mutual respect and esteem. Let no one doubt that. But there is an unsettled question between them that is constantly testing and threatening a breach of these friendly relations. That question must be settled justly and fairly if this much-desired friendly relation is to continue, and the sooner it is settled the better. It is the only safeguard against future enmity and eventual war between the two nations.

The messages exchanged, as published in the two books I have cited, do not help to settle this question. Most of the worthy American gentlemen who wrote these friendly messages knew but little about the question or the obvious necessity of settling it, and in the main those of them who had some knowledge on *the subject* refrained from mentioning the very thing that inspired the messages of good will intended to allay the fears of a rupture between the two nations. One of the messages was written by Hon. Elihu Root, who dealt with the order of the San Francisco school board excluding Japanese from public schools, about which there was such a furore at the time. I will speak of that incident later. Senator Root's evident purpose was to give assurance that the discussion over that question between this country and Japan was friendly throughout, and I have no doubt it was. He says:

It is a pleasure to be able to say that never for a moment was there, as between the Government of the United States and the Government of Japan, the slightest departure from perfect good temper, mutual confidence, and kindly consideration; and that no sooner had the views and purposes of the Governments of the United States, the State of California, and the city of San Francisco been explained by each to the other than entire harmony and good understanding resulted, with a common desire to exercise the powers vested in each for the common good of the whole country, of the State, and of the city.

* * * * * * *

There was one great and serious question underlying the whole subject, which made all questions of construction and of scope and of effect of the treaty itself—all questions as to whether the claims of Japan were well founded or not; all questions as to whether the resolution of the school board was valid or not—seem temporary and comparatively unimportant. It was not a question of war with Japan. All the foolish talk about war was purely sensational and imaginative. There was never even friction between the two Governments. The question was, What state of feeling would be created between the great body of the people of the United States and the great body of the people of Japan as a result of the treatment given to the Japanese in this country?

What was to be the effect upon that proud, sensitive, highly civilized people across the Pacific of the discourtesy, insult, imputations of inferiority and abuse aimed at them in the columns of American newspapers and from the platforms of American public meetings? What would be the effect upon our own people of the responses that natural resentment for such treatment would elicit from the Japanese?

Benjamin Ide Wheeler, president of the University of California, another of the message writers, expressed his appreciation of Japan's consent to exclude her own laborers from this country by refusing them passports. He says:

We appreciate the wisdom of Japan's consent to the practical exclusion of Japanese laborers through the device of withholding passports under what is known as the "gentlemen's agreement," and we recognize the honorableness with which Japan has carried out her part of the contract. This would seem to be a fair example of one nation appreciating the difficulties inherent in the situation of the other, i. e., of seeing things as the other sees them. We ask for a continuation of that attitude of sympathy. The Japanese people surely understand that it is not on merely arbitrary grounds that we insist on the necessity of denying admission to their laborers. If for any reason the "gentlemen's agreement" should be abrogated, we should find it extremely difficult to agree upon a treaty which would accomplish the purpose. Japan is one of the great powers of the world; her people represent one of the highest types of the world's civilization. They are not unnaturally jealous of their position and sensitive regarding any apparent infringement of their claim. They would not welcome American legislation discriminating against them, and they certainly would not agree to a treaty which by their very acceptance of it would constitute or seem to constitute a documentary confession on their part of oddity, if not of inferiority. (America to Japan, 177, 178.)

I think we all appreciate the making of the "gentlemen's agreement" by Japan. I believe her agreement has been honorably kept, so far as Japan was able to keep it. But Japanese laborers come to this country through other countries with passports from their home country. The "gentlemen's agreement" is only partially effective if complied with to the letter.

There is another question relating to the "gentlemen's agreement" that is worthy of careful consideration. Is the act of Japan in granting passports to her subjects conclusive on our Government, or may we deport them if upon examination we find them to be undesirable citizens?

The following news dispatch, of date April 28, 1916, from San Francisco, will indicate the difficulties that may arise under this agreement:

JAPANESE BOY DENIED ADMISSION.

Edward White, United States commissioner of immigration here, in a complaint on record Thursday in the United States district court, charges that Matsurtaro Nakao, 17-year-old Japanese boy ordered deported, attempted to gain admission to this country in violation of the Root-Takahira laborer-exclusion agreement. On the basis that Matsurtaro was likely to become a public charge, he was denied admission. Commissioner White said the "gentlemen's agreement" between Japan and the United States had been violated. Representatives of the United States district attorney's office said that the boy could not be barred legally under the agreement.

Mr. President the views of Americans and Japanese that I have thus brought together are interesting. They are important, too, as showing the existence of genuine feelings of friendship between Japan and this country. But these assurances of good will and friendship are significant of the fact that they were thought to be necessary to allay the feeling of hostility that exists on the part of the masses of the people of Japan and of the States of the Union directly interested in the question. This condition of hostility can not be overcome by such exchanges of friendly sentiments. The cause for the friction must be removed. This should be done by joint action of the two Governments. If it can not be done in this way, it must or should be done by the laws of our own country. It can not be justly left to the States immediately concerned. It is a national question, which must eventually be settled by Federal laws. If this is not done, then the States will settle it, and the National Government will have to take the consequences.

The following, from the San Francisco Chronicle of date April 24, 1916, very accurately states the situation:

ORIENTAL LABOR—WHATEVER THE CONSEQUENCES, IT WILL NOT BE ADMITTED TO THIS COUNTRY.

The Japanese Government fully understands that the opposition of the white races everywhere to the admission of oriental labor is due to the fact that it maintains a standard of life which requires less to support it than white labor needs. The result is that when oriental labor comes, white labor goes. Where labor is scarce, oriental labor is as prompt to profit by it as the whites, but there is saving of money to be invested in land. And when the oriental farmer comes, the American farmer goes.

The result of unrestricted immigration of oriental labor would inevitably be the surrender of our land to an oriental civilization. And to that the American people will never submit.

It is not a question of inferiority or superiority in anything. It is a question of difference. Those of each civilization are quite at liberty to prefer their own and to exclude from their boundaries all elements which they think may endanger it. We make no claims for the protection of our own civilization which we do not concede to others. If Japan, for example, objects to the intrusion of American labor, she is quite at liberty to exclude it.

Now, the Japanese Government understands this perfectly and respects the feeling. To the extent of its ability it prevents the emigration of Japanese labor to this country. So far as emigration direct from Japan is concerned, its control is effective. Its control over Japanese domiciled in other countries is not effective, except as our own authorities may make it so by demanding imperial passports from Japanese, no matter where they come from. And we do not know upon what statutory authority that can be done.

If we are to protect ourselves, it is certainly desirable, and probably essential, that there be statutory authority for it. The bill before Congress is in that respect very carefully drawn, with the desire and intent that no national susceptibility be wounded.

Since that time, as I shall point out directly, it has been very considerably and, I think, very unfortunately modified.

HOW THE QUESTION AFFECTS CALIFORNIA.

Mr. President, I have so far discussed this question as a national one. I maintain that it should be treated as wholly a national question. But the Government has not dealt with it effectively up to this time, and when it attempts to do so by a provision in the immigration bill, Japan promptly interposes a protest against any legislation excluding any of her subjects from entry into this country. No one can deny that the United States has that right. We are asked not to do so, because such legislation would wound the proud sensibilities of Japan. Of

course, nothing unnecessary to the protection of our own people should wantonly be done if it is offensive to Japan. But the best interests of the American people should be our first consideration, and Congress may be assured that if it does not protect the people of California from the perils of Japanese immigration and Japanese landholding in the State, by proper and effective laws, then California will legislate for the protection of her own people.

In order that the Senate may understand why California must take this course in self-defense, I am going to call your attention to the conditions as they exist in the State to-day and the dangers that are now confronting her people as well as the action already taken by her for her own protection.

As embodying a fair statement of the number of Japanese in California, how they are occupied, and the quantity of land owned by them, I take the following from the article of Mr. Rowell, in the World's Work, to which I have already referred. Mr. President, the extract to which I refer is quite long. I am not desirous of taking up unnecessary time under present conditions. I wish, however, that every Member of this body might take the time to read what Mr. Rowell says upon that subject, which gives a pretty fair view of the conditions as they exist to-day in my State. I ask that the matter be printed in the RECORD without reading.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Without objection, permission is granted.

The matter referred to is as follows:

By the census there were 71,722 Japanese in the United States in 1910, of whom about 55,000 were in California. It is estimated, on Japanese authority, that there were 11,400 Japanese in the United States in 1898, which number, however, was more than doubled in the next two years, and reached nearly 80,000 by 1908. Since then, on the face of the figures, the number has decreased to about 75,000. This estimate is reached, however, by subtracting from the number of residents and recorded immigrants the number departing for Japan. The Exclusion League claims that the majority of the immigrants now come in surreptitiously over the Mexican border, and that the decrease is therefore fictitious. The league even guesses that there may be 100,000 Japanese in the State. Probably a safe maximum estimate would be that not more than 3 per cent of the population of California and not more than 10 per cent of the population of any one county is Japanese. Officially, the proportion in the State is a trifle more than 2 per cent, and the distribution ranges from 9 per cent in Yolo and San Bernardino Counties down to none at all in many counties. The largest percentage in any city is in Sacramento, where Japanese constitute 5½ per cent of the population. The proportion in Sacramento County is 8 per cent. There are nearly 8,000 Japanese in Los Angeles and nearly 7,000 in San Francisco. Ten counties in the State have more than 1,000 Japanese each, ranging from 1,000 in Placer and Contra Costa to 11,500 in Los Angeles County. The Exclusion League's estimates might double some of these figures.

Officially, the history of the migration of Japanese laborers to the United States begins in 1885, when the emigration of laborers was legalized, and ends in 1907, when the "gentlemen's agreement" went into effect whereby passports are no longer issued in Japan to laborers destined for the United States. The number did not reach 1,000 until 1891, and since 1907 it has officially included no laborers, but has included numerous "picture brides," many of whom have engaged in labor for hire after arrival. These women also naturally presage a new population of native-born Japanese who will be American citizens. They are the weak point in the "gentlemen's agreement." If there are 55,000 Japanese men in the State (or 100,000, as the Exclusion League guesses), the privilege of each to send his photograph to Japan and marry it to a wife means a possible immediate increase of the population to 110,000 (or 200,000), with the potential permanent increase of the progeny of these marriages. These wives, of course, also increase the tendency of the Japanese to seek more fixed occupations. The picture bride is not permitted to leave Japan until her photograph husband has provided a place for her. "Catch 'em wife" is one of the motives commonly assigned by Japanese for taking up land leases. To these must be added whatever Japanese slip in from Mexico. The Exclusion League insists that there is a constant stream of Japanese immigration to insignificant Mexican ports near the border, with no increase in the Japanese population of those ports and no sign of its absorption elsewhere in Mexico.

* * * * * * *

The characteristic occupation of the Japanese in California is that of migratory farm laborers. On the estimate of 55,000 population, 20,000 were given as "farm hands." But of the 4,500 "farmers" many are on small temporary leaseholds and easily revert to day labor. The 6,000 employees of merchants and the 5,000 domestic servants include many who occasionally do farm labor, and even the 4,000 "merchants" are mostly keepers of insignificant shops—of whom two-thirds have each less than $1,000 capital invested. There are 3,580 unassigned laborers, and 8,500 (mostly women and children) of "no occupation." On railroads, 1,500 are employed. Greeks and Mexicans have largely displaced them. Of the nonlaboring classes, there are 120 officials, teachers, and clergy, 1,000 "students" (many of them doubtless temporary pupils learning English).

The total number of farms owned by Japanese in 1912 was 312, with an acreage of 12,726 and an assessed valuation of $609,605 (real value probably about $1,000,000). The number of farms had increased in three years from 208 to 312, and the acreage from 10,791 to 12,726. Japanese owned 218 town lots, with an assessed valuation, including improvements, of $235,675. This was an increase of $60,981 in three years. There were 319 recorded leases in November, 1909, covering 20,294 acres, and 282 leases were recorded from that date to December 12, 1912, covering 17,596 acres.

* * * * * * *

The typical object lessons of conditions as they might become are small districts, like the Vaca Valley, north of San Francisco Bay, or the Florin and Elk Grove districts near Sacramento, where the Japanese have "taken the country" to the extent of moving in in such numbers that white men, by race repulsion, are moving out. These conditions, if they become general, would spell the Hawaiianization of California. The present fact is that they are confined to a few spots, and the Japanese authorities offer their good offices to induce the dispersion of these.

Compared with the total industries and farms of the State, these Japanese enterprises are, of course, insignificant. If it were not for the race question they would be forgotten. But it is quite otherwise with farm labor. Here the principal production of the State is really dominated by the Japanese. On the farms operated by Japanese, of course practically all the labor (96 per cent) is also Japanese. On the farms operated by white farmers, according to an investigation made in 1909, of the total labor employed, 54 per cent was white, 36 per cent Japanese, and the remaining 10 per cent Chinese, Mexicans, Hindus, and Indians. On the large farms the percentage of Japanese was much larger, and on the small farms much smaller than this average.

Mr. VARDAMAN. Mr. President, I ask the Senator what number of the World's Work contains the article to which he has referred?

Mr. WORKS. I have given the volume and page, I will say to the Senator.

Mr. VARDAMAN. I should like to refer to it, and I am glad the Senator has indicated where it can be found.

Mr. WORKS. Mr. President, it must be seen that the conditions as they exist now can not be allowed to increase and grow worse. California will not permit them to do so in that State.

Now, let me call your attention to what the State has already done to protect herself from this threatening and growing evil and what has come from it.

After a full survey of conditions then existing, the San Francisco Chronicle, one of the leading newspapers of the State, in February, 1905, commenced the publication of a series of articles dealing with the Japanese situation. I take some excerpts from these publications from an article of John P. Young, editor of the Chronicle, in The Annals of the American Academy of Political and Social Science, volume 34, page 231. As an introduction to these publications, it was said:

In the accompanying article the Chronicle begins a careful and conservative exposition of the problem which is no longer to be ignored, the Japanese question. It has been but slightly touched upon heretofore; now it is pressing upon California and upon the entire United States as heavily and contains as much of a menace as the matter of Chinese immigration ever did, if, indeed, it is not more serious, socially, industrially, and from an international standpoint. It demands consideration. This article shows that since 1880, when the census noted a Japanese population in California of only 86, not less than 35,000 of the little brown men have come to the State and remained here. At the present day the number of Japanese in the United States is very conservatively estimated at 100,000. Immigration is increasing steadily, and, as in the case of the Chinese, it is the worst she has that Japan sends to us. The Japanese is no more assimilable than the Chinese and he is not less adaptable in learning quickly how to do the white man's work and how to get the job for himself by offering his labor for less than a white man can live on.

On the ensuing March 1 the Senate of Californina by a unanimous vote passed the following resolution:

Resolved by the senate (the assembly concurring), That in view of the facts and the reasons aforesaid (recited in the preamble), and of many others that might be stated, we, as representatives of the people of the State of California, do earnestly and strenuously ask and request, and in so far as it may be proper, demand, for the protection of the people of this State and for the proper safeguarding of their interests, that action be taken without delay, by treaty or otherwise, as may be most expeditious and advantageous, tending to limit without reasonable bounds and diminish to a marked degree the further immigration of Japanese laborers into the United States. That they, our Senators and Representatives in Congress, be, and are hereby, requested and directed to bring the matters aforesaid to the attention of the President and Department of State.

On the 4th of the same month the house concurred in the resolution by a unanimous vote.

Two months later the board of education of San Francisco passed the following resolution:

Resolved, That the board of education is determined in its efforts to effect the establishment of separate schools for Chinese and Japanese pupils, not only for the purpose of relieving the congestion at present prevailing in our schools, but also for the higher end that our children should not be placed in any position where their youthful impressions may be affected by association with pupils of the Mongolian race.

This action by the board of education attracted no particular notice and met with no protest by Japan.

On the 11th of October the board passed this further resolution:

Resolved, That in accordance with article 10, section 1662, of the school law of California, principals are hereby directed to send all Chinese, Japanese, or Korean children to the Oriental Public School situated on the south side of Clay Street, between Powell and Mason Streets, on and after Monday, October 15, 1906.

I will let Mr. Young give you the result of this harmless and inoffensive action of the board of education. He says in the article in the Annals:

It is doubtful whether this declaration would have incited the Japanese to protest had not the authorities at Washington objected. Immediately after its publication, Victor H. Metcalf, then Secretary of the Navy, was sent to the coast to make an investigation, and he made a report to the President, the effect of which was to create the impres-

sion at the East that the Japanese on the coast were the objects of continuous persecution. Trifling affairs, which scarcely merited the attention of a police court, were magnified into matters of international importance. The Chronicle, at the time, took occasion to comment on the unfairness of his presentation, and it has since been explained that he was only expected to see one side of the case. In short, ex-President Roosevelt appeared to be seeking for matter upon which to base the most extraordinary attack ever made upon a section of the American Union. In his message to Congress, delivered in December, 1906, he threatened California with an armed invasion if it did not abandon its recalcitrant attitude, and he pictured a condition of affairs as existing here which, had it really existed, would have been shameful; but as it did not, he merely convicted himself of adding another to the long list of his hasty judgments.

Mr. President, there is no persecution of the Japanese in California. They are employed in almost all kinds of work and go unmolested. By many employers they are preferred to white laborers, because more work for the same pay can be gotten out of them than from white laborers, and they demand less in the way of care and support. In fact, it is mostly the selfishness of the employer classes in the United States that brings the Japanese laborer here and keeps him at work in the place that should be filled by the white laborer.

With them it is a pure matter of business. They welcome the Japanese laborer here because they can get more out of him. Japan does not insist upon her laborers coming here. She has agreed to keep them from coming by refusing them passports, and I am convinced that she has kept the agreement in good faith. But, as I have said, her efforts are not effective. I am sorry to say it, but what we really need most is not legislation against the Japanese but against the selfishness of our own people, who disregard the good of the masses of the people in their own interests.

The question was again agitated when the State of California proposed the enactment of an alien land law that would prevent Japanese subjects from owning land in the State. The Japanese Government protested against such legislation as a discrimination against her people. Our Government attempted to influence and prevent action by the State legislature relating to her own domestic affairs. The Secretary of State went to California and, with State permission, addressed the legislature on the subject. The result was a mongrel compromise enactment containing the following provisions——

Mr. President, I ask to include the quotations without reading.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

SECTION 1. All aliens eligible to citizenship under the laws of the United States may acquire, possess, enjoy, transmit, and inherit real property, or any interest therein, in this State in the same manner and to the same extent as citizens of the United States, except as otherwise provided by the laws of this State.

SEC. 2. All aliens other than those mentioned in section 1 of this act may acquire, possess, enjoy, and transfer real property, or any interest therein, in this State in the manner and to the extent and for the purposes prescribed by any treaty now existing between the Government of the United States and the nation or country of which such alien is a citizen or subject, and not otherwise, and may in addition thereto lease lands in this State for agricultural purposes for a term not exceeding three years.

SEC. 5. Any real property hereafter acquired in fee in violation of the provisions of this act by any alien mentioned in section 2 of this act, or by any company, association, or corporation mentioned in section 3 of this act, shall escheat to and become and remain the property of the State of California.

SEC. 6. Any leasehold or other interest in real property less than the fee hereafter acquired in violation of the provisions of this act by any alien mentioned in section 2 of this act, or by any company, association, or corporation mentioned in section 3 of this act, shall escheat to the State of California.

SEC. 7. Nothing in this act shall be construed as a limitation upon the power of the State to enact laws with respect to the acquisition, holding, or disposal by aliens of real property in this State.

Mr. WORKS. It will be seen, Mr. President, that this curious statute does not forbid any alien taking or holding land in the State. It only provides that aliens eligible to citizenship may do so, and provides also that all aliens other than those specially allowed the privilege may do so—

In the manner and to the extent and for the purposes prescribed by any treaty now existing between the Government of the United States and the nation or country of which such alien is a citizen or subject, and not otherwise.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Idaho?

Mr. WORKS. I yield.

Mr. BORAH. The Senator stated a few moments ago, if I understood him correctly, that he regarded this as entirely a national question. Does the Senator mean to include also the question of who should own land within a State?

Mr. WORKS. Oh, not at all, Mr. President. My thought about it is that the Government should protect all the States, either by legislation or by treaty with foreign nations; but the right belongs to a State unquestionably of protecting itself against the owning of land by objectionable people.

Mr. WILLIAMS. Mr. President, will the Senator allow me to interrupt him at this point?

Mr. WORKS. Certainly.

Mr. WILLIAMS. This thought has occurred to me while the Senator has been talking: I agree with him perfectly upon this whole subject matter, but the thought has occurred to me that really the best way to settle it all would be by treaty. The Senator has just referred to that. It strikes me that the Japanese do not object to our excluding their people, provided we exclude them in a manner which will not seem to reflect upon them as a race. It strikes me that the only way to do that is by treaty, effecting mutual exclusion under identical limitations and restrictions, and I have never known why that could not be done.

Mr. BORAH. Mr. President, what does the Senator mean—I do not know that I understand—when he speaks of mutual exclusion?

Mr. WILLIAMS. I mean a treaty whereby we exclude the Japanese and the Japanese exclude us, with certain limitations as to the character of those who shall be exempt from the exclusion.

Mr. BORAH. I may be in error, but I understand that Japan insists that we treat her citizens upon the same basis as we treat people coming from Europe.

Mr. WILLIAMS. I understand that; but that is because we are dealing with the matter by legislation; but when we deal with it by mutual agreement, each Government being a party to it, and she treats our citizens with exactly the same discrimination that we treat hers, and the matter is a matter of international treaty instead of merely a matter of national legislation, the sting is taken out of it.

Mr. BORAH. If Japan would ever make that kind of a treaty, of course that would be true.

Mr. WILLIAMS. Does the Senator from California know whether any negotiations have ever been carried on in that direction?

Mr. WORKS. Oh, yes; negotiations have been carried on in that way, and they resulted in this side agreement on the part of Japan to prevent the emigration of her laborers.

Mr. WILLIAMS. Does the Senator know why that became a so-called gentlemen's agreement, or, as the Senator calls it now, a side agreement, instead of becoming a treaty to be sent to the Senate for ratification?

Mr. WORKS. As I understand, simply because Japan objected to having it go into the treaty, on the ground that it was a discrimination against her people as compared with the people of other countries.

Mr. WILLIAMS. Does the Senator know whether we agreed to let her make exactly the same discrimination against us?

Mr. WORKS. I do not know.

Mr. PHELAN. Mr. President, will the Senator state the terms of the last treaty with Japan by which the United States agreed not to legislate in matters affecting immigration?

Mr. WORKS. I am not able to state them from memory, but I assume that my colleague has already stated them, which may be taken as the fact. I am not familiar with the exact language of the treaty.

Mr. PHELAN. But, as I understand, by that treaty we further bound our hands, and hence we are practically incapable now, without a violation of a treaty or denouncing it, of legislating upon this subject. I ask for information. I was not present when the treaty was ratified in this body, and I thought some Senator might know without referring to the record.

Mr. WORKS. So the State of California attempted by this means to surrender its sovereign right to determine who should hold land within its borders and vest that power in the National Government. Then in order to relieve the State from this humiliating surrender of its right and duty to its people it was provided that "nothing in this act shall be construed as a limitation upon the power of the State to enact laws with respect to the acquisition, holding, or disposal by aliens of real property in the State."

Well, Mr. President, it was not a limitation of the power of the State to deal with the subject, but an absolute and abject surrender of the right for the time being. It was a surrender that did not redound to the credit of the great State I have the honor to represent in this body. The act was further weakened by allowing aliens not eligible to citizenship to lease lands for agricultural purposes for a term not exceeding three years without any provision against the renewal for all time to come by three-year terms.

This statute, so much talked about, amounts to nothing and leaves California practically just where she was. Its only effect was to make uninformed people believe we had an effective alien land law and allay public feeling.

Mr. President, I want now to deal briefly with the question of discrimination so earnestly protested against by the Japanese Government, as it relates to the exclusion of its subjects from this country and the attempt to prevent them from becoming landowners in my State. What is it that constitutes the discrimination complained of, and by whom is this discrimination exercised? Let us go to the root of the matter and see how consistent Japan is in making this complaint.

Mr. President, if there is any just cause for complaint of discrimination it is against the National Government and not my State.

The naturalization laws of the United States prevent a subject of Japan becoming a citizen by naturalization. He is directly discriminated against in this way, and that on account of his race and color. In the act providing for the naturalization of aliens it is provided (U. S. Rev. Stats., sec. 2169):

The provisions of this title shall apply to aliens being free white persons and to aliens of African nativity and to persons of African descent.

Now, why should complaint be made of a State for denying to one who can not become a citizen or a voter under Federal laws the right to hold lands within the State?

I submit, sir, that no alien who is denied citizenship in this country should be allowed to hold or own lands in any State in the Union. Not only is it the right of a State to declare who shall not own land in the State, but it should be her solemn duty to deny that right to anyone, of whatever race or country, who is declared by the laws of the country to be unfit to become a citizen.

Mr. President, I think the State should go further than this. No man should be allowed to own or hold land in fee until he is naturalized and has actually become a citizen. There my State made a mistake. It lacked the courage to take that unassailable stand and enforce it by law. If in that case discrimination should result, it would not be because of the State law. It would deny the right perpetually to those who are denied citizenship by the Federal laws.

It can readily be seen why this course, which would have relieved the State from any charge of discrimination or unfairness, was not taken. It would stop some of the flow of foreign gold into the State. The bankers, the real-estate men, and business men of all sorts would have risen up against it. It would then become a question of money as against the interest of the laboring classes and the social welfare of the State and the Nation. These powerful influences, that go so far in shaping legislation, State and National, would have prevented this just legislation. It is hard to act upon principle and be wholly just when money interests and big business are to be affected. The result of it is that California is practically without an alien land law and her people are not satisfied.

WHAT IS THE NATIONAL GOVERNMENT GOING TO DO ABOUT IT?

Mr. President, has the National Government no duty or responsibility in the matter? It has raised the race issue by excluding the Japanese from citizenship. Having done this, is it going to allow the people that it has in effect declared unfit to become citizens of this country to come here without limit, or leave it to Japan to say who of her subjects shall come to this country, leaving us no control over this admission or exclusion?

I take the broad ground—and I believe it is unassailable—that no alien who has been excluded from citizenship for whatever reason should be admitted to permanent residence in this country. We should have no people here as permanent residents who can not become citizens and share in the privileges, duties, and obligations of citizenship. I am so strongly convinced of this that I am opposed to any treaty between this or any other country that will admit such aliens to this country except for temporary purposes. No treaty should be made that will permit them to become permanent residents or landowners here.

There is an immigration bill now pending in Congress which, as originally reported from committee, in providing who shall be excluded from admission to the United States, contained this:

Persons who can not become eligible under existing law to become citizens of the United States by naturalization, unless otherwise provided for by existing agreements as to passports, or by existing treaties, conventions, or agreements, or by treaties, conventions, or agreements that may hereafter be entered into: Hindus. The two provisions next foregoing, however, shall not apply to persons of the ligious teachers, missionaries, lawyers, physicians, chemists, civil engineers, teachers, students, authors, artists, merchants, and travelers for curiosity or pleasure, nor to their legal wives or their children under 16 years of age who shall accompany them or who subsequently may apply for admission to the United States, but such persons or their legal wives or foreign-born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be deemed to be in the United States contrary to law, and shall be subject to deportation as provided in section 19 of this act.

The fatal clause in this provision is this:

Unless otherwise provided for by existing agreements as to passports, or by existing treaties, conventions, or agreements, or by treaties, conventions, or agreements that may hereafter be entered into.

The fact that they can not become citizens under the laws of this country should be conclusive against their admission except in the special cases enumerated. No treaty or agreement to the contrary should ever be made or recognized. If we have any such treaties or agreements they should be abrogated just as soon as it can be done without their violation. Denial of citizenship should be regarded as a denial of the right of permanent residence here, and treated accordingly.

But even in the form reported this clause was not satisfactory to Japan. The ambassador of that country protested against it. Under this pressure and whatever other influences may have been brought to bear upon it or its members, the following clause was substituted by the committee in place of a portion of the one quoted:

Unless otherwise provided for, or by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia situate south of the twentieth parallel of latitude north, west of the one hundred and sixtieth meridian of longitude east from Greenwich, and north of the tenth parallel of latitude south, or who are natives of any country, Province, or dependency situate on the continent of Asia west of the one hundred and tenth meridian of longitude east from Greenwich and east of the fiftieth meridian of longitude east from Greenwich, except that portion of said territory situate between the fiftieth and the sixty-fourth meridian of longitude east from Greenwich and twenty-fourth and thirty-eighth parallels of latitude north.

It might require a good deal of study, that few will give it, to ascertain the fact that this clause was inserted in the bill at the demand of Japan in order to prevent the subjects of some other nation or nations from coming into this country and at the same time exclude Japanese from the provisions of the bill. But that is admittedly the purpose and effect of this anomalous provision.

Of this remarkable situation the Oakland (Cal.) Tribune of May 17, 1916, very well says:

Congress has taken steps toward amending the proposed immigration legislation in such manner as to meet the objections raised to the original bill by the Japanese Government. The modified "Asiatic exclusion" section will put the ban up against people residing in certain geographical latitudes of the Far East. Japan is discreetly left outside the affected zones.

It will be recalled that the protest of Ambassador Chinda was not on account of the form of the immigration bill as reported in the House, but against the United States presuming to enact legislation of any kind regarding the admission of orientals into the country, so long as Japan was in danger of being considered an oriental nation. In effect Japan insists upon settling the United States immigration question in her own way, so far as it may affect Japanese.

The whole controversy is in the main one of principle. Japan considers that the "gentlemen's agreement" negotiated by Secretary of State Root and Ambassador Takahira "limited" Japanese immigration and that it would be an affront to Japan if the United States should now seek to enact regulations concerning immigration. Although the bill in its original form does not mention Japanese it employs the word "Asiatic," so Japan has sought to block, seemingly with fair measure of success, regulation of all Asiatic immigration because Japan is an Asiatic country.

It is little short of preposterous that Japan should be permitted to interject her new-born susceptibilities into purely domestic American affairs. As a matter of principle, Congress should decline to listen to such presumption. The Senate proposal to tediously map out all of Asia into imaginary zones of racial nativity is ridiculous.

It is a surrender of our inherent right to regulate according to our own lights the admission of foreign citizens into our territories, and we should not make such a surrender. Besides it is begging the issue to attempt to draw distinctions between the objections to Chinese, Hindus, and Japanese to admission to the country. The need for restricting Asiatic immigration is based upon economic grounds, and there is no difference in oriental economic standards to justify any differentiation as to the geographical location of the homes of prospective immigrants. The immigration question looms too large and uncertain in the future for Congress to begin now to waive any portion of its power to settle it according to the best interests of the United States.

The astonishing effects of the proposed amendment is well and forcefully stated in an editorial in the San Francisco Chronicle of May 18, 1916, which I ask permission to include in my remarks without reading.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

THE NEW EXCLUSION ACT—IT APPEARS TO BE A CURIOUS DOCUMENT BUT MAY SERVE ITS PURPOSE.

In default of the complete text of the new exclusion act as agreed to by the Senate Committee on Immigration and of some explanatory report thereon, it is difficult to understand some of its provisions.

Japan and its possessions, including Formosa, are excluded from the operation of the law, as well as about two-fifths of the Chinese Empire. Nothing east of the one hundred and tenth meridian on the Asiatic Continent is covered by the bill, which, if it operates to repeal all previous laws inconsistent therewith—as it will unless expressly provided to the contrary—would open our door to some hundreds of millions of Chinese from the continent as well as all the Chinese from Formosa.

So far as the Chinese are concerned, one may assume that the California delegation, if no others, may be relied on to see that an effective nonrepeal clause is included in the bill. Without that the paragraph as agreed upon would let in the entire population of China unless our authorities were prepared to prove that applicants were from east of meridian 110.

Another curious thing is its effect on Siberia. Meridian 110 runs just east of Lake Baikal. Those born east of that lake may come to this country, but if born west of the lake they must stay out. A glance at the map suggests that the line is drawn to exclude from the bill Korea, which is a dependency or Province of Japan, and Manchuria, which she is engaged in swallowing, but the geographical margin seems unnecessarily large, except on the assumption that Japan is expected to gobble pretty much all of China.

It is difficult to believe that Japan objects to have its territory included merely as a matter of national pride. The position of Japan as a power is as perfectly established as our own, and that country might exercise its undoubted right to exclude Americans by name, and we should not for a moment regard it as implying that we were not respectable, but merely that she did not wish any of us to come there.

And that is precisely our feeling with respect to the Japanese. We admire their ability, and are astonished at their energy, but we do not wish to live with them and we won't. So long as the Japanese Government can prevent its laborers from coming here, that is entirely satisfactory to us. But when the time arrives—and it will arrive—when the Japanese Government is unable to control the movements of its people, we believe the situation will be more satisfactory to all concerned if geographical limitations operate to prevent immigration. A good many people have too much respect for the Japanese to believe that racial sensitiveness is their real reason for objecting to enact the gentlemen's agreement into law.

Unless the bill has somewhere a considerable list of exceptions if enacted into law, it will have curious results. It is "natives" of the specified territory who are excluded and some of our missionaries, commercial and other, have large families born in the country of their activities which they would have to leave behind should they return to this country.

There is but one sane solution, and that is for each country to use its unquestionable right to admit or exclude as it pleases.

The article closes by saying:

There is but one sane solution, and that is for each country to use its unquestionable right to admit or exclude as it pleases.

So it will be seen, Mr. President, that in the eagerness or willingness of the committee to favor Japan over other nations by excluding her subjects from the effects of the immigration law, it is actually proposed to open the door to Chinese immigration, a door that has long been closed and must be kept closed in the interest of and for the protection of our own people. The attempt is to favor Japan by an impractical and dangerous provision. It looks too much like trifling with the people of the Pacific Coast States in a matter of the most vital interest to them.

What an amazing spectacle! We boast lustily of our independence and Americanism and then propose to surrender to another nation the right to determine who shall come to this country and make their homes here. The "gentlemen's agreement" to this effect was bad enough, but to enact such a humiliating surrender of our rights, as a Nation, to deal with a matter of such grave importance affecting the happiness and tranquillity of our own people should be looked upon as intolerable.

Mr. President, why are we making this inexcusable and humiliating concession to a foreign nation? Are we afraid to assert and maintain our right to say what foreigners shall emigrate to this country? Have we become so pusillanimous that we are willing to allow a foreign nation to exercise this right and dictate to us what laws shall be enacted by Congress affecting so grave a matter? This clause in the bill was forced into it by the representative of Japan. We have allowed Japan to dictate to us what laws we shall enact in the effort to exclude undesirable immigrants from this country. We may very well differ as to what an immigration law shall be as affecting the subjects of any foreign nation. But to have our course in dealing with domestic affairs directed by any foreign government should shock the patriotic sense of the American people. While we are ostensibly endeavoring not to discriminate against and humiliate the people of Japan, we are proposing to insert in this bill a concession a hundredfold more humiliating to our own people than absolute exclusion could be to that country. It is earnestly hoped that no such provision will ever be enacted by Congress.

PREPAREDNESS FOR NATIONAL DEFENSE.

Some will say that any such attitude as I have suggested, taken by the Government or a State, will mean war with Japan. There is no possible reason why that country should have submitted to the provision in the naturalization laws of this country excluding her subjects from citizenship, and then seek war with us, because for the very same reason which induced that legislation we provide that her people, who are excluded from participation in our affairs, shall not become permanent residents or own land in this country. The discrimination which lies at the foundation of it all has existed and been acquiesced in without protest for many years. Besides, the insistence by Japan that her people shall come here when they are not wanted and own lands against our will, would be an evidence of weakness and humiliating to a proud nation. Japan does not want her people to come here when they are not wanted. She has shown that conclusively by her "gentlemen's agreement," that she herself will prevent their coming by refusing them passports. But this, as I have shown, does not prevent their coming and will not. Nor does it meet the necessity of excluding those who are here, or others who may come, from owning land in the States, a condition that is most objectionable. Neither does it meet the complication that is going to result from the incoming of "picture brides," of which there are already hundreds, perhaps thousands, in my State. The offspring of these Japanese women born in this country will be citizens of the United States by virtue of their native birth. With 55,000 Japanese in California, many of whom are married to these women, the Japanese population is bound to increase rapidly if they are allowed to remain, whether immigration of others is allowed or not.

Mr. President, it is not a pleasant prospect. Our people who know the Japanese immigrants, their character, their manner of living, and their mode of dealing with our people, look upon it with great apprehension, as well they may.

The best means of national defense is the enactment of just laws and the fearless enforcement of them. If we had long ago enacted laws excluding everybody from the country who were not eligible to become citizens, as we had a perfect right to do, we would not have 70,000 Japanese in the United States, 55,000 of whom are in California. We have temporized and compromised our just rights, which has brought about the present complications that may imperil our friendly relations with the Japanese nation.

Mr. VARDAMAN. Mr. President, would it interrupt the Senator for me to make an inquiry?

Mr. WORKS. Not at all.

Mr. VARDAMAN. To what extent have the Japanese amalgamated with the whites in California? Has the Senator any information on that subject?

Mr. WORKS. To a very limited extent, because marriage between the two races is forbidden by law. They sometimes go out of California into other States and marry, and return to the State, but that has been a very rare occurrence.

We should temporize no longer. If we do, we will come to regret it. Japan will have no just cause to complain. If she does make trouble, our own Government will be to blame for not asserting its just rights as a nation in the beginning. The sooner we assert our own rights now and maintain them the better for both nations.

But if war with Japan comes, what then? Are we ready for it? Have we prepared for it? Will we be prepared for it if the proposed program of military and naval expansion is carried out? No; not on the Pacific coast. To make the Pacific Coast States secure we must have two separate armies and two navies, one on each of the seacoasts. The Pacific coast has never had anything like its proportionate share of either the Army or the Navy. It is not likely to have under this new plan. I endeavored to make us more secure by an amendment to the Army reorganization bill providing for an industrial reserve military force on the Pacific coast, but the Senate voted down the amendment. I do not believe we are going to have war with Japan. Some people think we shall. Those who think so should see to it that the Pacific Coast States, which must bear the brunt of any fighting with that country, have a sufficient portion of the increased Army and Navy to protect them from attack.

As I said in the beginning I say in the closing. Japan does not want war with us and we do not want war with Japan. That country could not afford to go to war for a mere sentiment. She could not consistently go to war with us for doing what we have every right to do. We should not do it in any offensive way or for any offensive reason, as I have endeavored to point out. If Japan should engage us in war, it would inevitably mean her defeat in the end and nothing gained. It would mean loss of lives and property for us without profit to Japan. Our relations would not be improved. Her people would be less welcome here than they are now. Her people could not gain citizenship or other rights in this country by war. To me, Mr. President, war between the United States and Japan is unthinkable.

NAVAL APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

The SECRETARY. The pending amendment is found on page 67, being the amendment offered by the junior Senator from Massachusetts [Mr. WEEKS].

Mr. SWANSON. I understand that the Senator from Massachusetts withdraws his amendment.

Mr. WEEKS. Mr. President, I did not understand that the proposition contained in the bill conformed with the law in its application to the Army. As it does, I think it wise to withdraw the amendment.

The SECRETARY. The Senator from Massachusetts had moved to strike out the word "lieutenant" before the word "commander" on line 16.

The VICE PRESIDENT. That amendment being withdrawn, the question is on the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 67, after line 25, to insert:

Hereafter all commissioned officers of the active list of the Navy shall receive the same pay and allowances according to rank and length of service.

The amendment was agreed to.

The next amendment was, on page 68, after line 16, to insert:

The Secretary of the Treasury is hereby authorized and directed to credit in the accounts of Passed Assistant Paymaster James C. Hilton, United States Navy, the sum of $6,033.61, being the amount stolen from the United States funds by a person or persons unknown and charged against the accounts of the said James C. Hilton, passed assistant paymaster, on the books of the Treasury Department.

The amendment was agreed to.

The next amendment was, on page 68, after line 23, to insert:

The accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of Paymaster T. D. Harris, United States Navy, credit for the full payment of the contract price made by him to James Morrow under contract of May 29, 1909, and to Carson, Pirie, Scott & Co., James Corse, N. H. Dow Manufacturing Co., The Snead & Co. Iron Works, and Original Cabinet Co. under contracts of March, 1911, pertaining to the naval training station, Great Lakes, Ill.

The amendment was agreed to.

The next amendment was, on page 69, after line 6, to insert:

That the President of the United States is hereby authorized to cause Ensign Harrold Harrison Little, United States Navy, to be examined for promotion to the grade of lieutenant (junior grade), United States Navy, and subject to his successfully passing such reexamination to promote him to the grade of lieutenant (junior grade), to take place on the Navy list in such grade next after Lieut. (Junior Grade) William G. Greenman, United States Navy, who was the officer immediately above the said Harrold Harrison Little in the list of lieutenants (junior grade) at the date said Harrold Harrison Little became due for promotion to the grade of lieutenant (junior grade), United States Navy: *Provided*, That no back pay, allowances, or emoluments shall accrue by reason of the passage of this act.

The amendment was agreed to.

The next amendment was, on page 69, after line 20, to insert:

Hereafter Asst. Paymaster John D. P. Hodapp, United States Navy, shall be regarded as having been appointed as an assistant paymaster in the United States Navy on the same date as the officer now next above him in grade: *Provided*, That nothing herein shall be construed to entitle the said Asst. Paymaster John D. P. Hodapp, United States Navy, to any back pay, allowances, or other emoluments.

The amendment was agreed to.

The next amendment was, on page 70, after line 2, to insert:

Section 6 of an act entitled "An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, namely:" approved May 10, 1916, is hereby amended so as to read as follows:

"SEC. 6. That unless otherwise specially authorized by law, no money appropriated by this or any other act shall be available for payment to any person receiving more than one salary when the combined amount of said salaries exceeds the sum of $2,000 per annum, but this shall not apply to retired officers or enlisted men of the Army, Navy, Marine Corps, or Coast Guard, or to officers and enlisted men of the Organized Militia and Naval Militia in the several States, Territories, and the District of Columbia: *Provided*, That no such retired officer, officer, or enlisted man shall be denied or deprived of any of his pay, salary, or compensation as such, or of any other salary or compensation for services heretofore rendered, by reason of any decision or construction of said section 6."

Mr. NORRIS. Mr. President, I should like to inquire of the Senator from Virginia what change is made in section 6 from the law as it exists now?

Mr. SWANSON. The only change is in the proviso.

Mr. NORRIS. From the proviso on?

Mr. SWANSON. In the proviso itself. I will state to the Senator that this takes care of Mr. Theall, who is the secretary of the Naval Affairs Committee of the House. We passed a provision that permitted that, and the Comptroller of the Treasury decided that the clerk of a committee was not a public officer, which precluded him from occupying that position. This simply puts a construction there so that the Comptroller of the Treasury can not deprive him of his present position. We had previously passed a law taking care of him, and he decided that the clerk of a committee was not a public officer, and would not pay the salary.

Mr. NORRIS. Does this apply to anybody except this official of the House of Representatives?

Mr. SWANSON. To no one, I understand, except this officer.

Mr. NORRIS. Why not make a direct reference to the particular person?

Mr. LODGE. We are amending the statute. You can not mention him in another statute.

Mr. NORRIS. This particular position in the House of Representatives is filled by a retired naval officer. There is another question. If this applies only to an official or employee of the House of Representatives, why did not the House of Representatives put it in?

Mr. SWANSON. I understand that there is another one at the navy yard. If the Senator will permit me, we amended section 6 so as to enable them to employ a retired officer in the Navy to be clerk of the committee. That was included in the bill. The provision was included in the legislative, executive, and judicial appropriation bill. Having used the words "public officer," the Comptroller of the Treasury, I understand, rules that the clerk of the committee is not a public officer, and consequently he can not receive his salary. The amendment is in the proviso which prevents the comptroller from giving that interpretation to the law.

Mr. LODGE. If the Senator will allow me, I may remind him that this ruling was not made until after the bill had left the House.

Mr. NORRIS. Even if that be true, this is to give relief to some one in the House, and this is simply, of course, class legislation put on an appropriation bill. I had my attention called to it by a Member of the House, who said that it applied to a large number of retired persons, and I should think it would apply to practically the entire Navy Department. If there is any good reason why one man should be excluded from the operation of the law, I would not have any objection if he was excluded and excluded directly by name or his office or position excluded.

Mr. LODGE. But the general law expressly provides that the provision about the salaries shall not apply to retired officers and enlisted men. That is the general provision of the statute. The exception is in the proviso, because there is an attempt made to exclude this one man from the general law by the comptroller by a ruling which, it seems to me, is absurd. Down to the proviso it is the general existing law.

Mr. NORRIS. Commencing, then, at line 17, with the proviso, that is the only change made in the existing law?

Mr. LODGE. It is to enable him, if the Senator will read it, to receive his compensation as provided by law for services heretofore rendered.

Mr. NORRIS. Let us see how it reads:

Provided, That no such retired officer, officer, or enlisted man shall be denied or deprived of any of his pay, salary, or compensation as such, or of any other salary or compensation for services heretofore rendered, by reason of any decision or construction of said section 6.

Do I understand that the effect of that will be that this official in the House of Representatives, who seems to be the beneficiary, will get his back pay, but will in the future not be able to get any?

Mr. LODGE. No; he will get it in the future. It covers both.

Mr. NORRIS (reading)—

Of any of his pay, salary, or compensation as such, or of any other salary or compensation for services heretofore rendered.

Mr. LODGE. Yes; no such retired officer—

shall be denied or deprived of any of his pay, salary, or compensation as such, or of any other salary or compensation for services heretofore rendered.

Mr. SMOOT. Mr. President——

Mr. NORRIS. I yield to the Senator from Utah.

Mr. SMOOT. The Appropriation Committee of the Senate in reporting the legislative, executive, and judicial appropriation bill for this year inserted section 6 in the bill as follows:

That unless otherwise specially authorized by law no money appropriated by this or any other act shall be available for payment to any person receiving more than one salary when the combined amount of said salaries exceeds the sum of $2,000 per annum.

That is what the committee reported to the Senate. While the bill was under consideration the Senator from Massachusetts [Mr. LODGE] offered an amendment to the committee amendment as follows:

But this shall not apply to retired officers of the Army, Navy, or Marine Corps whenever they may be appointed or elected to public office or whenever the President shall appoint them to office by and with the advice and consent of the Senate or to officers and enlisted men of the Organized Militia and Naval Militia in the several States, Territaries, and the District of Columbia.

That is the way section 6 of the bill finally passed the Senate. I understand of course that this proviso is put in the pending bill to take care of one man in the employ of the House of Representatives. I will say to the Senator that that case was called to the attention of the Appropriation Committee when it first considered the amendment, but the committee at that time did not feel justified in proposing an amendment to take care of one man, but after the Senate adopted the amendment offered by the Senator from Massachusetts it exempted retired officers and enlisted men of the Army and Navy and Marine Corps, and so forth. It develops now that the employee in the House of Representatives referred to is a retired officer, and

if that be true he should be exempted under the amendment offered by the Senator from Massachusetts, but under a ruling it is held that no matter whether he is a retired officer or not, holding the position he does with a committee of the House, he is not entitled to the two salaries.

Mr. NORRIS. I rather think since we have exempted everybody else from the effect of the law we ought not to hesitate to exempt this one man who is left. I understand the law prohibiting anyone from drawing two salaries is so amended that it does not apply to anyone except this clerk in the House of Representatives, and this is to let him out also.

Mr. SMOOT. That is the effect of the proviso, but I will say to the Senator——

Mr. NORRIS. Why not repeal the law altogether?

Mr. SWANSON. If the Senator will permit me, it was held that the appointment by a committee of Congress, as I understand the ruling of the Comptroller of the Treasury, is not a public officer, and consequently not being a public officer he can not get the benefit of the exemption that others have. He is a very valuable man, one of the most valuable men in the House of Representatives as far as naval affairs are concerned, and he can not afford to accept a clerkship in the committee unless this exemption is permitted. This is put in the bill at the request of the chairman of the Naval Committee of the House, who desires to retain the valuable services of this man, and it is made necessary on account of what seems to me to be the foolish ruling of the Comptroller of the Treasury that a clerk of a committee is not a public officer.

Mr. NORRIS. I should like to inquire how many men are drawing two salaries now who are not affected by the law.

Mr. SMOOT. I will say to the Senator that at the time the amendment to the legislative, executive, and judicial appropriation bill was being considered in the Committee on Appropriations we undertook to find out just how many there were in the employment of the Government drawing two salaries. We were unable to ascertain the exact number, but I will say to the Senator there were a great many of them, but since the passage of the legislative, executive, and judicial appropriation bill it has done away with all except retired officers, as stated before.

I will state further to the Senator that the committee found that the practice was growing to such an extent that it decided to pass a law prohibiting it. That is the reason why the committee reported the amendment to the legislative, executive, and judicial appropriation bill.

Mr. NORRIS. Yes; but after it was amended it did not apply to anybody.

Mr. SMOOT. Yes; it applied to everybody, with the exception of enlisted men and officers in the Army and Navy, Marine Corps, and Organized Militia and Naval Militia.

Mr. NORRIS. How many are there of those? Can the Senator state the number?

Mr. LODGE. If the Senator will allow me, it has never been attempted to prevent retired officers from accepting private employment. It would be a useless cruelty.

Mr. NORRIS. This law does not attempt to do that. We could not pass a law under the Constitution that would be of any validity, probably, that would do that, but we could pass a law that would prevent a man from drawing two salaries from the Government of the United States.

Mr. LODGE. You could prevent a retired officer from accepting any other emolument in private life.

Mr. NORRIS. Nobody wants to do that.

Mr. LODGE. You could make him forfeit his pay. That has never been done. Officers have always been allowed to accept private employment. Of course, they are always at the orders of the Government.

Mr. NORRIS. Can the Senator from Utah answer my question as to how many men were drawing two salaries from the Government and are not drawing it now by reason of the enactment of this law?

Mr. SMOOT. It would be only an estimate, but I will say to the Senator that there must have been something over 50 men who were drawing two salaries who are not doing so to-day. I do not want to state positively the number, but there were at least that many, and perhaps a great many more.

Mr. NORRIS. I do not know that that is material now, because it is in the law anyway, but what was the reason for exempting Army officers and officers of the Marine Corps?

Mr. SMOOT. The reason was this: As to retired officers of the Army, Navy, and Marine Corps, and officers of the Guard, their time belongs to them, and if any department of the Government desires to avail itself of their services there should be no objection to that. The exemption was adopted so that the Government could avail itself of their services.

Mr. NORRIS. Why not the other people who are not retired officers of the Army or Navy?

Mr. SMOOT. The reason is this, because their time is already paid for by the Government, and extra long hours must of necessity interfere with their efficiency in both positions.

Mr. WEEKS. It is the custom to pay certain officers connected with the Government a higher rate of pay on account of the excellence of their service. For instance, the clerk of the Committee on Appropriations of the House of Representatives is paid an annual salary of $5,000 a year as long as he holds that position. It is simply a reward for efficiency. The salary which he receives is a thousand dollars greater than would be the salary of any other man holding that place. The same general principle applies to this case. The clerk of the House Naval Committee is a graduate of the Naval Academy and served in the Marine Corps. He was retired for physical disability, but he is entirely competent to perform the duties of that technical position not only as well but better than almost any other man. Therefore it has seemed fair that he should receive his retired pay and such salary as the committee gave him. As a matter of fact, he is paid $2,400 as clerk of the committee, and his retired pay is between $1,900 and $2,000, or about $4,300 a year. That is his entire pay from the Government, and it is not a high salary for that particular place, which he fills so acceptably to the House Naval Committee.

There are three or four other cases which come under this limitation, I understand. There are perhaps three other naval officers who are employed in such a way that they will not receive their salary under the ruling of the comptroller. In this particular case the salary for the last two months which this House employee actually received is being checked up against his retired pay of the Navy, and unless something is done, as proposed in this measure, not only will he in future receive only the retired pay from the Navy, but the actual pay which he has received under the law up to this time will be checked against that retired pay. It seems to me, from my knowledge of the case, there can not be two sides to the fairness and desirability of adopting the provision which the Committee on Naval Affairs has proposed to the bill.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 70, after line 21, to strike out:

NAVAL FLYING CORPS.

There is hereby established in the Navy, subject to the laws and regulations governing the same, a special corps to be known as the naval flying corps, whose particular duties shall be in connection with the operation, maintenance, and activities of aircraft in all its phases, and in the education and training of personnel for all duties connected therewith.

The naval flying corps shall be composed of 150 officers and student flyers and 350 enlisted men, appointed, commissioned, enlisted, and distributed in the various grades and ratings of the Navy as hereinafter provided. The said number of officers, student flyers, and enlisted men shall be in addition to the total number of officers and enlisted men which is now or may hereafter be provided by law.

The officers and enlisted men shall receive the same pay and allowances that are now provided by law for officers and enlisted men of the same grade or rank and rating in the Navy detailed for duty with aircraft. Student flyers while undergoing instruction and training shall receive the same pay and allowances as midshipmen at the Naval Academy: *Provided*, That after receiving a certificate of qualification as actual flyers of aircraft they shall receive the same pay and allowances now allowed by law for midshipmen after graduation from the Naval Academy and shall rank with but after midshipmen.

The number of officers shall be distributed in the various grades and ranks as follows: Five flight commanders, one of whom shall be designated as senior flight commander; 10 flight lieutenant commanders, 30 flight lieutenants, 30 flight lieutenants (junior grade), 25 flight ensigns, and such number of student flyers as will maintain a total of 125 in addition to 10 chief warrant officers of the rank of chief machinist and 15 warrant officers of the rank of machinist.

Within two years after the passage of this act the President may, by and with the advice and consent of the Senate, and with the consent of the officer concerned, transfer any officer or officers of the Navy or Marine Corps to fill original vacancies in the various grades of the naval flying corps, provided such officers are skilled in the knowledge of aircraft and have had adequate experience in the flying of the same: *Provided*, That no officer shall be commissioned in the grade of commander in said corps unless he be skilled in the flying of aircraft as well as in the design of the same: *Provided further*, That not more than one commander, two lieutenant commanders, five lieutenants, and five lieutenants (junior grade) shall be commissioned in the naval flying corps in any one year from among officers of other branches of the Navy so transferred, and that officers so transferred will take rank with one another in accordance with the seniority held by them before transfer.

The Secretary of the Navy is hereby authorized within two years after the passage of this act to issue acting appointments in said flying corps to not more than five flight lieutenants (junior grade) and five flight ensigns in any one year from civil life to fill original vacancies created by this act: *Provided*, That such acting appointments shall continue in force for a period of two years unless sooner revoked by the Secretary of the Navy, and that at the end of such period officers holding acting appointments shall be examined and if found qualified under the provisions of this act shall be commissioned in the grade in which they have been acting or to fill vacancies in the next higher

grade: *Provided*, That the Secretary of the Navy is authorized to appoint such number of student flyers, not to exceed 30 in any one year, as added to the number of commissioned and acting commissioned officers will bring the total to 125: *Provided*, That after two years from the passage of this act all appointments to fill vacancies in the various grades shall be made by promotions from the grade next below, and that thereafter all appointments to the grade of flight ensign shall be made by the promotion of such student flyers as may have been duly qualified under the provisions of this act.

Within the first two years after the passage of this act the Secretary of the Navy may issue acting appointments to not more than two chief machinists and three machinists in any one year. Thereafter all appointments to the grade of chief machinist shall be made from the grade of machinist and all appointments to the grade of machinist from the grade of chief petty officer: *Provided further*, That no person shall be appointed to the warrant grades until he shall have fully demonstrated his knowledge of the principles governing the construction of aircraft and all component parts thereof and his mechanical skill in repairing and keeping in working order the same.

The enlisted personnel shall be distributed in the various ratings as now obtain in the Navy in so far as such ratings are applicable to duties connected with aircraft.

Enlistment shall be for not less than two or more than four years, and the Bureau of Navigation shall establish rules governing the qualification and advancement of the enlisted men.

Any enlisted man who passes satisfactorily the prescribed examination and is recommended by a board of officers may be appointed a student flyer.

In time of peace no officer shall be promoted to a higher grade in the naval flying corps until he shall have completed not less than two years of service in the next lower grade, and until he shall have satisfactorily passed such mental, moral, and professional examination as may be prescribed by the Secretary of the Navy, and been recommended for promotion by an examining board composed of officers in a senior grade or grades in the naval flying corps, nor until he shall have satisfactorily passed a physical examination before a board of medical officers of the Navy.

No person shall receive an acting appointment in the commissioned or warrant grades in the naval flying corps, nor shall any person be appointed as student flyer until he shall have qualified therefor by such examination as may be prescribed by the Secretary of the Navy, nor shall any person be appointed or enlisted in said corps unless he be a citizen of the United States.

The Secretary of the Navy shall prescribe regulations governing the examinations of candidates for appointment, enlistment, and promotion in the naval flying corps.

Nothing in this act shall be so construed as to prevent the temporary detail of officers and enlisted men of other branches of the Navy for duty with aircraft.

The Secretary of the Navy is hereby authorized to establish an aeronautic school of instruction and training for student flyers, and prescribe qualifications for their promotion. All student flyers who successfully complete a course of two years at said school shall be given a certificate of graduation and shall be eligible for appointment to fill vacancies in the grade of ensign in said flying corps. Graduates of the aeronautic school shall be appointed to fill vacancies in the grade of ensign in flying corps in the order of merit as determined by their examinations and by their efficiency records at the school.

And in lieu thereof to insert:

NAVAL FLYING CORPS.

The naval flying corps shall be composed of 150 officers and 350 enlisted men, detailed, appointed, commissioned, enlisted, and distributed in the various grades, ranks, and ratings of the Navy and Marine Corps as hereafter provided. The said number of officers, student flyers, and enlisted men shall be in addition to the total number of officers and enlisted men which is now or may hereafter be provided by law for the other branches of the naval service.

The number of officers detailed to duty in aircraft involving actual flying in any one year shall be in accordance with the requirements of the air service as determined by the Secretary of the Navy: *Provided*, That the officers so detailed from the line of the Navy and from the Marine Corps shall not exceed the total number herein prescribed for the naval flying corps: *Provided further*, That the proportion of line officers of the Navy and of the Marine Corps thus detailed shall be the same as the proportion established for the regular services: *And provided further*, That the student flyers hereinafter provided for shall be in addition to the officers and enlisted men comprising the naval flying corps.

The officers detailed and the enlisted men of the naval flying corps shall receive the same pay and allowances that are now provided by law for officers and enlisted men of the same grade or rank and rating in the Navy and Marine Corps detailed to duty with aircraft involving actual flying.

The Secretary of the Navy is hereby authorized to appoint annually in the line of the Navy and the Marine Corps for a period of two years following the passage of this act, in order of merit as determined by such competitive examinations as he may prescribe, 15 acting ensigns or acting second lieutenants for the performance of aeronautic duties only. Persons so appointed must be citizens of the United States, and may be appointed from warrant officers or enlisted men of the naval service or from civil life, and must, at the time of appointment, be not less than 18 nor more than 24 years of age: *Provided*, That no person shall be so appointed until he has been found physically qualified by a board of medical officers of the Navy for the performance of the duties required: *Provided further*, That the number of such appointments to the line of the Navy and of the Marine Corps shall be in the proportion decided for the regular services. Such appointments shall be for a probationary period of three years and may be revoked at any time by the Secretary of the Navy.

Such acting ensigns and acting second lieutenants shall be detailed to duty in the naval flying corps in aircraft involving actual flying.

Such acting ensigns of the Navy and acting second lieutenants of the Marine Corps shall, upon completion of the probationary period of three years, be appointed acting lieutenants of the junior grade, or acting first lieutenants, respectively, by the Secretary of the Navy for the performance of aeronautic duties only, after satisfactorily passing such examinations as he may prescribe, and after having been recommended for promotion by the examining board and found physically qualified by a board of medical officers of the Navy. Such appointments shall be for a probationary period of four years and may be revoked at any time by the Secretary of the Navy.

Such acting lieutenants (junior grade) and acting first lieutenants may elect to qualify for aeronautic duty only or to qualify for all the duties of officers of the same grade in the Navy and in the Marine Corps, respectively. Those officers who elect to qualify for aeronautic duty only shall be detailed to duty in the naval flying corps involving actual flying in aircraft. Those officers who elect to quality for the regular duties of their grade shall be detailed to duty in the regular service for at least two years to allow them to prepare for such qualification.

Such acting lieutenants (junior grade) and acting first lieutenants who have elected to qualify for aeronautic duty only shall, upon completion of the probationary period of four years, be commissioned in the grade of lieutenant of the line of the Navy or captain of the Marine Corps for aeronautic duties only, after satisfactorily passing such competitive examination as may be prescribed by the Secretary of the Navy to determine their moral, physical, and professional qualifications for such commissions and the order of rank in which they shall be commissioned. Such lieutenants for aeronautic duty only shall be borne on the list as extra numbers, taking rank with and next after officers of the same date of commission.

Such acting lieutenants (junior grade) and acting first lieutenants who have elected to qualify for the regular duties of the line of the Navy and of the Marine Corps, respectively, shall, upon completion of the probationary period of four years, two years of which shall have been on such regular duties, be commissioned in the grade of lieutenant of the line of the Navy and captain of the Marine Corps, after passing satisfactorily such competitive examinations as may be prescribed by the Secretary of the Navy to determine their moral, physical, and professional qualifications for such commissions and to determine the order of rank in which they shall be commissioned. Such lieutenants of the line of the Navy and captains of the Marine Corps will be borne upon the lists of their respective corps as extra numbers, taking rank with and next after officers of the regular services of the same date of commissions.

Acting lieutenants (junior grade) of the line of the Navy for aeronautic duties only and acting first lieutenants of the Marine Corps for aeronautic duty only who have completed the probationary period of four years may, upon examination for commissions to the next higher grade, if recommended by the board of examination, be transferred to the naval reserve flying corps and commissioned in the same grade or the next higher grade as may be recommended in accordance with their qualifications as determined by the examination: *Provided*, That at any time during such probationary period any such officer can, upon his own request, if his record warrants it, be transferred to the naval reserve flying corps and commissioned in the acting grade he then holds. Any officer of the naval flying corps holding an appointment of student flyer or acting ensign, second lieutenant, lieutenant (junior grade), or first lieutenant, who, upon examination for promotion, is found not qualified shall, if not recommended by the examining board for transfer to the naval reserve flying corps, be honorably discharged from the naval service.

Officers commissioned for aeronautic duty only shall be eligible for advancement to the higher grades, not above captain in the Navy or colonel in the Marine Corps, in the same manner as other officers whose employment is not so restricted, except that they shall be eligible to promotion without restriction as to sea duty, and their professional examinations shall be restricted to the duty to which personally assigned: *Provided*, That any such officer must serve at least three years in any grade before being eligible to promotion to the next higher grade.

Nothing in this act shall be so construed as to prevent the detail of officers and enlisted men of other branches of the Navy as student aviators or student airmen in such numbers as the needs of the service may require.

Such officers and enlisted men, while detailed as student aviators and student airmen involving actually flying in aircraft, shall receive the same pay and allowances that are now provided by law for officers and enlisted men of the same grade or rank and rating in the Navy detailed for duty with aircraft.

The Secretary of the Navy is hereby authorized to appoint annually for a period of four years, from enlisted men of the naval service, or from citizens of the United States in civil life, not to exceed 30 student flyers for instruction and training in aeronautics who shall receive the same pay and allowances as midshipmen at the United States Naval Academy: *Provided*, That persons so appointed must, at the time of appointment, be not less than 17 or more than 21 years of age: *Provided further*, That no person shall be appointed a student flyer until he shall have qualified therefor by such examination as may be prescribed by the Secretary of the Navy.

The appointment of student flyers shall continue in force for two years, unless sooner revoked by the Secretary of the Navy, in his discretion, and at the end of such period student flyers shall be examined for qualification as qualified aviators: *Provided*, That if such student flyers are not qualified, their appointment will be revoked, or if recommended by the examining board, they shall be transferred to the naval reserve flying corps and commissioned as ensigns therein.

Student flyers shall, after receiving a certificate of qualification as an aviator for actual flying in aircraft, rank with midshipmen and shall receive the same pay and allowances as midshipmen, plus 50 per cent thereof: *Provided*, That student flyers who have qualified as aviators under the provisions of this act shall be commissioned acting ensigns for aeronautic duties only, after three years' service: *Provided further*, That they shall have been examined by a board of officers of the naval flying corps to determine by a competitive examination prescribed by the Secretary of the Navy their moral, physical, and professional fitness and the order of rank in which they shall be commissioned: *And provided further*, That any student flyer qualified as an aviator may at any time, in the discretion of the Secretary of the Navy, if his record warrants it, at his own request, be transferred to the naval reserve flying corps and be commissioned as ensign therein: *And provided further*, That student flyers not considered qualified for commissions as acting ensigns for aeronautic duties only may, upon recommendation of the examining board, be transferred to the naval reserve flying corps and be commissioned as ensigns therein.

The Secretary of the Navy is hereby authorized to establish aeronautic schools for the instruction and training of student flyers and prescribe the course of instruction and qualifications for certificate of graduation as a qualified aviator.

Nothing in this or any other act shall be so construed as to prevent the temporary detail of officers and enlisted men of any branch of the Navy for duty with aircraft.

In the event of the death of an officer or enlisted man or student flyer of the naval flying corps from wounds or disease, the result of an aviation accident, not the result of his own misconduct, received

while engaged in actual flying in or in handling aircraft, the gratuity to be paid under the provisions of the act approved August 22, 1912, entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1913, and for other purposes," shall be an amount equal to one year's pay at the rate received by such officer or enlisted man or student flyer at the time of the accident resulting in his death. In all cases where an officer or enlisted man or student flyer of the Navy or Marine Corps dies, or where a student flyer or an enlisted man of the Navy or Marine Corps is disabled by reason of any injury received or disease contracted in line of duty, the result of an aviation accident, received while employed in actual flying in or in handling aircraft, the amount of pension allowed shall be double that authorized to be paid should death or the disability have occurred by reason of an injury received or disease contracted in line of duty not the result of an aviation accident.

Student flyers and the acting ensigns and acting lieutenants (junior grade) and acting second and first lieutenants for aeronautic duties only provided for herein shall be subject to the laws and regulations and orders for the government of the Navy, but shall not be entitled to retirement or retired pay.

The enlisted personnel of the naval flying corps shall be distributed by the Secretary of the Navy in the various ratings as now obtain in the Navy in so far as such ratings are applicable to duties connected with aircraft.

Within the first two years after the passage of this act, enlisted men may be transferred from other branches of the naval service to the naval flying corps, under regulations established by the Secretary of the Navy governing such transfer and the qualifications for this corps: *Provided*, That the number so transferred shall not exceed one-half the total number of enlisted men allowed by this act.

The Secretary of the Navy shall establish regulations governing the term of enlistment, the qualifications, and advancement of the enlisted men of the flying corps.

Any enlisted man who passes satisfactorily the prescribed examination and is recommended by a board of officers may be appointed a student flyer as herein provided.

Mr. BRANDEGEE. In line 5, on page 84, in the amendment reported by the committee, where the amendment reads "within the first two years after the passage of this act," the language had better be "after the approval of this act," had it not?

Mr. LODGE. Yes.

The VICE PRESIDENT. The amendment to the amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. On page 84, line 5, after the words "after the," it is proposed to strike out "passage" and to insert in lieu thereof the word "approval," so as to read "within the first two years after the approval of this act," and so forth.

The amendment to the amendment was agreed to.

Mr. WEEKS. Mr. President, I should like to call the attention of the Senator in charge of the bill to the paragraph of the amendment, on page 80, commencing in line 5, which refers to the promotion of civilian employees of the naval flying corps, and to ask the Senator how that promotion is to be brought about? Are they to follow a grade in the Navy? For instance, when the last man in the lieutenant's grade of the Navy is promoted, are these men then to be promoted to lieutenant commanders, or in what manner is that paragraph to be applied?

Mr. SWANSON. I understand that this applies to the method of promotion as provided in this measure.

Mr. WEEKS. I do not find any method of promotion in this measure other than what is in that paragraph. If the Senator from Virginia will read it, he will find that it provides "in the same manner as other officers" of the Navy; but we are going to create a force of officers of junior rank. Now, when is their promotion to commence?

Mr. SWANSON. The language is:

Provided, That any such officer must serve at least three years in any grade before being eligible to promotion to the next higher grade.

Mr. WEEKS. Then, at the end of three years are they to be promoted?

Mr. SWANSON. At the end of three years the officer is eligible to be promoted to the next higher grade.

Mr. WEEKS. In what way is he going to be promoted?

Mr. SWANSON. If he passes a satisfactory examination, such as is required for other officers, the officer will go from junior lieutenant to full lieutenant, and up as high as he can go.

Mr. WEEKS. Then, in 12 years they would become captains in the Navy or colonels in the Marine Corps?

Mr. SWANSON. I have not exactly figured that out, but I understand that is the provision.

Mr. WEEKS. That is substantially correct. Is that what is to happen in the case of these men?

Mr. SWANSON. That is what I understand. I have not examined the matter very fully so as to be able to answer the question directly, but I understand such an officer must serve three years in one grade before being eligible to the next higher grade, and then he must pass a satisfactory examination.

Mr. WEEKS. One more question. I do not find any provision for the retirement of such officers. Are they to be retired as other officers in the Navy and Marine Corps and at the same age?

Mr. SWANSON. I can not speak accurately, because this is a mere change of the House provision, embodying some modifications recommended by the department; but I understand that the rules applying to the Navy generally will apply to the flying corps.

Mr. WEEKS. Mr. President, I have no desire to embarrass the committee in connection with this provision. I want something done, and, so far as I know, this will accomplish a great deal for the service; but it seems to me that there are considerations which should have the attention of the committee and of the Senate. For example, I do not believe that a man after he reaches the age of 45 or 50 is fit for service in the flying corps. I am quite confident that the average man between the age of 50 and 60 has not the nerve to perform the kind of service which this corps will be called upon to perform, and that it is inadvisable to have a considerable number of officers in this corps other than those who are connected with the regular naval service, who shall in their younger days perform service in this corps and at the same time continue their connection with the Navy, so that later they may perform the ordinary duties of a naval officer of higher rank. I think that ought to be taken into consideration.

Mr. LODGE. Mr. President, if I may, I will call my colleague's attention to the paragraph at the bottom of page 83, relating to the matter of retirement, which reads:

Student flyers and the acting ensigns and acting lieutenants (junior grade) and acting second and first lieutenants for aeronautic duties only provided for herein shall be subject to the laws and regulations and orders for the government of the Navy, but shall not be entitled to retirement or retired pay.

As I understand, beyond those grades they will be eligible for retirement up to the grade of captain, and one purpose of that is to bring them within the proper age.

Mr. WEEKS. Mr. President, I have no disposition to criticize the provision, but I do feel that there should be a limitation of the number of civilians who are taken into this service——

Mr. LODGE. That is carefully limited.

Mr. WEEKS. For the reason I have stated, that I do not believe that a man can perform that service acceptably at the advanced age of, say, the average Senator.

Mr. LODGE. I quite agree with the Senator. The age is very carefully limited, and that is the reason for the short periods of promotion, as I understand. I ought to say also that this is a redraft of the House provision, which was found to be inadequate. There is no change in the size of the corps, and the number of civilians is carefully limited.

Mr. WEEKS. May I ask the Senator who drafted this provision?

Mr. LODGE. It was drafted at the department by the Bureau of Navigation.

Mr. WEEKS. And it has the approval of the department in this form?

Mr. LODGE. Absolutely. It is entirely their work; the committee did not prepare a line of it.

The VICE PRESIDENT. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 84, after line 17, to insert:

ADMINISTRATION OF JUSTICE.

Hereafter all officers of the Navy and Marine Corps who are authorized to order either general or summary courts-martial may order deck courts upon enlisted men under their command, and shall have the same authority to inflict minor punishments as is conferred by law upon the commander of a naval vessel.

Summary courts-martial may be ordered upon enlisted men in the naval service under his command by the commanding officer of any brigade, regiment, or separate or detached battalion, or other separate or detached command, and, when empowered by the Secretary of the Navy, by the commanding officer or officer in charge of any command not specifically mentioned in the foregoing: *Provided*, That when so empowered by the Secretary of the Navy to order summary courts-martial, the commanding officer of a naval hospital or hospital ship shall be empowered to order such courts and deck courts, and inflict the punishments which the commander of a naval vessel is authorized by law to inflict, upon all enlisted men of the naval service attached thereto, whether for duty or as patients.

No sentence of a summary court-martial shall be carried into execution until the proceedings and sentence have been approved by the officer ordering the court, or his successor in office, and by his immediate superior in command: *Provided*, That if the officer ordering the court, or his successor in office, be the senior officer present, such sentence may be carried into execution upon his approval thereof.

When empowered by the Secretary of the Navy, general courts-martial may be convened by the commanding officer of a squadron, of a division, of a flotilla of a fleet, and of a brigade or larger force of the naval service on shore beyond the continental limits of the United States: *Provided*, That in time of war, if then so empowered by the Secretary of the Navy, general courts-martial may be convened by the commandant of any navy yard or naval station, and by the commanding officer of a brigade or larger force of the Navy or Marine Corps on shore not attached to a navy yard or naval station.

Courts of inquiry may be convened by any officer of the naval service authorized by law to convene general courts-martial.

When a force of marines is embarked on a naval vessel, or vessels, as a separate organization, not a part of the authorized complement thereof, the authority and powers of the officers of such separate or-

ganization of marines shall be the same as though such organization were serving at a navy yard on shore, but nothing herein shall be construed as impairing the paramount authority of the commanding officer of any naval vessel over the vessel under his command and all persons embarked thereon.

The amendment was agreed to.

The next amendment was, under the head "Naval reserve force," on page 87, line 3, after the words "Secretary of the Navy," to insert "or by transfer thereto as in this act provided," so as to make the clause read:

The naval reserve force shall be composed of citizens of the United States who, by enrolling under regulations prescribed by the Secretary of the Navy or by transfer thereto as in this act provided, obligate themselves to serve in the Navy in time of war or during the existence of a national emergency, declared by the President: *Provided*, That citizens of the insular possessions of the United States may enroll in the naval auxiliary reserve.

The amendment was agreed to.

The next amendment was, on page 87, after line 8, to insert:

The Secretary of the Navy shall make all necessary and proper regulations not inconsistent with law, for the administration of the provisions of this act which relate to the naval reserve force.

The amendment was agreed to.

The next amendment was, on page 87, line 13, after the words "may be," to strike out "called" and insert "ordered"; in line 14, after the word "into," to insert "active service in the Navy"; in line 15, before the word "by," to strike out "the naval service of the United States"; and in the same line, after the word "by," to strike out "order of," so as to make the clause read:

Members of the naval reserve force may be ordered into active service in the Navy by the President in time of war or when, in his opinion, a national emergency exists.

The amendment was agreed to.

The next amendment was, on page 87, after line 21, to insert:

Members of the naval reserve force appointed to commissioned grades shall be commissioned by the President alone, and members of such force appointed to warrant grades shall be warranted by the Secretary of the Navy: *Provided*, That officers so warranted or commissioned shall not be deprived of the retainer pay, allowances, or gratuities to which they would otherwise be entitled. Officers of the naval reserve force shall rank with but after officers of corresponding rank in the Navy.

The amendment was agreed to.

The next amendment was, on page 88, line 17, before the word "rank," to insert "grade," and in line 21, before the word "rank," to insert "grade," so as to make the clause read:

When first enrolled members of the naval reserve force, except those in the fleet naval reserve, shall be given a provisional grade, rank, or rating in accordance with their qualifications determined by examination. They may thereafter, upon application, be assigned to active service in the Navy for such periods of instruction and training as may enable them to qualify for and be confirmed in such grade, rank, or rating.

The amendment was agreed to.

The next amendment was, on page 88, line 23, after the word "provisional," to insert "grade," so as to make the clause read:

No member shall be confirmed in his provisional grade, rank, or rating until he shall have performed the minimum amount of active service required for the class in which he is enrolled, nor until he has duly qualified by examination for such rank or rating under regulations prescribed by the Secretary of the Navy.

The amendment was agreed to.

The next amendment was, on page 89, line 8, before the word "person," to strike out "The Secretary of the Navy shall prescribe regulations governing the qualifications for enrollment, reenrollment, appointment, promotions, and advancement of all members of the naval reserve force in the various classes, subject to the provisions of this act: *Provided*, That no" and insert "No"; in line 18, after the word "conditions," to insert "and who shall have enrolled in the naval reserve force"; in line 20, before the word "rank," to insert "grade and"; in line 21, before the word "physical," to strike out the letter "a" and insert "the," and in the same line, after the word "examination," to insert "above prescribed," so as to make the clause read:

No person shall be appointed or commissioned as an officer in any rank in any class of the naval reserve force, or promoted to a higher rank therein, unless he shall have been examined and recommended for such appointment, commission, or promotion by a board of three naval officers not below the rank of lieutenant commander, nor until he shall have been found physically qualified by a board of medical officers to perform the duties required in time of war, except that former officers and midshipmen of the Navy, who shall have left the service under honorable conditions, and who shall have enrolled in the naval reserve force may be appointed in the grade and rank last held by them without examination other than the physical examination above prescribed.

The amendment was agreed to.

The next amendment was, on page 90, after line 24, to insert:

Retainer pay shall be paid annually or otherwise, as the Secretary of the Navy, in his discretion, may direct.

The amendment was agreed to.

The next amendment was, on page 91, line 4, after the word "in," to strike out "the Army" and insert "any branch of the military service of the United States or any State thereof"; so as to make the clause read:

No existing law shall be construed to prevent any member of the naval reserve force from accepting employment in any branch of the public service, except as an officer or enlisted man in any branch of the military service of the United States or any State thereof, nor from receiving the pay and allowances incident to such employment in addition to his retainer pay.

The amendment was agreed to.

The next amendment was, on page 91, line 23, before the word "Members," to strike out "The naval reserve force shall be organized and administered under the Navy Department, and its members shall be governed by the Articles for the Government of the Navy and by the Navy Regulations and Instructions only when actively employed with the Navy, or when employed in authorized travel to and from prescribed active duty with the Navy, or in time of war, or when the President of the United States has declared that a national emergency exists," and insert "enrolled members of the naval reserve force shall be subject to the laws, regulations, and orders for the government of the Regular Navy only during such time as they may by law be required to serve in the Navy, in accordance with their obligations, and when on active service at their own request as herein provided, and when employed in authorized travel to and from such active service in the Navy," so as to make the clause read:

Enrolled members of the naval reserve force shall be subject to the laws, regulations and orders for the government of the Regular Navy only during such time as they may by law be required to serve in the Navy, in accordance with their obligations, and when on active service at their own request as herein provided, and when employed in authorized travel to and from such active service in the Navy. Members of the naval reserve force shall be issued a distinctive badge or button which may be worn with civilian dress, and whoever, not being a member of the naval reserve force of the United States and not entitled under the law to wear the same, willfully wears or uses the badge or button or who uses or wears the same to obtain aid or assistance thereby, shall be punished by a fine of not more than $20 or by imprisonment for not more than 30 days or by both such fine and imprisonment.

The amendment was agreed to.

The next amendment was, on page 92, line 7, after the words "set forth in," to strike out "the preceding paragraph, be held and considered to be in all respects in the same status and shall" and insert "this act," and in line 12, after the word "employed," to strike out "with" and insert "in"; so as to make the clause read:

All members of the naval reserve force shall, when actively employed as set forth in this act, be entitled to the same pay, allowances, gratuities, and other emoluments as officers and enlisted men of the naval service on active duty of corresponding rank or rating and of the same length of service. When not actively employed in the Navy, members of the naval reserve force shall not be entitled to any pay, bounty, gratuity, or pension except as expressly provided for members of the naval reserve force by the provisions of this act.

The amendment was agreed to.

The next amendment was, on page 92, line 17, before the words "of the naval reserve force," to strike out "Members" and insert "Enrolled members," so as to make the clause read:

Enrolled members of the naval reserve force may, in time of war or national emergency, be required to perform active service in the Navy throughout the war or until the national emergency ceases to exist.

The amendment was agreed to.

The next amendment was, on page 93, after line 8, to strike out:

Officers and men serving on board United States naval auxiliary vessels, not manned by officers and enlisted men of the regular service, if citizens of the United States, shall within two years enroll in any class of the naval reserve force for which qualified and in the rank or rating in which they are found by examination to be competent to fill.

The amendment was agreed to.

The next amendment was, on page 93, after line 14, to insert:

Hereafter, in shipping officers and men for service on board United States auxiliary vessels, preference shall be given to members of the naval reserve force, and, after two years from the date of approval of this act, no person shall be shipped for such service who is not a member of the naval reserve force herein provided.

The amendment was agreed to.

The next amendment was, under the subhead "Fleet Naval Reserve," on page 95, line 5, after the word "minority," to insert "and who shall have enrolled in the naval reserve force," and in line 7, after the word "Reserve," to strike out "under such regulations as may be prescribed by the Secretary of the Navy," so as to make the clause read:

All former officers of the United States naval service, including midshipmen, who have left that service under honorable conditions, and those citizens of the United States who have been, or may be entitled to be, honorably discharged from the naval service after not less than one four-year term of enlistment or after a term of enlistment during minority, and who shall have enrolled in the naval reserve force, shall be eligible for membership in the fleet naval reserve.

The amendment was agreed to.

The next amendment was, on page 95, line 13, after the words "naval service," to insert "or previous honorable service in the Army," so as to make the clause read:

In addition to the enrollment in the fleet naval reserve above provided the Secretary of the Navy is authorized to transfer to the fleet naval reserve at any time within his discretion any enlisted man of the naval service with 20 or more years' naval service, or previous honorable service in the Army, and any enlisted man, at the expiration of a term of enlistment who may be then entitled to an honorable discharge, after 16 years' naval service: *Provided*, That such transfers shall only be made upon voluntary application and in the rating in which then serving, and the men so transferred shall be continued in the fleet naval reserve until discharged by competent authority.

The amendment was agreed to.

The next amendment was, on page 96, line 10, before the word "enrolled," to strike out "Officers and men" and insert "Men"; in line 12, before the words "per annum," to strike out "$30" and insert "$50"; in line 14, before the words "per annum," to strike out "$60" and insert "$72"; and in line 19, after the word "minority," to strike out "shall be considered as four years," and insert "and any enlistment terminated within three months prior to the expiration of the term of enlistment by special order of the Secretary of the Navy shall be considered as four years' service. The annual retainer pay of officers of the fleet naval reserve shall be two months' base pay of the corresponding rank in the Navy," so as to make the clause read:

Men enrolled in the fleet naval reserve with less than 8 years' naval service shall be paid at the rate of $50 per annum; those with 8 or more years and less than 12 years' naval service shall be paid at the rate of $72 per annum; and those with 12 or more years' naval service shall be paid at the rate of $100 per annum, such pay to be considered as retainer pay for the obligation on the part of such members to serve in the Navy in time of war or national emergency: *Provided*, That for all purposes of this act a complete enlistment during minority and any enlistment terminated within three months prior to the expiration of the term of enlistment by special order of the Secretary of the Navy shall be considered as four years' service. The annual retainer pay of officers of the fleet naval reserve shall be two months' base pay of the corresponding rank in the Navy.

The amendment was agreed to.

The next amendment was, on page 97, line 2, after the word "years," to strike out "under such regulations as the Secretary of the Navy may prescribe"; in line 11, before the words "naval service," to insert "regular"; in line 12, before the words "naval service," to insert "regular"; and in line 15, before the words "naval service," to insert "regular," so as to make the clause read:

Reenrollments in the fleet naval reserve shall be for four years. Officers and men enrolling in the fleet naval reserve within four months of the date of the termination of their last naval service or reenrolling within four months of the date of the termination of their last term of enrollment shall receive an increase of 25 per cent of their retainer pay for each such enrollment: *Provided*, That men who have enrolled in the fleet naval reserve within four months of the date of their discharge from the regular naval service shall, upon reenlistment in the regular naval service within four months of the date of discharge from the fleet naval reserve, be entitled to the same gratuity and additional pay as if they had reenlisted in the regular naval service within four months of discharge therefrom.

The amendment was agreed to.

The next amendment was, on page 98, line 14, before the word "Members," to strike out "enrollments, appointments, and promotions shall be governed by such regulations as may be prescribed by the Secretary of the Navy, and no officer or man shall be enrolled, appointed, or promoted until he has established his qualifications under such regulations," so as to make the clause read:

Members of the fleet naval reserve who have established their qualifications by examination to the satisfaction of the Secretary of the Navy may be given warrants or commissions in the fleet naval reserve in the grades of boatswain, gunner, carpenter, machinist, pharmacist, pay clerk, ensign for deck or engineering duties, or in the lowest grades of the staff corps: *Provided further*, That those so warranted or commissioned shall not be deprived of the retainer pay, allowances, or gratuities to which they would be otherwise entitled.

The amendment was agreed to.

The next amendment was, under the subhead "Naval reserve," on page 99, line 25, before the word "No," to strike out "the naval reserve shall be composed of persons who have been or may be engaged in the seagoing profession who enroll for general service" and insert "members of the naval reserve force who have been or may be engaged in the seagoing profession, and who have enrolled for general service, shall be eligible for membership in the naval reserve," so as to make the clause read:

Members of the naval reserve force who have been or may be engaged in the seagoing profession, and who have enrolled for general service, shall be eligible for membership in the naval reserv. No person shall be first enrolled in this class who is less than 18 or more than 35 years of age, nor unless he furnishes satisfactory evidence as to his ability and character; nor shall any person be appointed an officer in this class unless he shall have had not less than two years' experience as an officer on board of lake or ocean-going vessels.

The amendment was agreed to.

The next amendment was, on page 100, line 9, after the word "is," to strike out "as follows: Officers," and in the same line, after the words "three months," to strike out "men of more than two years' experience on such vessel, three months," so as to make the clause read:

The minimum active service required of members to qualify for confirmation in their rank or rating in this class is three months.

The amendment was agreed to.

The next amendment was, on page 100, line 11, after the word "required," to strike out "in order to maintain," and insert "for maintaining"; in line 14, after the words "may be," to strike out "taken"; and in the same line, after the words "periods of," to insert "not less than," so as to make the clause read:

The minimum active service required for maintaining the efficiency of a member of this class is three months during each term of enrollment. This active service may be in one period or in periods of not less than three weeks each year.

The amendment was agreed to.

The next amendment was, on page 100, line 17, after the words "two months'," to insert "base," so as to make the clause read:

The annual retainer pay of members in this class after confirmation in rank or rating shall be two months' base pay of the corresponding rank or rating in the Navy.

The amendment was agreed to.

The next amendment was under the subhead "Naval auxiliary reserve," on page 100, after line 19, to strike out "The naval auxiliary reserve shall be composed of persons of the seagoing profession who have been or may be employed on board American vessels of the merchant marine of suitable type for use as naval auxiliaries, and which shall have been retained or listed as such by the Navy Department for use in war, who enroll for service on such auxiliaries in time of war or national emergency," and insert:

Members of the naval reserve force of the seagoing profession who shall have been or may be employed on American vessels of the merchant marine of suitable type for use as naval auxiliaries and which shall have been listed as such by the Navy Department for use in war, shall be eligible for membership in the naval auxiliary reserve.

The amendment was agreed to.

The next amendment was, on page 101, after line 6, to strike out "In time of war persons in this class shall be required to serve only in vessels of the merchant-ship type except in cases of emergency, and then only for temporary service," and insert:

In time of war or during the existence of a national emergency persons in this class shall be required to serve only in vessels of the merchant-ship type, except in cases of emergency, to be determined by the senior officer present, when said officer may, in his discretion, detail them for duty elsewhere as the exigencies of the service may require.

The amendment was agreed to.

The next amendment was, on page 102, line 5, after the word "officers," to strike out "one-half of," and in line 7, after the words "two months'," to insert "base," so as to make the clause read:

The annual retainer pay of members in this class after confirmation in rank or rating shall be for officers one month's base pay of the corresponding rank in the Navy, and for men, two months' base pay of the corresponding rating in the Navy.

The amendment was agreed to.

The next amendment was, under the subhead "Naval coast defense reserve," on page 102, after line 9, to strike out "The naval coast defense reserve shall be composed of those persons who may be capable of performing special useful service in the Navy or in connection with the Navy in defense of the coast and who obligate themselves to perform such service with the Navy in time of war or national emergency" and insert:

Members of the naval reserve force who may be capable of performing special useful service in the Navy or in connection with the Navy in defense of the coast shall be eligible for membership in the naval coast-defense reserve.

The amendment was agreed to.

The next amendment was, on page 102, line 20, after the word "service," to insert "in connection with the naval defense of the coast, such as service"; in line 22, before the word "patrol," to strike out "or"; and in the same line, after the word "vessels," to strike out "as they may elect," so as to make the clause read:

Persons may enroll in this class for service in connection with the naval defense of the coast, such as service with coast-defense vessels, torpedo craft, mining vessels, patrol vessels, or as radio operators, in various ranks or ratings corresponding to those of the Navy for which they shall have qualified under regulations prescribed by the Secretary of the Navy: *Provided*, That the Secretary of the Navy may permit the enrollment in this class of owners and operators of yachts and motor-power boats suitable for naval purposes in the naval defense of the coast; and is hereby authorized to enter into contract with the owners of such power boats and other craft suitable for war purposes to take over the same in time of war or national emergency upon payment of a reasonable indemnity.

The amendment was agreed to.

The next amendment was, under the subhead "Volunteer naval reserve," on page 103, line 17, after the word "those,"

to strike out "persons" and insert "members of the naval reserve force," and in line 18, after the words "eligible for," to strike out "enrollment" and insert "membership," so as to make the clause read:

The volunteer naval reserve shall be composed of those members of the naval reserve force who are eligible for membership in any one of the other classes of the naval reserve force and who obligate themselves to serve in the Navy in any one of said classes without retainer pay and uniform gratuity in time of peace.

The amendment was agreed to.

The next amendment was, under the subhead "Naval reserve flying corps," on page 103, line 24, after the words "officers and," to strike out "enlisted men" and insert "student flyers"; on page 104, line 1, after the word "corps," to insert "and of enlisted men who shall have been so transferred"; in line 3, before the word "enlisted," to strike out "officers and"; and in line 7, after the word "President," to strike out "*Provided further*, That citizens of the United States skilled in the flying of aircraft or in their design, building, or operation may be commissioned, appointed, or enlisted in such grades and ratings of the naval reserve flying corps as may be determined after examination by a board of officers of the naval flying corps under regulations established by the Secretary of the Navy: *Provided further*, That members of the naval reserve flying corps who so request may be called into active service for drills and exercises for not less than two weeks and not more than one month in any one year, and while so employed shall be subject to the regulations of the Navy and shall receive the same pay as those of corresponding rank or rating in the regular service, together with transportation from their homes and return," and insert "Members of the naval reserve force skilled in the flying of aircraft, or in their design, building, or operation, shall be eligible for membership in the naval reserve flying corps. The amount of active service required for confirmation in grade, rank, or rating, and for maintaining efficiency therein, shall be the same as that required for members of the Naval Reserve. The retainer pay of members of the naval reserve flying corps shall be the same as that of members of the Naval Reserve," so as to make the section read:

The naval reserve flying corps shall be composed of officers and student flyers who have been transferred from the naval flying corps to the naval reserve flying corps and of enlisted men who shall have been so transferred under the same conditions as those provided by law for enlisted men of the Navy transferred to the fleet naval reserve: *Provided*, That surplus graduates of the aeronautic school may be commissioned as ensigns in the naval reserve flying corps and promoted therein under such regulations as may be prescribed by the President. Members of the naval reserve force skilled in the flying of aircraft or in their design, building, or operation shall be eligible for membership in the naval reserve flying corps. The amount of active service required for confirmation in grade, rank, or rating, and for maintaining efficiency therein, shall be the same as that required for members of the Naval Reserve. The retainer pay of members of the naval reserve flying corps shall be the same as that of members of the Naval Reserve.

The amendment was agreed to.

The next amendment was, under the subhead "Marine Corps Reserve," on page 105, line 10, after the word "same," to strike out "conditions" and insert "provisions," and, in line 12, after the words "for the," to strike out "fleet naval reserve of the naval reserve force provided for in this act" and insert "naval reserve force in this act: *Provided*, That the Marine Corps reserve shall consist of five classes corresponding, as near as may be, to the fleet naval reserve, the naval reserve, the naval coast-defense reserve, the volunteer naval reserve, and the naval reserve flying corps, respectively," so as to make the clause read:

A United States Marine Corps reserve, to be a constituent part of the Marine Corps and in addition to the authorized strength thereof, is hereby established under the same provisions in all respects (except as may be necessary to adapt the said provisions to the Marine Corps) as those providing for the naval reserve force in this act: *Provided*, That the Marine Corps reserve shall consist of five classes corresponding, as near as may be, to the fleet naval reserve, the naval reserve, the naval coast-defense reserve, the volunteer naval reserve, and the naval reserve flying corps, respectively.

The amendment was agreed to.

The next amendment was, on page 105, after line 18, to strike out:

All acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

The amendment was agreed to.

The next amendment was, on page 105, line 21, after the words "expenses of," to insert "organizing," and, on page 106, line 2, after the words "naval reserve force," to insert: "The retainer pay and active-service pay of members of the naval reserve force shall be paid from the appropriation 'Pay—the Navy,' and the retainer pay and active-service pay of the Marine Corps reserve shall be paid from the appropriation 'Pay, Marine Corps,'" so as to make the clause read:

Naval reserve force: For the authorized expenses of organizing the naval reserve force, $130,000, and the unexpended balance of the appropriation for carrying into effect the provisions of the act of March 3, 1915, relating to a naval reserve, be, and it is hereby, made immediately available to carry into effect the foregoing provisions relating to a naval reserve force. The retainer pay and active-service pay of members of the naval reserve force shall be paid from the appropriation "Pay—the Navy," and the retainer pay and active-service pay of the Marine Corps reserve shall be paid from the appropriation, "Pay, Marine Corps."

Each commissioned and warrant officer on the active list of the Naval Militia shall receive compensation for his services, referred to hereinafter as retainer pay, except during periods of service for which he may become lawfully entitled to the same pay as an officer of corresponding grade of the United States Navy or Marine Corps, at the following rates per annum, namely:

To officers of or above the naval rank or equivalent rank of lieutenant, $500;

To officers of the naval rank or equivalent rank of lieutenant (junior grade), $240;

To officers of the naval rank or equivalent rank of ensign, $200;

To warrant officers, $120:

Provided, That no commissioned or warrant officer of the Naval Militia shall be entitled to any retainer pay for any period during which he has not attended the minimum number of drills prescribed in section 15 of an act entitled "An act to promote the efficiency of the Naval Militia, and for other purposes," approved February 16, 1914, or duly authorized equivalent official duty.

That each enlisted man on the active list of the Naval Militia shall receive compensation for his services, referred to hereinafter as retainer pay, except during periods of service for which he may become lawfully entitled to the same pay as an enlisted man of corresponding rate or rank of the United States Navy or Marine Corps, at a rate equal to 25 per cent of the base pay now, or as may be hereafter, provided by law for an enlisted man of corresponding rate or rank in the United States Navy or Marine Corps, but not to exceed $120 per annum: *Provided*, That such enlisted man shall receive the full retainer pay represented by said 25 per cent of said base pay only if he shall have attended, during any one year, the maximum number of assemblies for drill, instruction, and target practice, but for the purpose of computing pay not to exceed 48 (or equivalent official duty), which he shall have been duly required to attend, and a proportionate amount for attendance at a lesser number of the same, being in no case less than 50 per cent of said maximum, nor less than the minimum total number of assemblies for drill, instruction, and target practice provided for by section 15 of an act entitled "An act to promote the efficiency of the Naval Militia, and for other purposes," approved February 16, 1914, or duly authorized equivalent official duty.

That no member of the Naval Militia shall be entitled to the retainer pay herein provided for until he has been found qualified, both physically and professionally, in accordance with the standards prescribed by the Secretary of the Navy, and until he has enrolled in the National Naval Volunteers hereinafter provided for.

That the compensation provided for herein shall be computed for quarterly periods under such regulations as the Secretary of the Navy may prescribe, beginning the first days of January, April, July, and October, respectively, of each year, in proportion to the number of said assemblies attended, and no compensation shall be paid to any enlisted man during the first semiannual period of any year unless he shall have attended during said period at least 50 per cent of said minimum of assemblies; but attendance at any lesser number of said assemblies during said period shall be reckoned with the said assemblies attended during the second, third, and fourth quarterly periods in computing the compensation, if any, due him for that year: *Provided*, That when any enlisted man enters into an enlistment he shall be entitled to proportional compensation for that year if during the remainder of the year he shall attend a number of said assemblies whose ratio to said minimum is not less than the ratio of the part of the year so served to the whole year; and when the enlistment of any man shall expire the compensation, if any, to which he may be entitled shall be determined in like manner: *And provided further*, That periods of any actual military duty equivalent to the assemblies hereinabove particularly referred to, except those periods of service for which, under existing or future laws, members of the Naval Militia may become entitled to the same pay as officers and enlisted men of the corresponding ranks, grades, or rates in the United States Navy and Marine Corps, may be accepted as service in lieu of such drills, when approved by the Secretary of the Navy.

Whenever a member of the National Militia who is employed under a department of the Government of the United States attends drills, cruises, or other ordered duty of the Naval Militia, he shall receive the amount of the salary or wages he would have earned when so employed, in addition to the amount provided for by law as a member of the said Naval Militia: *Provided, however*, That such attendance shall not affect his efficiency rating in said department.

That the retainer pay provided above shall be paid quarterly, except as otherwise above provided, to officers and enlisted men of the Naval Militia through the disbursing officer provided for under section 11 of an act to promote the efficiency of the Naval Militia, and for other purposes, approved February 16, 1914, who shall be an officer of the pay corps of the Naval Militia. The Secretary of the Navy is hereby authorized to pay to such disbursing officer so much of the amount appropriated to carry out the provisions of this act as shall be necessary for the above purposes. When disbursing officers are traveling in the performance of their official duties under orders issued by the Secretary of the Navy, they shall be reimbursed for their actual and necessary traveling expenses, the same to be made a charge against the appropriation "Arming and equipping Naval Militia."

The governor of each State and Territory, and the commanding general of the District of Columbia Militia, shall appoint either the above-described disbursing officer or such other officer of the pay corps of the Naval Militia as he may elect as accounting officer for each battalion thereof, or, at his option, for each larger unit or combination of units of the same, who shall be responsible for the proper accounting for all property belonging to the United States issued to and for the use of such battalion or larger unit or combination of units.

Accounting officers shall render accounts as prescribed by the Secretary of the Navy and shall be required to give good and sufficient bonds to the United States in such sums as the Secretary of the Navy may direct, conditioned upon the faithful accounting for all property belonging to the United States and for the safe-keeping of such part thereof as may be in the personal custody of such officer. Accounting officers may issue any or all such property to other officers or enlisted men of the Naval Militia under such rules and regulations as may be prescribed: *And provided further*, That the Secretary of the Navy shall cause an inspection of the accounts and records of the accounting officers to be made by an officer of the Navy at least once each year.

When accounting officers are traveling in the performance of their official duties under orders issued by the Secretary of the Navy, they shall be reimbursed for their actual and necessary traveling expenses, the same to be made a charge against the appropriation "Arming and equipping Naval Militia."

That officers and enlisted men of the Naval Militia to whom property has been issued as herein provided for shall be responsible for the safe-keeping and return thereof. Stoppages may be made against the compensation payable to any officer or enlisted man of the Naval Militia to cover the cost of public property lost or destroyed by and chargeable to such officer or enlisted man.

That no part of the Naval Militia which is entitled to compensation under the provisions of this act shall be disbanded without the consent of the President.

That to provide a force for use in any emergency, including that of actual or imminent war, requiring the use of naval forces in addition to those of the Regular Navy, of which emergency the President shall be, for the purposes of this act, the sole judge, there is hereby created a force, to be known as the "National Naval Volunteers," into which the President alone is authorized, under such regulations as he may prescribe, to at any time enroll, by commission, warrant, and enlistment, respectively, and without examination, such number of the officers and men of the various branches of the Naval Militia as he may decide to so enroll from among those of the Naval Militia who have theretofore conformed to the standard of professional and physical examination prescribed for such officers and men under section 5 of an act entitled "An act to promote the efficiency of the Naval Militia, and for other purposes," approved February 16, 1914, and who may volunteer for such enrollment; and may also similarly enroll, immediately upon the occurrence of any such emergency (subject to their first or subsequently passing examinations satisfactory to him, or may, if he shall think best, enroll without any examination), such further number of the officers and men of the Naval Militia as may so volunteer from among those of the Naval Militia who have not theretofore conformed to said standards. Such officers and men, so enrolled by commission, warrant, or enlistment, shall be eligible and liable for call for immediate service in the event of any such emergency.

That the President may also, in the event of such emergency, draft into the naval service of the United States and enroll as members of the said Volunteers as many officers and men of the Naval Militia as he may think best, and with or without examination, as he may decide, from among those of the Naval Militia who shall not theretofore have volunteered and been enrolled in said Volunteers: *Provided*, That no commissioned or warrant officer drafted or otherwise enrolled shall be compelled to serve in said Volunteers in a lower rank or grade than that which he held in the Naval Militia at the time of being drafted or otherwise enrolled: *Provided further*, That the President may commission, warrant, or rate in said Volunteers any person who shall be so enrolled as above.

That when the national naval volunteers are ordered by the President into the active service they will, from the date such orders are issued until such time as they may be discharged from such service, be subject to the laws for the government of the Navy in so far as those laws may properly be applied to persons not in the regular permanent naval service.

That all persons so enrolled shall be held to service in said volunteers during the continuance of any such emergency and during the period of any existing or thereafter ensuing war, unless sooner relieved by order of the President or until reaching the age of 62 years for those in the naval branch and the age of 64 years for those in the Marine Corps branch, upon attaining which ages such persons, respectively, shall be relieved from such enrollment: *Provided*, That during the continuance of any such emergency or war any enrolled person who shall fail to obey the call to service of the President may be arrested and compelled to serve, and, in addition thereto, may be tried by court-martial as a deserter and punished as such in such manner as said court-martial may lawfully direct.

That any person so enrolled may tender his resignation to, or request his discharge from, the President, who may, in his discretion, accept such resignation or grant such discharge and disenroll such person, and any person so enrolled may be disenrolled by the President for any cause: *Provided*, That no person so enrolled shall be held against his will to such enrollment for a longer continuous period than three years, except during the pendency or duration of the emergency or of war hereinabove referred to. Any person enrolled may subsequently, upon his own application while so enrolled and if still a member of the Naval Militia, be reenrolled in any rank, grade, or rating for which he shall have been found qualified under the provisions of section 5 of an act entitled "An act to promote the efficiency of the Naval Militia, and for other purposes," approved February 16, 1914, and for which he shall also have been duly commissioned, warranted, enlisted, or rated, as the case may be, in the Naval Militia.

That every person enrolled in said volunteers shall, from the date of the call of the President, and during the continuance of his active service under said call, stand relieved from all duty as a member of the Naval Militia, and shall, during said period, have in said volunteers all the authority and obligations of a person of similar rank, grade, or rate in the United States Navy or Marine Corps, shall be governed by the laws and regulations for the government of the Navy, and shall, during his time of active service, be entitled to the same pay and allowances as are, or may be hereafter, provided by law for a person of similar rank, grade, or rate in the United States Navy and Marine Corps, respectively.

That the members of the said volunteers may be ordered to duty with the Navy or separately, and either within or without the territorial limits of the United States, and when so serving shall rank with but after those of corresponding rank, grades, or rates in the United States Navy or Marine Corps, except that for the purpose of determining who shall exercise command over a combined force, composed of vessels commanded by officers of said volunteers, and of vessels commanded by officers of the United States Navy, acting in conjunction, and for the purpose of determining who shall exercise command on shore over a combined force composed of military units commanded by officers of said volunteers and officers of the United States Navy or Marine Corps, acting in conjunction, all officers of said volunteers of or above the rank of lieutenant commander (naval branch) or major (Marine Corps branch) will be regarded as junior to lieutenant commanders of the Navy and majors of the United States Marine Corps, respectively, and provided that as between themselves officers of the said volunteers shall take rank and precedence as of the dates of the commissions in the Naval Militia under which enrolled in said volunteers.

That when serving under the call of the President, officers of said volunteers may serve on courts-martial for the trial of officers and men of the United States naval or Naval Militia service, or of said volunteers, but in the cases of courts-martial convened for the trial of officers of the United States Navy or Marine Corps, the majority of the members shall be officers of the regular naval service, and officers and enlisted men of the said volunteers may be tried by courts-martial, the members of which are members of the regular naval service, or of said volunteers, or any or all of the same.

That when any officer or enlisted man of the said volunteers is disabled by reason of wounds or disabilities received in the active service of the United States, when called to duty under the provisions of this act, he shall be entitled to all the benefits of the pension laws existing at the time of his service for the benefit of members of the United States Navy or Marine Corps, respectively, and in case such officer or enlisted man dies in the active service of the United States, or in returning to his place of residence after being relieved from such active service, or at any time in consequence of wounds or disabilities received in such active service, his widow and children, or previously designated dependent relative, if any, shall be entitled to all the benefits of such pension laws.

That the President may relieve any and all persons in the United States naval volunteers from active service when their services are no longer needed.

That no distinction shall be made between the regular naval service and the national naval volunteers when in active service under the call of the President in respect to promotions or rewards for valorous conduct or to the conferring upon officers or enlisted men of brevet rank, medals of honor, or other rewards for distinguished conduct.

That the Naval Militia shall consist of the regularly enlisted militia between the ages of 18 and 45 years, organized as prescribed for the Naval Militia by law, and commissioned officers between the ages of 21 and 62 years (naval branch) and 21 and 64 years (Marine Corps branch): *Provided, however*, That enlisted men may continue in service after the age of 45 years and until the age of 62 years (naval branch) or 64 years (Marine Corps branch), provided the service is continuous.

That hereafter the period of enlistment in the Naval Militia shall be three years. An enlisted man who has served honorably for the full term of his enlistment may reenlist for a term of one, two, or three years, as he may elect. When a man reenlists within 30 days from the date of the expiration of his prior enlistment his term of service shall be considered as continuous and shall be so dated.

That courts-martial in the Naval Militia of the several States and Territories and in the District of Columbia shall, except when the Naval Militia shall have been called into the service of the United States, consist of general courts-martial, summary courts-martial, and deck courts.

That general courts-martial shall consist of not less than 3 nor more than 13 officers, and may be convened by order of the governor of a State or Territory or the commanding general of the District of Columbia Militia.

That summary courts-martial may be ordered by the governor of a State or Territory or by the commanding general of the District of Columbia Militia or by the commanding officer of a Naval Militia battalion or brigade.

That deck courts may be ordered by the commanding officer of a Naval Militia battalion or brigade or by a Naval Militia officer in command of Naval Militia forces on shore or on any vessel loaned to a State, Territory, or the District of Columbia or on any vessel on which said forces may be serving.

That the above courts-martial and deck courts herein provided for shall be constituted and have cognizance of the same subjects and possess like powers, except as to punishments, as similar courts provided for in the Navy of the United States, and the proceedings of courts-martial of the Naval Militia shall follow the forms and modes of procedure prescribed for such courts in the Navy of the United States.

That every precept or order for the convening of any such court may authorize said court to sit at any place or places within the Territorial limits of the State, Territory, or District where such Naval Militia may be located or organized as the convening authority may designate, and may further provide that any such court may be convened and sit on board any such naval or other vessel wherever the same may from time to time happen to be or at such place or places ashore outside the territorial limits referred to above, as in the judgment of the said convening authority may be convenient or desirable for the purposes of such courts-martial.

That general courts-martial shall have power to impose fines not exceeding $200, to sentence to forfeiture of pay and allowances, to a reprimand, to dismissal or dishonorable discharge from the service, to reduction in rank or rating, or any two or more of such punishments may be combined in the sentences imposed by such courts.

That summary courts-martial shall have the same powers of punishment as general courts-martial, except that fines imposed by summary courts-martial shall not exceed $100.

That deck courts may impose fines not exceeding $50 for any single offense, may sentence enlisted men to reduction in rank or rating, to forfeiture of pay and allowances, to a reprimand, to discharge with other than dishonorable discharge, or to a fine in addition to any one of the other sentences specified.

That all courts-martial of the Naval Militia, including deck courts, shall have the power to sentence to confinement in lieu of fines authorized to be imposed: *Provided*, That such sentences shall not exceed one day for each dollar of fine authorized.

That no sentence of dismissal or dishonorable discharge from the Naval Militia shall, except when the Naval Militia shall have been called into the service of the United States, be executed without the approval of the governor of the State or Territory or the commanding general of the District of Columbia Militia.

That presidents of general courts-martial, senior members of summary courts-martial, and deck-court officers of the Naval Militia shall have the power to issue warrants to arrest accused persons and to bring them before the court for trial whenever such persons have disobeyed an order in writing from the convening authority to appear before such court, a copy of the charge or charges having been delivered to the accused with such order, and to issue subpœnas and subpœnas duces tecum, and to enforce by attachment attendance of witnesses and the production of books and papers, and to sentence for a refusal to be sworn or to answer, all as authorized for similar proceedings for courts-martial in the Navy of the United States.

That all processes and sentences of said courts-martial shall be executed by such civil or other officers as may be prescribed by the laws of the several States and Territories, except as hereinafter alternatively provided, and in any State where no provisions have been made for such action and in the Territories and the District of Columbia the same shall be executed by a United States marshal, or by his duly appointed deputy, and it shall further be the duty in any case of any United

States marshal, when so required by the convening authority of any such court-martial, to execute all such processes and sentences and make return thereof to the officer issuing or imposing the same.

That the Naval Militia shall be subject to the system of discipline prescribed for the United States Navy and Marine Corps, and the commanding officer of a Naval Militia battalion or brigade, and the Naval Militia officer in command of Naval Militia forces on shore or on any vessel of the Navy loaned to the States, Territories, and the District of Columbia, or on any vessel on which such forces are training, shall have the power, without trial by courts-martial, to impose upon members of the Naval Militia the punishments which the commanding officer of a vessel of the Navy is authorized by law to impose.

That the amount of any fine imposed under sentence of the courts heretofore named on any member of the Naval Militia may be collected from him, or may be deducted from any amount due said member as accrued pay or retainer pay under the provisions of this act, or otherwise.

That all fines assessed under the provisions of this act and collected or withheld shall be paid to the commanding officer of the Naval Militia brigade, battalion, or separate unassigned unit of which the person against whom such fine shall have been assessed is a member, to be used by said commanding officer to replace lost or damaged property or for such other purposes of his Naval Militia organization as he may decide, subject to such regulations as may be prescribed by the Secretary of the Navy. Upon the receipt of a certificate from the authority convening the court as to any fine assessed by it, any United States disbursing officer concerned shall pay over any funds due the said member not exceeding the amount of such fine to said commanding officer upon the sole receipt of said commanding officer.

That courts of inquiry in the Naval Militia shall be instituted, constituted, and conducted in the same manner and shall have like powers and duties as similar courts in the Navy of the United States, except that in the Naval Militia courts of inquiry shall be ordered by the governor of the State or Territory, the commanding general of the District of Columbia Militia, or the commanding officer of a Naval Militia brigade or battalion.

That officers of the United States Navy and Marine Corps may, with the approval of the Secretary of the Navy, be elected or appointed and commissioned as officers of the Naval Militia without prejudice to their position or status in the regular service: *Provided*, That such officers so commissioned shall, when directed by the Secretary of the Navy, tender their resignations of such State commissions: *And provided further*, That nothing herein contained shall limit the authority of the Secretary of the Navy over such officers so commissioned.

That line officers of the Naval Militia may be for line duties only, for engineering duties only, or for aeronautic duties only.

That, under such regulations as the President may prescribe, the Secretary of the Navy may, upon the recommendation of the governor of any State or Territory, or the commanding general of the National Guard of the District of Columbia, authorize a limited number of selected officers or enlisted men of the Naval Militia to attend and pursue a regular course of study at any Navy or Marine Corps service school of the United States, except the United States Naval Academy; or to be attached to any Navy or Marine Corps command for routine practical instruction; and such officer or enlisted man shall receive, out of any Naval Militia allotment of funds available for the purpose, the same travel allowances and quarters, or commutation of quarters, and the same pay, allowances, and subsistence to which an officer or enlisted man of the naval service would be entitled for attending such school, college, or practical course of instruction under orders from proper naval authority, while in actual attendance at such school, college, or practical course of instruction: *Provided*, That in no case shall the pay and allowances authorized by this section exceed those of a lieutenant in the Navy.

That the Secretary of the Navy shall cause to be estimated annually the amount necessary for carrying out the provisions of this act, and no money shall be expended under said provisions, except as shall, from time to time, be appropriated for carrying them out.

During the reading of the foregoing amendment,

Mr. SHAFROTH. Mr. President, I should like to make an inquiry of the Senator from Virginia concerning the provision on page 116, reading as follows:

That the members of the said Volunteers may be ordered to duty with the Navy or separately, and either within or without the territorial limits of the United States, and when so serving shall rank with but after those of corresponding rank, grades, or rates in the United States Navy or Marine Corps, except that for the purpose of determining who shall exercise command over a combined force, composed of vessels commanded by officers of said Volunteers, and of vessels commanded by officers of the United States Navy, acting in conjunction, and for the purpose of determining who shall exercise command on shore over a combined force composed of military units commanded by officers of said Volunteers and officers of the United States Navy or Marine Corps, acting in conjunction, all officers of said Volunteers of or above the rank of lieutenant commander (naval branch) or major (Marine Corps branch) will be regarded as junior to lieutenant commanders of the Navy and majors of the United States Marine Corps, respectively, and provided that as between themselves officers of the said Volunteers shall take rank and precedence as of the dates of the commissions in the Naval Militia under which enrolled in said Volunteers.

I should like to ask the Senator, under that provision, where there is a combined force of volunteers and regular members of the Navy, whether the senior volunteer would sometimes take command of a fleet or take command of a ship in preference to one in the regular service? It seems to me it would be unwise to do that, inasmuch as the volunteer has never had experience in handling these war vessels; and, when there is a combination force, to put him in command of the fleet would be something that would be a detriment to the service. If it bears that construction, it seems to me it ought to be changed, and the part with relation to a combination ought to be stricken out.

In other words, as I understand from this, if there is operating a combined force of, say, half a dozen vessels, and the admiral in charge dies, the highest officer of the volunteer forces takes command of the fleet and orders it.

Mr. SWANSON. But there is a limit to how high a volunteer officer can go. If the Senator will look at the bill he will find that there is a limit.

Mr. SHAFROTH. What is that limit?

Mr. LODGE. There are no volunteer officers of flag rank in the Navy.

Mr. SHAFROTH. Would there be an officer who could command a battleship? Would that apply in case of a battleship? If it would not, I do not see any objection to it.

Mr. SWANSON. I think it is limited to lieutenant commander under that language.

Mr. SHAFROTH. The question arose in my mind, where there is a combination of forces, and there is present one of the militia of the rank of commander, whether he, not having had experience in regard to the handling of a battleship or handling a fleet, ought to take preference over the officer of lower rank but in the regular service.

Mr. SWANSON. I am satisfied that under the provisions of this bill that can not occur, and if it does it will be corrected.

Mr. LODGE. It is not possible, I am sure. The Senator is quite right, but I am sure it is carefully provided for.

After the conclusion of the reading of the amendment,

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, under the subhead of "Coast Guard," at the top of page 127, to insert:

That the Secretary of the Treasury is hereby authorized and directed to construct and equip two steam Coast Guard cutters for service on the Pacific coast and in Alaskan waters, at a total cost not to exceed the sum of $700,000; one steam Coast Guard cutter for service as an anchorage patrol boat in New York Harbor, at a cost not to exceed the sum of $125,000, such vessel to be especially constructed for ice breaking; to purchase or construct and equip two or more cutters for service in harbors and shoal waters, at a total cost not to exceed $50,000; to purchase or construct and equip three light-draft river steamboats, including lifeboats and such other life-saving appliances and equipment as may be necessary, to be used in rescuing lives and property and in distributing food and clothing to marooned people during flood times on the Mississippi and Ohio Rivers and their tributaries, for patrolling said waters for the enforcement of navigation and motor-boat laws, and for rendering aid to vessels in distress, at a total cost not to exceed $240,000. On account of Coast Guard vessels herein authorized, to be available until expended, $400,000: *Provided*, That the Secretary of the Navy, at the request of the Secretary of the Treasury, is hereby authorized to build the vessels herein authorized, or any Coast Guard vessels hereafter authorized, at such navy yards as the Secretary of the Navy may designate.

That for the purpose of saving life and property along the coasts of the United States and at sea contiguous thereto, and to assist in the national defense, the Secretary of the Treasury is authorized to establish, equip, and maintain aviation stations, not exceeding 10 in number, at such points on the Atlantic and Pacific coasts, the Gulf of Mexico, and the Great Lakes as he may deem advisable, and to detail for aviation duty in connection therewith officers and enlisted men of the United States Coast Guard. At one of these stations there may be instituted a school for the purpose of special instruction in aeronautics, and the Secretary of the Treasury is hereby authorized to employ one expert instructor in aeronautics, at a salary of $4,000 per annum, and one assistant instructor, also skilled in aeronautics, at a salary of $3,000 per annum.

Mr. WEEKS. I should like to turn to page 127 and ask the committee if it is proposed to keep those steamers provided for—that is, light-draft river steamboats—in commission all the time, and if so, who is going to man them?

Mr. SWANSON. I am not acquainted in that particular. I think they will usually be manned by the Coast Guard.

Mr. WEEKS. It is a new service, I understand, and I wondered whether it is going to be necessary to maintain it all the time or not.

Mr. SWANSON. I can not speak with respect to that. The Coast Guard has been made a part of the Navy, and very properly that is a part of this bill.

Mr. LODGE. The law providing for the Coast Guard is, of course, a separate law, including the Life-Saving Service and the Revenue-Cutter Service. They are provided for under other bills.

Mr. WEEKS. Floods do not occur all the time, we only occasionally have a flood, and therefore it would be only occasionally necessary to use these vessels. I am wondering if it is going to be necessary to keep them commissioned and manned all the time.

Mr. LODGE. They are also to be used, the Senator will notice, "for patrolling said waters for the enforcement of navigation and motor-boat laws, and for rendering aid to vessels in distress."

The amendment was agreed to.

The next amendment was, on page 128, after line 13, to insert:

At the request of the Secretary of the Treasury the Secretaries of War and Navy are authorized to receive officers and enlisted men of

the Coast Guard for instruction in aviation at any aviation school maintained by the Army and Navy, and such officers and enlisted men shall be subject to the regulations governing such schools.

The amendment was agreed to.

The next amendment was, on page 128, after line 19, to insert:

Hereafter officers and enlisted men of the Coast Guard, when detailed for aviation duty, shall receive the same percentages of increases in pay and allowances as are now or may hereafter be prescribed by law for officers and men of the Navy detailed for aviation duty: *Provided*, That no more than a yearly average of 15 commissioned officers and a total of 40 warrant officers and enlisted men of the Coast Guard detailed for duty involving actual flying in aircraft shall receive any increase in pay or allowances by reason of such detail or duty: *Provided further*, That the number of third lieutenants and third lieutenants of engineers now authorized by law for the Coast Guard is hereby increased 10 and 5, respectively, and such portion of the act approved August 24, 1912, which provides that no additional appointments as cadets or cadet engineers shall be made in the Revenue-Cutter Service unless hereafter authorized by Congress is hereby revoked.

The amendment was agreed to.

The next amendment was, on page 129, after line 10, to insert:

LIGHTHOUSE SERVICE.

The President is hereby authorized, whenever in his judgment a sufficient national emergency exists, to transfer to the service and jurisdiction of the Navy Department, or of the War Department, such vessels, equipment, stations, and personnel of the Lighthouse Service as he may deem to the best interest of the country, and after such transfer all expenses connected therewith shall be defrayed out of the appropriations for the department to which transfer is made: *Provided*, That such vessels, equipment, stations, and personnel shall be returned to the Lighthouse Service when such national emergency ceases in the opinion of the President, and nothing in this act shall be construed as transferring the Lighthouse Service or any of its functions from the Department of Commerce except in time of national emergency and to the extent herein provided: *Provided further*, That any of the personnel of the Lighthouse Service who may be transferred as herein provided shall, while under the jurisdiction of the Navy Department or War Department, be subject to the laws, regulations, and orders for the government of the Navy or Army, as the case may be, in so far as the same may be applicable to persons, whose retention permanently in the military service of the United States is not contemplated by law.

The amendment was agreed to.

The next amendment was, on page 130, after line 7, to insert:

The Secretary of the Navy, the Secretary of War, and the Secretary of Commerce shall jointly prescribe regulations governing the duties to be performed by the Lighthouse Service in time of war, and for the cooperation of that service with the Navy and War Departments in time of peace in preparation for its duties in war, and this may include arrangements for a direct line of communication between the officers or bureaus of the Navy and War Departments and the Bureau of Lighthouses to provide for immediate action on all communications from these departments.

The amendment was agreed to.

The next amendment was, on page 131, line 12, after the words "United States Navy," to insert "Commander Allen M. Cook, retired, to be a commander on the active list and to take rank next after Commander John R. Brady, United States Navy; Commander Emmet R. Pollock, retired, to be a commander on the active list, to take rank next after Commander Andre Morton Proctor, United States Navy; Capt. Washington Irving Chambers, retired, to be a captain on the active list, to take rank next after Rear Admiral Walter McLean, United States Navy," so as read:

That the President be, and he is hereby, authorized to appoint the following-named officers now on the retired list of the United States Navy to the grade and rank on the active list of the United States Navy, as hereinafter provided:

Commodore Ten Eyck De Witt Veeder, retired, to be a rear admiral on the active list, to take rank next after Rear Admiral Austin M. Knight, United States Navy; Capt. Templin Morris Potts, retired, to be a rear admiral on the active list, to take rank next after Rear Admiral William B. Caperton, United States Navy; Capt. John Henry Gibbons, retired, to be a captain on the active list, to take rank next after Capt. Frank M. Bennett, United States Navy; Capt. Frank Kinsey Hill, retired, to be a captain on the active list, to take rank next after Capt. Clarence S. Williams, United States Navy; Capt. Armistead Rust, retired, to be a captain on the active list, to take rank next after Capt. Robert B. Higgins, United States Navy; Commander Allen M. Cook, retired, to be a captain on the active list, to take rank next after Capt. Thomas S. Rodgers, United States Navy; Capt. John Morris Ellicott, retired, to be a captain on the active list, to take rank next after Capt. Robert B. Higgins, United States Navy; Commander Allen M. Cook, retired, to be a commander on the active list and to take rank next after Commander John R. Brady, United States Navy; Commander Emmet R. Pollock, retired, to be a commander on the active list, to take rank next after Commander Andre Morton Procter, United States Navy; Capt. Washington Irving Chambers, retired, to be a captain on the active list, to take rank next after Rear Admiral Walter McLean, United States Navy.

Mr. BRANDEGEE. I have no objection at all to agreeing to the amendment, but if the officers named are those who were removed from the service by the so-called plucking board I want to suggest one other name.

Mr. LODGE. Some of them were.

Mr. BRANDEGEE. It occurred to me that some of them were. I did not want to be concluded by the Senate having agreed to a committee amendment that could not be further amended; that is all.

Mr. LODGE. The Senator can move to amend the amendment now.

Mr. BRANDEGEE. I have not the name with me, lest I would make the motion now.

Mr. LODGE. It certainly would be open to amendment.

Mr. BRANDEGEE. Not after it is agreed to, perhaps.

Mr. LODGE. The fact that the amendment was agreed to does not estop any Senator from offering an individual amendment when individual amendments are reached.

Mr. BRANDEGEE. Very well.

Mr. SWANSON. In line 18, page 38, there is a mistake. The word "captain" ought to be "rear admiral."

The VICE PRESIDENT. The Chair thinks it is fair to state to the Senator from Connecticut that if his amendment applies to the committee amendment it is now in order.

Mr. BRANDEGEE. Of course, I wanted to amend the committee amendment.

The VICE PRESIDENT. It is now in order, then.

Mr. BRANDEGEE. It is in order now before agreement to the committee amendment. I do not want to do anything that would prevent action upon the question.

Mr. LODGE. If the Chair will allow me and the Senator will permit me——

Mr. BRANDEGEE. I will yield.

Mr. LODGE. This whole clause is a list of names. The committee added certain names, each one of which is an amendment. It does not seem to me that an individual amendment of another name offered by a Senator is out of order. He need not offer it in the place where the committee amendment occurs; he can offer it anywhere. It is a long list of names.

The VICE PRESIDENT. The Chair was only making a general observation that a Senator has a right to move to amend the committee amendment.

Mr. LODGE. Certainly; the Chair is quite right.

Mr. BRANDEGEE. I will make no objection. I will say frankly to the Senate I think the gentleman whose name I shall move to insert is quite as much entitled to be included as those who were inserted by the House and those who have been inserted by the Senate committee. I did not know that the committee was going to have this legislation.

Mr. SWANSON. If the Senator will present the name, I will consent to its insertion.

Mr. BRANDEGEE. I only want an opportunity to have it considered on the same basis when the time comes.

The VICE PRESIDENT. The amendment to the amendment suggested by the Senator from Virginia will be stated.

The SECRETARY. On page 131, line 18, strike out the word "captain" and insert "rear admiral," so as to read:

Capt. Washington Irving Chambers, retired, to be a rear admiral on the active list, to take rank next after Rear Admiral Walter McLean.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 132, after line 4, to insert:

That hereafter no officer of the Navy who is a graduate of the United States Naval Academy shall be retired for age on reaching the age of 62 years unless and until he shall have completed 41 years of service in the Navy from the date of graduation from said Naval Academy.

Mr. SMITH of Georgia. I desire to make a point of order against this piece of legislation. At present the law fixes the same age for all to retire. It is a general statute. This changes a general statute in an appropriation bill. I make the point that it is out of order and objectionable.

Mr. SMOOT. On what ground?

Mr. SMITH of Georgia. On the ground that it is general legislation on an appropriation bill.

Mr. SMOOT. Mr. President, I recognize the fact that a point of order will lie against the amendment, but I want to ask the Senator, for information, whether——

Mr. SWANSON. I do not object to its going out.

The VICE PRESIDENT. The Senator from Virginia does not object?

Mr. SWANSON. If the Senator will permit me, I think it changes existing law entirely.

Mr. SMOOT. I am perfectly aware of it, and is subject to a point of order, and I so stated. I said that a point of order would lie against it; there is no question about it; but I wanted to ask the Senator a question. Would the Senator make a point of order against an amendment extending——

Mr. SMITH of Georgia. The time of service of all?

Mr. SMOOT. Yes.

Mr. SMITH of Georgia. On the contrary, I would be glad to see it done.

Mr. SMOOT. I think the age of retirement in the Navy ought to be the same as the age of retirement in the Army—64 years instead of 62. I will say to the Senator having the bill in

charge that the proposed committee amendment would not reach some of the efficient officers I had in mind. Unless the age limit is extended to 64 years, Rear Admirals C. McR. Winslow, T. B. Howard, C. J. Boush, D. W. Coffman, and A. M. Knight, some of the very best naval officers that we have, will have to retire, and to retire within a very few weeks.

It seems to me that at present, while we are building up a Navy and are short of officers and seamen of all grades, it would be a very proper time, indeed, to extend the age limit of retirement to 64 years instead of 62.

Mr. SMITH of Georgia. Mr. President, I think the law on this subject when changed should be changed wholly in the interest of those not in the service. I think it is a question as to how the people who provide for the Navy and pay the taxes—citizens of the United States, who through legislation organize a Navy—can be best served by their naval officers. If 62 is the right age to retire them, it is the right age to retire all of them. The mere fact that a man would not be promoted to a higher office if he is retired at 62 is no excuse whatever for changing the rule as to him. If naval officers can do efficient service, as a rule, longer than the age of 62, then the time of service ought to be extended as to all of them. If 64 is the age at which we may expect complete proficiency, then none of them ought to retire before they are 64. It is a mistake, if 64 is the proper age for service, to retire any before 64.

My position is simply this, that legislation should not be shaped simply to take care of particular men. It should be framed to take care of the interests of those who are not in office; and whatever time is considered the appropriate time to which some should serve, I would be glad to see the same time made for all. I object to one date for one and another date for another.

Mr. SMOOT. Mr. President, I quite agree with the Senator from Georgia. I will say, further, that at the time the rear admirals named entered the Naval Academy the ages of entrance to the academy were from 14 to 18 years, as I remember. Many entered the academy in those early days at 16 years and graduated when they were 20 years old. The age has been increased since then from 16 to 20, but I believe that it would be wise to extend the age limit from 62 to 64, and I hope there will be no objection to an amendment of that kind when I offer it.

Mr. SWANSON. I can not consent to extend the age from 62 to 64, and I make a point of order against it.

Mr. SMOOT. It has not been offered yet.

Mr. SWANSON. The point of order is made against this provision. I have always doubted the wisdom of a provision which extends to the Naval Academy of the same class the right of serving 41 years. Some graduate when they are 24 and some graduate when they are 20. The effect of it would be to extend the age limit probably to 65. The man who would graduate at 24 and would serve 41 years would be 65.

Another disadvantage would be that the entire class would be retired at one time. I have doubted the wisdom of retiring a class entirely at one time. I am opposed to extending the age limit for retirement in the Navy. In the Army some of the ablest generals we have are old men, but nearly all of the commanders of the fleets in Europe are young men. It is a more trying life and requires more activity, more physical strength than service in the Army. I would be compelled to make a point of order against an amendment extending the age limit to 64.

Mr. SHAFROTH. I suggest to the Senators that Lord Nelson was 48 years old when he fought the Battle of Trafalgar and his greatest naval achievement, the Battle of the Nile was fought when he was 39 years old. It is the tendency of the European countries to keep young men in command of their fleets.

Mr. WEEKS. But other instances can be given where the officers were of much greater age. Lord St. Vincent was materially over 60 years old when at the height of his service.

The application is not universal that the younger officers perform the best service. Of course, if the Senator from Virginia makes a point of order against the suggested amendment, I assume that it will be sustained, and there is not any purpose to be served by taking time to discuss the question. Otherwise I should like to have done so.

Mr. SWANSON. I make a point of order against it. I think it would be a very unwise thing to do in the Navy.

The VICE PRESIDENT. Against what—your own amendment?

Mr. SWANSON. A point of order has been made against this amendment. It is a clear violation of the rule, changing the statute that fixes the time of retirement. I think the point of order is well taken.

Mr. WEEKS. The idea the Senator expresses, that he thinks such an amendment would be very bad public policy, is not a reason for making the point of order.

Mr. SWANSON. The point of order was made against the amendment. I was asked whether I would make a point of order against an amendment extending the retirement age to 64 in the Navy, and I said I would.

Mr. SMOOT. I expect to offer such an amendment.

The VICE PRESIDENT. Just a moment. Does the bill contain legislation on this subject? It does not. The point of order is sustained.

The next amendment was, on page 133, line 7, after the words "in all," to strike out "$9,087,823.85" and insert "$9,820,900.25," so as to make the clause read:

Provisions, Navy: For provisions and commuted rations for the seamen and marines, which commuted rations may be paid to caterers of messes, in case of death or desertion, upon orders of the commanding officers, commuted rations for officers on sea duty (other than commissioned officers of the line, Medical and Pay Corps, chaplains, chief boatswains, chief gunners, chief carpenters, chief machinists, chief pay clerks, and chief sailmakers) and midshipmen, and commuted rations stopped on account of sick in hospital and credited at the rate of 50 cents per ration to the naval hospital fund; subsistence of officers and men unavoidably detained or absent from vessels to which attached under orders (during which subsistence rations to be stopped on board ship and no credit for commutation therefor to be given); and for subsistence of female nurses, and Navy and Marine Corps general courts-martial prisoners undergoing imprisonment with sentences of dishonorable discharge from the service at the expiration of such confinement: *Provided*, That the Secretary of the Navy is authorized to commute rations for such general courts-martial prisoners in such amounts as seem to him proper, which may vary in accordance with the location of the naval prison, but which shall in no case exceed 30 cents per diem for each ration so commuted; and for the purchase of United States Army emergency rations as required; in all, $9,820,900.25, to be available until the close of the fiscal year ending June 30, 1918.

The amendment was agreed to.

The next amendment was, on page 134, line 6, before the words "coffee mills," to insert "expenses of disbursing offices"; in line 15, after the word "expenses," to insert "pay of chemists and for inspection service and"; in line 26, before the words "for clerical," to strike out "for chemists and"; in the same line, after the word "inspection," to strike out "storekeeper" and insert "storeman"; on page 135, line 3, after the word "stations," to insert "and disbursing offices"; in line 5, after the word "exceed," to strike out "$1,021,000" and insert "$1,183,000"; and in the same line, after the words "in all," to strike out "$2,276,000" and insert "$2,623,640," so as to make the clause read:

Maintenance, Bureau of Supplies and Accounts: For fuel; the removal and transportation of ashes and garbage from ships of war; books, blanks, and stationery, including stationery for cammanding and navigating officers of ships, chaplains on shore and afloat, and for the use of courts-martial on board ship; purchase, repair, and exchange of typewriters for ships; packing boxes and materials; interior fittings for general storehouses, pay offices, and accounting offices in navy yards; expenses of disbursing offices; coffee mills and repairs thereto; expenses of naval clothing factory and machinery for the same; laboratory equipment; purchase of articles of equipage at home and abroad under the cognizance of the Bureau of Supplies and Accounts, and for the payment of labor in equipping vessels therewith, and the manufacture of such articles in the several navy yards; musical instruments and music; mess outfits; soap on board naval vessels; athletic outfits; tolls, ferriages, yeomen's stores, safes, and other incidental expenses; pay of chemists and for inspection service and labor in general storehouses, paymasters' offices, and accounting offices in navy yards and naval stations, including naval stations maintained in island possessions under the control of the United States, and expenses in handling stores purchased and manufactured under "General account of advances"; and reimbursement to appropriations of the Department of Agriculture of cost of inspection of meats and meat-food products for the Navy Department: *Provided*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, inspection, storeman, store laborer, and messenger service in the general storehouses, paymasters' offices, and accounting offices of the navy yards and naval stations and disbursing offices for the fiscal year ending June 30, 1917, shall not exceed $1,183,000; in all, $2,623,640.

The amendment was agreed to.

The next amendment was, on page 135, after line 6, to insert:

For such appliances, equipment, and storage facilities as may be required in the handling, segregation, and care of materials and scrap and for the reworking of the same, including the services of necessary employees, $80,000: *Provided*, That scrap sorters may be employed at the various navy yards and stations for the purpose of sorting scrap, whose wages may be charged to this appropriation.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Construction and Repair," on page 137, line 2, after the word "auxiliaries," to insert "pay of technical, drafting, and inspection force and," so as to read:

Construction and repair of vessels: For preservation and completion of vessels on the stocks and in ordinary; purchase of materials and stores of all kinds; steam steerers, pneumatic steerers, steam capstans, steam windlasses, and all other auxiliaries; pay of technical, drafting, and inspection force and labor in navy yards and on foreign stations.

The amendment was agreed to.

The next amendment was, in the item of appropriation for "Construction and repair of vessels," on page 139, line 6, after the word "clerical," to strike out "drafting, inspection," and

in line 10, after the word "exceed," to strike out "$1,300,000" and insert "$400,000," so as to read:

And the Secretary of the Navy is hereby authorized to make expenditures from appropriate funds under the various bureaus for repairs and changes on the vessels herein named, in an amount not to exceed the sum specified for each vessel, respectively, as follows: *North Dakota*, $730,000; *Georgia*, $525,000; *Virginia*, $525,000; *Salem*, $430,000; *Cincinnati*, $285,000; *Saratoga*, $335,000; *Henley*, $150,000; *Mayrant*, $150,000; *F-1*, $205,000; *F-2*, $205,000; *F-3*, $205,000; *Pontiac*, $20,000; *Constitution*, $150,000; in all, $3,915,000: *Provided further*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, watchmen (ship keepers), and messenger service in navy yards, naval stations, and offices of superintending naval constructors for the fiscal year ending June 30, 1917, shall not exceed $400,000.

The amendment was agreed to.

The next amendment was, on page 139, line 25, after the word "cost" to strike out "the money obtained from such sale to be covered into the Treasury as miscellaneous receipts" and insert "All moneys received from such sale shall be deposited by the Secretary of the Navy in the Treasury. This money, when so deposited, is hereby appropriated toward the construction of additional auxiliary ships of the Navy classified as colliers, transports, tenders, supply ships, or hospital ships," so as to make the clause read:

The Secretary of the Navy is hereby authorized to sell any or all of the auxiliary ships of the Navy classified as colliers, transports, tenders, supply ships, special types, and hospital ships, which are 18 years and over in age, which he deems unsuited to present needs of the Navy and which can be disposed of at an advantageous price, which shall not be less than 50 per cent of their original cost. All moneys received from such sale shall be deposited by the Secretary of the Navy in the Treasury. This money, when so deposited, is hereby appropriated toward the construction of additional auxiliary ships of the Navy classified as colliers, transports, tenders, supply ships, or hospital ships.

The amendment was agreed to.

The next amendment was, on page 140, line 19, after the words "South Carolina," to strike out "$10,000" and insert "$25,000," so as to make the clause read:

For repairs and improvement of machinery and implements at plant at navy yard, Charleston, S. C., $25,000.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Steam Engineering," on page 141, line 18, after the words "pay of," to insert "technical, drafting, inspection, and," so as to read:

Engineering: For repairs, preservation, and renewal of machinery, auxiliary machinery, and boilers of naval vessels, yard craft, and ships' boats, distilling and refrigerating apparatus; repairs, preservation, and renewal of electric interior and exterior signal communications and all electrical appliances of whatsoever nature on board naval vessels, except range finders, battle order and range transmitters and indicators, and motors and their controlling apparatus used to operate machinery belonging to other bureaus; maintenance and operation of coast signal service, including expenses of office of superintendent of radio service and the purchase of land as necessary for sites for radio shore stations; equipage, supplies, and materials under the cognizance of the bureau required for the maintenance and operation of naval vessels, yard craft, and ships' boats; purchase, installation, repair, and preservation of machinery, tools, and appliances in navy yards and stations; pay of technical, drafting, inspection, and classified force under the bureau; incidental expenses for naval vessels, navy yards and stations, inspectors' offices, the engineering experiment station, such as photographing, technical books, and periodicals, stationery, and instruments; instruments and apparatus, supplies, and technical books and periodicals necessary to carry on experimental and research work in radiotelegraphy at the naval radio laboratory.

The amendment was agreed to.

The next amendment was in the item of appropriation for engineering, on page 142, line 1, after the word "clerical," to strike out "drafting, inspection"; in line 6, after the word "exceed," to strike out "$801,876.28" and insert "$350,000"; and in line 8, after "$10,000," to insert:

Provided further, That such land of the United States under the control of a particular department or other branch of the Government that has been or may hereafter be mutually selected as a site for a naval radio station may, by direction of the President, be transferred to and placed under the control and jurisdiction of the Navy Department for use as a naval radio station or other naval purposes: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical and messenger service in navy yards, naval stations, and offices of the United States inspectors of machinery and engineering material for the fiscal year ending June 30, 1917, shall not exceed $350,000: *Provided further*, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $10,000: *Provided further*, That such land of the United States under the control of a particular department or other branch of the Government that has been or may hereafter be mutually selected as a site for a naval radio station may, by direction of the President, be transferred to and placed under the control and jurisdiction of the Navy Department for use as a naval radio station or other naval purposes.

Mr. BRANDEGEE. To what does the word "mutually" refer?

Mr. SWANSON. I take it it means between the different departments of the Government. I think the purpose is to transfer certain land that might belong to the Army to the radio stations of the Navy.

Mr. BRANDEGEE. If the Senator from Virginia is clear about that, I shall not now delay the consideration of the bill, but it does not seem to me to be at all so from its hasty reading at the desk. I could not tell as the Secretary read the language whether it meant the land was to be mutually agreed upon by a certain department and by the President, and then by direction of the President to be set aside, or what it did mean. I do not yet feel clear about it.

Mr. SWANSON. We will correct it in conference.

Mr. BRANDEGEE. Let it be corrected in conference.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 142, line 25, to increase the total appropriation for the Bureau of Steam Engineering from "$9,051,876.28" to "$9,056,376.28."

The amendment was agreed to.

The next amendment was, on page 142, line 25, after the amendment just adopted, to insert the following proviso:

Provided further, That an expenditure under this appropriation of not exceeding $4,500 is authorized for the installation of a pneumatic tube between the communication office in the State, War, and Navy Building, and the branch communication office in the Navy annex.

The amendment was agreed to.

The next amendment was, under the subhead "Naval Academy," on page 145, line 10, after "$2,400," to insert "2 clerks, at $1,800 each"; in line 13, before the word "clerks," to strike out "four" and insert "two"; and in line 19, after the words "Naval Academy," to strike out "$238,860" and insert "$240,780," so as to make the clause read:

One swordmaster, $1,600; 1 assistant, $1,200; and 2 assistants, at $1,000 each; 2 instructors in physical training, at $1,500 each; and 1 assistant instructor in physical training, at $1,000; and 1 instructor in gymnastics, $1,200; 1 assistant librarian, $2,160; 1 cataloguer, $1,200; and 2 shelf assistants, at $900 each; 1 secretary of the Naval Academy, $2,400; 2 clerks, at $1,800 each; 2 clerks, at $1,500 each; 4 clerks, at $1,200 each; 4 clerks, at $1,000 each; 4 clerks, at $900 each; 2 clerks, at $840 each; 1 stenographer, at $840; 1 draftsmen, $1,200; 1 surveyor, $1,200; services of organist at chapel, $300; 1 captain of the watch, $1,100; 1 second captain of the watch, $1,000; 22 watchmen, at $900 each; 3 telephone switchboard operators, at $600 each; 1 attendant, at $300. In all, pay of professors and others, Naval Academy, $240,780.

The amendment was agreed to.

The next amendment was, on page 147, line 4, after the words "civil establishment," to strike out "$334,521.92" and insert "$336,441.92," so as to read:

In all, civil establishment, $336,441.92.

The amendment was agreed to.

The next amendment was, on page 147, after line 16, to strike out, "Expenses of the Board of Visitors of the Naval Academy, being actual expenses while engaged upon duties as members of the board not to exceed $5 a day and actual expenses of travel by the shortest mail routes, and for clerk hire, and other incidental and necessary expenses of the board, $500," and insert:

From and after the passage of this act there shall be appointed every year, in the following manner, a board of visitors, to attend the annual examination of the academy: Seven persons shall be appointed by the President and two Senators and three Members of the House of Representatives shall be designated as visitors by the Vice President or President pro tempore of the Senate and the Speaker of the House of Representatives, respectively, at the session of Congress next preceding such examination. The chairman of the Committee on Naval Affairs of the Senate and chairman of the Committee on Naval Affairs of the House of Representatives shall be ex officio members of said board.

Each member of said board shall receive not exceeding 8 cents per mile traveled by the most direct route from his residence to Annapolis and 8 cents per mile for each mile from said place to his residence on returning.

For expenses of the Board of Visitors to the Naval Academy, $3,000.

Mr. PENROSE. Mr. President, I should like to ask the Senator from Virginia what the law is at present regarding the number of Senators and Representatives who are appointed as visitors to the Naval Academy?

Mr. SWANSON. The present Board of Visitors is composed of Senators and Representatives——

Mr. PENROSE. I understand that; but is there any limit to the number?

Mr. SWANSON. I think there is a limit, though I forget the exact number.

Mr. PENROSE. I do not at all object to it; in fact, I think it is a very excellent provision to have seven civilians appointed by the President; but it seems to me that the bill has fixed a rather low limit on the number of Senators and Representatives who should visit the academy. I feel that every Senator and Representative who goes to the academy comes back with information which is of value in the discharge of his duties.

I know also how difficult it is to get Senators and Representatives to visit the academy, but it seems to me as if this were rather a low limit. I do not know whether the Senator

from Virginia has given the subject any special attention, but would he object to making the number on the board 5 Senators and 10 Representatives?

Mr. SWANSON. The board is now composed, as I understand, of 2 Senators, 3 Members of the other House, and 7 civilians, 12 in all, and it seems to me that that is enough.

Mr. PENROSE. The bill provides for only two Senators.

Mr. SWANSON. For two Senators and three Representatives.

Mr. PENROSE. It is not an important matter, but I really think the more Senators and Representatives visit the academy the better able they will be to cope with the many complex questions that come up in Congress in connection with legislation for the acadamy and for the discipline of the cadet corps.

The VICE PRESIDENT. The Chair has no right to interfere, but, as the Chair reads the amendment, the language is identical with the present law.

Mr. PENROSE. I should like simply to ask the Senator, by unanimous consent, if I am out of order, whether he does not think he has the limit rather low?

Mr. SWANSON. This amendment provides for a board of 12 members—7 civilians, 2 Senators, and 3 Members of the House. I have no objection to increasing the number and taking it to conference.

Mr. PENROSE. I would suggest to the Senator to increase the number slightly, because I was once a visitor to the academy, and I know how much I learned when I was there which has been useful to me in participating in the consideration of such legislation.

Mr. SWANSON. Does the Senator suggest three Senators and three Members of the other House?

Mr. PENROSE. I should be almost willing to suggest five Senators and 10 Representatives, if the Senator from Virginia does not think that too large a number, but I do not press it.

Mr. SWANSON. If the members of this board do not happen to be in Washington, it might be very expensive for them to visit the academy if they were at home, a long distance away.

Mr. PENROSE. I leave the matter to the Senator. I merely desired to call his attention to it. I repeat, however, I think he has the number a little low.

Mr. SWANSON. I offer the amendment that we appoint four Senators——

Mr. PENROSE. The expense would not be very much of an item compared to the good which would be accomplished.

Mr. SWANSON. I am willing to adopt any number the Senator may suggest—four Senators and five Members of the other House and then the chairmen of the Committee on Naval Affairs of the two Houses as members. I offer an amendment to the amendment to that effect.

Mr. PENROSE. Make it four Senators and five Members of the other House.

Mr. WEEKS. Mr. President, I am sorry to find the Committee on Naval Affairs has gone back to what I consider the discredited method of carrying out an antiquated provision of the law. The old method was to have the Board of Visitors to the Military and Naval Academies made up of three or four Senators and Representatives and a half dozen or more civilians. The inspection which is made is at the time of the annual examinations, when everything is on dress parade, and no useful purpose is accomplished by attending at such a time. Incidentally the board does not have an opportunity to witness the conduct of the affairs of the academy, as the academy is carried on from day to day and from week to week, but simply preparation is made for them in the shape of drills and examinations without any opportunity to witness the instruction or the courses which are being taken or anything of that sort.

My judgment is that while the cost of visitors going to the academy is not expensive, and therefore is not of great importance, it is a waste of money. If provision were made to send civilian visitors there during the actual course—that is to say, while the actual course was being conducted at any time during the year—let them drop in there from time to time and witness the drills, the recitations, and the conduct of other affairs at the academy, they would get some knowledge of matters them which would enable them to make recommendations which would be of importance in conducting that institution.

Mr. CLAPP. Will the Senator from Massachusetts allow an interruption?

Mr. WEEKS. I will do so in just a moment. I do not believe that the recommendations of a Board of Visitors to the Naval Academy was ever looked at by a Senator or by a Representative since the beginning of time; I do not think any consideration was ever given to their report; but whatever report they make is based on the recommendations of officers stationed at the academy at the time, recommendations which should be made in the usual course if it were desirable to do so.

I am not going to make a motion to strike out this provision, but I wanted to submit these observations, because I think it is a foolish waste of public money and a foolish method of attempting to correct any policies or methods at the academy, which might be changed if they were inspected by proper officials.

Mr. CLAPP. I want to ask the Senator from Massachusetts if his criticism as to civilians going to the academy when the institution is on dress parade would not apply with equal force to Members of the Senate and House of Representatives going there?

Mr. WEEKS. I think so, absolutely. I think Members of the Senate and of the House should go to the Naval Academy and should go to West Point during the term when they can see work as it is being done and learn something, as the Senator from Pennsylvania [Mr. PENROSE] has suggested. What we should do is to have visitors go there who not only can get information, but who are competent to make suggestions which will improve the course or improve the methods followed at the academy and the manner of conducting it. This meeting of the Board of Visitors is entirely foreign to any such result.

Mr. CLAPP. I think myself it is very valuable to have civilian visitors to the academies at West Point and Annapolis. They become interested, and we obtain suggestions from them. I quite agree, however, with the Senator that the visitation by anybody to an institution when the visitation is anticipated is very apt to involve a certain degree of preparation for the visitors and a dress parade condition for their inspection.

Mr. PENROSE. Mr. President, I will ask the Senator from Massachusetts whether he would approve of a suggestion that the annual visit should be made at a date designated by the Secretary of the Navy?

Mr. WEEKS. Mr. President, it would be an improvement if the visit were made at any other time than at the time of the annual graduation ceremonies.

Mr. PENROSE. Well, rather than fix an arbitrary date, I move to amend the amendment—and it can be considered in conference—so that it will read:

The date of the annual visit of the board aforesaid to be fixed by the Secretary of the Navy.

Mr. SWANSON. I will accept the amendment for the consideration of the conferees.

The VICE PRESIDENT. The Secretary will state the amendment proposed by the Senator from Pennsylvania to the amendment reported by the committee, and the Chair will ask the Senator from Pennsylvania to note the amendment prepared by the Secretary to see whether it carries out his idea.

The SECRETARY. In the amendment of the committee on page 147, line 24, after the word "to," it is proposed to strike out "attend the annual examination of the academy" and insert "visit annually the academy, the date of the annual visit of the board aforesaid to be fixed by the Secretary of the Navy," so as to read:

From and after the passage of this act there shall be appointed every year, in the following manner, a Board of Visitors, to visit the academy, the date of the annual visit of the board aforesaid to be fixed by the Secretary of the Navy.

Mr. SHAFROTH. I suggest that it might be better to insert the words "at a date to be fixed by the Secretary of the Navy" following the words "to attend the annual examination of the academy."

Mr. LODGE. The annual examination is a fixed date, and that would not meet the object of the Senator from Pennsylvania.

Mr. SHAFROTH. Very well.

Mr. PENROSE. I think the amendment is all right as the Secretary has read it.

Mr. SWANSON. I accept the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The Senator from Virginia has proposed an amendment to the amendment, which the Secretary will now state.

The SECRETARY. In the committee amendment on page 147, line 25, after the word "and," it is proposed to strike out "two" and insert "four"; and on page 148, line 1, after the word "and," to strike out "three" and insert "five," so as to read: "and four Senators and five Members of the House of Representatives."

The VICE PRESIDENT. Without objection the amendment to the amendment is agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 149, line 17, after the words "Naval Academy," to strike out "$701,446.92" and insert "$705,866.92"; so as to make the clause read:

In all, Naval Academy, $705,866.92.

The amendment was agreed to.

The next amendment was, under the subhead "Marine Corps," on page 149, line 21, after the word "paymasters," to strike out "seven" and insert "nine," and in line 22, after the word "authorized," to strike out "$1,328,749" and insert "$1,421,849," so as to make the clause read:

Pay, Marine Corps: Pay of officers, active list: For pay and allowances prescribed by law of officers on the active list, including clerks for assistant paymasters, nine, and for the following additional officers hereby authorized, $1,421,849.

The amendment was agreed to.

The next amendment was, in the item of appropriation for pay, Marine Corps, on page 151, line 1, after the word "colonel," to insert the following proviso:

Provided further, That the officers serving in the senior grades of the Adjutant and Inspector's, Quartermaster's, and Paymaster's Departments shall, while serving therein, have the rank, pay, and allowances of a brigadier general: *And provided further*, That for the purpose of determining the number of officers in the various ranks as herein provided such staff officers shall be counted as being of the rank of colonel: *And provided further*, That officers holding permanent appointments in the staff departments shall not be eligible for appointment to the grade of brigadier general of the line, as hereinbefore provided.

The amendment was agreed to.

The next amendment was, on page 155, line 6, after the words "Marine Corps," to insert "or Navy Pay Corps," and in line 8, after the words "Marine Corps," to insert "or Navy Pay Corps," so as to make the clause read:

The President is hereby authorized, within two years after the approval of this act, by and with the advice and consent of the Senate, to transfer to the active list of the Marine Corps or Navy Pay Corps any officer under 50 years of age who may have been transferred from the active list to the retired list of the Marine Corps or Navy Pay Corps by the action of any retiring board for physical disability incurred in the line of duty: *Provided*, That such officer shall be transferred to the place on the active list which he would have had if he had not been retired, and shall be carried as an additional number in the grade to which he may be transferred or at any time thereafter promoted: *Provided further*, That such officer shall establish to the satisfaction of the Secretary of the Navy his mental, moral, professional, and physical qualifications to perform the duties on the active list of the grade to which he is transferred. The provisions of sections 1493 and 1494 of the Revised Statutes of the United States shall apply to the Marine Corps.

The amendment was agreed to.

The next amendment was, on page 155, after line 21, to insert:

In lieu of suspension from promotion of any officer of the Marine Corps who hereafter fails to pass a satisfactory professional examination for promotion, or who is now under suspension from promotion by reason of such failure, such officer shall suffer loss of numbers, upon approval of the recommendation of the examining board, in the respective ranks, as follows: Lieutenant colonel, 1; major, 2; captain, 3; first lieutenant, 5; second lieutenant, 8: *Provided*, That any such officer shall be reexamined as soon as may be expedient after the expiration of six months if he in the meantime again becomes due for promotion, and if he does not in the meantime again become due for promotion he shall be reexamined at such time anterior to again becoming due for promotion as may be for the best interests of the service: *Provided further*, That if any such officer fails to pass a satisfactory professional reexamination he shall be honorably discharged, with one year's pay, from the Marine Corps.

The amendment was agreed to.

The next amendment was, on page 157, line 1, before the words "sergeants major," to strike out "Seventeen" and insert "Twenty-eight"; in line 2, before the words "quartermaster sergeants," to strike out "seventy-two" and insert "one hundred and seventeen"; in line 3, before the words "first sergeants," to strike out "sixty-five" and insert "one hundred and seven"; in line 4, before the words "gunnery sergeants," to strike out "sixty-five" and insert "one hundred and seven"; in line 5, before the word "hundred," to strike out "three" and insert "five"; in line 6, before the word "corporals," to strike out "five hundred" and insert "eight hundred and thirty-five"; in the same line, before the word "drummers," to strike out "thirty" and insert "fifty"; in the same line, before the word "trumpeters," to strike out "thirty" and insert "fifty"; in line 7, before the word "privates," to strike out "two thousand" and insert "three thousand two hundred and thirty-five"; and in line 20, after the words "In all," to strike out "$3,434,582.52" and insert "$3,665,942.52," so as to make the clause read:

Pay of enlisted men, active list: Pay and allowances of noncommissioned officers, musicians, and privates, as prescribed by law, and for the following additional enlisted men hereby authorized: Twenty-eight sergeants major, 117 quartermaster sergeants, 107 first sergeants, 107 gunnery sergeants, 500 sergeants, 835 corporals, 50 drummers, 50 trumpeters, 3,235 privates; and hereafter the number of enlisted men of the Marine Corps shall be exclusive of those sentenced by court-martial to discharge, and for the expenses of clerks of the United States Marine Corps traveling under orders, and including additional compensation for enlisted men of the Marine Corps regularly detailed as gun captains, gun pointers, mess sergeants, cooks, messmen, signalmen, or holding good-conduct medals, pins, or bars, including interest on deposits by enlisted men, post-exchange debts of deserters, under such rules as the Secretary of the Navy may prescribe, and the authorized travel allowance of discharged enlisted men and for prizes for excellence in gunnery exercise and target practice, both afloat and ashore. In all, $3,665,942.52.

The amendment was agreed to.

The next amendment was, on page 157, after line 21, to insert:

The President is authorized when in his judgment it becomes necessary to place the country in a complete state of preparedness, to further increase the enlisted strength of the Marine Corps to 17,400: *And provided*, That the distribution in the various grades shall be in the same proportion as that authorized at the time when the President avails himself of the authority herein granted.

The amendment was agreed to.

The next amendment was, on page 159, line 7, after the word "undrawn," to strike out "$90,000" and insert "$100,000," so as to make the clause read:

Undrawn clothing: For payment to discharged enlisted men for clothing undrawn, $100,000.

The amendment was agreed to.

The next amendment was, on page 159, line 9, after the word "troops," to strike out "$55,000" and insert "$58,000," so as to make the clause read:

Mileage: For mileage to officers traveling under orders without troops, $58,000.

The amendment was agreed to.

The next amendment was, on page 159, line 11, after the word "quarters," to strike out "$56,000" and insert "$61,000," so as to make the clause read:

For commutation of quarters of officers on duty without troops where there are no public quarters, $61,000.

The amendment was agreed to.

The next amendment was, on page 160, line 9, after the words "Marine Corps," to strike out "$5,331,406.30" and insert "$5,673,866.30," so as to make the clause read:

In all, pay, Marine Corps, $5,673,866.30.

The amendment was agreed to.

The next amendment was, under the subhead "Maintenance, Quartermaster's Department, Marine Corps," on page 160, line 24, after the word "rations," to strike out "$1,150,068.90" and insert "$1,491,621.90," so as to read:

Provisions, Marine Corps: For noncommissioned officers, musicians, and privates serving ashore; subsistence and lodging of enlisted men when traveling on duty, or cash in lieu thereof; commutation of rations to enlisted men regularly detailed as clerks and messengers; payments of board and lodging of applicants for enlistment while held under observation, recruits, and recruiting parties, or in lieu of board, commutation of rations to recruiting parties; transportation of provisions, and the employment of necessary labor connected therewith; ice machines and their maintenance where required for the health and comfort of the troops and for cold storage; ice for offices and preservation of rations, $1,491,621.90.

The amendment was agreed to.

The next amendment was, on page 161, line 14, after the word "law," to strike out "$926,423.50" and insert "$1,158,058.50," so as to make the clause read:

Clothing, Marine Corps: For noncommissioned officers, musicians, and privates, authorized by law, $1,158,058.50.

The amendment was agreed to.

The next amendment was, on page 161, line 20, after the word "officers," to strike out "$217,092,660" and insert "$243,561.92," so as to make the clause read:

Fuel, Marine Corps: For heat, light, and commutation thereof for the authorized allowance of quarters for officers and enlisted men, and other buildings and grounds pertaining to the Marine Corps; fuel, electricity, and oil for cooking, power, and other purposes; and sales to officers, $243,561.92.

The amendment was agreed to.

The next amendment was, on page 162, line 23, after the word "supplies," to insert "including a reserve supply of small-arms ammunition"; and in line 24, after the words "in all," to strike out "$713,648.78" and insert "$1,657,021.74," so as to make the clause read:

Military stores, Marine Corps: Pay of chief armorer, at $4 per diem; one mechanic, at $3 per diem; two mechanics, at $2.50 each per diem; one chief electrician, at $4 per diem, and one assistant electrician, at $3.50 per diem; per diem of enlisted men employed on constant labor for periods of not less than 10 days; purchase of two armored automobiles, to cost not exceeding $10,000 each, military equipments, such as rifles, revolvers, cartridge boxes, bayonet scabbards, haversacks, blanket bags, canteens, rifle slings, swords, drums, trumpets, flags, waistbelts, waist plates, cartridge belts, spare parts for repairing rifles, machetes; purchase and repair of tents, field cots, field ovens, and stoves for tents; purchase and repair of instruments for bands; purchase of music and musical accessories; purchase and marking of prizes for excellence in gunnery and rifle practice; good-conduct badges; medals awarded to officers and enlisted men by the Government for conspicuous, gallant, and special service; incidental expenses of schools of application; construction, equipment, and maintenance of school, library, and amusement rooms and gymnasiums for enlisted men, and the purchase and repair of all articles of field sports for enlisted men; purchase and repair of signal equipment and stores; establishment and maintenance of targets and ranges, renting ranges, construction of buildings for temporary shelter and preservation of stores, and entrance fees in competitions; procuring, preserving, and handling ammunition and other necessary military supplies including a reserve supply of small-arms ammunition; in all, $1,657,021.74.

The amendment was agreed to.

The next amendment was, on page 163, line 24, after the word "service," to strike out "$459,711.65" and insert "$549,630.65," so as to read:

Transportation and recruiting, Marine Corps: For transportation of troops and of applicants for enlistment between recruiting stations and recruit depots or posts, including ferriage and transfers en route, or cash in lieu thereof; toilet kits for issue to recruits upon their first enlistment and the expense of the recruiting service, $549,630.65.

The amendment was agreed to.

The next amendment was, on page 164, line 12, after the word "days," to strike out "$170,000" and insert "$220,000," so as to make the clause read:

Repairs of barracks, Marine Corps: Repairs and improvements to barracks, quarters, and other public buildings at posts and stations; for the renting, leasing, improvement, and erection of buildings in the District of Columbia and at such other places as the public exigencies require; and for per diem to enlisted men employed under the direction of the Quartermaster's Department on the repair of barracks, quarters, and other public buildings on constant labor for periods of not less than 10 days, $220,000.

The amendment was agreed to.

The next amendment was, on page 164, line 14, after the word "horses," to strike out "$39,246" and insert "$80,306," so as to make the clause read:

Forage, Marine Corps: For forage in kind and stabling for public animals of the Quartermaster's Department and the authorized number of officers' horses, $80,306.

The amendment was agreed to.

The next amendment was, on page 165, line 3, after the words "per month," to strike out "$107,512" and insert "$111,928," so as to make the clause read:

Commutation of quarters, Marine Corps: Commutation of quarters for enlisted men on recruiting duty, for officers and enlisted men serving with troops where there are no public quarters belonging to the Government, and where there are not sufficient quarters possessed by the United States to accommodate them; commutation of quarters for enlisted men employed as clerks and messengers in the offices of the commandant, adjutant and inspector, paymaster, and quartermaster, and the offices of the assistant adjutant and inspectors, assistant paymasters, assistant quartermasters, at $21 each per month, and for enlisted men employed as messengers in said offices, at $10 each per month, $111,928.

The amendment was agreed to.

The next amendment was, in the item of appropriation for "Contingent, Marine Corps," on page 166, line 21, after the word "classify," to strike out "$654,345" and insert "$846,385," so as to make the clause read:

Improving parade grounds; repair of pumps and wharves; water; straw for bedding, mattresses; mattress covers, pillows, sheets, furniture for Government quarters and repair of same; packing and crating officers' allowance of baggage on change of station; deodorizers, lubricants, disinfectants; and for all emergencies and extraordinary expenses arising at home and abroad but impossible to anticipate or classify, $846,385.

The amendment was agreed to.

The next amendment was, on page 166, line 24, after the words "Marine Corps," to strike out "$4,469,048.49" and insert "$6,389,513.71," so as to make the clause read:

In all, for the maintenance of Quartermaster's Department, Marine Corps, $6,389,513.71; and the money herein specifically appropriated for the maintenance of the Quartermaster's Department, Marine Corps, shall be disbursed and accounted for in accordance with existing law as maintenance, Quartermaster's Department, Marine Corps, and for that purpose shall constitute one fund.

The amendment was agreed to.

The next amendment was, on page 167, after line 4 to insert:

For the authorized expenses of the Marine Corps reserve, $25,000.

The amendment was agreed to.

The next amendment was, on page 167, line 7, after the words "public works," to strike out "$9,800,454.79" and insert "$12,088,380.01," so as to make the clause read:

Total Marine Corps, exclusive of public works, $12,088,380.01.

The amendment was agreed to.

The next amendment was, under the subhead "Increase of the Navy," on page 167, after line 9, to strike out:

For the purpose of further increasing the Naval Establishment of the United States the President of the United States is hereby authorized to have constructed five battle cruisers carrying suitable armor and as powerful armament as any other vessel of their class, to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $15,000,000 each.

Four scout cruisers, carrying suitable protection and armament suited to their size and type, to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $4,500,000 each.

Ten torpedo-boat destroyers, to have the highest practicable speed and greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $1,000,000 each: *Provided*, That four of said torpedo-boat destroyers herein authorized shall be built on the Pacific coast: *Provided further*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

Fifty submarines, of which number three shall be of a surface displacement of about 800 tons each, to cost, exclusive of armor and armament, not to exceed $1,100,000 each, and the remaining 47 submarines shall be the best and most desirable and useful type of a submarine which can be procured at a cost, exclusive of armor and armament, not to exceed $625,000 each, and the sum of $9,387,000 is hereby appropriated for said purposes, to be available until expended.

Fifteen of the submarines herein authorized shall be built on the Pacific coast: *Provided*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic plus the cost of transportation from the Atlantic to the Pacific.

One fuel-oil ship, to cost, exclusive of armor and armament, not to exceed $1,265,000.

One ammunition ship, to cost, exclusive of armor and armament, not to exceed $2,600,000.

One hospital ship, to cost not to exceed $2,250,000.

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels: *Provided*, That the Secretary of the Navy is hereby authorized to build any of the vessels herein authorized in such navy yards as he may designate.

Construction and machinery: On account of hulls and outfits of vessels and machinery of vessels heretofore and herein authorized, to be available until expended, $47,366,860.

Increase of the Navy, torpedo boats: On account of submarine torpedo boats heretofore authorized, to be available until expended, $5,282,593.

Increase of the Navy, armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $33,896,060.

Increase of the Navy, ammunition: For ammunition for the vessels herein authorized, to be available until expended, $11,329,925.

Total increase of the Navy heretofore and herein authorized, $107,262,438.

And insert:

For the purpose of further increasing the Naval Establishment of the United States the President of the United States is hereby authorized to undertake prior to July 1, 1919, the construction of the vessels enumerated below:

Ten first-class battleships, carrying as heavy armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; four of these at a cost, exclusive of armor and armament, not to exceed $11,500,000 each, to be begun as soon as practicable.

Six battle cruisers, carrying suitable armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; four of these to cost, exclusive of armor and armament, not to exceed $16,500,000 each, to be begun as soon as practicable.

Ten scout cruisers, carrying suitable protection and armament suited to their size and type, to have the highest practicable speed and greatest desirable radius of action; four to cost, exclusive of armor and armament, not to exceed $5,000,000 each, to be begun as soon as practicable.

Fifty torpedo-boat destroyers, to have the highest practicable speed and greatest desirable radius of action; 20 to cost, exclusive of armor and armament, not to exceed $1,200,000 each, to be begun as soon as practicable: *Provided*, That not less than 4 of these shall be built on the Pacific coast: *Provided further*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

Nine fleet submarines.

Fifty-eight coast submarines, of which number 3 to have a surface displacement of about 800 tons each, to cost, exclusve of armor and armament, not to exceed $1,200,000 each, and 27, which shall be the best and most desirable and useful type of submarine which can be procured at a cost, exclusive of armor and armament, not to exceed $700,000 each, shall be begun as soon as practicable; and the sum of $8,217,000 is hereby appropriated for the construction of said submarines, to be available until expended. Not less than 12 of the submarines herein authorized to be begun as soon as practicable shall be built on the Pacific coast: *Provided*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

One submarine, equipped with the Neff system of submarine propulsion, exclusive of armor and armament, $250,000: *Provided*, That the owners of the Neff system of submarine propulsion will construct, in accordance with drawings, plans, and specifications provided by them, one coast-defense submarine of about 150 tons displacement when submerged, carrying armor and armament similar and equal to that of the "C" class of submarines, with fittings, equipment, machinery, devices, appliances, and appurtenances of every kind with latest improvements, complete in all respects, and suitable for naval purposes: *Provided further*, That the money appropriated for this purpose shall not be paid to the builders of said boat until the same has been completed, passed satisfactory service tests, and been accepted by the Secretary of the Navy; but upon such completion, tests, and acceptance by the Secretary of the Navy the sum appropriated shall be paid.

Three fuel ships, one at a cost not to exceed $1,500,000, to be begun as soon as practicable.

One repair ship.

One transport.

One hospital ship, at a cost not to exceed $2,350,000, to be begun as soon as practicable.

Two destroyer tenders.

One fleet submarine tender.

Two ammunition ships, one at a cost, exclusive of armor and armament, not to exceed $2,350,000, to be begun as soon as practicable.

Two gunboats, one at a cost, exclusive of armor and armament, not to exceed $860,000, to be begun as soon as practicable: *Provided*, That the 66 vessels directed herein to be begun as soon as practicable shall be contracted for or shall be begun in navy yards within six months from the date of the approval of this act.

The Secretary of the Navy shall build any of the vessels herein authorized in such navy yards as he may designate should it reasonably appear that the persons, firms, or corporations, or the agents thereof, bidding for the construction of any of said vessels have entered into any combination, agreement, or understanding the effect, object, or

purpose of which is to deprive the Government of fair, open, and unrestricted competition in letting contracts for the construction of any of said vessels: *Provided*, That the Secretary of the Navy is hereby authorized to build any of the vessels herein authorized in such navy yards as he may designate.

Construction and machinery: On account of hulls and outfits of vessels and machinery of vessels heretofore and herein authorized, to be available until expended, $59,000,194.

Increase of the Navy, torpedo boats: On account of submarine torpedo boats heretofore authorized, to be available until expended, $5,282,593.

Increase of the Navy, armor and armament: Toward the armor and armament for vessels heretofore and herein authorized, to be available until expended, $47,110,000.

Increase of the Navy, ammunition: Toward ammunition for the vessels herein authorized, to be available until expended, $19,485,500.

Total increase of the Navy heretofore and herein authorized, $139,345,287.

Mr. THOMAS. Mr. President, the amendment just read is, of course, the most important part of the bill, and will very naturally provoke some discussion. I suggest to the Senator having the bill in charge that this amendment be passed over and the bill proceeded with, so that the reading of the bill can be completed this evening.

Mr. SWANSON. I have no objection, Mr. President.

Mr. NORRIS. Mr. President, I could not hear the request.

Mr. SWANSON. The Senator from Colorado requested that this amendment be passed over, and I consent to that.

Mr. NORRIS. I was going to make the same request.

Mr. VARDAMAN. Mr. President, may I ask the Senator in charge of the bill a question?

Mr. SWANSON. Certainly.

Mr. VARDAMAN. The Senator is not going to try to force the bill to final passage this afternoon, is he?

Mr. SWANSON. No; I have no purpose of forcing it to final passage this afternoon.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment was, on page 174, after line 21, to strike out:

In the event the Secretary of the Navy is unable to secure from the shipbuilders contracts for the expeditious construction of the ships herein authorized at a fair and reasonable price, the sum of $6,000,000, or so much thereof as may be necessary, is hereby appropriated to enable the Secretary of the Navy to equip the navy yards at Puget Sound, Philadelphia, Norfolk, Boston, Portsmouth, Charleston, and New Orleans with suitable and necessary machinery, implements, building ways, and equipment for the construction of such of the ships herein authorized as may be assigned to such yard for construction. The yards at Puget Sound, Philadelphia, Norfolk, and Boston to be equipped for the construction of capital ships.

And insert:

The Secretary of the Navy is authorized to improve and equip the navy yards at Puget Sound, Philadelphia, Norfolk, Boston, Portsmouth, Charleston, and New Orleans for the construction of such ships herein or as may be hereafter authorized as may be assigned to such yards for construction, and the sum of $6,000,000, or so much thereof as may be necessary, is hereby appropriated for this purpose: *Provided*, That the navy yards at Puget Sound, Norfolk, and Boston shall be equipped for the construction of capital ships forthwith.

Mr. PENROSE. Mr. President, I desire to call the attention of the Senator from Virginia to the fact that in line 16 Philadelphia has been apparently omitted by a printer's error, as it appears in the paragraph which was amended in line 6. I will ask unanimous consent to insert "Philadelphia" before "Norfolk," in line 16.

Mr. SWANSON. I have no objection.

Mr. PENROSE. It is evidently an error.

Mr. SWANSON. That was included in the House bill.

Mr. PENROSE. Yes; it was included in the House bill.

The VICE PRESIDENT. That will be done by unanimous consent.

Mr. BROUSSARD. Mr. President, the amendment of the committee enumerates a number of navy yards which the Secretary of the Navy is authorized to improve and equip, with a view to the use of these navy yards in the construction of ships provided for in the bill. The proviso of the amendment specifies Puget Sound, Norfolk, and Boston, and, I understand, by the amendment of the Senator from Pennsylvania, Philadelphia, for the larger ships; and it is made obligatory that the Secretary shall forthwith prepare these navy yards with a view of constructing there the largest ships provided in this bill. With regard to the other navy yards recited in the amendment, the authority is given to the Secretary, and an appropriation of $6,000,000 is made, to equip these navy yards; but there is no direct instruction to the Secretary to equip and improve any one of these navy yards, thus leaving the matter entirely to the discretion of the Secretary.

I desire to call the attention of the chairman of the committee to the fact that so far as our experience goes, if this authority is placed in the discretion of the Secretary, nothing will be done, so far as the naval station at New Orleans is concerned, toward equipping it with a view of building any of the ships provided for in this bill. The policy of the Navy Department with regard to that naval station is such that we of Louisiana are warranted in believing that the name of the station at New Orleans might as well be entirely left out of this amendment unless it is the purpose of the committee to utilize that station in the construction of the smaller vessels.

I will ask the chairman of the committee if this amendment might not be further amended so as to direct the Secretary of the Navy to utilize this appropriation toward the equipment of the yards recited therein with a view of getting them in readiness for their share of the construction of the number of vessels provided for in the bill?

Mr. SWANSON. The provision is that the Secretary is authorized to improve and equip them.

Mr. BROUSSARD. He is authorized, but he is not directed to do it, as he is in regard to Puget Sound, Boston, Norfolk, and Philadelphia, regarding the construction of the larger ships in those yards. Now, I do not object at all to the direction given with regard to these larger yards, and to the direction given to the Secretary forthwith to equip those yards, but, in so far as the other yards are concerned that are not enumerated in the proviso, it is left discretionary with the Secretary as to whether or not he shall equip those yards with a view of their utilization in the construction of the smaller ships.

Mr. SWANSON. If the Senator will permit me, we put in the language that is usually used for appropriations. The House provision left it entirely discretionary. We thought it should not be left discretionary on certain conditions occurring, so we used the language that is usually used—that he is authorized to equip them. Some of the yards that were included have not been investigated, and we thought there ought to be some little discretion, though the language is as strong as the language that is usually used in authorizations for any of the navy yards in the previous part of the bill; and we made it much stronger than the House provision.

Mr. BROUSSARD. I will call the attention of the chairman of the committee to the fact that in so far as the navy yards provided for in the proviso are concerned, there is an absolute direction, an absolute command, that these yards shall be equipped, and in so far as the other yards are concerned the Secretary is simply authorized to equip them. So that the one is mandatory, and the other, after all, is in the discretion of the Secretary. He may or he may not equip them.

I know that the provision placed in the bill by the House has been improved upon by the amendment of the Senate committee; but would it not be proper to insert, after the word "authorized," the words "and directed," so that it would read that he is authorized and directed to equip them? This would make it mandatory with regard to the yards, say, at Charleston and New Orleans, and place them in the same category with regard to the construction of the smaller vessels in those yards as with regard to the construction of the larger vessels in the yards enumerated in the proviso.

I move that after the word "authorized" the words "and directed" be inserted.

Mr. SHAFROTH. Mr. President, does the Senator believe that no discretion should be left to the Secretary?

Mr. BROUSSARD. Oh, I believe that all discretion should be left to him; and there is plenty of discretion if you insert the words "and directed," because there is a lump appropriation of $6,000,000 to provide for half a dozen or more navy yards, and he can expend just as much or just as little as he pleases on each yard.

Mr. SHAFROTH. In view of the fact that the Congress does not know the condition of the navy yards, is it not best to leave it to his discretion?

Mr. BROUSSARD. I will state to the Senator that I am as convinced as I am of anything in the future that unless there is some direction with regard to this matter the station at New Orleans will not be looked after, or will be entirely overlooked; and so far as that station is concerned, the name might as well be left out of the provision if the Secretary is not directed to equip the yard at New Orleans.

Mr. SHAFROTH. If that is true, it is because the construction can not be done as well there.

Mr. BROUSSARD. Oh, I do not believe that at all.

Mr. SHAFROTH. We are not capable here, with the present data before us, of determining that, and I do not believe that these yards ought to be improved unless the cheapest and the best construction can be carried on there. This thing of our designating a place that is not the best, and making it mandatory upon the part of the Secretary of the Navy, seems to me to be absurd. If New Orleans is a place where these vessels can be constructed better and cheaper, it ought to get all of them

that its capacity justifies; but if it is not, the work ought to go to those places where it can be done cheaper and better. It is not that this construction ought to be distributed around. It ought to be a question of the efficiency of the construction at particular points.

Mr. SWANSON. If the Senator will permit me, it seems to me that if we put in the word "shall," so as to read "and shall equip," it will limit it to such vessels as may be assigned there.

Mr. BROUSSARD. That will be satisfactory.

Mr. SWANSON. I think the insertion of the word "shall" there will leave a discretion that is reasonable.

Mr. BROUSSARD. I move that the word "shall" be inserted.

The PRESIDING OFFICER (Mr. KENYON in the chair). Will the Senator state exactly where his amendment comes in?

Mr. BROUSSARD. In line 10, page 175, before the word "equip," I move to insert the word "shall."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On line 10, in the committee amendment on page 175, before the word "equip," the first word in the line, it is proposed to insert the word "shall."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. NORRIS. I offer an amendment, which I desire to have printed and lie on the table.

The PRESIDING OFFICER. Without objection, it will be so ordered.

Mr. NORRIS. I wish to make a further inquiry of the Senator from Virginia, having charge of the bill. I could not hear the remark he made a while ago, but I understood him to say there would be no attempt made to finish the bill to-night.

Mr. SWANSON. There will be no attempt made to finish the bill tonight.

Mr. NORRIS. The amendment that was recently laid over, regarding the increase of the Navy, will not come up to-day?

Mr. SWANSON. It will go over until to-morrow. I assure the Senator that it will not be brought up again to-day.

Mr. NORRIS. I asked that question because the amendment that I have just asked to have printed is an amendment to that part of the bill.

Mr. SWANSON. We will let it go over until to-morrow. I will not bring up that amendment until to-morrow.

The SECRETARY. After the amendment just agreed to, it is proposed to insert:

The Secretary of War and the Secretary of the Navy are authorized and directed to report to Congress at the earliest practicable date, not later than December 4, 1916:

First. Specific plans for improvement of the harbors and connecting channels which, in their judgment, will best provide adequate facilities for operations of the fleet for defense of the harbors of Portland, Me.; Boston, Mass.; Providence, R. I.; New London, New Haven, and Bridgeport, Conn.; New York, N. Y.; Norfolk, Va.; Savannah and Brunswick, Ga.; Charleston, S. C.; New Orleans, La.; Galveston, Tex.; San Diego and San Francisco, Cal.; and Seattle, Wash.

Mr. PENROSE. Mr. President, while that paragraph is before the Senate I should like to ask the Senator from Virginia whether there would be any objection to adding "Philadelphia"?

Mr. SWANSON. None whatever.

Mr. LODGE. I suggest that the amendment be read first.

Mr. PENROSE. Well, there is one paragraph——

The PRESIDING OFFICER. Let the Secretary finish reading the amendment.

Mr. SWANSON. I have an amendment including that. I should like to get the committee amendment perfected first. Possibly it is included in that. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Senator from Pennsylvania has been recognized.

Mr. PENROSE. I should like to have the word "Philadelphia" put in after "New York"—"Philadelphia, Pa."

Mr. SWANSON. I have no objection.

Mr. BORAH. Why not put it in before "New York"?

Mr. PENROSE. I was putting it in before "Norfolk," in line 2, and I thought that was sufficient presumption.

The PRESIDING OFFICER. The Senator offers that as an amendment?

Mr. PENROSE. I do; and it is accepted, as I understand.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 176, line 2, after the words "New York," it is proposed to insert "Philadelphia, Pa.," and a semicolon.

The amendment to the amendment was agreed to.

Mr. SWANSON. Now, I have an amendment that I wish to offer.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. It is also proposed to insert "Camden, N. J.," and "Wilmington, Del."

The amendment to the amendment was agreed to.

Mr. SWANSON. I have another committee amendment here.

Mr. LODGE. I have a committee amendment to offer.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 175, line 22, after the word "harbors," it is proposed to insert the words "and canals."

Mr. LODGE. That was the amendment I was about to offer.

The amendment to the amendment was agreed to.

The SECRETARY. On page 176, line 5, after the word "Seattle," it is proposed to insert the words "Willapa and Grays Harbors."

The amendment to the amendment was agreed to.

Mr. SHEPPARD. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 176, line 4, between the words "Texas" and "San Diego," it is proposed to insert:

Port Arthur, Tex.; Freeport, Tex.; Port Aransas, Tex.; Corpus Christi, Tex.; Rockport, Tex.; Brazos Island, Tex.

Mr. VARDAMAN. Mr. President, I should like to amend that by adding "Gulfport and Pascagoula, Miss."

Mr. LODGE. In behalf of the Senator from Oregon I desire to offer an amendment.

The PRESIDING OFFICER. The Chair will state to the Senator from Massachusetts that an amendment to the amendment is now pending.

Mr. LODGE. I beg pardon; I thought it was disposed of.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Mississippi [Mr. VARDAMAN] to the amendment of the Senator from Texas [Mr. SHEPPARD] to add "Gulfport and Pascagoula, Miss."

Mr. BORAH. What are these amendments for?

Mr. LODGE. For the board of officers to visit.

Mr. SWANSON. The board of officers on the question of preparedness will visit these places, and the Secretary of War and the Secretary of the Navy will make a report on a proper plan of preparedness.

Mr. OVERMAN. Mr. President, there is one place left out that I think the committee ought to have put in, and that is Wilmington, N. C. There was fought there the greatest battle of the Civil War, at Fort Fisher. Wilmington ought to be included, and that place ought to be looked into to see if there are proper defenses. We have a fort there now. I think Wilmington ought to be included.

Mr. WILLIAMS. I think that if this is to go on indefinitely we had better take a map and look around the Gulf coast and the South Atlantic coast and the Pacific coast and put in all the places, and take the towns in Arizona and New Mexico and Texas on the Rio Grande and put them all in. It seems to me that these officials can be trusted to know what towns we should prepare to defend without having them specially designated by Congress, when mentioning one by omission implies that some others are not equally worthy of defending.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Mississippi [Mr. VARDAMAN] to the amendment.

The amendment to the amendment was agreed to.

Mr. LODGE. I wish to offer an amendment to the amendment.

The PRESIDING OFFICER. The question pending is the amendment of the Senator from Texas [Mr. SHEPPARD] to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. LODGE. Mr. President——

Mr. SHAFROTH. I desire to move that all from the words "Portland, Me.," in line 25, be stricken out and that the words "the United States" be inserted, so as to leave the wording of it as follows:

First. Specific plans for improvement of the harbors and connecting channels which, in their judgment, will best provide adequate facilities for operations of the fleet for defense of the harbors of the United States.

That will avoid naming any harbors.

Mr. LODGE. If I am recognized now——

The PRESIDING OFFICER. The Chair has recognized the Senator from Massachusetts.

Mr. LODGE. So I understood.

The PRESIDING OFFICER. The Chair will ask other Senators to take their seats.

Mr. LODGE. I was about to make the motion which the Senator from Colorado has just made.

Mr. THOMAS. Will the Senator permit me to suggest that the amendment refers to salt-water harbors. There are a number of harbors where there could be no possible operation of a fleet.

Mr. LODGE. I think it ought to be "tidewater harbors" or Atlantic and Pacific and Gulf coasts. It is obviously those harbors and it is a mere question of making it exact. There is no sense in making the amendment ridiculous by stringing on every possible harbor that anyone may think of on the Atlantic and Pacific and Gulf coasts. What we want is a report from the officers of the Navy Department and the War Department as to the harbors, canals, and channels on our Atlantic, Gulf, and Pacific coasts, and they will select and let us know what is necessary to be done. That seems to me to be the sensible way to frame the amendment.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Colorado [Mr. SHAFROTH] to the amendment.

Mr. LODGE. I think it would be better to say Atlantic, Gulf, and Pacific coasts.

Mr. SHAFROTH. I accept that.

Mr. SHEPPARD. Let it be read.

The PRESIDING OFFICER. The Secretary will read the amendment to the amendment as modified.

The SECRETARY. Strike out all after the word "harbors," in line 25, on page 175, down to and including the word "Washington," in line 5, on page 176, and insert:

On the Atlantic, Gulf, and Pacific coasts of the United States.

Mr. LODGE. To make the amendment exact, the words "and canals" should be inserted after "harbors."

The PRESIDING OFFICER. It will be so modified. The Secretary will read it as proposed to be amended.

The SECRETARY. So as to read:

First. Specific plans for improvement of the harbors and canals and connecting channels which, in their judgment, will best provide adequate facilities for operations of the fleet for defense of the harbors of the Atlantic, Gulf, and Pacific coasts of the United States.

Mr. VARDAMAN. Mr. President, a point of order. Has not the amendment been adopted as amended?

The PRESIDING OFFICER. It has not.

Mr. VARDAMAN. This is offered as a substitute for the amendment as amended.

The PRESIDING OFFICER. It is a substitute for the several amendments to the amendment that has been offered and agreed to.

Mr. LODGE. The whole amendment has not been read.

The Secretary continued the reading of the amendment on page 176, line 6, as follows:

Second. The feasible extensions requisite to make existing approved projects for improvement of the aforementioned harbors available for the purposes stated in the foregoing paragraph.

Third. The cost of each such several improvements calculated upon the basis of completion thereof under contract within five years.

Mr. PENROSE. I suggest to the Senator from Virginia that the words "aforementioned harbors" ought to be stricken out in lines 7 and 8, on page 176.

Mr. BRANDEGEE. They are mentioned as harbors of the United States.

Mr. PENROSE. But canals are included.

Mr. BRANDEGEE. But it still stands "harbors on the Atlantic, Pacific, and Gulf coasts of the United States." Therefore they are aforementioned.

Mr. PENROSE. Ought it not to read "harbors and canals," in line 8, to follow the other language?

Mr. LODGE. I move to insert, after the word "harbors," the words "canals and channels."

The SECRETARY. On page 176, line 8, after the word "harbors," insert "canals and channels."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 176, after line 12, to insert:

The President, in time of war or when war is imminent, or for the purpose of carrying out the authorizations for which appropriations are made in this act, is empowered, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such individual, firm, company, association, corporation, or organized manufacturing industry.

Compliance with all such orders for products or material shall be obligatory on any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof and shall take precedence over all other orders and contracts theretofore placed with such individual, firm, company, association, corporation, or organized manufacturing industry, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of shipbuilding, engineering, and ordnance material, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any manufacturing plant, which, in the opinion of the Secretary of the Navy, shall be capable of being readily transformed into a plant for the manufacture of shipbuilding, engineering, and ordnance material, or other necessary supplies or equipment, who shall refuse to give to the United States such preference in the matter of the execution of orders, or who shall refuse to manufacture the kind, quantity, or quality of shipbuilding, engineering, and ordnance material, or any necessary supplies or equipment, as ordered by the Secretary of the Navy, or who shall refuse to furnish such shipbuilding, engineering, and ordnance material, or other supplies or equipment, at a reasonable price as determined by the Secretary of the Navy, then, and in either such case, the President, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement herein provided for, is hereby authorized to take immediate possession of any such plant or plants and, under the supervision of the Secretary of the Navy, to manufacture therein in time of war, or when war shall be imminent, such product or material as may be required, and any individual, firm, company, association, or corporation, or organized manufacturing industry, or the responsible head or heads thereof, failing to comply with the provisions of this section shall be deemed guilty of a felony, and upon conviction shall be punished by imprisonment for not more than three years and by a fine not exceeding $50,000.

Mr. BORAH. Is that an amendment of the Senate committee?

The PRESIDING OFFICER. It is an amendment of the Senate committee.

Mr. LODGE. It was put in by the Senate committee. It is a copy of the provision in the Army law which has just been passed.

Mr. BORAH. It is a very drastic proposition, it makes no difference where it comes from.

Mr. LODGE. It is a very drastic proposition.

Mr. BORAH. I should like to have it go over to-night.

The PRESIDING OFFICER. Without objection, it will go over.

Mr. SWANSON. I wish to say to the Senator that we have no objection to its going over, but this is what we passed in the Army bill, except it is applicable to what is appropriated this year.

Mr. LODGE. And in time of war.

Mr. SWANSON. And in time of war. We had information that it was nearly impossible to construct ships of any kind now. The contracts have been delayed a great many years, and a great many of these industries and manufacturing establishments have contracts for years ahead. It is impossible, except when we purchase the ships for the department to facilitate the construction unless there is some such power as this given. We duplicated the law relative to the Army as far as we could, simply putting in the addition that it should apply to the authorizations this year for which we make the appropriations. If the Senator desires it will go over.

Mr. BORAH. I should like, at least, to read one of these promulgations of the guard.

Mr. WEEKS obtained the floor.

Mr. SHAFROTH. Before it goes over I should like to make a suggestion.

The PRESIDING OFFICER. The Senator from Massachusetts [Mr. WEEKS] has been recognized twice.

Mr. WEEKS. Mr. President, I was called from the Chamber when the provision, on page 175, relating to navy yards and the development of navy yards was considered. I wish to make some comments on that paragraph, and I ask unanimous consent to return to it.

Mr. President, the other day, during the consideration of this bill, some suggestion was made about navy-yard development and the building of ships in navy yards. This proposition, in my opinion, is the most indefensible item in the bill. We are going to spend $6,000,000 to partially prepare half a dozen navy yards for building purposes. We have within five minutes reached a provision which will enable the Government to go into a manufacturing establishment and take possession of it and do what it likes when an emergency arises, and yet we are, on the very next page, appropriating $6,000,000 to put the shipbuilding industry of this country out of business.

If the appropriations were to be limited to $6,000,000, I would not especially criticize it, but we are appropriating $315,000,000 in the bill, and that is only a starter. We now have two plants where we can manufacture capital ships. We are going to develop five more. So we are going to have seven shipyards where we can manufacture capital or other ships. The annual appropriation for such a purpose will be, in my judgment, very much greater than most Senators have contemplated. The maintenance of our navy yards is a very important matter. We have 26 or 27 navy yards now. Every year we appropriate to maintain the plants, to keep the yards and buildings in order and repair, and the appropriations are a very considerable part of the total appropriations for the naval service.

Just listen to the list of navy yards which we now maintain for ordinary purposes: Portsmouth, Boston, Newport, New London, Sacket Harbor, New York, Philadelphia, Norfolk, Charleston, Port Royal, Key West, Pensacola, New Orleans, Guantanamo, San Juan, Culebra, Cavite, San Diego, Mare Island, Bremerton, Great Lakes, Indianhead, Tutuila, Pearl Harbor, and Washington, D. C.

Many of those are not equipped to build capital ships, and that is the movement which we are now undertaking.

Our total naval appropriations from 1900 to 1913, inclusive, amounted to $1,656,000,000. Up to the 30th of June, 1910, for the first 10 years of that period the total appropriations made to cover the cost of navy yards amounted to $320,600,000, or more than 20 per cent of the total amount appropriated for all naval purposes.

To show that an unreasonable amount has been expended for this purpose, it is only necessary to call attention to the appropriations for the year 1914, which aggregated $140,736,000. This appropriation was divided as follows: Increase of the Navy, $35,300,000; pay of the Navy, $41,000,000; Marine Corps, $7,600,000; supplies, $9,600,000; navigation, $3,000,000; Naval Academy, $600,000; medicine and surgery, $700,000; and coal, $5,000,000. Of the balance—$38,000,000—$12,700,000 was appropriated for the Bureau of Ordnance, largely for the purchase of supplies and the manufacture of mines, torpedoes, and guns at Washington, Newport, and Indianhead; $6,100,000 for the Bureau of Steam Engineering, which included the purchase of engines and other material used in this department; $5,300,000 for the Bureau of Equipment, largely for the purchase of supplies other than coal; and $8,665,000 was expended by the Bureau of Construction and Repair, which expenditure covers the repair of ships at navy yards, the preservation and completion of vessels on the stocks, the purchase of material and stores for this purpose, all kinds of machinery necessary for employment in connection with such work, designing naval vessels, repair of vessels connected with the yard and many miscellaneous expenses connected with that service.

Substantially speaking, the item which I have just referred to covers the cost of the work carried on at all of our navy yards, although the accounts are so kept that it is impossible to differentiate between new construction and renewals, while some items connected with the work of the Bureaus of Equipment, Steam Engineering, and Yards and Docks should be added to this appropriation. However, I think it is safe to say that not less than 8 nor more than 10 millions of dollars would be the total amount required for construction work, except the increase of the Navy item, carried on at our navy yards, including all repairs. Yet, in 1914 there was appropriated $4,348,945 for the extension, renewals, and repair of public works connected with navy yards.

Of this expenditure for navy yards, naval stations, and magazines only $800,000 was actually appropriated for repairs and preservation, so that the additions made to the plants—now, bear this in mind—so that the additions made to the plants at our navy yards and naval stations for the year 1914 amounted to $3,823,000. While these figures seem exorbitant and out of all proportion to the amount of work carried on at such places, an examination of naval appropriations in other years seems to indicate that that is about the normal amount required for that purpose.

What manufacturing business could be carried on successfully which required, in the form of additions, changes, and other similar expenditures, an amount aggregating substantially 50 per cent of the gross output of the plant? The fact of the matter is that a large percentage of these appropriations are not necessary, or would not be necessary, if a change were made in the location and management of our navy yards. Although England's Navy is two to three times as large as ours, we have twice as many navy yards as has Great Britain and more than three times as many as Germany, whose navy is certainly larger than ours at this time. If our plants could be concentrated into not exceeding three on the North Atlantic coast, one at or near Key West, one at Pearl Harbor, and not exceeding two on the Pacific coast, the remainder of the present plants being disposed of, I believe the change could be made without a very large new expenditure and that the cost of maintenance in future could be reduced at least one-half. I am using these figures simply to illustrate one of the elements in our naval expenditures where, it seems to me, material savings can be made and would be made by any business concern conducting operations of the character involved in the work of our yards; and yet now we are undertaking to equip five great yards so that we can build naval ships there, involving the expenditures incident to the equipment and maintenance of these yards during the life of the Republic so far as we can see. In other words, instead of 50 per cent of the total appropriation made for the repairs of ships and expenses incident thereto being expended for additions in navy yards, we are going to put ourselves in a position where we shall spend 75 per cent as much money to maintain our plants as we shall spend in the repairs of ships and other such matters.

Mr. VARDAMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Mississippi?

Mr. WEEKS. I yield to the Senator from Mississippi.

Mr. VARDAMAN. I was very much impressed with what the Senator was saying, and it occurred to me that if at the conclusion of war in Europe the President of the United States should be able to effect the understanding which would bring about world peace and which this bill contemplates he may effect, $200,000 being appropriated to pay the expenses of the commission to the Peace Conference of the Nations, the outlay which the Senator has just commented upon would be without warrant or justification; that the plants to be constructed would be wholly unnecessary, and they would have to be torn down or given away or destroyed, and the people of this country who pay the taxes which furnished the money that constructed them would be needlessly burdened. I am personally in favor of the Government building all of its fighting ships, and if the ships were needed I should favor getting ready for the building. But the Government does not need the ships and may never need them. Then why, in the name of justice and truth, should this tremendous load be put upon the taxpayers? Why this haste in this matter, which means so much to the people, whose labor bears all the expense of government?

Mr. WEEKS. I do not expect to accomplish anything by the comments I am making. I am simply scolding about an item of what I consider willful waste.

Mr. VARDAMAN. I agree very heartily with the Senator as to that. I agree with him also that he will not accomplish anything by what he is saying, nor will anybody else who proposes to cut down appropriations. I think the enormous appropriations carried in this bill for the enlargement of our Navy is wholly unjustified from any viewpoint of the public good. The people are to be taxed and the money squandered in the building of a navy which will never be needed if the people of this Republic shall be true to their own interests, loyal to their Government, and faithful to the traditions of the Democratic Party.

Mr. WEEKS. We are providing for the building of seven capital ships; that is to say, we can build under the provisions of this act capital ships in seven navy yards; and I will make the prediction that we shall not again build seven capital ships in any one year or in any two years within the term of service of any Member of this body to-day; in other words, these plants are going to be idle very much of the time with the expense of maintenance going on every year.

We have seen examples within the last two days of the desire of individual Senators to have something accomplished in their own neighborhoods. What Senator is going to stand idly by and not have his plant running at full capacity if he can get it done? The pressure on the Navy Department to get ships built at navy yards will be pretty nearly enough—I do not know whether it will be entirely sufficient—to drive any man from the position of Secretary of the Navy.

We are immeasurably overdoing this thing. I can not enter too strong a protest against this general policy of putting the Government in business at the expense of private concerns. I agree that we should be able to prevent monopoly; that we should be able to prevent collusion among manufacturers, so that we could get ships built at a fair price; but I maintain that it costs from 10 to 20 per cent more to build a ship in a Government navy yard than it does by a private concern; and that, if we prepare these plans as is contemplated in this bill, we are going to build in navy yards hereafter instead of by contract. The result is going to be a largely increased expense to build the Navy, to maintain the naval establishment, and in every item connected with it. I wish I had the power to knock at least three-fourths of this item out of the bill.

Mr. OVERMAN. How many navy yards are prepared to build capital ships?

Mr WEEKS. Two.

Mr. OVERMAN. Only two?

Mr. WEEKS. Only two.

Mr. OVERMAN. Where are they located?

Mr. WEEKS. At New York and Mare Island.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Idaho?

Mr. WEEKS. I do.

Mr. BORAH. How much is provided for by this item?

Mr. WEEKS. The item which is now appropriated for carries an appropriation of $6,000,000, but that is but a beginning; that is simply the first appropriation.

Mr. BORAH. That is a very good beginning.

Mr. WEEKS. It will not amount to anything compared with the appropriations that will follow for the completion and maintenance of these plants.

Mr. SHAFROTH. Mr. President, I should like to ask the Senator from Massachusetts whether this provision would not be more satisfactory to him, beginning at line 9, on page 175——

Mr. SWANSON. That provision has been adopted, but it can again come up in the Senate.

Mr. SMOOT. The vote whereby it was adopted may be reconsidered.

Mr. OVERMAN. The Senator may ask unanimous consent to have that done.

Mr. SHAFROTH. I will merely make the suggestion to the Senator from Massachusetts, though I do not expect to make any motion in relation to it. I suggest that the amendment be changed to read in this way:

The Secretary of the Navy is authorized to improve and equip such of the navy yards of the United States as he deems most desirably located for the construction of such ships herein or as may be hereafter authorized as he may assign to such yards for construction, and the sum of $6,000,000, or so much thereof as may be necessary, is hereby appropriated for this purpose.

Then strike out the remainder of the clause. It seems to me that that would give the Secretary the opportunity of selecting the very best places. We, not having sufficient knowledge, are not competent to do so.

Mr. WEEKS. I think I shall consider the form of the change suggested by the Senator from Colorado, and to-morrow I shall move to reconsider the vote by which the amendment was adopted and endeavor to suggest an amendment to better the proposition.

Mr. OVERMAN. I call the attention of the Senator from Massachusetts to the words in line 9, page 175, which read:

Provided, That the navy yards at Puget Sound, Norfolk, and Boston shall be equipped for the construction of capital ships forthwith.

In addition to those, as I understand, we have the navy yards at Mare Island and at New York equipped for building such ships.

Mr. WEEKS. That would make five navy yards at which capital ships could be built, and there are several others adapted to other purposes.

Mr. OVERMAN. For what purpose are the other navy yards to be used—merely to make repairs?

Mr. WEEKS. They are for repairs and various other purposes.

Mr. BRANDGEE. Mr. President, I desire to call the attention of the Senator in charge of the bill to a matter to which I referred a while ago. A few moments ago I allowed the amendment on page 131 as to the restoration of certain officers to the service to be acted upon with the understanding that when I procured the name of another officer similarly situated I might be allowed to offer an amendment including his name. I now ask unanimous consent to turn back for a moment to that amendment, and I move, on page 131, in line 12, before the word "Commander," and after the word "Navy," to insert the name I have sent to the Secretary's desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 131, line 12, after the word "Navy," and before the word "Commander," it is proposed to insert "Capt. Frank W. Kellogg, retired, to be a captain on the active list to take rank next after Capt. Thomas Snowden, United States Navy."

The PRESIDING OFFICER. The question is on agreeing to the amendment

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Naval Affairs was, on page 178, after line 10, to insert:

That section 125 of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, be, and it is hereby, amended to read as follows:

"Protection of the uniform: It shall be unlawful for any person not an officer or enlisted man of the United States Army, Navy, or Marine Corps to wear the duly prescribed uniform of the United States Army, Navy, or Marine Corps, or any distinctive part of such uniform, or a uniform any part of which is similar to a distinctive part of the duly prescribed uniform of the United States Army, Navy, or Marine Corps: *Provided*, That the foregoing provision shall not be construed so as to prevent officers or enlisted men of the National Guard from wearing, in pursuance of law and regulations, the uniform lawfully prescribed to be worn by such officers or enlisted men of the National Guard; nor to prevent members of the organization known as the Boy Scouts of America, or the Naval Militia, or such other organizations as the Secretary of War or the Secretary of the Navy may designate, from wearing their prescribed uniforms, nor to prevent persons who in time of war have served honorably as officers of the United States Army, Navy, or Marine Corps, Regular or Volunteer, and whose most recent service was terminated by an honorable discharge, muster out, or resignation, from wearing, upon occasions of ceremony, the uniform of the highest grade they have held by brevet or other commission in such Regular or Volunteer service; nor to prevent any person who has been honorably discharged from the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing his uniform from the place of his discharge to his home, within three months after the date of such discharge; nor to prevent the members of military societies composed entirely of honorably discharged officers or enlisted men, or both, of the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing, upon occasions of ceremony, the uniform duly prescribed by such societies to be worn by the members thereof; nor to prevent the instructors and members of the duly organized cadet corps of a State university, State college, or public high school offering a regular course in military instruction from wearing the uniform duly prescribed by the authorities of such university, college, or public high school for wear by the instructors and members of such cadet corps; nor to prevent the instructors and members of the duly organized cadet corps of any other institution of learning offering a regular course in military instruction, and at which an officer or enlisted man of the United States Army, Navy, or Marine Corps is lawfully detailed for duty as instructor in military science and tactics, from wearing the uniform duly prescribed by the authorities of such institution of learning for wear by the instructors and members of such cadet corps; nor to prevent civilians attendant upon a course of military or naval instruction authorized and conducted by the military or naval authorities of the United States from wearing, while in attendance upon such course of instruction, the uniform authorized and prescribed by such military or naval authorities for wear during such course of instruction; nor to prevent any person from wearing the uniform of the United States Army, Navy, or Marine Corps, or who is accredited by the Secretary of the Navy as a representative or correspondent of the press or, in any playhouse or theater or in moving-picture films while actually engaged in representing therein a military or naval character not tending to bring discredit or reproach upon the United States Army, Navy, or Marine Corps; *Provided further*, That the uniforms worn by officers or enlisted men of the National Guard, or by the members of the military societies or the instructors and members of the cadet corps referred to in the preceding proviso, shall include some distinctive mark or insignia to be prescribed by the Secretary of War or the Secretary of the Navy to distinguish such uniforms from the uniforms of the United States Army, Navy, or Marine Corps: *And provided further*, That the members of the military societies and the instructors and members of the cadet corps hereinbefore mentioned shall not wear the insignia of rank prescribed to be worn by officers of the United States Army, Navy, or Marine Corps, or any insignia of rank similar thereto.

"Any person who offends against the provisions of this section shall, on conviction, be punished by a fine not exceeding $300, or by imprisonment not exceeding six months, or by both such fine and imprisonment."

Mr. PENROSE. Mr. President, in the committee amendment, on page 179, line 2, I desire to offer an amendment. I have not, however, prepared the amendment as yet, and will therefore take an opportunity of bringing it up later if the Senator from Virginia has no objection.

Mr. THOMAS. Mr. President, I shall not take up the time of the Senate very long in referring to this amendment. I merely wish to point out that as it stands it is of no value whatever. When the Army reorganization bill was before the Senate I submitted an amendment which was agreed to, but afterwards emasculated in conference, designed to protect the American uniform. I presume it was impossible to secure the enactment of such a measure by the conference committee, and the bill should not have been delayed by any effort to force it after the improbability of doing so became apparent. That amendment is, I presume, the basis for this one, since it is designed to supersede that one and to apply as well to the Navy and Marine Corps.

Mr. President, the only thing that this amendment does is to make it unlawful for those who are not entitled to wear the uniform to do so, except under the circumstances which are specified. As conditions are in this country, nobody wants to wear the American uniform—and, of course, I refer to the uniform of the private—because it is no mark of honor or distinction, but rather one of reproach and sometimes of humiliation. The Amreican uniform is discriminated against constantly. It is not necessary to go into the many reasons assigned for it, but it is a matter of common knowledge that men wearing the uniform are frequently precluded from the privileges of playhouses, are denied entertainment at hotels and other public places. These are not always open to the wearers of the American uniform. Under these circumstances it is idle, it seems to me, to provide penalties for unlawfully wearing it.

I believe that we ought to protect the uniform; I believe that it should be made a badge of distinction, and it must be made at least as respectable as the clothing of an ordinary citizen if we are ever to have an army worthy of the name.

We have recently enacted a law providing for enormous increases in our Army, in response to a public demand, or a seeming public demand for that increase. Recently the militia has been mobilized, and some of the States have responded by presenting the quotas to which they were entitled, and their troops have been sent to the border. A large number of other National Guard organizations are unable to go, notwithstanding the most strenuous efforts at recruiting and at enlistment carried on, not only by public authorities, but through private solicitation on the part of those who are anxious to proceed to the border. It may be that this failure to respond is due to a lack of national spirit; it may be that it is due to the more

attractive pursuits of civil life; there may be many reasons for it; but I believe I am safe in saying that one of them is that the uniform of an enlisted man has no protection. In some places he does not receive decent treatment and is not accorded proper respect if he appears upon the streets clothed in the uniform of the American Army.

This amendment, instead of meeting that difficulty, does not even refer to it, and, instead of offering to the Army and Navy something substantial, it enacts a measure that will remain an idle and, in my judgment, an entirely valueless part of this bill, if it becomes a law.

Of course I can not blink my eyes to the fact that one reason for this discrimination against the uniform is largely due to the character and the complexion of a great many of the men who wear it. I am saying nothing whatever, Mr. President, that can be construed even indirectly—at least, I am not intentionally saying anything that can be so construed—in advocacy of a measure that is designed in any way to interfere with those social conditions which are regulated by the common customs of mankind and which no statute law can overthrow.

Nor am I in favor of a measure which, while pretending to protect the uniform, establishes a regulation that will interfere with the social customs of the country. That is not necessary at all. If John Smith is not worthy to enter a given house of entertainment because he is intoxicated, or because his character is such as to justify his expulsion if he enters or a denial of entry if he applies for it, or if his color is objectionable, those may or may not be perfectly legitimate grounds for exclusion; but it should not be placed upon the fact of the uniform he wears. It should not be permitted to be placed upon that fact under any circumstances.

We can enact this species of legislation forever; we can provide for a huge Army and for a huge Navy; we can appropriate untold millions to meet what is supposed to be a great national exigency; we may turn out the best ordnance in the world and the finest ships that sail the seas; but we will never have an Army, we will never have a Navy in this country until the fighting force in both is composed of American citizens filled with the spirit of patriotism and national unity, a spirit which is absolutely inconsistent with those practices which tend to humiliate and to cast reproach upon the men who wear the uniform.

Mr. PENROSE. Mr. President, I call the attention of the Senator from Virginia to line 1, page 179. I should like to amend that so that it will read "nor to prevent members of the organizations known as the Sons of Veterans and the Boy Scouts of America."

Mr. SWANSON. The Boy Scouts are included.

Mr. PENROSE. The Boy Scouts are included now. I want to make the word "organization" plural, and insert the words I have stated, so that it will read "members of the organizations known as the Sons of Veterans and the Boy Scouts of America."

Mr. SWANSON. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 181, line 23, after the word "who," to insert "in his judgment," and in line 24, after the words "qualified for," to strike out "the mission by eminence in the law and by devotion to the cause of peace" and insert "such duty," so as to make the clause read:

Upon the conclusion of the war in Europe, or as soon thereafter as it may be done, the President of the United States is authorized to invite all the great Governments of the world to send representatives to a conference which shall be charged with the duty of suggesting an organization, court of arbitration, or other body, to which disputed questions between nations shall be referred for adjudication and peaceful settlement, and to consider the question of disarmament and submit their recommendation to their respective Governments for approval. The President is hereby authorized to appoint nine citizens of the United States, who in his judgment shall be qualified for such duty to be representatives of the United States in such a conference. The President shall fix the compensation of said representatives and such secretaries and other employees as may be needed. Two hundred thousand dollars, or so much thereof as may be necessary, is hereby appropriated and set aside and placed at the disposal of the President to carry into effect the provisions of this paragraph.

The amendment was agreed to.

The next amendment was, on page 182, line 14, after the word "tribunals," to strike out "shall" and insert "may," so as to make the paragraph read:

If at any time before the appropriations authorized by this act shall have been contracted for there shall have been established, with the cooperation of the United States of America, an international tribunal or tribunals competent to secure peaceful determinations of all international disputes, and which shall render unnecessary the maintenance of competitive armaments, then and in that case such naval expenditures as may be inconsistent with the engagements made in the establishment of such tribunal or tribunals may be suspended, when so ordered by the President of the United States.

The amendment was ageed to.

The next amendment was, at the top of page 184, to insert:

The Secretary of the Navy is hereby directed to submit to the Congress during its next regular session a report on the largest battleship which can be undertaken in the United States in the present state of the shipbuilding and engineering sciences and arts, giving due consideration to the present and prospective depths and other limiting dimensions of the docks and harbors of the United States and its possessions and of the locks of the Panama Canal, and he shall further report the principal characteristics of such a vessel, giving the displacement, cost, number and size of guns, thickness of armor, speed and cruising radius, and he shall further report on the desirability of building one or more such vessels.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. SWANSON. Mr. President, there are some amendments that were passed over. I should like to take them up in their order.

The PRESIDING OFFICER. The Secretary will state the amendments passed over.

The SECRETARY. The first committee amendment passed over is on page 4, after line 22.

Mr. SWANSON. Let that go over. The Senator from Wisconsin [Mr. LA FOLLETTE] desired to have that passed over.

The PRESIDING OFFICER. The amendment will be again passed over.

The SECRETARY. The next amendment passed over is on page 29, after line 7.

Mr. SWANSON. Let that go over. I desire to get more information on it.

The PRESIDING OFFICER. The amendment will be again passed over.

The SECRETARY. The next amendment passed over is on page 42, after line 3, referring to an experimental and research laboratory.

Mr. SMOOT. Mr. President, I should like to have that go over until to-morrow morning. I have not the data at hand that I expected to get together. I will say to the Senator that if it does not arrive to-morrow I will not ask that action be delayed further.

Mr. SWANSON. Let that go over.

The PRESIDING OFFICER. The amendment will be again passed over.

The SECRETARY. The next amendment passed over is on page 49, after line 22—the amendment relating to the Naval Dental Corps.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The amendment will be again passed over.

The SECRETARY. The next amendment passed over is on page 62——

Mr. POINDEXTER. I ask that that go over until to-morrow.

The PRESIDING OFFICER. The amendment will be again passed over.

The SECRETARY. The next amendment passed over is on page 65, lines 14 to 17, both inclusive.

Mr. WILLIAMS. That is the amendment that I requested to go over because I wanted to look into it. I have looked into it, and I find that it is perfectly satisfactory, and I have no objection.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 65 it is proposed to strike out lines 14 to 17, both inclusive, in the following words:

Such officers shall thereafter be required to perform engineering duties only, and shall be eligible for advancement to the higher grades in the manner herein provided for line officers assigned to engineering duty only.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. The next amendment passed over is on page 167, after line 8, the amendment relating to the increase of the Navy.

The PRESIDING OFFICER. That goes over under the agreement.

Mr. SWANSON. That goes over.

The SECRETARY. The next amendment passed over is on page 176, after line 12.

Mr. SWANSON. Let that go over.

The PRESIDING OFFICER. The amendment will be again passed over. That completes the amendments passed over.

Mr. SWANSON. I presume it will be in order now to consider amendments offered by individual Senators, if there are any such amendments to be offered. [A pause.]

The PRESIDING OFFICER. What is the further pleasure of the Senate?

EXECUTIVE SESSION.

Mr. SWANSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS.

Mr. KERN. I move that the Senate take a recess until 10 o'clock to-morrow morning.

The motion was agreed to; and (at 5 o'clock and 55 minutes p. m.) the Senate took a recess until to-morrow, Saturday, July 15, 1916, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 14, 1916.

ASSOCIATE JUSTICE OF THE SUPREME COURT.

John H. Clarke, of Cleveland, Ohio, now serving as United States district judge northern district of Ohio, to be Associate Justice of the Supreme Court of the United States, vice Charles E. Hughes, resigned.

POSTMASTERS.

ARKANSAS.

W. L. Hoover to be postmaster at England, Ark., in place of F. B. Schooley, resigned.

CALIFORNIA.

Frank A. Chapman to be postmaster at McFarland, Cal., in place of Frank A. Chapman. Office became presidential July 1, 1916.

IOWA.

R. C. Morse to be postmaster at Belmond, Iowa, in place of John L. McAlpine, resigned.

KANSAS.

Nancy M. McKechnie to be postmaster at Pawnee Rock, Kans., in place of Nancy M. McKechnie. Office became presidential July 1, 1916.

KENTUCKY.

Thomas Mimms to be postmaster at Guthrie, Ky., in place of W. L. Kimbrough. Incumbent's commission expires July 18, 1916.

MINNESOTA.

Mayme Murphy to be postmaster at Tower, Minn., in place of J. D. Murphy, resigned.

George W. Shipton to be postmaster at Ogilvie, Minn., in place of George W. Shipton. Office became presidential July 1, 1916.

NEBRASKA.

Gilbert E. Swanson to be postmaster at Oshkosh, Nebr., in place of Gilbert E. Swanson. Office became presidential January 1, 1916.

OHIO.

Thomas A. Duckworth to be postmaster at Johnstown, Ohio, in place of C. A. Burke. Incumbent's commission expired June 14, 1916.

PENNSYLVANIA.

Eli Hess to be postmaster at New Holland, Pa., in place of John Roland. Incumbent's commission expired May 20, 1916.

R. H. Johnston to be postmaster at Farrell, Pa., in place of John Leyshon. Incumbent's commission expired June 5, 1916.

Martin A. King to be postmaster at Clarks Summit, Pa., in place of W. B. Parker. Incumbent's commission expired December 18, 1915.

John Ray to be postmaster at West Middlesex, Pa., in place of A. E. Lewis. Incumbent's commission expired July 13, 1916.

VIRGINIA.

J. H. Cecil to be postmaster at Dublin, Va., in place of John S. Cecil. Incumbent's commission expired May 1, 1916.

WASHINGTON.

Lula M. Craft to be postmaster at McCleary, Wash., in place of Lula M. Craft. Office became Presidential July 1, 1916.

Lydia M. Rouls to be postmaster at Everson, Wash., in place of Lydia M. Rouls. Office became Presidential July 1, 1916.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 14, 1916.

COMMISSIONER OF THE DISTRICT OF COLUMBIA.

Oliver P. Newman to be a Commissioner of the District of Columbia.

CONSULS GENERAL.

CLASS 3.

George A. Chamberlain.

CLASS 5.

George N. West.

CONSULS.

CLASS 5.

Stuart K. Lupton.

CLASS 6.

Clarence E. Gauss.

CLASS 7.

Robertson Honey.
Felix Willoughby Smith.
Henry M. Wolcott.

CLASS 9.

Tracy Lay.

RECEIVER OF PUBLIC MONEYS.

Philip W. Brooks, receiver public moneys, El Centro, Cal.

REGISTER LAND OFFICE.

F. C. Farr, register land office, El Centro, Cal.

PUBLIC HEALTH SERVICE.

Dr. Robert R. Ivey to be assistant surgeon.
Dr. Vance B. Murray to be assistant surgeon.
Dr. Lendon H. Smith to be assistant surgeon.

APPOINTMENTS IN THE ARMY.

DENTAL CORPS.

Acting Dental Surg. Eugene Milburn to be dental surgeon with rank of first lieutenant.

Acting Dental Surg. Claudius Gordon Baker to be dental surgeon with rank of first lieutenant.

PORTO RICO REGIMENT OF INFANTRY.

Albert P. Hinton, Columbus.

WEST VIRGINIA.

William M. Davis, Bridgeport.
M. Grundy Gilmer, Matoaka.
Charles L. Watkins, Shinnston.

HOUSE OF REPRESENTATIVES.

FRIDAY, *July 14, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou great Spirit, whose rays divine permeate all space and fill the soul with the holy spirit of truth which clarifies the mind and heart of man, gives him a livelier sense of the eternal values, and fits him to meet the supreme test in every individual crisis, help us as we pursue the journey of life to be master of self, that we shall be able to say at the close of our earthly pilgrimage, "I have fought a good fight; I have finished my course; I have kept the faith; henceforth there is laid up for me a crown of righteousness." Amen.

The Journal of the proceedings of yesterday was read and approved.

STEAMBOAT INSPECTION.

Mr. ALEXANDER. Mr. Speaker, I desire to call up from the Speaker's table the bill (H. R. 449) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10. It is a House bill with a Senate amendment, and I ask unanimous consent that the Senate amendment be disagreed to and that the House ask for a conference.

The SPEAKER. The gentleman from Missouri calls up a House bill with a Senate amendment, the title of which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. The gentleman asks unanimous consent to disagree to the Senate amendment and ask for a conference. Is there objection?

There was no objection; and the Speaker announced as conferees on the part of the House Mr. ALEXANDER, Mr. BURKE, and Mr. GREENE of Massachusetts.

CHANGE OF CONFEREES.

Mr. HELM. Mr. Speaker, H. R. 4767, authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, has been sent to conference. Two of the conferees, the gentleman from Tennessee [Mr. HOUSTON] and the gentleman from Maine [Mr. HINDS], are temporarily out of the city, and I am expecting to leave to-night, and I ask that other conferees be appointed in their stead.

The SPEAKER. The Chair appoints Mr. SUMNERS, Mr. ASWELL, and Mr. SMITH of Minnesota as conferees.

LEAVE TO EXTEND REMARKS.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on the compensation bill.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to revise and extend his remarks on the compensation bill. Is there objection?

There was no objection.

Mr. MEEKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a report on the new barge line that is operating between St. Louis and New Orleans.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD by inserting a report on the new barge line that is operating between St. Louis and New Orleans. Is there objection?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing two short editorials, one from a Republican and the other from a Democratic paper in Colorado, on the Mexican situation.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks by printing two editorials from Colorado papers, one Republican and one Democratic, on the Mexican situation.

Mr. MANN. Reserving the right to object, the leader of the majority [Mr. KITCHIN] the other day said he should object to these requests. In his temporary absence I will act for him, and I object.

The SPEAKER. The gentleman from Illinois objects.

RECLAMATION EXTENSION.

Mr. TAYLOR of Colorado. Mr. Speaker, I call up the conference report on the bill (H. R. 6057) to amend section 14 of the reclamation extension act approved August 13, 1914, and I ask to have the statement of the House conferees read.

Mr. MANN. Let the conference report be read. It is very short.

The conference report and statement were read as follows:

CONFERENCE REPORT (NO. 953).

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 6057) to amend section 14 of the reclamation extension act, approved August 13, 1914, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the Senate insert the following: "that where the applicant for such acceptance is in arrears on construction charges, he shall at the time of acceptance pay such installments of the construction charge as he would have been required to pay had he accepted this act within the time limit hereinabove fixed, plus the penalties that would have accrued had he so accepted, and such applicant shall thereafter be upon the same status that he would have been had he accepted the provisions of this act within the time limit hereinabove fixed"; and on page 2 of the bill, line 8, strike out the words "upon the"; and the Senate agree to the same.

EDWARD T. TAYLOR,
JOHN E. RAKER,
MOSES P. KINKAID,
Managers on the part of the House.
M. A. SMITH,
HARRY LANE,
W. L. JONES,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference of the disagreeing vote of the two Houses on the amendment to bill H. R. 6057, to amend section 14 of the reclamation extension act, approved August 13, 1914, submit the following written statement, explaining the effect of the action agreed upon:

The bill as it passed the House contained provisions that were more drastic and imposed conditions that were, upon more careful consideration, deemed most too hard upon delinquent settlers under reclamation projects. The provisions might penalize innocent entrymen in an unwarranted manner. In fact, the terms of the bill did not exactly carry out either the intention of the committee or of the Reclamation Service, as the language was subsequently construed.

On the other hand, the amendment inserted by the Senate was looked upon as erring in the opposite direction and not being sufficient to fully protect the welfare of the Reclamation Service. The compromise language agreed upon, which is in the nature of a substitute for both the House and Senate provisions, meets with the hearty approval of the representatives of both committees and of the Reclamation Service, and it is believed that this language will amply guard the interests of the Government and be entirely fair to the applicants and promote the welfare of the service and development under the various reclamation projects. Your House conferees believe they have retained the intention of the House, and that this language is much better than the language adopted by either the Senate or the House.

Respectfully submitted.

EDWARD T. TAYLOR,
JOHN E. RAKER,
MOSES P. KINKAID,
Managers on the Part of the House.

The SPEAKER. The question is on agreeing to the conference report.

Mr. WALSH. Is this amendment, which now meets with the approval of the conferees, the same amendment that was proposed and defeated in the House during the discussion of the bill?

Mr. TAYLOR of Colorado. No; I do not think it is. It is a substitute for both the Senate and House language. When we passed the act amending the reclamation law and extending the time for the payments by settlers from 10 years to 20 years, we provided that people on Government reclamation projects who desired to take advantage of that act must come in and make application within a certain time—six months. There were a good many people who were absent from the State. Some of them never heard of it. Some of them never were able to get in under that act, and we passed this bill providing that they now might come in, but we imposed as a condition upon them a penalty of 1 per cent per month for their delinquency. That was construed to mean 1 per cent per month upon the entire construction cost, which would be unnecessarily and unreasonably harsh, as there was no bad faith or anything of that kind. The Senate struck out that, and provided that they might come in without being required even to pay the ordinary assessments and arrears that would have been charged against them if they had come in; so that strictly speaking neither the Senate nor the House language carried out what ought to be done. When the irrigation committees of the two houses got together, and the Reclamation Service called our attention to the situation, we very readily agreed upon this language as a substitute, which we think fully protects the Government and lets these delinquents come in by squaring up and paying what they would have had to pay if they had come in. It meets with the hearty approval of the Reclamation Service, and we think this will protect the interest of everybody and let the delinquents come in, whom the service wants to have come in. We want them in there, and we feel that there can be no objection to the adoption of the conference report, and I trust our report will be adopted. I prepared and presented the report and statement as the acting chairman of the Committee on Irrigation of Arid Lands.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 12717. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes.

SHANGHAI DOCK & ENGINEERING CO. (LTD.).

Mr. GREENE of Massachusetts. Mr. Speaker, I call up a privileged resolution (H. Res. 275), calling on the Secretary of War for information concerning the contract with the Shanghai Dock & Engineering Co. (Ltd.), of Shanghai, China, for the construction of a collier for the use of the United States Army.

The SPEAKER. The gentleman from Massachusetts calls up a resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, That the Secretary of War be, and he is hereby, directed to transmit to the House of Representatives detailed information in the War Department concerning the contract with the Shanghai Dock & Engineering Co. (Ltd.), of Shanghai, China, for the construction of the single-screw steel collier *No. 1* for the use of the United States Army.

Mr. FOSTER. I would like to ask the gentleman from Massachusetts if he is not willing to let this matter go over until the gentleman from Virginia, Mr. HAY, who is very much interested, of course, can be present?

Mr. GREENE of Massachusetts. I have no objection to that. The resolution was introduced on the 24th of June.

Mr. MANN. I do not think that anybody is opposed to the resolution.

Mr. FOSTER. I do not know that anyone is opposed to it, but I think it would be better to take it up when the gentleman from Virginia can be present.

Mr. GREENE of Massachusetts. I am perfectly willing. All I want to get is the information, and I have not been able to get it. I am willing that it should go over until Mr. HAY is present.

SAMUEL SCHWARTZ.

Mr. BENNET. Mr. Speaker, I move to discharge the Committee on Foreign Affairs from the further consideration of House resolution 280, which I will ask the Clerk to report.

The SPEAKER. How long has it been introduced?

Mr. BENNET. For 16 days.

The Clerk read as follows:

House resolution 280.

Resolved, That the Secretary of State be, and he is hereby, requested to furnish the House of Representatives with a statement of what he has done to secure the release of Samuel Schwartz, an American citizen alleged to be unjustly deprived of his liberty by or under the authority of the Government of Great Britain, since proof was given him that the said Samuel Schwartz did not expatriate himself, but, on the contrary, resided at 22 West One hundred and twelfth Street, New York City, from 1902 to 1907.

Mr. FOSTER. Mr. Speaker, I reserve a point of order that this is not a privileged resolution; and, further, that the information has been once secured by the gentleman from the State Department.

Mr. BENNET. The gentleman is wrong in both instances. The present Speaker ruled on the question in connection with a resolution introduced by the gentleman from Wyoming [Mr. MONDELL], I think, in the first term in which the present Speaker was Speaker. This calls for information as to what has been done since a particular time.

Mr. FOSTER. The information is contained in the report of the Secretary of State.

Mr. BENNET. This asks for what has been done since that time. The report of the Secretary of State was a romance.

Mr. FOSTER. The gentleman is trying to get information in regard to a gentleman whose life, it seems, was more than a romance, as I read the report of the Secretary of State.

Mr. BENNET. This asks for information since I made my remarks the other day on the floor calling attention to certain facts, subsequent to which I furnished the Department of State with certain proof about a month ago, and I want to find out what they have done to secure the liberation of this man since that time.

Mr. MANN. The gentleman from New York wants another chapter of the romance. [Laughter.]

Mr. FOSTER. It seems that he was a much-married man and had much notoriety throughout the world.

Mr. BENNET. If the gentleman had done me the honor to listen to my speech or had read it in the RECORD, he would not have made those remarks.

Mr. FOSTER. Oh, I always listen to the gentleman's speeches, and I have read the report of the Secretary of State.

Mr. BENNET. If the report had been accurate, this man would have been a bad citizen. The only trouble is that the report of the Secretary of State was a tissue of misinformation.

Mr. FOSTER. If the State Department can furnish the gentleman with any different information from what it has already furnished him in regard to his constituent, I do not know that there is any harm in getting it.

Mr. BENNET. I have sufficient confidence in it to call for it.

The SPEAKER. The point of order is overruled, and the question is on the resolution.

The question was taken, and the resolution was agreed to.

WATER-POWER BILL.

The SPEAKER. The unfinished business is the vote on the bill of which the Clerk will report the title.

The Clerk read as follows:

An act (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. COOPER of Wisconsin) there were 51 ayes and 17 noes.

So the bill was passed.

On motion of Mr. ADAMSON a motion to reconsider the vote whereby the bill was passed was laid on the table.

CAMPAIGN CONTRIBUTIONS AND EXPENDITURES.

Mr. RUCKER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15842) relating to campaign contributions and expenditures.

The SPEAKER. The gentleman from Missouri moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15842.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes.

The CHAIRMAN. General debate is closed, and the Clerk will read.

Mr. BENNET. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BENNET. Is the bill to be read according to the numbered sections or by paragraphs?

The CHAIRMAN. By sections, as the Chair understands.

The Clerk read as follows:

Be it enacted, etc., That an act entitled "An act providing for publicity of contributions made for the purpose of influencing elections at which Representatives in Congress are elected," approved June 25, 1910, as amended by an act entitled "An act to amend an act entitled 'An act providing for publicity of contributions made for the purpose of influencing elections at which Representatives in Congress are elected,' and extending the same to candidates for nomination and election to the offices of Representative and Senator in the Congress of the United States and limiting the amount of campaign expenses," approved August 19, 1911, and all acts amendatory thereof, be, and they are hereby, revised, amended, and codified to read as follows:

"SECTION 1. That the term 'committee,' when used in this act, shall be construed to include the national, State, and the national congressional campaign committees of all political parties, and all other committees, association, or organizations, political or nonpolitical, which shall receive or expend any money, or give or promise anything of value, for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President of the United States are to be nominated, or candidates for Senator or Representative in Congress are to be nominated or elected.

"The term 'election' or 'elected,' whenever used in this act, shall mean and include nomination by primary, convention, or otherwise, as well as final elections.

"The words 'Representative,' 'Representatives,' and 'Representatives in the Congress,' wherever they occur in this act, shall be held and construed to include and embrace Delegates to the Congress of the United States.

"The term 'candidate,' whenever used in this act in relation to the nomination or election to the office of President or Vice President of the United States or Senator or Representative in Congress, shall mean and include every person who seeks to become the nominee of any political party, every person who is the nominee of any political party, every person who seeks nomination or election independently of all political parties, every person whose name is presented to any convention or primary election with his knowledge and consent, and every person who declares himself a candidate for nomination or election or who has expended money or incurred any expense in an effort or attempt to secure nomination or election, whether nominated or elected or not.

"The terms 'contribute' or 'contributed,' 'disburse,' 'disbursed,' or 'disbursement,' 'expend,' or 'expenditure,' whenever used in this act, shall mean and include every act or transaction by or through which any money, check, note, property, or thing of value passes or is, directly or indirectly, conveyed, transferred, assigned, paid, given, provided, promised, pledged, loaned, or advanced.

"The term 'person,' whenever used in this act, shall mean and include any private person, firm, copartnership, association, or committee, and the singular shall include the plural.

Mr. PLATT. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I shall have no hesitation in voting against this bill, not because I disapprove of a great deal that is in it, but because it is unfair to pass a bill in the midst of an election which does not apply to everybody. It applies to primaries and to the November elections, and one-half of the primaries have already been held.

Mr. RUCKER. If the gentleman will yield, perhaps the gentleman was not present on yesterday when I stated that an amendment would be offered which would leave the existing law in force so far as the election this fall is concerned. I agree with the gentleman that it would be unfair to change the law now, and we will not do it.

Mr. PLATT. Well, Mr. Chairman, that changes the matter somewhat; but why pass it at this time in a hurry? Those complicated laws after all give those of us who are now in Congress a certain advantage over our opponents. We know all about them, because we are here and we hear them discussed, but the fellow who is trying to beat us on the outside does not know all about them, and he gets stuck. I remember in the last campaign I nearly scared the life out of my opponent—a nice old gentleman, a Progressive, who had been indorsed by the Democrats. I happened to go down to file one of the statements of my expenses in the office of the Clerk of the House of Representatives, and quite accidentally I discovered that my opponent had not filed any statement. He had not spent very much money and it was not a matter of any consequence. I am not sure that he had spent anything, but the law required him to file a statement, and I wrote to him in my most solemn terms and informed him that he had laid himself liable before the courts of the United States to a fine of $1,000 or more through his violation of the corrupt-practices act. The poor fellow was pretty nearly scarced to death. He had done nothing wrong and had intended nothing wrong, but that is the way the law works. I do not know what would have happened to my opponent if the law at that time had contained section 12 of this bill, requiring the Clerk of the House of Representatives to certify to the district attorney of the United States for the southern district of New York the fact of his failure to file, and requiring the institution of a prosecution against him. Mr. Chairman, such a bill as this is unfair. It may be called a bill to make it as difficult as possible for anybody to run against a sitting Member of Congress, either at a primary or at a general election.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. I was not here yesterday, and I have not read the bill, and I am now called to a meeting of the subcommittee of the Committee on Appropriations to consider the general deficiency appropriation bill, and it is of some importance that I be there to help make a quorum. I am going there, and I do not know how long the meeting will last; but before doing so I would like to ask the gentleman in charge of the bill a question. He is familiar with these bills. Does the gentleman's bill make it any more difficult to commit perjury or violate the law than the existing law? [Laughter.]

Mr. RUCKER. More difficult to commit perjury?

Mr. CANNON. Yes.

Mr STAFFORD. That is a stunner.

Mr. RUCKER. I confess that it is a stunner. Really, with all deference to the gentleman, I do not believe I quite understand him. Any man can commit perjury. There is not very much difficulty about it if he can get his own consent to it.

Mr. CANNON. Very well. Is it any more difficult to escape conviction?

Mr. RUCKER. Does the gentleman mean whether this makes it more difficult?

Mr. CANNON. Yes.

Mr. RUCKER. I am glad to say to the gentleman that it makes conviction much easier and escape much more difficult, if a man should violate the provisions of this bill than under existing law.

Mr. CANNON. Is there a severe penalty for those people who do not file their returns either for the primary or for the election, before and after?

Mr. RUCKER. The penal section of the bill applies to everyone who shall willfully violate any of the provisions of the law, and makes him subject to a fine of not more than $10,000 or more than one year of imprisonment.

Mr. CANNON. In a conversation in answer to an inquiry which I made some months ago respecting returns that were made of gentlemen who were defeated at the primaries, and so on, I was informed that in a great many instances the law had been violated, though perhaps not as a rule. I did not know whether there was any penalty for its violation under existing law.

Mr. RUCKER. The same penalty is provided for failure to make a statement as is provided for making a false statement.

Mr. CANNON. Yes.

Mr. RUCKER. I confess the gentleman's criticism is correct.

Mr. CANNON. Oh, I am just asking questions for information.

Mr. RUCKER. The gentleman's suggestion presents a situation to the House. Many people, especially those who are not nominated, have ignored the law, and in some instances I have heard that those who were nominated have ignored the law, though I am not stating positively about that. Under existing law there is a kind of loophole or opportunity for candidates to escape, growing out of this condition. The one man of all who would likely have the most knowledge would be the opponent of a candidate for nomination, and whether successful or defeated, the opponent does not want to become an informer against his adversary. If successful, he feels that he has had triumph enough and that his opponent has been punished enough, and if defeated, he feels that he would be very much criticized if he invoked the law against his successful opponent. We have provided in this bill a means by which all embarrassment is removed, and through official channels those parties will be brought to justice.

This bill when it becomes a law requires each candidate who files his statement to give the name and address and the Federal district in which his opponent resides, and then the Clerk of the House is required to scan all of these statements and make a list of all of the people who are candidates for nomination or for election, and if any one of those listed as a candidate fails to file his statement within the time required by the law

it becomes the duty of the Clerk of the House of Representatives to give official notice of that fact to the district attorney prosecuting in the district where the delinquent resides.

Mr. CANNON. It makes the successful man, then, either for nomination or election, turn informer against his opponent?

Mr. RUCKER. Oh, no; that is what it does not do. It makes the Clerk of the House do that in his official capacity, and the Member has nothing to do with it at all.

Mr. CANNON. Oh, the Clerk must keep posted.

Mr. RUCKER. Yes.

Mr. CANNON. I am gratified to learn that.

Mr. RUCKER. I believe if the gentleman would permit me to explain to him all the provisions of the bill, he would be gratified with all of them.

Mr. BENNET. Mr. Chairman, I move to strike out the last two words. We have had laws like this on our statute books for, I should imagine, 20 years in the State which I have the honor in part to represent. This particular kind of a law does not do anything to do away with corruption. We have had corruption at elections in New York State. I remember 25 years ago seeing men marched through a room to the polling place, and each man was made to hold his hand up so that the other side could not slip ballots into it, and when he got to the polling place he was permitted to let his hand come down so that the bunch of ballots he carried could be delivered to the inspector, and the presumption was that for that act of humiliation he got what he considered was satisfactory pecuniary compensation. That time has passed in New York State. I live in a Democratic city, and I presume I ought to take more or less joy in criticizing a Democratic city; but I want to state very frankly that in the twenty odd years I have been connected with politics in the Democratic city of New York, I have never known of vote buying and I do not think there is any vote buying. I will tell you what made the change. I do not know that we are any better in New York than 25 years ago, but we adopted the Australian ballot, and the men who used to be addicted to those practices lost their incentive to buy votes because they could not make sure the goods were delivered. That is why, therefore, this bill is practically a masquerade. It is assumption of virtue without any cause. It does not make any difference one way or the other. You will not do a very consciously good act by voting for it and you will not accomplish any useful purpose by voting against it. This is a piece of paper passing through the House and gets nobody anywhere.

Mr. COLEMAN. It is a waste of the time of the House to pass such a bill, is it not?

Mr. BENNET. Oh, I do not know; it is a sort of expression that virtue is its own reward, and people believe in decency at election, and we are so far ahead of the other body nothing is a waste of time.

Mr. WALSH. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. WALSH. Is there any need for this legislation to protect elections in the State of New York?

Mr. BENNET. Not only is there no need but it will not accomplish anything. In the mayoralty election of 1909, in which I was connected, the contributions amounted to $275.000, and under the State law we published how we spent the money.

Mr. RUCKER. Will the gentleman yield?

Mr. BENNET. I will.

Mr. RUCKER. I believe you have a statute something like this in New York, have you not?

Mr. BENNET. We have a statute which is not so long, but I think it is better. We have had it for 20 years.

Mr. RUCKER. Will the gentleman kindly give the House the benefit of his information and help to make this bill better instead of saying it is worth nothing?

Mr. BENNET. Mr. Chairman, my criticism does not go so much to the particular bill which so far as the mere arrangement of words is concerned seems to be pretty fair, but to the fact that you are coming in about 25 years after the reason for anything of this kind has occurred and pass a bill when——

Mr. RUCKER. In view of the fact that my friend votes the Republican ticket and lives in a Democratic district, I am glad to hear the old practice has become antiquated.

Mr. BENNET. During the 25 years I have been connected with the politics of New York State I have never known of a vote being bought by a Democrat or a Republican, not because we are better than anybody else—I do not want to be a Pharisee—and if I can have a minute more I want to tell you——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I would like to have two minutes additional.

Mr. RUCKER. If the gentleman will comply with this law, I think he will find good results from it.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. BENNET. A colored man is ordinarily a Republican in New York anyhow, and some of my Democratic brethren thought they could beat the game a little bit and they paid the colored men a dollar apiece if they would bring the star, which was the Democratic emblem, cut out of the ballot and deliver it. Well, some of the colored men thought that was a pretty good idea and voted the Republican ticket and cut the star out of the ballot and went back and got the dollar. That spoiled every Republican ticket cast by one of those colored men. The next year the Democrats got even more stars than the first year, but the Republicans had waked up by this time and they supplied these colored men with stars. [Laughter.] The result was that they went in and voted the Republican ticket and came out with a star, leaving the ballot unmutilated, and collected a dollar apiece for each star. [Laughter.]

Mr. RUCKER. The gentleman seems to have so much knowledge about this and living in a Democratic district, is not he just mistaken in the historical fact? Was it the Democrats or the Republicans who——

Mr. BENNET. A Republican does not waste any money buying colored votes; they are mostly Republicans anyway. [Applause.] No; I am not mistaken.

Mr. RUCKER. I want to say to the gentleman that in some sections of the country the Democrats treat the negroes much better than you do in New York, because I have known them to get as much as $2.

Mr. BENNET. I am glad to hear they pay $2 instead of $1. [Laughter.]

Mr. SLOAN. Will the gentleman yield?

Mr. BENNET. I will.

Mr. SLOAN. This bill apparently is directed against improper inducements for voting. Is there anything in the bill providing for the removal of obstructions in any of the States from the votes being cast?

Mr. BENNET. No; and I should be very glad to see something of that kind in the bill. I remember when the Democrats came back into power in 1894 they repealed the old statutes which were on the statute books at that time which tended to honest, fair elections throughout the United States. There is nothing of that kind in this bill.

Mr. RUCKER. Let me say to the gentleman that in my judgment there never will be anything like that in any other bill that is before the House and passed.

Mr. BENNET. That is just simply 1 gentleman's opinion out of 435. My colleague from Albany County disagrees with you.

Mr. PLATT. Will the gentleman yield?

Mr. TOWNER. Mr. Chairman——

Mr. RUCKER. Mr. Chairman, I ask unanimous consent that all debate on this section close and all amendments thereto in five minutes.

Mr. CHIPERFIELD. Mr. Chairman, I would like to have five minutes on this section.

Mr. RUCKER. Make it 10 minutes, then, Mr. Chairman.

The CHAIRMAN. The gentleman from Missouri [Mr. RUCKER] asks unanimous consent that debate on this section close in 10 minutes and that the gentleman from Iowa [Mr. TOWNER] have 5 minutes and the gentleman from Illinois [Mr. CHIPERFIELD] 5. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, it is always very easy to criticize a bill of this kind. I believe that this bill is subject to some criticism. I believe, however, that it is a marked step in advance over the three incomplete, somewhat contradictory, and altogether incomprehensible bills that have preceded it.

Mr. Chairman, I do not agree with my friend from New York [Mr. BENNET] in regarding it as an unnecessary bill. I think it is very necessary, and I think that it will accomplish a great deal of good. We should remember, gentlemen, that this bill applies only to national elections. It applies only to the election of President and Vice President and to the election of Senators and Representatives in Congress. And it is essential that this Congress should pass that kind and character of legislation. And although any bill presented may be subject to criticism, although there may be loopholes in it, and although gentlemen may see a degree of incompleteness in its terms so that there may be still violations of law, it is a great step in advance, and the moral effect of legislation of this kind, in my judgment, is extremely good. I think that the very fact that it is known in the United States of America that no man who expects to be a candidate for Senator or for Congress can expend an unlimited amount of money in corrupting the elec-

torate to which he appeals will deter the unfit and unscrupulous from becoming candidates. [Applause.]

Mr. WALSH. Will the gentleman yield?

Mr. TOWNER. I will.

Mr. WALSH. Does the gentleman understand that this bill prevents the expenditure of an unlimited amount of money for the purpose of securing the election of a Member of Congress?

Mr. TOWNER. I said, if the gentleman will remember, at the outset that this bill by the very fact that it does put limitations on the corruption of the voters and puts upon them the necessity of accounting for their expenditures, makes it more difficult for men to corrupt the electorate, and I still think there is no question but that is true.

Mr. BENNET. What is the limitation on the committee appointed for a senatorial primary?

Mr. TOWNER. What is the limitation?

Mr. BENNET. Yes.

Mr. TOWNER. None, I will say to the gentleman, but there ought to be. I have always argued for that before when bills of this kind were under consideration. But I will say to the gentleman, does that excuse you or me for not supporting a bill that at least is some defense against unscrupulous politicians?

Mr. BENNET. I was simply following out the gentleman's argument that this prevented a man of wealth from spending a good deal of money in a senatorial contest.

Mr. TOWNER. I think it does.

Mr. BENNET. It simply prevents him from drawing a check.

Mr. TOWNER. I think there is a good deal of benefit under the terms of this bill.

Mr. CHIPERFIELD. Will the gentleman yield?

Mr. TOWNER. Yes.

Mr. CHIPERFIELD. I think everyone would agree with the gentleman in his statements about the corruption of voters, but does he think it necessarily follows that any sum in excess of $2,500 in a congressional district or $5,000 in a senatorial contest means everything?

Mr. TOWNER. Not necessarily, I will say to the gentleman; but it occurs to me that gentlemen will agree that there must be some limitation placed upon these amounts. Of course it is arbitrary, and in some instances it may be unfair, but I do not believe it is not of value in the protection of the electorate.

Mr. RUCKER. The $2,500 the gentleman from Illinois [Mr. CHIPERFIELD] just asked the gentleman from Iowa [Mr. TOWNER] about, is $2,500 exclusive of all personal expenses of travel, for writing letters and sending telegrams, and telephone messages, and all those things.

Mr. TOWNER. That is true. I want to make one observation in closing, and that is addressed to these gentlemen who criticize the bill. It is now before you for amendment. Present your amendments. If they are fair and reasonable, if they will strengthen and make more effective this bill, I and others will support them. But the fact that imperfections exist which may be corrected is no reason why the bill should be condemned and why gentlemen should set themselves up in opposition to the bill.

The CHAIRMAN. The time of the gentleman from Iowa has expired. The gentleman from Illinois [Mr. CHIPERFIELD] is recognized.

Mr. CHIPERFIELD. Mr. Chairman, I cordially agree with the statements that have been made by the gentleman from Iowa [Mr. TOWNER] with reference to the necessity for carrying on both primary and general elections in a cleanly, decent, upright, and honorable way, and I would not yield to him any greater admiration for the accomplishment of this purpose than I possess.

But I take it, Mr. Chairman, that this bill, in practical operation, will have the result of bringing about and promoting hypocrisy and inducing perjury and subterfuge and concealment in connection with the expenses that are incurred in both congressional and senatorial elections.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes; I will be glad to do so.

Mr. RUCKER. Do I understand the gentleman's position is that the law which forbids a candidate for Congress to do a certain thing would induce that man to commit perjury?

Mr. CHIPERFIELD. No; that is not my position at all. My position is this, if the gentleman asks the question for an answer and will give me his attention: That when you say that under no circumstances can a candidate for Congress spend more than $2,500 for the purpose of organization and necessary expenses in a primary election in a congressional district you are putting a premium upon dishonest practices.

If it be your own district and the contest gets warm and your political fate and future are at stake, if you do not violate this provision yourself your friends and your political associates will do for you indirectly what you say by this law can not be done directly.

And you might as well recognize the situation first as last.

Mr. RUCKER. The gentleman is not recognizing the situation, because I say to the gentleman that that is an impossible situation. I want to say to the gentleman that no mortal man, so far as I know, ever spent one dollar to secure my election except myself. I have never violated the law, and this year I have a hard fight on my hands and I can not spend as much as $500 in my district.

Mr. CHIPERFIELD. I make bold to say this, without regard to what the gentleman urges, and he need take it as no possible reflection against the veracity of his statement, that when the time comes in the gentleman's district where he and his party organization are convinced that the gentleman's nomination means the success of his party his friends will see to it that he is nominated, and they will pay the price for doing it, whatever it may be.

Mr. RUCKER. There is no trouble in my district after getting the nomination.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. COLEMAN. In other words, the principle involved is paramount over everything else, and the people will fight for that principle?

Mr. CHIPERFIELD. Yes. You provide that in the State of Illinois in a senatorial contest not more than $5,000 can be expended for the campaign expenses of a candidate. That is absurd and ridiculous.

Mr. SANFORD. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. SANFORD. Will the gentleman tell the House the purpose for which he would want to spend money in a crisis? He might spend $2,500 in addition to the exceptions contained in the bill.

Mr. CHIPERFIELD. Yes; I will tell you. If it was the gentleman's own case the purpose would be to make sure that he was the one nominated by his party, regardless of other candidates.

Mr. SANFORD. What item would be expended outside the $2,500? If the gentleman will read the bill, he will find he is perfectly inconsistent in his attitude.

Mr. CHIPERFIELD. Oh, the gentleman is evidently laboring under the impression that he is the only man in the House who reads. [Laughter.] If the gentleman generally maintains that attitude, it would take more than $2,500 to be nominated in his district. [Renewed laughter.]

Mr. SANFORD. I do not want to be personal; I did not intend to be. I asked the gentleman to name any one item.

Mr. CHIPERFIELD. If the gentleman will kindly allow me to continue and cease interrupting, I will name to him the items for which he inquires and show him the application.

In the State of Illinois a man desires to be a candidate for Senator. By this bill he is limited to expending $5,000.

With the approval of the people of the State of Illinois in the last senatorial campaign, the expenses have run to $50,000 and $75,000 and $100,000, and gentlemen need not hold up their hands in holy horror on account of it. Many of the best men of the State of Illinois generously contributed for the expenses of these senatorial candidates in that State, and waged a hot campaign.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes; if I may get the time.

Mr. RUCKER. Does the gentleman know that one of the United States Senators from the State of Illinois was the first to write in the law the $10,000 limitation, and last year the $5,000 limitation?

Mr. CHIPERFIELD. I do not care who wrote it in the bill. I know that a senatorial campaign can not be made in the State of Illinois for $5,000, and it is hypocrisy to pretend that it can.

Mr. SANFORD. It does not need to be.

Mr. CHIPERFIELD. When you assert that a senatorial campaign can be carried on in the State of Illinois for $5,000 you are hypocritically pretending what can not be. If the State committee desires to communicate with the voters of the party in that State with but one letter, requiring a 2-cent stamp——

Mr. SANFORD. It exempts that.

Mr. CHIPERFIELD. I say if the campaign committee desires to communicate with the voters of the State of Illinois and sends to each of them a 2-cent letter, figuring the total cost of preparing and posting each letter at 3 cents, it would cost from $25,000 to $30,000 to do that alone.

Mr. RUCKER. That would not be an expense to the candidate.

Mr. CHIPERFIELD. Well, if you mean that a campaign committee can expend an indefinite sum, you simply nullify the law and make it ineffective. A campaign committee can not expend a great sum for a candidate under this law without violating its provisions.

The CHAIRMAN. The time of the gentleman from Illinois has expired. All time has expired on the paragraph.

Mr. MANN. I ask unanimous consent, Mr. Chairman, that the gentleman may have five minutes more.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that his colleague [Mr. CHIPERFIELD] be permitted to proceed five minutes more. Is there objection?

There was no objection.

Mr. CHIPERFIELD. I am not, and I will not be put in the attitude of being opposed to a bill that means an honest limitation of campaign expenses.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. TOWNER. If you believe that the amounts named in the bill—$2,500 and $5,000—are too small, can they not be changed by amendment?

Mr. CHIPERFIELD. Yes; of course they can.

Mr. TOWNER. And will the gentleman suggest to the committee what he thinks ought to be the change?

Mr. CHIPERFIELD. In my opinion there can be no fixed rule.

Mr. TOWNER. What amount should be stated instead of the amount stated in the bill?

Mr. CHIPERFIELD. There can be no rule that would apply equally to a senatorial contest in a State like New York and in a State like Arizona. There can be no rule made to apply to the State of Illinois and at the same time to the State of Idaho, because the conditions are so entirely different; for instance, 9,000,000 population in New York, 6,000,000 population in Illinois, and but a few thousand in the other States.

The candidate has got to reach the voters, and the purposes of the primary law are defeated if the candidate's claims can not be decently and legitimately laid before the people and a proper appeal submitted to their judgment.

Mr. TOWNER. I am concerned to know how the gentleman would meet that difficulty.

Mr. CHIPERFIELD. It is a great deal easier to say this is an improper limitation than to prescribe a rule that would properly fit every case.

Mr. TOWNER. The gentleman surely would not say we ought to have no legislation of this kind, would he?

Mr. CHIPERFIELD. I suppose because I will not say that, in the gentleman's opinion, that is an argument in favor of this particular sum; because I can not definitely prescribe a rule, this limitation is right. But, speaking from my personal observation of the conditions that exist in Illinois and the conditions that exist in Chicago, I say you might as well prescribe that you can not spend a dollar as to say you must limit to $5,000 the expenses in a senatorial campaign.

In the city of Chicago in the mayoralty campaign it is hotly contested; they hold their meetings; they have their organizations; they maintain headquarters; they conduct an educational campaign, apparently and avowedly for the purpose of selecting the best candidate, and make a thoroughly organized fight. The expenses of those primaries run from $50,000 to $100,000, with the approval of the people and the press of that city.

Now, when you not only include the city of Chicago but cover the entire State of Illinois, or perhaps run for Congress in the entire State of Illinois, how can one meet the people of the entire State? How can you present your views to the people of that State, by letter or otherwise, for $2,500 or $5,000?

And when you leave open a loophole to a committee to do for the candidate what the candidate can not do directly for himself you are putting a man who is inclined to obey the law at a disadvantage as compared with the man who does desire not to obey the law and who does not obey it.

Mr. MADDEN. Mr. Chairman, will the gentleman yield there?

Mr. CHIPERFIELD. Yes.

Mr. MADDEN. The question is whether the rule should be applied to a State of 6,000,000 people as it is applied to a State having only 200,000 people.

Mr. CHIPERFIELD. Exactly. You have got to bring your claims before the people through the medium of the modern campaign methods, and there is no other way to do it; and legislation of this sort prevents the dissemination of the knowledge that is necessary for intelligent action on the part of the voters. There has got to be used in these campaigns the lithograph, the billboard, many forms of advertising, letters from the candidate and from the campaign committee, speakers, campaign headquarters, clerical aid, workers, and there has got to be the organization necessary to present the claims of the candidate to the people.

Mr. RUCKER. Will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. RUCKER. My judgment is that when this bill becomes a law the gentleman from Illinois will find a way to get back here without violating the law.

Mr. CHIPERFIELD. It is not a question whether I can come back or whether I must remain at home.

Mr. RUCKER. Whoever succeeds the gentleman, then, will come back without violating this law. And if it ever should dawn on the intelligent judgment of this House that any mortal man sits here as a criminal, then every man here, whether he comes from the great State of Illinois or any other State, ought to record his vote in favor of lashing that man from this floor.

Mr. CHIPERFIELD. I entirely agree with the gentleman on that. Now, just let me suggest one case where this law might work a hardship.

Suppose there is a man in the Senate or in the House who does not properly represent the wishes of his State or district. I have in mind no particular man, but I am taking the abstract proposition of a man who does not properly represent his district or State.

The forces that make for good, as they are lovingly called in the State of Illinois, desire to displace him and desire to place a man in nomination and present his claims to the people of the State. Does any man within the limits of this Hall think that can be done in a State of the size of Illinois for $5,000? It would prevent the claims of the other candidate being properly presented.

Mr. RUCKER. Will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. RUCKER. For what purpose will the money be expended?

Mr. CHIPERFIELD. When I look at the silvered hair of my friend from Missouri and realize the great extent of his political experience——

Mr. RUCKER. Oh, it is not because of age. Do not respect my age at all.

Mr. CHIPERFIELD. I understand that the gentleman knows far better than I do what is necessary to be done in the proper conduct of a political campaign; and, instead of instructing him, I am very sure I should sit humbly at his feet and receive instruction from him. [Laughter.]

Mr. RUCKER. I am trying to get instruction.

Mr. CHIPERFIELD. The gentleman knows the legitimate purposes for which money is expended in a political campaign.

Mr. RUCKER. State them.

Mr. CHIPERFIELD. Very well, I will state them. I will tell the gentleman what we do in the State of Illinois to organize a campaign for a worthy man. Does the gentleman mean to say now that it is not necessary to have the people who are interested in his campaign and in his nomination go about the State and present his claim? Is it not necessary to hold meetings? Is it not necessary to hire halls, to have advertisements in the papers, to cover the dead walls, to communicate with voters, and to organize the forces down to the smallest voting precinct?

Mr. RUCKER. In that great State of Illinois, where the office seeks the man, they always find good men like the gentleman——

Mr. CHIPERFIELD. That does not answer my question. I am talking in all seriousness. You have got to have your campaign headquarters. There must be a suite of rooms in a centrally located city. You have got to have your clerical force, and when you attempt to reach 6,000,000 people in 60 days the expense has run legitimately to $50,000 or $100,000 for a senatorial campaign in Illinois.

Mr. RUCKER. If the gentleman will permit me, I do not want to interrupt him——

Mr. CHIPERFIELD. The gentleman may interrupt all he pleases.

Mr. RUCKER. The gentleman is making all his argument with reference to the senatorial end of this situation. Now, I believe that the Senators at the other end of this Capitol will be quite capable of taking care of their interests in this bill.

Mr. CHIPERFIELD. That is probably true; but the bill is before us now, and the chief iniquity of it, as I see it, is in the senatorial situation, although I think $2,500 for congressional campaigns may very often work a hardship.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TOWNER. I ask unanimous consent that the gentleman's time be extended five minutes.

Mr. RUCKER. I will not object, of course.

Mr. TOWNER. Let me say to the gentleman from Missouri that I do not think he ought to object.

Mr. RUCKER. I said I would not object.

Mr. TOWNER. Let me explain to the gentleman that I think it is necessary that we have this discussion regarding the general propositions embraced in the bill, at some time, and we might as well have it now as at any time.

Mr. RUCKER. Yes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa, that the time of the gentleman from Illinois [Mr. CHIPERFIELD] be extended five minutes?

There was no objection.

Mr. CHIPERFIELD. I did not enumerate all of the expenses that would be necessary.

Of course, the publicity given a candidate can not all be in the form of a personal letter. There has got to be much campaign literature; and in a State like Illinois—I speak of that because it is the particular thing I have in mind—there are many complicated issues in which the people of the State are vitally and intimately and seriously concerned and interested.

Those issues can only be put before the people of that State by spreading literature broadcast, by getting out documents, pamphlets, and circulars, by going to the press and asking for the use of their editorial columns, by posters on the dead walls, by using the advertising columns of the papers; and it is impossible to present the issues of a campaign on any great issue in the State of Illinois for $5,000 or $10,000 or $20,000, so far as the printing and advertising alone is concerned.

Mr. WALSH. Will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. WALSH. I should like to ask the gentleman if he does not represent a district as large as that represented by either of the Senators from the State of Illinois?

Mr. CHIPERFIELD. Yes. I did not care to speak of my own personal interest in this matter, but I represent the whole State of Illinois, and in the carrying on of my campaign it is necessary to go to every county in the State of Illinois, and to these present my claims precisely as would be done in a senatorial or gubernatorial race.

In the present primary I will have against me a gentleman connected formerly with the Chicago Tribune, also a former Senator, and a number of other distinguished gentlemen. Under the provisions of this bill I have the privilege of spending in any county in Illinois, of which there are 102, the princely sum of $24 and some odd cents.

What does it mean?

It means that I might just as well, and a good deal better, remain at home and not spend a penny in any county of Illinois. If any man thinks that when a candidate spends $50 in a county he is debauching the electorate, that gentleman is credulous in the extreme.

Mr. TOWNER. Will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. TOWNER. Does not the gentleman recognize the fact that his opponents will be subject to the same law?

Mr. CHIPERFIELD. Theoretically I do. I am answering the gentleman seriously. Let me tell you, the gentleman I just mentioned, who is opposing me in this primary, and for whom I have the highest regard, was formerly in the newspaper business in the State of Illinois, and every newspaper in the State of Illinois will give him space for publicity that I will not get. They will give it to him voluntarily. He will have help of that kind which will be the equivalent of many thousands of dollars in the way of advertisement.

Mr. COLEMAN. Does not this law give the controller of a newspaper a great advantage?

Mr. CHIPERFIELD. Unquestionably.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. SMITH of Michigan. I would like to inquire whether or not the gentleman is limited in his expenditure by any statute of his own State.

Mr. CHIPERFIELD. No.

Mr. SMITH of Michigan. They are in a good many States.

Mr. CHIPERFIELD. So far as I know, and I ask any gentleman from Illinois to correct me if I am wrong, I know of no limitations on the subject.

Mr. TOWNER. Will the gentleman further yield?

Mr. CHIPERFIELD. Yes.

Mr. TOWNER. The gentleman believes, does he not, that the people require and are justified in requiring the passage of a corrupt-practice act?

Mr. CHIPERFIELD. Yes; but it should be a law that will enable a candidate to properly conduct his campaign and to make a fair appeal to the voters.

Mr. TOWNER. If that be the case, how can we get one if there is no limitation to be made on the expenditure? What does the gentleman recommend?

Mr. CHIPERFIELD. My idea is that there are certain things that are so legitimate, such as the unlimited use of the newspaper, the unlimited use of every form of advertising, the sending of pamphlets and circulars in the use of which there can be no corruption, and a lot of allied things that I can not name just now—those things should be taken out of this bill absolutely.

You can not corrupt a man by advertisement or by an appeal to his intelligence.

I have received letters from newspapers of the State of Illinois, many of them, from every county and section of the State, urging me to let them have some advertising in my own campaign.

Under this law I can not do that. Every man on the floor knows that you have to recognize and deal with the papers in your own county, your district, and the State, and so I am prevented in my own case from using the newspapers of the State. I say that such forms of advertising are legitimate. I favor, as much as any man, honest elections.

They are the very foundation upon which the Republic is builded. But, in order to secure the selection of capable men, the candidates should have the absolute right to fully present the issues for which they stand, to widely promulgate their platforms, and to communicate most fully and freely with the voters.

This bill proceeds upon the theory that the most laudable expenditure of any money in excess of a certain amount is corrupting. This bill seeks to close the usual and approved avenues of publicity, and has as its effect the denying of information to the voter.

My contention is that the improper use of money in the smallest amount should be prohibited, and that the proper use of money for the fullest publicity and the widest and most accurate information should be encouraged.

The weakness of this measure is that it makes an arbitrary and insufficient limit to expenditures and does not properly consider the purpose for which the expenditure is to be made.

In this respect it is illy conceived and unwisely prepared.

It will only bring about lack of information, evasion, and deceit.

Mr. MANN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I want to get some information as to what the first definition in the bill covers. In the existing law the word "committee" is used as a political committee, and only includes the political committee which seeks to influence the election of Members of Congress in two or more States. It does not include the local committee. But the language of the present bill is so broad that I think we ought to understand what is its purpose. Remember that every committee now in the bill must make a report of its contributions and expenditures and must have a chairman and a treasurer. The language is:

> That the term "committee," when used in this act, shall be construed to include the national, State, and the national congressional campaign committees of all political parties and all other committees, associations, or organizations, political or nonpolitical, which shall receive or expend any money, or give or promise anything of value, for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President of the United States are to be nominated, or candidates for Senator or Representative in Congress are to be nominated or elected.

That includes all the fall elections, all of the primary elections at which Members of Congress who are candidates are selected.

This will require every township committee, every school-district committee, every ward organization to make a report of all of its receipts and expenses, and to have an organization, to make them under oath, get them properly transmitted to the clerk of the House of Representatives, or be subject to a criminal prosecution. Here are the ladies in the State of Illinois or Colorado up on some district in the mountain top where there are three or four of them organized in a club for the purpose of promoting the election of the gentleman from Colorado, Mr. TAYLOR, to Congress. They may spend 10 cents or they may promise something.

Mr. RUCKER. If the gentleman will yield.

Mr. MANN. I will not yield just now. I want to finish this statement. Nobody has been able to make a consecutive state-

ment without being interrupted by some member of the committee. I want to get some information.

Mr. RUCKER. But I may not answer the gentleman if the gentleman is going to talk in that way.

Mr. MANN. I am not complaining of the gentleman, but I do want to make a consecutive statement.

Mr. RUCKER. When the gentleman makes a mistake, as he sometimes does, I thought it would be right to correct him.

Mr. MANN. It seems to be impossible in the consideration of this bill for the gentleman from Missouri to contain his soul in patience for a moment. We all look to him for advice and information on the bill. Now, do not misunderstand me. I am not complaining, but let some of the rest of the Members express themselves, so that we can get the information.

I do not know now just where I was. I was making a consecutive argument, and was interrupted by the gentleman, who asked an inconsequential question.

Mr. HAMILTON of Michigan. The gentleman was with the ladies on the mountain top. [Laughter.]

Mr. MANN. If the ladies making up that organization do not make a report, under the terms of this bill they are liable to be sent to jail or fined.

A MEMBER. Oh, no!

Mr. MANN. Some gentleman who does not know anything about it says "Oh, no," but that is the bill and that is what the bill is for. What I want to know is, if I may ask the gentleman, if I may very respectfully and I hope very courteously ask the gentleman from Missouri [Mr. RUCKER], whether this bill does not cover every kind of an organization or committee or association which in any way seeks to influence the election of a Member of Congress, whether that organization be an organization in a school district or half a school district, or what not, or a ward in a country town, or a national organization. May I have the gentleman's attention now?

Mr. RUCKER. Mr. Chairman, will the gentleman permit me to answer? [Laughter.]

Mr. MANN. I beg the gentleman to answer it.

Mr. RUCKER. For fear the gentleman misunderstood me before, I am going to get closer, so that if he has any further demonstrations to make he will not have to walk so far to make them. Mr. Chairman, in response to the questions propounded by the gentleman from Illinois [Mr. MANN] I want to say that he is now as far wrong as I have ever known him to be in my life, except that he is always wrong on political questions. This bill requires nothing of the kind, as I understand it.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RUCKER. I do not want to be interrupted. [Laughter.] It does require every committee, association, or organization, political or nonpolitical, which receives and expends money to affect the result of a nomination of a candidate for Senator or Representative to account, and it ought to do it. Otherwise criticisms which I have heard would be well founded. It will not do to allow a gentleman who might want to do it to organize a personal committee and do the very thing which the whole body of the people protest against, namely, debauch society.

Mr. MANN. Now, will my friend yield?

Mr. RUCKER. Oh, the gentleman must not interrupt me; but I will yield to him.

Mr. MANN. Yes; inasmuch as it is my time. The gentleman is not now answering the question that I put at all.

Mr. RUCKER. Let the gentleman put the question again.

Mr. MANN. He said that I was as far wrong as could be, and he dodged—well, I will not say that; but he does not answer the question. He is arguing as to whether it ought to be. I want to know whether it is, not whether it ought to be. That is another question. Does the law apply to every precinct, every school-district organization, whether it be political or nonpolitical, which seeks to influence the election of a Member of Congress or, for that matter, the election of the President of the United States?

Mr. RUCKER. Every organization which collects and expends money for that purpose must account for it and ought to account for it.

Mr. MANN. Mr. Chairman, every one of these organizations expends money or something else. This is not confined to money. It provides with respect to money or promise of something of value. Every kind of an organization, if it be composed of only three people, does something which comes within the terms of the bill. The result of that would be, in my opinion, to bring the bill into disrepute. People will become accustomed to violating the law. Nobody believes that such a law will be complied with or that you will send people to jail. If I were the President of the United States and this law were on the statute books, I would have it within my power to have half the prominent Democrats of the country looking through the bars of a penitentiary.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. MANN. Of course, I would not prosecute the Republicans.

Mr. RUCKER. I was going to ask the gentleman what would become of this great horde of Republicans with whom we contend?

Mr. MANN. Every one in politics or out of politics, every one who thinks he has an idea who ought to be President of the United States, under the terms of this bill is subject to being placed in the penitentiary. It may be they will not all be sent there, because when everyone is guilty of crime you can not convict anyone.

Mr. RUCKER. I want to say to the gentleman courteously and respectfully, that I am sure he takes a strained view of this law.

Mr. MANN. Point out to me some place in the bill where it does not say exactly what I suggest.

Mr. RUCKER. I am not surprised at the solicitude the gentleman feels for the organization of ladies in this country, after a recent utterance from him.

Mr. MANN. Oh, well, the gentleman is getting gay now. That is rot.

Mr. RUCKER. It is true all the same.

Mr. MANN. It is not true.

Mr. RUCKER. I say it is true, and I am not surprised——

Mr. MANN. I say it is false.

Mr. RUCKER. What are you talking about?

Mr. MANN. What you say.

Mr. RUCKER. Mr. Chairman, the gentleman must not—I was talking courteously to him, and he must not get gay.

Mr. MANN. Oh, no; the gentleman was not talking courteously.

Mr. RUCKER. I was.

Mr. MANN. Very well. The gentleman is one of my very best friends and he can not quarrel with me. I have a great affection for him.

Mr. RUCKER. If the gentleman were not so ugly in his utterances I would embrace him. [Laughter.]

Mr. MANN. The gentleman will still not deny the statement that I made that under the terms of this bill every kind of a committee, political or nonpolitical, a sewing society, any body that seeks to influence in any way by money or otherwise the candidacy of a man for nomination, or election, for the Presidency or to Congress, must make the reports required in this bill, and if they do not, they are guilty of a penal offense. Is not that true?

Mr. RUCKER. No; it is not true. The gentleman has an entirely wrong notion. I wanted to tell him but he is cross this morning.

Mr. MANN. I am glad to have the interruption. I would like to have the gentleman point it out.

Mr. COOPER of Wisconsin. I would like to answer that question if I might be permitted. I think the gentleman from Illinois is slightly in error. He says this proposed law would punish any party or any committee which should expend money or do anything else to influence votes. I do not think that. It says, "expend any money or give or promise anything of value for the purpose of influencing," and so forth. Now, I think anybody who spends money——

Mr. MANN. Now, the gentleman is giving an opinion and not stating a fact.

Mr. COOPER of Wisconsin. That is what this bill proposes.

Mr. MANN. That is what I said.

Mr. COOPER of Wisconsin. No; the gentleman said, "in any way."

Mr. MANN. Expend or give or promise anything of value.

Mr. COOPER of Wisconsin. Exactly.

Mr. MANN. That is, in any way.

Mr. COOPER of Wisconsin. Oh, no; it is not.

Mr. MANN. Promise anything of value. It does not say money.

The CHAIRMAN. The time of the gentleman has again expired.

The Clerk read as follows:

SEC. 2. That every committee as defined in this act shall have a chairman and a treasurer. It shall be the duty of the treasurer to keep a detailed and exact account of all money or things of value contributed to such committee or any member thereof or by or to any person acting under its authority or in its behalf, and the name of every person, firm, association, or committee from whom received, and of all disburse-

ments made by the committee or any member thereof, or by any person acting under its authority or in its behalf, and to whom disbursed. No officer or member of such committee, or other person acting under its authority or in its behalf, shall receive any money or thing of value or expend or promise to expend any money on behalf of such committee until after a chairman and treasurer of such committee shall have been chosen.

Mr. RUCKER. Mr. Chairman, I do not care to discuss this provision here at all.

The CHAIRMAN. Does the gentleman desire to offer an amendment?

Mr. RUCKER. I move to strike out the last word. Mr. Chairman, I merely want, in justice to myself and to the membership of this House, including the gentleman from Illinois [Mr. MANN], to say that evidently he misunderstood what I said or I was exceedingly unfortunate in my use of language.

The gentleman knows very well I would not intentionally say that which would offend any gentleman in this House, and particularly himself; but when I was trying to make overtures to him and get real close to him, because he knew he was arguing a bad case, as he frequently does, he grew somewhat petulent and cross and ugly with me. I am sorry for it, and if I wounded his feelings I sincerely apologize for it, because I had no intention whatever to do so. [Applause.]

Mr. MANN. Mr. Chairman, if the gentleman will permit me, in the rough and tumble of debate nobody wounds my feelings. I fight back when gentlemen fight me. Do not think you can walk all over me without getting kicked if I can kick. The gentleman from Missouri and I never quarrel more than a minute at a time.

Mr. BENNET. Mr. Chairman, I am going to move to strike out the section. If the gentleman from Michigan desires to make an amendment prior to that——

Mr. SMITH of Michigan. I did not have an amendment, but I wanted to inquire something about the bill of the chairman of the committee.

Mr. BENNET. The gentleman can move to strike out the last word.

Mr. SMITH of Michigan. Mr. Chairman, I move to strike out the last word, and I do that for the purpose of obtaining some information. I would like the attention of the chairman of the committee, if he will kindly give it to me. I want to inquire of the chairman, in view of what has been said between the chairman and our minority leader [Mr. MANN], as it seems to me whether it is true, that if a committee is appointed that in any way favors the election of a Member of Congress, they must make a report of the amount expended, such as ladies on a mountain top, or a committee or a township or a precinct in my district?

Now, if a committee is appointed of its own volition, without my solicitation, or without being authorized under the law, I would like to know what effect it would have on my election if I do not know or consent to it, and under this law it must report as I understand it has to do?

Mr. RUCKER. I may not be able to make myself clear to the gentleman, but I will try to do so. I believe that if a committee or association, whether composed of one or more people, gather and spend money solely in your interest, or in my interest, that they must account for it, if acting as a committee.

Mr. SMITH of Michigan. That is what I wanted to know.

Mr. RUCKER. And I believe you, and I would have to account for it if it is spent in our interests solely with our knowledge and consent.

Mr. SMITH of Michigan. But suppose we did not know it?

Mr. RUCKER. Then it would not be.

Mr. SMITH of Michigan. Thank you.

Mr. BENNET. Mr. Chairman, I move to strike out section 2 for this reason: The language of section 1 covers, this year, at any rate, one-third of the Protestant churches of the Northern States. There are, I think, five States in which there is going to be a prohibition election, and the temperance boards of every State have asked the churches to contribute—I know the Presbyterian Church has been asked to contribute, and I have no doubt the Methodist, the Baptist, and everybody else have. Now, those organizations are going to be added to the 8,000 committees that have to report under the provisions of this law. We have 8,000 local committees that I know of in the State of New York that have to report to the secretary of state under our existing law. They will have to make two reports this year, or 16,000 reports, which will have to come down to the Clerk of the House, and he will have to go over them and see who shall be prosecuted. But section 1 provides that all other committees, associations, or organizations—and that includes the churches—political and nonpolitical, it seems to me sometimes a question whether the church is one or the other, but it certainly is one or the other—which gives any money to be spent for or against the election of a particular candidate for Congress at which candidates for President and Vice President of the United States are to be nominated, must elect a chairman, section 2 provides, and a treasurer, and make reports.

Now, every single one of the Protestant churches that contributes to these prohibition elections in the five States will have to organize, with the election of a chairman and treasurer. Of course, they will not do it. But in this law, in the latter part of it, there are teeth. The Clerk of the House must report to the clerk of the proper judicial district of the United States district courts, and they must bring down the ministers of all those churches——

Mr. MAPES. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. MAPES. Will these ministers and churches contribute to campaign committees?

Mr. BENNET. They will contribute to committees. The Presbyterian Church, of which the gentleman from Indiana [Mr. MORRISON] and myself are elders, and of which the gentleman from Illinois [Mr. MCKINLEY] is a very honored member, will contribute to the board of temperance of our church.

Mr. MAPES. If the gentleman will refer to section 9, he will see that they do not have to make an accounting if they contribute to regular committees.

Mr. BENNET. I think that section there refers to regular political committees.

Mr. MAPES. It refers to all the committees——

Mr. BENNET. Suppose that instead of contributing to the board of temperance they send it to the Amethyst, which is the organ of our church. Then they have all to make these two reports, in not more than 15 nor less than 10 days after the election, and the Clerk of this House has got to investigate those expenditures and put the warrants in the hands of the clerks of the district courts of the various districts and bring all those good Presbyterians and Baptists to jail, along with the Woman's Christian Temperance Union, and the Antisaloon League, and the liquor dealers' organizations, whatever they are, and the labor organizations, and we will have more good people in jail at one time than we ever had before.

Mr. BARKLEY. Is it the gentleman's contention that the mere fact that the prohibition election is to be held on the same day on which the general election is held would require these committees to make this report that you have been detailing?

Mr. BENNET. Of course. The language is specific.

Mr. BARKLEY. If that is true, then could it not be carried still further and require the committee in any county where the election will be held on the same day that the general election is held to report also.

Mr. BENNET. They have all to report. As I have stated, the political committees in the State of New York that I know of will have to make 16,000 reports under the provision of this statute. My colleague on the committee, Mr. SANFORD, can not deny that.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BENNET. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LONGWORTH. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. LONGWORTH. Would this, in the gentleman's opinion, apply to, say, a ward political club at an election where a very large number of officers were to be elected incidentally with the Congressman?

Mr. BENNET. Certainly.

Mr. LONGWORTH. And how could they in filing their statement determine the amount that was expended for the election of the Congressman as distinguished from these various others?

Mr. BENNET. If a Congressman is elected, they would have to file a report showing all their receipts and all their disbursements. The aggregate of all the receipts and disbursements, and for all disbursements over $10, they have to have a receipt from the man to whom they paid it out.

Mr. LONGWORTH. I assume that probably in every ward of the gentleman's district there is a Democratic committee——

Mr. BENNET. I have 142 election districts in my congressional district. In each one there is a Democratic committee, a Progressive committee, a Republican committee, and Independence League, and a Socialist committee. In some of them there are Prohibition committees, but not in all. And in addition to that, if there are independent candidacies, as there usually

are in New York City districts, each one of them under our State laws must in practice have an election district committee.

Mr. LONGWORTH. And because a Member of Congress is to be elected, perhaps only 1 of more than 100 candidates of that particular party with which this club is associated, they would have to make a return to the Clerk of the House, stating all the receipts and expenditures made by them in the election?

Mr. BENNET. Mr. Chairman, it looks to me under this law they would have to do more than that. Some of us will be candidates at the primaries. We may not have any opposition. It may not cost me $4 to be renominated—I hope it will not—or some of the other gentlemen who are nominated. But it is a primary, and we are candidates for Congress. They will have to make 568 reports to the Clerk of this House from my congressional district.

Mr. BARKLEY. Will the gentleman yield further?

Mr. BENNET. Yes.

Mr. BARKLEY. If this law is to require county committees that have charge of the election of county officers who are elected on the same day a general election is held to report to the Clerk of the House of Representatives in States where they have State laws regulating corrupt practices, how is a man to know what one he has to obey?

Mr. BENNET. He has simply to report to the State and to the Congress, both.

Mr. BARKLEY. Suppose there is a limitation on the expenditure in the two laws that are entirely different, then he is compelled to obey the one that requires the smallest amount?

Mr. BENNET. I do not know how it would work out. He must obey the law so far as the election for Congress is concerned; but suppose the limitation was $600, as it is in Missouri, for a Congressman, and they have another limitation for county officers, as I assume they have, or State officers, now it might be that a political organization would spend out of its proportion for the election of State or county officers—that is, out of its proportion in connection with Congress—and be put in a position where they would violate either the State or the Federal law?

Mr. BARKLEY. Does the gentleman believe that reports on purely local offices, like county or precinct offices, ought to be required to be made to Congress?

Mr. BENNET. I do not. I have moved to strike out the section.

Mr. DALLINGER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. DALLINGER. Is it not a fact that there is conflict between sections 1 and 2 and 9? Section 1 says that the term "committee," when used in this act, shall be construed to include the national, State, and the national congressional campaign committees of all political parties, and all other committees, associations, or organizations, political or nonpolitical—any committee that contributes anything?

Mr. BENNET. Yes.

Mr. DALLINGER. And section 2 requires that every committee shall have a treasurer and shall make report, and section 9 confines it to every person, firm, association, or organization that shall spend or promise any sum of money or other thing of value amounting to $50 or more.

Mr. BENNET. I do not know that there is a conflict. I think the scheme for the perpetration of the outrage is fairly consistent. If this Congress wants 150,000 reports, more or less, this fall, of course we have the right to put it on the statute books. If you want all your Baptists and Methodists and Presbyterians——

Mr. SANFORD. Mr. Chairman, will the gentleman yield there?

Mr. BENNET. Yes.

Mr. SANFORD. I would like to ask the gentleman if he thinks the Baptist sewing circle or the Presbyterian sewing circle or the Young Men Christian Association does collect some money to advance the gentleman's interest in the election, does not that society or sewing circle immediately become a political committee within the proper definition of the law? That is, if you want to assume that you need and want publicity, is there any other way of getting it than the way provided right here?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BENNET. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BENNET. I know of one Catholic priest who is a warm friend of mine, although I am a Presbyterian, and I know that he will put in at least a day in my campaign; and I know that if he does, unless he organizes his church with a chairman and treasurer, he must report to the Clerk of this House, and be arrested unless he makes a report of all receipts and disbursements of his church during the campaign.

Mr. SANFORD. Does the gentleman mean that would happen when he does not contribute money?

Mr. BENNET. Yes. He contributes something of value, and that is his time.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. RUCKER. I wanted several times to interrupt the gentleman as he was proceeding, because he has several times repeated statements that I think are erroneous. I do not think the gentleman wants to remain in error. The gentleman speaks of the Clerk of the House attempting to put a warrant in the hands of a Catholic priest. There is nothing in this bill to warrant that idea at all. There is something in this bill providing that a candidate for Congress or for Senator must give the name and residence of his opponent for nomination or election, and that the Clerk, if those opponents are named and fail to comply with this law, must certify that fact to the district attorney. But that has no reference to a committee whatever.

Mr. BENNET. Then, the argument of the chairman of the committee is this, that while my statement may be accurate that these 100,000 committees may violate the law, we nevertheless ought to pass the bill, because under his construction of section 9 it is nobody's duty to enforce it, and that therefore these good people can go ahead and defy the law ad libitum. That in itself ought to defeat the bill.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. MEEKER. Is there anything in this bill that will bring in reports of all the moneys collected for political activity, that would compel everybody to report money raised for political purposes?

Mr. BENNET. Every man that contributes as much as $10, or every man, at least, that contributes as much as $50, would surely get in, and possibly, under one construction, a man who contributes as much as $10.

Mr. MEEKER. Would that apply only to the election of candidates?

Mr. BENNET. No; it would apply also to the primaries.

Mr. MEEKER. Would it apply only to individuals or to a cause?

Mr. BENNET. It would apply to a man who contributes as much as $50 to a cause. To be specific, in the thirty-fourth congressional district of New York the Anti-Saloon League has asked for a contribution of $50,000 to defeat the sitting Representative at the primaries. Of course that means, if this becomes a permanent thing and the Anti-Saloon League attempted to influence the election of a single Representative in Congress—and, of course, they do every year, openly—they would have to file a complete statement of their receipts and disbursements.

Mr. MEEKER. They do it secretly now by attempting to defeat Congressmen in advance of the primary.

Mr. CHIPERFIELD. Mr. Chairman, will the gentleman yield right there?

Mr. BENNET. Yes.

Mr. CHIPERFIELD. Taking the same organization to which the gentleman has referred, and supposing they spend $3,000 to influence or attempt to influence the election of a Congressman in the election or at the primary, would not that be an absolute disqualification of the sitting Member?

Mr. BENNET. Yes; if they did that in the campaign for him and did not report.

Mr. CHIPERFIELD. Under section 13, would it not disqualify him?

Mr. BENNET. If the Anti-Saloon League in the thirty-fourth congressional district that has asked for a contribution of $50,000 spends $3,000, and they happen to defeat the sitting nominee, I should imagine that under this bill the successful candidate would be rendered ineligible for reelection.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. SMITH of Michigan. I see the bill recites "that no candidate for Senator or Representative found by the House in which he claims membership to be a party to a violation of this act shall receive or retain the office to which he was declared elected." If he is not a party to the violation of the act, he is not concerned?

Mr. BENNET. If he allows an organization in his district to make a public appeal for $50,000 to be expended in his behalf, and accepts the benefits of it, that makes him amenable to it.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. HULBERT. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BENNET. I thank my colleague, but I do not care to take up the time further, and will yield to others.

Mr. WALSH. Mr. Chairman, I rise in opposition to the motion of the gentleman from New York [Mr. BENNET] to strike out the paragraph.

Mr. Chairman, this measure, among other purposes, is to provide for publicity of campaign contributions and expenses, and where it does that it seems to be an admirable bill.

But it goes into other matters, and it results in leaving the laws relating to the nomination and election of candidates in rather a doubtful condition. Section 16 says that if any laws of the States are not directly in conflict with this bill, they are to be considered as in force. Now, if Congress is going to enact a measure relating to the election of Senators, Members of the House, President, and Vice President, I submit that it ought to standardize the laws and provide that they should apply to all candidates throughout all the States. Why, the learned chairman of the committee yesterday cited a condition which exists in his own State, where in one district they can spend $600 and in an adjoining district in the same State they are allowed by the State law to spend $1,000 or $1,200. There should be no such condition as that. If Congress is going to take charge of the election of its Members, we ought to enact a law that will apply in all the States and abrogate the State laws, and say that the law enacted by the Congress shall be the law relating to Members of the House and Members of the Senate, and that if a different law exists in any of the States it is abrogated by the act of Congress. We ought not to enact a law which will say, "If you have a law in your State that says you can only spend $2,400, and this act says you can spend $2,500, the law saying that you can spend only $2,400 is to govern, and you must be bound by that provision, but if you have a law which says you may spend $3,000, that law is in conflict with this act, and you must be bound by this act."

Mr. DYER. No doubt the gentleman is referring to the statement of the chairman of the committee. What the chairman meant was that the amount you can expend in Missouri is dependent upon the vote.

Mr. WALSH. Upon the vote cast.

Mr. DYER. We have one district in the State where more than three times as many votes are cast as in another district.

Mr. WALSH. The gentleman can see how unfair that is. In some of the Southern States, where there are no contests worthy of the name, if any law should be in force depending upon the size of the vote cast, it would make a considerable difference in the application of the law. Now, I have the honor to represent in part a State which was one of the first, if not the very first State, to enact a corrupt-practices act relating to elections and nominations, and it is one of the most stringent laws on the statute books of any State in the Union, and I represented a defendant in a prosecution set on foot under that very strict statute to punish for an alleged election fraud, and one of the evidences of corruption was simply that a political worker said to a voter, "John, I will see you to-morrow morning at the polls," or words similar to that, and it was attempted to be shown that under the Massachusetts act that was an indirect promise to give something of value to a voter for the purpose of influencing his vote, and it was a reasonable interpretation under the Massachusetts law, but did not, of course, make much of an impression on a jury. Now, I submit if the committee is going to report a bill to protect Members of Congress they should all be put on the same footing; a law should be framed which will apply equally to candidates in every congressional district throughout the country, and not leave it to some States to say that this restriction does not exist, and to say that in another State a more stringent regulation or restriction shall exist. I submit that publicity is wise, that we can give the utmost publicity to our campaign contributions and expenditures, but the manner in which it is to be done in this bill is going to lead to some absurd complications and results. The gentleman from Illinois [Mr. MANN] has already shown the unusual requirement with reference to committees.

Mr. DOWELL. Mr. Chairman, I desire to submit a question.

The CHAIRMAN. All debate on this paragraph is exhausted.

Mr. DOWELL. I move to strike out the last two words.

Mr. RUCKER. I ask unanimous consent that debate on this section and amendments thereto may close in 10 minutes, the gentleman from Iowa [Mr. DOWELL] to have 5 minutes, and I to have 5 minutes.

Mr. BARKLEY. I want to offer an amendment.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that debate on this section and amendments thereto close in 10 minutes. Is there objection?

Mr. DALLINGER. Reserving the right to object, I hope the gentleman will not press that request. There are a number of other gentlemen who want to speak.

Mr. RUCKER. I supposed there were no others. Let us see if we can agree on time.

Mr. SANFORD. I would like five minutes.

Mr. BARKLEY. I would like five minutes.

Mr. RUCKER. I ask unanimous consent that debate on this section and amendments thereto may close in 25 minutes.

Mr. MEEKER. Reserving the right to object, do I get five minutes?

Mr. RUCKER. I will make it 30 minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that debate on this section and all amendments thereto close in 30 minutes. Is there objection?

There was no objection.

Mr. DOWELL. Mr. Chairman, I desire to offer a few observations on this bill in view of the remarks of the gentleman from Massachusetts [Mr. WALSH]. Apparently his objection to this bill is because it does not repeal the legislation of the various States. I desire to say, however, that it does provide that the elections in these States shall come within certain limitations prescribed in this bill.

The gentlemen from Illinois have raised some serious objections to this bill from their standpoint, because it makes a limitation upon the expenditures of money. No one has yet ventured an assertion as to what amount should be allowed if the provisions of this bill are to be changed. I want to say that when the gentleman from Illinois makes the assertion that it requires $100,000 to elect a United States Senator or a Congressman in the State of Illinois——

Mr. CHIPERFIELD. Will the gentleman yield?

Mr. DOWELL. Yes.

Mr. CHIPERFIELD. I do not think the gentleman wishes to do me an injustice. I made no such statement. I said that such amounts have been expended, with the approval of the newspapers and the public of Illinois.

Mr. DOWELL. Then I want to say that the public and the newspapers of the State of Illinois, in my humble opinion, do not properly give their approval to such an expenditure of political campaign funds. [Applause.] It seems to me that it has not been very long since the State of Illinois brought this great country of ours into disrepute because of alleged improper elections in that State. [Applause.] It occurs to me Congress should make some kind of limitation, so that one may become a candidate for office without having behind him millionaires and corporations, who are able to expend these large fortunes for the purpose of electing a Member of Congress or a United States Senator. [Applause.] I believe that the people are able to judge for themselves who ought to be elected to these offices, without the expenditure of $100,000 or any like sum in any congressional district within the United States, and I believe that the people are perfectly competent to elect these officers without the expenditure of this large amount of money. I hope that we may have some proper restrictions and some regulations with reference to the election of Congressmen and United States Senators, under a provision that requires all the publicity suggested in this bill.

Mr. DALLINGER. Mr. Chairman, it seems to me, as the gentleman from Massachusetts [Mr. WALSH] has said, that we ought to have one uniform law on this subject. If Congress is going to pass a bill regulating the expenditure of money at congressional elections, it ought to exercise its exclusive jurisdiction and pass a law that shall be uniform throughout the country and that shall abrogate all existing State laws on the subject.

There was a time when the different States elected presidential electors at any time they saw fit. That has been changed. The Congress of the United States decided to have presidential electors elected on the same day throughout the country. Incidentally I believe that Congress ought to provide that Members of Congress shall be elected on the same day.

Now, Mr. Chairman, those of us who are not well off financially in our congressional campaigns have to rely upon some friend to act as treasurer of our campaign committee. At the present time, under the present system, we have 48 different States, with conflicting laws in regard to this matter, and the treasurer of one of these committees has to make an itemized report in many cases both before and after the primary and both before and after the election to the State authorities.

This bill, as well as the present law, requires such treasurer, in addition, to make a report to the Clerk of this House both before and after the primary and both before and after the election. It simply duplicates the work, and it means that a candidate will be obliged to hire somebody and pay him a salary so that he can be keeping the accounts and making oath to them, and see to getting them properly filed. A man's friends are not going to give their time, no matter how much friendship they may have for him, if they have to do all this unnecessary clerical work.

We should make up our minds what would be a fair and reasonable amount to expend in the election of a Congressman or in the election of a President or a Vice President, and we should have one law, and that should be a uniform law that should supersede all State laws on the suoject.

In conclusion, I wish to say that, while I shall probably vote for this bill, personally I do not believe that this or any other similar law which we may pass will amount to very much. Laws limiting the expenditure of money spent in elections are notoriously violated. I believe—and I want to go on record to-day as saying—that you will never meet this evil until throughout this land we prohibit by National and State legislation the expenditure of all money, both at primaries and at elections, by anybody whatever, and provide that the public shall pay all the necessary expenses incurred by candidates for public office. In this connection a Member of Congress might be allowed in his campaign to use his franking privilege within reasonable limits, and his opponent might be given the same privilege. When you prohibit the expenditure of all money in elections you will stop corrupt practices, and not before. Any law which simply limits the amount that may be expended will never permanently correct the evil. [Applause.]

Mr. SANFORD. Mr. Chairman, I interrupted the gentleman from Illinois [Mr. CHIPERFIELD] during his discussion and asked him a question. It seems to me that if the facts he states are true, or if his theory of this bill is correct, he has a very strong case against the bill. In my interruption I was anxious to try to point out to him that he had not the understanding, at least such as the committee had, of the provisions of the bill. I want to make myself clear, if I can, because in this discussion of the bill we can not get very far if we all have a different understanding of what it actually does.

There is no provision in the bill which would prevent the doing of things which the gentleman says are necessary to be done to carry on an election in the great State of which he is a Representative at large. I can see his problem in a campaign extending all over the State of Illinois and the necessity of a political committee expending a large amount of money. I know of no provision in the bill that limits the expenditure of money by political committees in the State of Illinois at any sum whatever. There are provisions of the bill that require great political committees that may operate in his State to give an account of the receipts and expenditures.

There is a provision in the bill that the candidate himself must not spend over $2,500, and that is the only limitation I know of. He says it may be necessary to spend $100,000. The political committee can under the operation of this bill spend a million dollars if they wish. The committee has not attempted to limit the amount expended by such political committees. It is the conception of the committee that Congress should not limit in any way whatever the expenditure of money for legitimate purposes.

Mr. CHIPERFIELD. Will the gentleman yield?

Mr. SANFORD. Certainly.

Mr. CHIPERFIELD. I merely want to inquire of the gentleman if it is his position that a campaign committee, not a regular party committee, can spend $100,000 in influencing the nomination of a candidate?

Mr. SANFORD. Let me make myself clear upon that. The limitation is that the candidate himself shall not expend over $2,500. I think in the spirit of this limitation it means that you can not evade that provision by handing some money over to a personal committee which would operate in your name, but it does mean that your friends can organize by the thousands and raise hundreds of thousands of dollars and operate for you. It does not mean that you can evade this by saying, "I am not doing this, but the Smith committee is doing it." I think it would be a violation of this provision if you should appoint a committee, or a committee should operate to use your money; but there is no limitation here upon any organization or any committee spending any amount of money they may care to expend independently of the candidate to accomplish the election of the gentleman.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. COOPER of Wisconsin. Is it the gentleman's construction of the proposed law that while the candidate can not expend more than $2,500 some multimillionaire might contribute, or some committee could, and expend $10,000,000 to elect him?

Mr. SANFORD. The bill permits that.

Mr. COOPER of Wisconsin. Then I think that would better be amended.

Mr. SANFORD. Let me make myself clear. The theory of the committee is that a multimillionaire or the Anti-Saloon League or anyone else should be permitted to expend any amount of money they desire to, but that they should be required to tell the public what they do with it.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. STAFFORD. The gentleman states it is the purpose of this bill to restrict the expenditures to legitimate purposes. Where is there any provision in the bill restricting the expenditure to any particular character of expenditure?

Mr. SANFORD. The only provision of the bill that will accomplish that is the influence of compelling the publication of the amounts and of the amounts which make up the expenditures.

Mr. STAFFORD. It is not necessary to compel the publication of any item in excess of $10 except the total amount paid to any individual, and there is no provision here to prevent a committee paying $9.99 to every worker in the State.

Mr. SANFORD. I think that is a hole in the bill which should receive the gentleman's attention. But I said this for the purpose of making clear to the gentleman from Illinois [Mr. CHIPERFIELD] the meaning of my question to him. I asked him for what purpose he wanted to expend the money. This bill provides that an individual candidate may expend only $2,500, but he need not count in that limitation what he expends for travel and subsistence for himself, for stationery or for postage, for writing or printing letters, except what he may expend for newspaper advertisement. In my imagination I am unable to think of anything that a candidate would want to spend money for that is legitimate which is prohibited by this bill except what he spends for advertising and newspapers, so when I interrupted the gentleman I asked him to specify the thing for which he wanted to expend the money. It almost looks to me on the face of the bill as though the Congress were giving the candidate for Congress the right to expend money for an illegitimate purpose, and I think perhaps some gentlemen are right who criticize the bill because it is too liberal in that regard.

Mr. BENNET. Mr. Chairman, will the gentleman yield?

Mr. SANFORD. Yes.

Mr. BENNET. Is it not a legitimate, proper, and sometimes very necessary expenditure to have watchers at the polls, and ought not a candidate to be permitted to expend money for that purpose?

Mr. SANFORD. Under the law of the State of New York, as I recollect it, a candidate is entitled to have a watcher at the polls, and to have the candidate's name on a ribbon. I know that I had one, and it was a very pretty ribbon. I think that is provided by law. I know that I paid nothing for the privilege.

Mr. BENNET. This does not come within the exemptions of this statute. Let us take a candidate for United States Senator. There are at least 2,000 polling places in the State of New York. You could not get a watcher for less than $3, and therefore if a candidate for the United States Senate had a hard contest and simply wanted to have the polls watched in the State of New York he could not do it within the limitations of this bill.

Mr. SANFORD. I think in answer to that that I will say to my colleague from New York——

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SANFORD. I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. The time has been limited by the committee.

Mr. SANFORD. I ask unanimous consent to be permitted to answer this question in not to exceed 30 seconds.

Mr. RUCKER. Mr. Chairman, I reserved five minutes of the time for myself, and I will be very glad to grant the gentleman a half a minute.

The CHAIRMAN. Does the Chair understand that the gentleman from Missouri has control of the time?

Mr. RUCKER. Oh, no.

Mr. SANFORD. In answer to my colleague's question with reference to the paying of watchers, I want to say to him that if any candidate for the United States Senate, or for the House of Representatives, can not get for love and without price a

watcher in each election district wherein he is operating, there is no hope for his election, and the expenditure of the money would be foolish.

Mr. BENNET. I want to say frankly that my friend is not a "practical" politician in Albany County.

Mr. SANFORD. I do not believe any of us are "practical" politicians in Albany County, although we try to get good results.

Mr. DALLINGER. Mr. Chairman, I wish to ask the chairman of the committee a question.

Mr. RUCKER. Mr. Chairman, one moment. I desire to know if any of the other gentlemen who expressed a desire to speak want to do so now, because I want to close the debate upon this section. If no one desires to speak, I would be glad to answer the gentleman from Massachusetts.

Mr. DALLINGER. I want to ask the chairman of the committee if he understands that this bill requires that every local committee in his district or mine to whom he or I make a contribution will have to make a return of it to the House of Representatives.

Mr. RUCKER. As the question is propounded, I will say no.

Mr. DALLINGER. That is the way it seems to me.

Mr. RUCKER. If the gentleman says to whom we make contributions to aid in an election or nomination of some candidate for Representative or Senator, then I would say yes.

Mr. DENISON. Will the gentleman yield?

Mr. RUCKER. I will yield to the gentleman.

Mr. DENISON. Just for a question. I know of certain churches and religious organizations that want to raise a little fund to employ automobiles to use on election day in the interest of candidates. Now, will those organizations have to elect a treasurer and make reports of the amount expended for that purpose? I would like to have the gentleman give his judgment on that point.

Mr. RUCKER. Mr. Chairman, I believe we had unanimous consent to close debate in 30 minutes, and that only a part of that time has been used——

Mr. MANN. I thought it was 10 minutes.

Mr. RUCKER. That was some time ago. Assuming we have more time, if nobody else desires to use it I shall be perfectly willing to answer all questions; otherwise I do not want to take up the time in answering questions. Let me say to the gentleman it does seem to me, in all candor and frankness, that gentlemen are taking erroneous views of the provisions in this bill. Everybody should recognize, or at least many of the Members who have heard this debate this morning will recall, that according to statements made here in some localities a vote is worth $1 and in some others it is worth $20. Does every man who votes have to organize himself into a committee, elect himself chairman, secretary, and treasurer? It is nonsense, I say with all due respect. This act contemplates that every national committee which deals with national elections must under the plain provisions of this bill make reports. In order to make this law effective—as the gentleman from New York said, put teeth in it—the committee provided that every other organization or association or committee, whether political or nonpolitical, which expends money or uses things of value in securing a nomination or election of these Federal officers, must make reports. Why, just in order to do the very thing we intend to do, if we can, make it impossible for a designing man—nobody here, but some man who might want to come here—to organize a committee of three or five——

Mr. MEEKER. Will the gentleman yield?

Mr. RUCKER (continuing). And spend large sums of money and then go unwhipped of justice. Now I yield to the gentleman from Missouri.

Mr. MEEKER. Is there anything in this bill which would reach an individual or an organization which would attempt to pledge a candidate in advance of his nomination or election, which is a very common method in one of the organizations of the country?

Mr. RUCKER. There is nothing in the bill, as far as I know.

Mr. FESS. Will the gentleman yield for a question?

Mr. RUCKER. Yes.

Mr. FESS. I understand that the purpose of the law is not so much to prevent the expenditure of money as it is to make public for what the money is expended. Now, if that be the case—and I take it that it is for the purpose of preventing the corrupt use of money—is there any reason why a church or any other association that stands for what we denominate "better things"—is there any reason why it should not require them to make a report? Is there any harm to come by requiring any of those organizations that stand for what we call a righteous cause being required to make public their contributions?

Mr. RUCKER. Mr. Chairman, if the gentleman will pardon me, I think I anticipate—or, rather, understand—his question. The gentleman will keep this fact in mind. Some of us still respect the rights of States along certain lines—the police powers of States, and so forth—that we think are involved, but we believe the Federal Government can go all over this great domain and legislate so far as pertains to the election of Federal officers, and we have put restrictions in this bill on all those matters which do not infringe upon purely State matters.

Now, if these societies or organizations for the uplift of humanity undertake to work out their ends and accomplish their great purposes through the election of certain candidates and spend their money for those candidates, obviously they ought to account for it——

Mr. FESS. I agree with the gentleman.

Mr. RUCKER. And allow me to add this: I said yesterday your committee had worked diligently and tried to present a bill which we thought would be acceptable to this House and approved of by the country—gentlemen have made a great many verbal criticisms or technical criticisms or criticisms against the technicalities that they think are in this bill without offering a solution or suggesting an amendment.

Mr. CHIPERFIELD. Will the gentleman permit a question?

Mr. RUCKER. Make it brief.

Mr. CHIPERFIELD. Certainly I will do so. Does the gentleman think there is any precise limitation which could be put on here by which States like New York and Idaho could be put upon the same basis so far as a senatorial election is concerned?

Mr. RUCKER. Mr. Chairman, I answer the gentleman in this way: This House primarily never undertook to do that. We were invited by that body over yonder to put that identical limitation in this bill on a candidate for Senator in New York and one in Nevada. They did it, and this House merely consented to what the Senate said ought to be done in that regard.

And I want to say further that gentlemen need not lash themselves into a fury. We are not crippling the candidates and those who may become candidates for the Senate because the Senate fixed this limitation.

Mr. PLATT. Does this law contain anything as to what time a man becomes a candidate for office of Senator?

Mr. RUCKER. Yes, sir. He becomes a candidate whenever he declares himself or expends any money looking to his candidacy.

Mr. PLATT. He becomes a candidate before his nomination?

Mr. RUCKER. That is one of the problems of the age. The gentleman and myself have been candidates for a great many years. Now, just when? This bill says whenever you do anything or expend any money looking to your renomination or reelection you are a candidate.

Mr. PLATT. I do not see how that can possibly be enforced. When you start in on a term in Congress you become a candidate for nomination the next time the minute you do anything toward it.

Mr. RUCKER. There are many things that are not prohibited that you do not account for and can not. No man is prohibited from working out his political salvation by efficiency and courtesy and painstaking efforts in behalf of his constituents, and that is the biggest capital he can employ and is most effective.

Mr. PLATT. And your limitation of the expenditure of money begins immediately?

Mr. RUCKER. Whenever he spends money looking to a reelection, it begins.

Mr. Chairman, I want to say this to the committee: The amendment, I understand, as offered by the gentleman from New York [Mr. BENNET], is to strike out this section. Does the gentleman know that this section is almost word for word with the existing law? You have been elected under it two or three times, once at least, and ought to have been, possibly, the other time, but were not.

Mr. BENNET. That is the way I felt about it.

Mr. RUCKER. It is the law to-day, and the gentleman would strike it out of this bill by his amendment. This section has never been criticized severely before. I hope the committee will leave it in the bill.

Mr. SMITH of Michigan. Will the gentleman yield for a question?

Mr. RUCKER. I will.

Mr. SMITH of Michigan. Now, it is very evident to me from what has been said that a township committee that employs any activity and spends any money for the election of a Member of Congress must make a report. Is that right?

Mr. RUCKER. I will give the gentleman the benefit of my judgment about it, that the conclusion suggested by his question is absolutely wrong.

Mr. McKELLAR. I think I can clear it up. Section 9, on page 8 of the bill, provides that he shall make a report of it unless he contributes the same to one of the committees heretofore referred to.

Mr. MANN. The gentleman has not read the right section at all.

Mr. RUCKER. I do not think it is germane to the question the gentleman asks.

Mr. SMITH of Michigan. If the gentleman will kindly answer this question—I ask it for information——

Mr. RUCKER. I assure the gentleman I shall be glad to answer it the best I can.

Mr. SMITH of Michigan. Suppose this township committee, or county committee, in my district fails to report the money they have expended to aid my election, what effect does that have upon my election under section 17 of this act? I know all the time that they are going to aid and assist me in my election, and they are using money for that, and I contribute small amounts to that end; now, if they do not report to this Congress, what effect will that have on my election?

Mr. RUCKER. It would have no bearing upon your election, provided you were elected—as I hope the gentleman will be—but that committee would have to account for it if they were acting as a committee.

Mr. SMITH of Michigan. If they did not, would it have any effect——

Mr. RUCKER. Not on your election, but upon the individual members of the committee, possibly.

Mr. JAMES. Is it not true that a township committee is not appointed for the purpose of his campaign? It is for the entire county ticket and State ticket.

Mr. RUCKER. In my opinion, it does not apply to any county committee in the United States that devotes its attention solely to election of county tickets and State tickets.

Mr. DALLINGER. How are you going to distinguish where there is a county committee or township committee that is working for the success of the whole ticket, Republican or Democratic? If a Member of Congress makes a contribution to help his election, how are you going to distinguish between the work they do for the Member of Congress and the rest of the ticket?

Mr. RUCKER. There is no effort to distinguish. It can not be done. The amount of money that a candidate for Congress contributes he must account for, but he can not be responsible for the balance of expenditures of the committee.

Mr. DALLINGER. They are trying to elect him?

Mr. RUCKER. Alone?

Mr. DALLINGER. No. But it does not say "alone" in this bill.

Mr. COX. I want to pursue a little further the query propounded by the gentleman from Michigan [Mr. SMITH]. Now, take the State of Indiana, our really active committee to-day is our county central committee, and it has its chairman, secretary, and treasurer. Each voting precinct of each county has a committeeman. So the organization of each county is made up in proportion to voting precincts. Now, they are the acting committees of the State of Indiana. Suppose a candidate for Congress from Indiana contributes under our State corrupt-practices act and stays within the provisions of that act, but the county central committee to which I would report fails to report to the Clerk of this House, and later that fact is found out, would I, as an illustration, come under this part of your bill which reads:

No candidate for Senator or Representative found by the House in which he claims membership to be a party to a violation of this act shall receive or retain the office to which he was declared elected.

Would not that be sufficient to unseat me or any other Member of the House?

Mr. RUCKER. Let me answer the gentleman by asking him a question.

Mr. COX. Yes.

Mr. RUCKER. In the case you suggested, as an illustration, in what earthly way could you have done a thing so that it violates any provision of this bill?

Mr. COX. Well, the gentleman is in charge of this bill, and he has been chairman of this committee now for nearly six years, and he ought to be willing to answer these questions at least intelligently.

Mr. RUCKER. Now, the gentleman ought not to make that statement. I asked the gentleman in good faith in what possible way the fact he suggested would affect him. Let me answer the gentleman's question in another way.

Mr. COX. I ask, then, why could not the gentleman have answered in that way at first? The gentleman ought not to be so peevish.

Mr. RUCKER. I protest that I am not peevish. I thought, when I suggested my answer to the gentleman, that such a statement of fact could not be offensive.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. RUCKER. Yes.

Mr. BARKLEY. Let us take another case, the case of the November election. There is a candidate for Congress who is to be elected. There is also a sheriff to be elected. A committee has been appointed to look after the congressional end of it in that particular county, and another committee has been appointed to look after the sheriff end of it. They are two independent, separate committees. Now, would that committee that is appointed for the purpose of conducting the campaign for sheriff have to report under this bill to the Clerk of the House of Representatives?

Mr. RUCKER. If I could answer that without offending the gentleman, I would say what does the gentleman think?

Mr. BARKLEY. I would answer "no."

Mr. RUCKER. I think the gentleman is clearly correct.

Mr. BARKLEY. It says:

All other committees, associations, or organizations, political or non-political, which shall receive or expend any money, or give or promise anything of value, for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President of the United States are to be nominated.

Now, the candidate for Congress is to be elected at this election, and therefore it falls within that provision.

Mr. RUCKER. The plain effect of it would be that it would not have that result.

Mr. BENNET. Mr. Chairman, there are worse sections in this bill than section 2, and I ask unanimous consent to withdraw my motion to strike it out.

The CHAIRMAN. The gentleman from New York [Mr. BENNET] asks unanimous consent to withdraw his motion to strike out the section. Without objection, the motion will be withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. That no committee as defined in this act shall distribute in any one State any sum whatever in notes, checks, drafts, money, or anything of value in excess of or greater than the aggregate amount contributed to such committee by actual residents of such State: *Provided*, That nothing in this section shall be construed to limit the amount which such committee may expend in actually employing campaign speakers, in defraying actual expenses of campaign speakers sent out by such committee, the actual expenses of maintaining committee headquarters, the expense of printing literature and distributing it through the mails, and the cost of newspaper advertisements, plainly marked as such, when ordered by such committee.

Mr. BENNET. Mr. Chairman, I move to strike out this section.

The CHAIRMAN. The gentleman from New York moves to strike out the section.

Mr. BENNET. I shall ask for a vote on that after debate.

Mr. Chairman, this section is so obviously improper and so out of concert with what my colleague from New York [Mr. SANFORD] has stated to be the purpose of the committee that it ought to be stricken out by the unanimous vote of the House.

Either campaign committees ought to be limited or they ought not. If they ought to be limited, and if the purpose of the bill, as stated by my colleague, simply is to rely on publicity, what difference does it make, to be plain about it, if the rich man in New York or Illinois contributes largely from his large means, and those sums are expended in part in other States? If that is not going to be the idea, anybody can see just what this is aimed at. It is aimed at the Republican Party, that has to conduct a real campaign in the States which it carries. It does not make much difference whether any money is sent down to Mississippi, for example, to help elect a Democratic candidate for President. He is reasonably sure to get the electoral vote of Mississippi. But the purpose of this bill is to hamper the national committee of the party that has to carry on a vigorous campaign in the other States.

Mr. MANN. There is even a better reason than that.

Mr. BENNET. The gentleman from Illinois says there is even a better reason than that. There may be. But that is enough to require that this section shall go out, when on the face of it it is aimed at one particular party and is not aimed at any corrupt use of money. It simply says, no matter for what purpose it is used in the State to which it is sent, that it can not be used unless the people of that particular State raise a sum equivalent to the amount sent by the national committee to that State. There is no relation between that section and

any improper purpose. It might refer to a new State that has no particular means within itself, or it might be that the national committee might want to carry on an educational campaign, not with particular reference to 1916, but with the idea of fruits to come in subsequent years. That might be the particular object.

Mr. DECKER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. DECKER. Does the gentleman know of any way in which the Republican Party has been in the habit of spending money raised in New York for other purposes than those mentioned there, to wit, in employing campaign speakers, in defraying actual expenses of campaign speakers sent out by such committee, the actual expenses of maintaining committee headquarters, the expense of printing literature and distributing it through the mails, and the cost of newspaper advertisements, plainly marked as such? It gives you the right to spend all the money from New York you want in that way. In what other way would you want to spend money?

Mr. BENNET. For instance, if the State of Arizona, which is a big State territorially, did not contribute very much to the national committee, the presidential candidate could not even be taken through there on a railroad train.

Mr. DECKER. He would be a campaign speaker, would he not?

Mr. BENNET. No.

Mr. DECKER. I mean if you have one that can speak. [Laughter.]

Mr. BENNET. Oh, we have one that can speak, believe me! [Applause on the Republican side.]

Mr. DECKER. I know; but almost any man can speak, and it allows the payment of the expenses of anybody who can speak.

Mr. BENNET. Oh, no. It does not allow the payment of the expenses of anybody that goes with him. The candidate for President usually travels on a special train, and unless the State of Arizona happens to contribute as much to the expenses of the national committee as the expense of that train would amount to that train would have to go around the State, according to the way this section is drafted.

Mr. BARKLEY. That would not be considered an expense incurred within the State. It would be an outlay made outside of the State.

Mr. BENNET. Why, certainly it would.

Mr. BARKLEY. Because that would be an outlay in the State where the company was paid.

Mr. BENNET. Oh, no.

Mr. DECKER. Why not put in an amendment so that it would let you take your candidate for President through some of these States? And why make it possible to raise the money in New York to corrupt somebody in Arizona or Wyoming in the interest of either a Republican or a Democratic candidate?

Mr. BENNET. The reason why they raise the money in New York is the same as the reason why they doubled the income tax. They get the money in the place where the money is.

Now, there is no necessary relation between raising money and using it corruptly. I think the Democratic Party in 1912 spent something like $2,000,000. I do not charge that they spent a dollar of it corruptly.

Mr. MANN. Mr. Chairman, I want to say something about this section before I get through. I have not yet got it through my clumsy brain, in view of the statement of the chairman of the committee presenting the bill, what reports have to be made. If I am erroneous I want to be corrected. My reading of the bill indicates that every kind of a committee that has anything to do with influencing or attempting to influence the election of anybody, no matter what office he is running for, which election takes place at the biennial fall election, is required to make a report to the Clerk of the House of Representatives. That is what the bill says. If that is not what the bill intends, let us make the language clear. As the gentleman from Kentucky [Mr. BARKLEY] stated a moment ago, the committee that is referred to is a committee—

for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President of the United States are to be nominated, or candidates for Senator or Representative in Congress are to be nominated or elected.

That is the primary election at which candidates for President or Members of Congress are concerned, or the election at which Members of Congress are concerned.

Mr. DECKER. What line of the bill does the gentleman refer to?

Mr. MANN. Page 2, lines 16 to 21. That is what the bill says. It does not say even that the money is to be spent to influence the election of a Member of Congress, but to influence the result of an election at which Members of Congress are nominated or elected. That is the function of the word "committee."

Mr. RUCKER. Before the gentleman leaves that may I ask him a question?

Mr. MANN. Certainly.

Mr. RUCKER. Before propounding the question let me make a statement.

Mr. MANN. Certainly.

Mr. RUCKER. I held the same view with reference to the former bill as that which the gentleman has now proclaimed with reference to this bill, and I believe that the phraseology of the former bill was such that it required statements to be made by committees which expended money to influence or control the nomination or election of a candidate for Congress——

Mr. MANN. In two or more States.

Mr. RUCKER. In two or more States. Of course, that was a different proposition, however. But this matter was thrashed out on the floor of the House. This language was put in the bill subsequently introduced because of the former action of the House. I will say to the gentleman frankly that if there is any well-founded conviction in the minds of gentlemen that this bill would require county committees and district committees and town or township committees to make reports, it would be an absurd proposition to require them to do that, and I, for one, would not ever stand for it, because it would make the whole thing top-heavy. Now, if gentlemen desire to offer an amendment on that subject, I shall have no objection to going back to section 1 in order that it may be more fully discussed, because I think it can be made perfectly clear that that is not the intention of Congress nor the proper legal construction of this language. Gentlemen differ about this, it is true.

Mr. MANN. I have no amendment prepared to offer. Let me state what the situation is.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask unanimous consent for five minutes more, and then I shall want five minutes more after that.

The CHAIRMAN. Unanimous consent is asked that the time of the gentleman from Illinois be extended five minutes. Is there objection?

There was no objection.

Mr. MANN. The law originally placed on the statute books has been amended several times. Two years ago the gentleman from Missouri [Mr. RUCKER], chairman of the Committee on Election of President, Vice President, and Representatives in Congress, reported into the House a bill, and on consideration in Committee of the Whole it was amended. Let us be perfectly candid about it. I remember the circumstances very well. I was here. The Committee of the Whole went crazy one afternoon and proceeded to insert into the bill all sorts of things. I do not know whether it was because they wanted them in the bill or because they thought there was a chance to kill the bill. These amendments went in, and the bill passed the House, and there was not one Member in the House at the time who thought that bill had the slightest opportunity of becoming a law. No one here thought it had the chance of a snowflake in hades, and it had not.

Mr. BARKLEY. Will the gentleman yield?

Mr. MANN. In just a minute. That is the way these things went into the bill. A lot of gentlemen here were outdoing one another trying to see who could write into the bill the craziest propositions. Now, I have no criticism of the committee that accepted the action of the House in bringing some of these things back, or all of them back, in this bill. But let us understand what we are doing before we do it.

Mr. RUCKER. Did I make myself clear?

Mr. MANN. The gentleman did.

Mr. RUCKER. I do not stand for one moment for a proposition that means what the gentleman says this means. If I thought it did, I would oppose it.

Mr. BARKLEY. During the consideration of this bill I prepared an amendment which I did not offer, because the chairman of the committee said he did not think it would apply in that sort of a case. I want to read it to the gentleman to see if he thinks it would be proper to exempt committees of that sort.

Mr. MANN. I do not see how you can do it in section 2.

Mr. BARKLEY. At the end of the section add the following:

Provided, however, That the provisions of this section shall not apply to committees organized solely in connection with the nomination and election of officers of a State or a subdivision thereof.

Mr. MANN. I do not think it would be sufficient to say that as to this section, and besides you want this to apply to a State committee.

Mr. BARKLEY. But if the State committee had charge solely of the election of State officers——

Mr. MANN. I can not answer the suggestion offhand. I want to demonstate to the House that every one of these so-called committees, whether a committee or an association, church, temperance, political, religious, or otherwise, would be required to make a report to the Clerk of the House under the terms of this bill.

Mr. SLOAN. I heard the illuminating statement of the chairman of the committee. I also heard that this was the unanimous report of the committee. I do not, however, understand that the membership of the committee agree that the various committees are excluded from the provisions of this bill. If it is a unanimous report, I should like to know from some member of the committee whether the members of the committee agree with the chairman.

Mr. MANN. The words "unanimous report from the committee" do not mean very much; and it is not to be expected that members of the committee will agree as to what certain language means unless they carefully examine it. I never knew the gentleman from Nebraska to agree to everything that seemed very illuminating to me.

Mr. SLOAN. I will put all the blame for that on the gentleman from Illinois.

Mr. MANN. Put it on the "gentleman from Illinois." I am able to bear it. [Laughter.] What I want to do is to get at the substance, and not discuss as to whether certain people disagree or whether somebody is to be criticized. I know enough about making up bills to know that after everybody has given all the thought they can to the subject there will be a great deal of wisdom that has not been brought to light.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. BENNET. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MAPES. Will the gentleman yield?

Mr. MANN. Yes.

Mr. MAPES. I want to say, for the benefit of the gentleman and other Members, that some members of the committee took the language for what it says. They believe that it includes all committees that attempt to influence the result of an election at which Members of Congress or candidates for the Senate or for Vice President or President are to be elected, and that it should. We do not see any way to make the law effective except to include these committees, because there is no way to differentiate between money that has been spent in a campaign for county and State officers and that expended for the campaign of a Member of Congress. If the law is to be effective, it must include those committees; otherwise those committees that raise $50,000, which have been referred to here, to defeat a candidate could go ahead and spend it and accomplish the result.

Mr. MANN. Mr. Chairman, hunters have been seeking some rule by which they could be sure when they fired a shot at an object that they would kill it if it was a deer and miss it if it was a calf. [Laughter.] But that is not possible. If the gentleman from Missouri is correct, I can not understand the meaning of the English language. If the gentleman from Michigan is correct, I can not understand how anybody can favor such a proposition in a bill. To say that you are going to require every little organization of any kind that seeks to influence the election of a school board, if it happened to elect a school board at a congressional election, shall organize, shall be subject to the penalties if they do not conform to the requirements, shall elect a treasurer and a secretary and make report, is to my mind to write a provision in the law which damns it to begin with, and which nobody would expect to be obeyed.

Mr. MAPES. There has been a good deal said about the election in school districts. Is it not true that in most of the States there is no committee taking part in the campaign except the county committee?

Mr. MANN. That illustrates what some gentlemen from country districts know about politics. [Laughter.] Probably they never run a political campaign. I am not speaking of the gentleman from Michigan; but gentlemen who never run a political campaign, never knew what a campaign was, had their nomination presented to them on a silver platter, and election followed. Such a man does not know what it is to go out in a political fight, a fight from the ground up. Talk about a campaign being run only by certain big committees! Why, great Cæsar, in my district they organize by the block, and by the block on each side of the street, one block apart.

Mr. MAPES. Will the gentleman yield? I am now asking for information. When these block committees are organized do they get their money from the general committee or not?

Mr. MANN. Some of them do and some raise it themselves, but that would not make any difference.

Mr. MAPES. If they got it from the general committee, does the gentleman think they would have to make a report in addition to the report of the general committee?

Mr. MANN. Certainly, under the terms of this bill, and if you give me a chance I will demonstrate it.

Mr. BARKLEY. Will the gentleman yield?

Mr. MANN. Yes.

Mr. BARKLEY. If the gentleman's interpretation and my interpretation, which is in harmony with his, is correct, would it not be necessary for any committee organized for a stock bond issue or a road bond issue to report to the Clerk of the House?

Mr. MANN. Certainly. The term "committee" covers everything.

Mr. RUCKER. Will the gentleman yield?

Mr. MANN. Yes.

Mr. RUCKER. Following up the suggestion made by the gentleman from Kentucky [Mr. BARKLEY], I believe the gentleman from Illinois will recollect that a year ago when the bill was under consideration I took the same position that he has taken now, but the House by a decided vote took a different view and put the provision in the bill.

Mr. MANN. Yes; I understand the situation. Here is the case: There is no way to make a law, and never will be, that somebody will not claim methods of evading it. But the mistake is that when you attempt to make it too drastic you destroy it. That is the reason we abolished the high penalties for criminal offenses, because you could not convict men, the people would not stand for it.

The House committee, in addition to what I said about it two years ago, had narrated to it how some committees were organized and that the committees ought to make a report. And they ought, if there is any way to differentiate it. I am willing to have every committee make a report where it does not become ridiculous, but you know that you will never comply with the law when you ask every little association and every little committee which may be organized to comply with it, and when they do not comply with the law it is difficult to enforce it against anybody else.

Now you determine what is a committee in section 1, and having provided in section 2 that there must be a chairman and treasurer, you provide under section 7 that the treasurer of every such committee—

shall, not more than 15 days and not less than 10 days next before an election at which Senators or Representatives in Congress are to be elected in two or more States, and not more than 15 days and not less than 10 days next before any general or special election for Senator or Representative in Congress in a single State or district, if such committee shall attempt to influence the result of an election held in a single State or district or in any manner participate therein, file in the office of the Clerk of the House of Representatives, at Washington, D. C., with said Clerk, an itemized detailed statement of all money or things of value received and disbursed by such committee; and on each sixth day thereafter, until such election, said treasurer shall file with said Clerk a supplemental itemized detailed statement.

That provides that the treasurer of every one of these committees shall file a report. It would not make any difference if they had expended only 10 cents for stationery, he would have to file a report, and have to report every sixth day thereafter. It will not do to say that they will not comply with the law. We know they will not comply with the law. The great majority of them will not know there is such a law, but what is the use of passing a law with the designed purpose of having people violate it, because when you do that you do not ask anyone to comply with it. Members of Congress will. Their opponents may not. That has been the case with the existing law. We have never prosecuted a single soul for a noncompliance with the existing law. Every Member of Congress files some kind of a statement, although they do not all comply with the law. I made an investigation last election. They had not all complied with the law, but many of their opponents had not attempted to comply with the law at all. There was some question in reference to the law, it is true, but if you pass a law that calls for hundreds of thousands of reports, not one in fifty of which will ever be filed, and not one in a hundred of which ought to be filed, you will make the law ridiculous. [Applause.]

I desire now to say a word or two about section 3 of the bill. Section 3 provides that except for certain purposes no money can be expended in a State unless it has been raised in the State. That does not apply to expenses of campaign

speakers, expenses of committee headquarters, expenses of printing and of distributing literature or newspaper advertising. It does apply to all other expenses.

If the State of Missouri should have a very distinguished candidate for President, as it did have four years ago [applause], under the terms of this bill his friends in Missouri could not organize and raise any money to go across the line into Illinois to perfect an organization there. It happens that the distinguished candidate from Missouri four years ago was well and widely known, but in the past there have been many candidates for the Presidency who in the first instance were scarcely known outside of their own States. Why should not the people of a State, desiring to present a candidate from that State for nomination for the Presidency, have a right to raise money enough to organize a committee in other States—not for improper expenditure of money. People talk here as though all of the money for campaign purposes was expended for the corruption of voters. That is not the case. It may be true in some places, but in the great general average it is not true. We seek to influence the judgment of people, we seek to arouse their feelings, we organize campaign clubs, we hire bands, we engage halls, we finance processions, we expend money legitimately in many ways. Why should not a people who believe they have a good candidate to present to the country have a right to do it in some way other than by buying newspapers through advertisements? [Applause.] I think there is no sense in such a provision.

That is another provision which was put in here by the committee. It never had the recommendation of a committee of the House until this bill was reported in, never had been reported or received the sanction of the committee, but in a blind moment the committee of the House two years ago put the provision in.

Mr. RUCKER. I think the gentleman is mistaken about that.

Mr. MANN. I think I am not. Still the gentleman's recollection might be better than mine on that.

Mr. CLARK of Missouri. Mr. Chairman, will the gentleman yield?

Mr. MANN. Yes.

Mr. CLARK of Missouri. I would like to ask the gentleman a question about the committees about which he was talking a moment ago. I have 10 counties in my district. There is a general congressional committee for the whole district, and there is a county committee for each county. None of them spend very much money, but is the interpretation that the gentleman puts upon that section he was talking about that these 11 committees will have to file affidavits?

Mr. MANN. It is as plain as the nose on my face. Not only would the county committees have to file their statements, but if there are any city committees in the district they would have to file their statements. If there are any township committees, if there are any ward committees in the city, they would have to file their statements. If there are school district committees, they would have to file their statements. If there is any kind of a committee, political or nonpolitical, if there is a church committee that passes a resolution favoring the candidate for Congress, the gentleman from Missouri [Mr. CLARK], they would have to elect a secretary and treasurer and file their statements.

Mr. CLARK of Missouri. That is ridiculous, anyway.

Mr. MANN. That is the reason I am talking.

Mr. RUCKER. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 20 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BARKLEY. Mr. Chairman, I have read this language of section 1 undertaking to define the word "committee" several times very carefully, and while I have the greatest respect for the gentleman from Missouri, who is the chairman of the committee, and I am sure he is sincere in his interpretation of the language at this time, yet I believe his interpretation a year ago was the correct interpretation, and I do not believe that the mere fact that the House voted this provision in the bill at that time is an indication of how the House would interpret the bill, or how the courts would interpret the language if the bill is passed in the present form. The definition of section 1 is as follows:

That the term "committee," when used in this act, shall be construed to include the national, State, and the national congressional campaign committees of all political parties and all other committees, associations, or organizations, political or nonpolitical, which shall receive or expend any money, or give or promise anything of value, for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President of the United States are to be nominated, or candidates for Senator or Representative in Congress are to be nominated or elected.

I am in favor of as stringent a bill as can be passed for regulating the election of the President and Vice President and Members of Congress, but it seems to me that it would have been easy for this committee to have framed the language so as to carry no doubt that the object of Congress was to regulate the election of the President and Vice President and Members of Congress and not to regulate elections of other officials who may be elected at the same time that the Congressmen are elected—

* * * and all other committees, associations, or organizations, political or nonpolitical * * * for the purpose of influencing or attempting to influence the result of any convention, primary election, or election at which candidates for President and Vice President * * * Senator or Representative in Congress are to be nominated or elected.

Mr. WINGO. Mr. Chairman, the gentleman is aware of the fact that each separate contest is, in law, considered a separate election, and this statute would certainly not be interpreted as meaning that a county committee that was organized for and interested solely in the election of a county ticket would have to comply with this law simply because at the same time a congressional election was held.

Mr. BARKLEY. I do not think it ought to mean that, I am frank to say, but the meaning of this language is that it does mean it, because if a committee, even a nonpolitical committee, which may not have any connection with a congressional election——

Mr. WINGO. I will say to the gentleman that the courts have held that each and every contest is a separate election in the contemplation of the law.

Mr. BARKLEY. That is true, but it is no indication what the Supreme Court of the United States will hold as to the meaning of this section which requires that every committee that has any function whatever in an election must report if the election is held at the same time Senators and Representatives are elected or nominated.

Mr. WINGO. I suggest to the gentleman he study the decisions of the court and he will find that what constitutes an election has been clearly defined.

Mr. BARKLEY. I am familiar with the decisions of the courts, but I do not think the language of this bill has been thrashed out at all in any court, and nobody can prophesy how a Federal court will decide it.

Mr. WINGO. I think if the gentleman will investigate the question he will find that the language used has a well-understood meaning.

Mr. BARKLEY. It would be a very easy matter to frame it so it would not be in doubt. Take the city in which I live, where we have a commission form of government. In the coming election we elect four commissioners which are nonpartisan or bipartisan, but without device. They will have a committee. A man who is a candidate may have a committee to look after his interests in that election which is on the same day of election on which Members of Congress are elected, and the Vice President and President.

Now, under the strict interpretation of this language, as I believe it may be interpreted by the court, that committee would have to report to the Clerk of this House the amount of money received and expended in the election of those commissioners. There ought not to be any doubt about the meaning of the language. Congress ought not to undertake to infringe upon the rights of the States in regulating their own elections of city, county, and State officials; and if this section does infringe in any way upon those local affairs, it seems to me it ought to be cleared up——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARKLEY. I ask for five minutes more.

The CHAIRMAN. The gentleman from Kentucky asks to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BARKLEY. Now, as to section 3, I am opposed to the motion of the gentleman from New York to strike out that section. It is a well-known fact that in many elections in this country in the past certain interests have contributed money toward the control of elections of Members of Congress in other States. It is a well-known fact, and it has been brought out here by investigation of Congress and committees appointed by legislatures, that certain interests or citizens in one or more States have contributed money to be sent to some other State to control the election of a Senator or a Member of the House. Now, while it may be it will work an injustice in some way in preventing outside citizens from contributing money toward the presidential campaign even in a State in which they do not live, yet I can not imagine how anybody would want to contribute funds even for the nomination or election of a President for any other purpose except those permitted in this section.

I can imagine no other legitimate object that can be contemplated by the law in permitting the expenditure of money in another State for the purposes which are permitted by this bill. But the thing which this section seeks to strike at is the outside interference of corporations and interests that have the desire to control the election of Members of Congress for some particular reason in some particular district because they may have something coming up in the approaching session in which they are interested, and they are anxious to secure the nomination or election of a particular man who will vote for or against a certain thing in the next Congress, and I believe this section ought to remain as it is, because it prohibits outside influence of corporations that have a desire to get their hands upon the throats of Members of Congress, at least by implication, and they should be prevented from going outside of their States and contributing money for the purpose of controlling the election in any county or any district in the United States. I believe this section ought to remain in this bill, because I do not believe that the people of any congressional district or any State in the election of a Senator ought to be compelled to submit to outside money being sent into the district or State for the purpose of undertaking to debauch the electorate and controlling the nomination or election of either a Member of the House or the Senate.

Mr. PLATT. Will the gentleman yield?

Mr. BARKLEY. I will.

Mr. PLATT. Would not section 3 prevent a political party, for instance, from sending a canvasser into an adjoining State if he was not paid for by that State?

Mr. BARKLEY. Not at all. He could have his expenses. The gentleman means by "canvasser" some one to take a poll?

Mr. PLATT. Yes.

Mr. BARKLEY. To find out how men vote?

Mr. PLATT. The canvasser might influence votes perhaps.

Mr. BARKLEY. I think if local committees and local expenditures can not take care of the expenses of a man who goes around to find out how men are going to vote they ought not to be permitted to send to New York or Chicago or anywhere else to get the money to carry it on.

Mr. PLATT. Suppose the Prohibitionists want to send a canvasser into a certain section of the country that is not prohibition?

Mr. BARKLEY. They should be permitted to do it. I do not think a prohibition election ought to come within the meaning of this section to section 2. It ought not to be necessary for a committee in charge of a prohibition election to report to Congress, because Congress at present does not control prohibition elections in the States, but those elections are held under the authority of the States.

Mr. PLATT. Suppose the Socialist Party that is not organized in some States at all wanted to send a man in them to organize?

Mr. BARKLEY. They can send them there for legitimate purposes. What does he want to do it for except as a matter of publicity?

Mr. PLATT. He can organize a committee and go and see the people and talk to them. They can not do it unless they send public speakers; but they can not send canvassers into the State.

Mr. BARKLEY. I do not think they ought to send canvassers to go around secretly in order to try to influence the votes of the people. How can Congress tell whether they confine their operations merely to verbal persuasion? Under cover of night they might slip to voters something else than a quantity of language, and yet it would be difficult to prove such an offense.

Mr. SANFORD. Can the gentleman understand how a county committee having $5,000 to spend can spend it to cause the election of a sheriff or other county officers, without influencing the election of the Member of Congress running at the same time?

Mr. BARKLEY. If it would get somebody to the polls who would vote for the whole ticket, who otherwise would not vote at all, to that extent it would influence the election of the Member of Congress, but the purpose of it is to primarily elect the sheriff.

Mr. SANFORD. Has the gentleman ever heard of committees that operate for one candidate?

Mr. BARKLEY. Oh, yes; frequently.

Mr. RUCKER. Mr. Chairman, this section now under consideration—section 3—is not a part of existing law, although it was in the bill reported by the committee, as I have suggested, two years ago and passed the House as a part of that bill. I think this is one of the most important sections in the bill, and I can not appreciate the argument of gentlemen who think it vicious and bad. It looks to me like, if we are going to do anything that even remotely looks to purifying politics, we must leave this section in the bill. What does it do? Does it curb in any way or in any manner, shape, or form the most complete and far-reaching campaign of education that can be conceived of? It does not limit the amount of money in any way that may be expended for literature or for advertisement, marked as such, in the newspapers. It does not limit the amount of money that any campaign committee may expend in touring the State with campaign speakers and visiting every village and hamlet and city in the State. It only says that you shall not send across the State line into another State actual money in greater sum than was actually contributed by citizens of that State. Now, I can not think that there is any serious objection on the part of any gentlemen to this.

Mr. GREEN of Iowa. Will the gentleman yield right there?

Mr. RUCKER. I will.

Mr. GREEN of Iowa. I notice in the bill you use the term "distributed in the State." Was there a particular reason for using the term "distributed in the State"?

Mr. RUCKER. If the gentleman will turn back to the first section, which contains the definition, it will show what that word means. It has a broad meaning as defined in this bill, and I think that is an appropriate word for it.

Now, let me say just a word. There seems to be considerable discussion here while this section is under consideration of a section that has been passed and to which, as I recall, no amendment was offered. Gentlemen have varying and conflicting views about it. I have had two views of it. At one time I held to the same thought that some gentlemen have advanced here to-day, but after hearing the matter discussed two years ago I came to the conclusion that I was wrong, and therefore I followed the mandate of the House and wrote into the bill substantially what the House by its vote then directed. The language says:

> For the purpose of influencing or attempting to influence the result of any convention—

And so forth.

Now, they do not vote on road bonds or school bonds in a convention, and they do not vote to elect school directors at a convention—

> primary election, or election at which candidates for President and Vice President of the United States are to be nominated or candidates for Senator or Representative in Congress are to be nominated or elected.

I think the plain meaning and legal construction that would be placed upon that language is that any committee—and I am speaking now of section 1, lines 19 and 20—that any committee which operates solely or largely for the purpose of influencing the result of a contest for nomination or election to one of these Federal offices referred to would have to make an accounting. I do not believe the others would, and I say frankly I do not think they ought to.

The CHAIRMAN. The gentleman has consumed five minutes.

Mr. RUCKER. I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. RUCKER. Make it short.

Mr. GREEN of Iowa. I find the gentleman misunderstood the inquiry I made a short time ago. I referred to the word "distribute," in section 3, line 21, which is not covered by the definition at the bottom of page 3. The word "distribute" has a different meaning than the word "disburse," and I wondered if there was some special reason——

Mr. RUCKER. To which part does the gentleman refer?

Mr. GREEN of Iowa. Line 21, on page 4.

Mr. RUCKER. Line 21, on page 4, the words "shall distribute"?

Mr. GREEN of Iowa. That word is not defined, and I take it there was some special reason for using that particular word.

Mr. MANN. While the gentleman is thinking I think I can give him a reason.

Mr. GREEN of Iowa. I rather think I can myself.

Mr. MANN. The language of the bill last year was "disburse, loan, advance, give, or promise." I suppose the gentlemen thought that they would save printers' ink by using the one word.

Mr. GREEN of Iowa. I think the word that was intended to be used was "disburse."

Mr. MANN. You used all six of them last year.

Mr. RUCKER. I know we did, but we have tried to save those words now. I will say that under modern conditions

there are in some sections of the country three well-defined political parties, and in some sections there are more.

Mr. FARR. And in some less.

Mr. RUCKER. Each one of them generally has a county committee, always a congressional committee, always a State committee, always a judiciary committee, always a State senatorial committee, always a United States senatorial committee, always a national campaign committee, and so on, so that in the aggregate they would amount to 70,000 or 80,000 committees.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. RUCKER. Yes.

Mr. MANN. I have not a congressional committee in my district.

Mr. HAMILTON of Michigan. I have not had a congressional committee in my district for several years.

Mr. RUCKER. There may be many districts in which that is the case.

Mr. EMERSON. In some cases we do not find friends to contribute to our campaigns.

Mr. RUCKER. Every committee that contributes to the election of a candidate or at the primary would be included.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. GREEN of Iowa rose.

The CHAIRMAN. The Chair will recognize the gentleman from Iowa for three minutes. Three minutes remain.

Mr. GREEN of Iowa. Mr. Chairman, if that word "distribute" was used as I thought it was used, intentionally, as distinguished from the word "disbursed" and other words that are defined in the last part of page 3, and if it means simply the handing out and passing around of money, I think section 3 is unobjectionable if that construction be put upon it. But if it means payments for ordinary and legitimate expenses, I recognize the force of the objections that have been made on the floor to section 3.

Mr. SANFORD. Mr. Chairman, will the gentleman yield there? I think the word was used intentionally to prevent distribution in any way except through the mails.

Mr. GREEN of Iowa. Oh, the gentleman is talking about the use of the word in another place.

Mr. SANFORD. I was not talking about the use of the word on line 21 on page 4, but I was talking about its use on line 5 of page 5.

Mr. GREEN of Iowa. I am not talking about that. If the committee had no intention to distinguish from the other words at the bottom of page 3, I think the objection is valid.

Mr. RUCKER. I think it should be "disbursed." I move, Mr. Chairman, to perfect the section by amending, on line 21, page 4, by striking out the word "distribute" and inserting the word "disburse."

The CHAIRMAN. The gentleman from Missouri [Mr. RUCKER] offers an amendment. There is already an amendment pending.

Mr. MANN. This is a preferential amendment. It has the preference.

The CHAIRMAN. It is a preferential motion. The Clerk will report the amendment of the gentleman from Missouri [Mr. RUCKER].

The Clerk read as follows:

Amend, page 4, line 21, by striking out the word "distribute" and inserting the word "disburse."

Mr. BENNET. Mr. Chairman, I ask unanimous consent to proceed for one minute in discussing that amendment.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. BENNET. Mr. Chairman, what this would simply mean would be that a national committee could incur any amount of proper expenditures within the State, and, so long as they simply paid the bill somewhere else, they would not violate the section. The section is bad enough as it is, but worse, if it could be worse, as it is to be amended, because it takes off any limitation whatever. It simply takes the paymaster's office from one place to another.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Missouri [Mr. RUCKER].

The amendment was agreed to.

The CHAIRMAN. The question is upon agreeing to the amendment offered by the gentleman from New York [Mr. BENNET] to strike out section 3.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. RUCKER. I ask for a division.

The CHAIRMAN. A division is called for.

The committee divided; and there were—ayes 32, noes 26.

Mr. RUCKER. I ask for tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Missouri asks for tellers.

Tellers were ordered, and the Chairman appointed Mr. RUCKER and Mr. BENNET to act as tellers.

The committee again divided; and the tellers reported—ayes 49, noes 37.

Mr. RUCKER. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Missouri makes the point of order that there is no quorum. Evidently there is not a quorum present. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Allen	Gallagher	Kent	Powers
Anthony	Gallivan	Key, Ohio	Ragsdale
Bacharach	Gandy	Kiess, Pa.	Rayburn
Bailey	Gardner, Mass.	Kreider	Riordan
Barchfeld	Garland	Lafean	Roberts, Mass.
Barnhart	Garner, Tex.	La Follette	Rogers
Beales	Garrett	Lazaro	Rowe
Black	Good	Lenroot	Rowland
Bowers	Goodwin, Ark.	Liebel	Sabath
Bruckner	Gould	Lindbergh	Saunders
Burgess	Graham	Linthicum	Scott, Pa.
Butler	Gray, N. J.	Loft	Scully
Callaway	Gregg	McAndrews	Shackleford
Capstick	Griest	McCulloch	Sherwood
Charles	Griffin	McDermott	Siegel
Clark, Fla.	Guernsey	McFadden	Slayden
Cline	Hamill	Maher	Slemp
Coleman	Hamilton, N. Y.	Meeker	Smith, Minn.
Cooper, Ohio	Hardy	Miller, Del.	Smith, N. Y.
Cooper, W. Va.	Harrison	Miller, Minn.	Smith, Tex.
Copley	Hart	Miller, Pa.	Snell
Costello	Haskell	Montague	Snyder
Crago	Hastings	Moon	Sparkman
Crosser	Hawley	Mooney	Stagall
Dale, N. Y.	Hayes	Moore, Pa.	Steele, Pa.
Danforth	Henry	Morgan, La.	Steenerson
Davenport	Hensley	Morin	Stephens, Cal.
Davis, Minn.	Hill	Morrison	Stiness
Dempsey	Hinds	Moss, W. Va.	Stout
Dewalt	Holland	Mott	Sumners
Dooling	Houston	Murray	Swift
Driscoll	Howard	Nelson	Switzer
Drukker	Howell	Nicholls, S. C.	Talbott
Dunn	Huddleston	Nichols, Mich.	Tavenner
Eagle	Humphreys, Miss.	North	Temple
Edmonds	Husted	Oglesby	Tilson
Edwards	Hutchinson	Oliver	Vare
Estopinal	Igoe	O'Shaunessy	Ward
Fairchild	Jones	Parker, N. J.	Wason
Ferris	Kahn	Parker, N. Y.	Wilson, Fla.
Fields	Kearns	Patten	Wilson, Ill.
Finley	Keister	Peters	
Flynn	Kennedy, Iowa	Porter	
Foss, Ill.	Kennedy, R. I.	Pou	

The committee rose; and the Speaker having resumed the chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes, finding itself with a quorum, he caused the roll to be called, when 258 Members answered to their names, and he presented the names of the absentees to be entered on the journal.

The SPEAKER. A quorum being present, the committee will resume its sitting.

Mr. RUCKER. Mr. Chairman, I suppose automatically we have another vote by tellers.

The CHAIRMAN. The Chair understands that as there was no quorum present, the former vote is vacated. It may be necessary to call for a further vote by tellers.

Mr. RUCKER. I call for a further vote by tellers.

Mr. BENNET. Mr. Chairman, what is there to indicate that at the time the vote by tellers was taken there was not a quorum present? After it was over the gentleman from Missouri [Mr. RUCKER] made the point of order that there was no quorum present, and the Chair counted and declared that there was not then a quorum present.

Mr. RUCKER. The vote showed that there was no quorum present when the vote was taken by tellers.

Mr. BENNET. All the Members within the bar of the House are not required to vote by tellers, and it may very well have been that in addition to the 85 Members who voted by tellers there were more than 15 others present.

The CHAIRMAN. When the point of no quorum was made the Chair counted and found that there was no quorum present.

Mr. BENNET. But even after the inspection made by the Chair, if the Chair then decided that there was no quorum present, that does not relate back to the time of the taking of the vote by tellers, and it seems to me that the former vote by tellers ought to be allowed to stand.

The CHAIRMAN. The vote by tellers and the count made by the Chair both showed that there was no quorum present.

Mr. BENNET. It is a very easy matter for at least 15 Members to get back into the cloakroom.

Mr. FOSTER. The Chair decided that there was no quorum present, and the roll was called. Now, it seems to me, it is too late for anyone to make the point of order that there was a quorum present at that time.

Mr. BENNET. The gentleman does not understand.

Mr. FOSTER. Wait until I get through. The gentleman now raises the question, as I understand, that there was a quorum present when the former vote was taken, and that because there was a quorum present, the vote by tellers ought to stand? It is the invariable rule that when a vote is taken in Committee of the Whole and it is disclosed by that vote that there is no quorum present, and the point is made that there is no quorum present, and the Chair decides that there is no quorum present, and the roll is then called, the former vote is vitiated, and the gentleman can not come in now and claim that there was a quorum present. The Chair has decided that there was no quorum present. That being so, and the point being made at the time when the vote was announced, there is no question that that vitiates the vote that was taken. It has never been held any other way.

Mr. BENNET. Just see what a condition we would be in if the gentleman's argument were sound——

The CHAIRMAN. The Chair understands that the gentleman from New York is merely propounding a parliamentary inquiry. The vote by tellers and the count by the Chair determined that there was no quorum present.

Mr. BENNET. But how does the condition of the House at the time the Chair counted relate back to the vote by tellers?

Mr. FOSTER. The Chair has decided that question. The Chair has decided that there was no quorum present.

Mr. BENNET. At the time of the count.

Mr. FOSTER. He decided when the point was made.

Mr. BENNET. Now, if the gentleman will allow me two uninterrupted sentences, I do not question that at the time the Chair counted the committee there was no quorum present; but does the Chair see in what position it would leave the Committee of the Whole if every time the dominant party in the House was beaten by a few votes, within a short time after that some one could raise the question of no quorum, and by that time enough Members might be off the floor, so that there would be no quorum present? But that is no proof that there was not a quorum present at the time the vote was taken.

The CHAIRMAN. The gentleman from Missouri [Mr. RUCKER] has called for tellers.

Tellers were ordered, and the Chairman appointed Mr. RUCKER and Mr. BENNET.

The committee again divided; and the tellers reported—ayes 74, noes 111.

Accordingly the amendment was rejected.

The Clerk read as follows:

SEC. 4. That any political advertisement contained in any newspaper, handbill, circular, or other publication shall, when published, contain the name of the committee, person, firm, or organization that has caused the same to be published and has paid or agreed to pay for the publication thereof.

Mr. RUCKER. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. RUCKER: Page 5, line 9, after the word "publication," insert a comma and add the words "or posted on any billboard, wall, or fence."

Mr. MANN. Mr. Chairman——

Mr. RUCKER. I yield to the gentleman from Illinois.

Mr. MANN. Of course I have no objection to the amendment, as far as that is concerned. What I wanted to ask was this: If, as I think is correct, the word "committee" applies to any committee, practically, does this term "political advertisement" apply to anything except in relation to Members of Congress and candidates for President and Vice President? We undertake to control a county committee seeking to affect the election of candidates at the fall election. Will this, then, require any county committee, or any other committee that may be described by the bill, when it gets out any kind of a handbill, circular, or other publication, to put its name on it?

Mr. RUCKER. I will say to the gentleman frankly that I think the literal language of the section would require it, although I do not believe that that is the intention of the committee. The idea is to regulate these matters so far as the election of Federal officers is concerned.

Mr. STAFFORD. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. STAFFORD. Does not the gentleman think that by inserting the word "poster" in the clause relating to political advertisements it would be better than to adopt the gentleman's amendment? In my campaign they placed the posters on stakes. That could not be held to be placed on a billboard or on a fence, and the person would be relieved of this requirement.

Mr. RUCKER. The amendment was handed to me by a Member on the floor, and because of conditions which he told me existed I thought it would be wise to adopt it.

Mr. STAFFORD. I am pointing out a case or an instance which would not be covered by that.

Mr. RUCKER. What is the suggestion of the gentleman from Illinois that he thinks would cover these matters?

Mr. STAFFORD. That is that the poster, no matter whether it is on a billboard or a fence or wherever it may be, adds to the generality of the clause as stated in the paragraph.

Mr. RUCKER. What is the gentleman's suggestion?

Mr. STAFFORD. That the gentleman withdraw his amendment and insert the word "poster," which covers everything, while his proposed amendment is restrictive.

Mr. RUCKER. Mr. Chairman, I ask unanimous consent to withdraw the amendment I have offered and offer the amendment suggested by the gentleman from Massachusetts.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. RUCKER. Now, Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend page 5, line 9, by inserting after the word "handbill" the word "poster."

Mr. WALSH. Mr. Chairman, I want to ask the chairman of the committee if he thinks that by accepting that amendment it would cover the case of a sign or advertisement being painted on a wall?

Mr. RUCKER. I take it that the gentleman is serious about that question. I do think the poster would cover that. I understand that method of campaigning is indulged in in some places. My judgment is it would cover it. What difference does it make whether the poster is printed or painted?

Mr. HAMILTON of Michigan. The term poster has an entirely different meaning from a painted advertisement on the wall.

Mr. RUCKER. I think the poster or handbill is the same whether printed or painted.

Mr. HAMILTON of Michigan. A poster is a detached piece of paper on which something has been printed or lithographed.

Mr. RUCKER. I want to cover the evil and my judgment is that this does it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

The question was taken, and the amendment was agreed to.

Mr. BENNET. Mr. Chairman, I move to strike out the last word to make an observation. This section provides that any political advertisement contained in any newspaper, and so forth, shall, when published, contain the name of the committee, person, firm, or organization that has caused the same to be published and has paid or agreed to pay for the publication thereof.

Now, suppose that the gentleman from Tennessee [Mr. AUSTIN] desired to publish an advertisement relating to himself. He fully satisfies the statute if his name appears anywhere in the advertisement. He does not even have to put the word "Adv." under it. And, quite naturally, if a gentleman should advertise in order to help his own candidacy he would have his name appear somewhere in the advertisement. He does not have to say that it was paid for by him. It would be enough to say that "among other good things performed by the gentleman from Tennessee [Mr. AUSTIN] was" so and so.

Mr. RUCKER. The gentleman notices the language in lines 11 and 12, "that has caused the same to be published and has paid or agreed to pay for the publication thereof." Does the gentleman think that because the name of Mr. BENNET appears in any political advertisement contained in a newspaper that that is compliance with this language?

Mr. BENNET. The language is:

That any political advertisement contained in any newspaper, handbill, circular, or other publication shall, when published, contain the name of the committee, person, firm, or organization that has caused the same to be published and has paid or agreed to pay for the publication thereof.

Mr. KELLEY. It would have to contain the name of the candidate to be of any value to him, would it not?

Mr. BENNET. Certainly; that is all it does. What it means is this: We had a classical song in our town at one time in which was a line, "You bought the box, but not the socks." What I mean to say is that this is a penal statute, and that if you print an advertisement all you have to do is to mention your name in it. Suppose they wanted to extol the virtues of my colleague, Mr. SIEGEL. They would print something like this: "Samuel S. Koenig, chairman of the Republican county committee, when asked last night what he thought of Congressman SIEGEL, said:" That would be all that would be necessary to say in order to comply with the statute. That avoids any violation of the statute.

Mr. PLATT. Does the gentleman insist on the pro forma amendment? I think the section would be better with the last word stricken out.

Mr. MANN. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. MANN. The gentleman knows that the law requires all newspapers making use of the second-class mail rates to print the word advertisement on anything they print which is paid for.

Mr. BENNET. Yes; but this provision may repeal it.

Mr. MANN. It does not.

Mr. BENNET. The requirement to put the word advertisement at the bottom is to know that it was paid for.

Mr. COX. Where does the gentleman get his authority for saying that if the name appeared anywhere in the article it would comply with the requirements of section 4?

Mr. BENNET. I get it from the language of the bill.

Mr. COX. Section 4 defines the conditions that shall be complied with in a political advertisement?

Mr. BENNET. Yes.

Mr. COX. Does the gentleman contend that what he said about Mr. SIEGEL constitutes an ordinary advertisement?

Mr. BENNET. The fact is that if the reading notice was published in the newspaper, and it complied with the provision in relation to second-class mail matter by having the word "advertisement" appended to it, there is nothing in this bill that provides for it to be plain and specific who was paying for the advertisement so long as somewhere in the advertisement appeared that name in any form whatever.

The Clerk read as follows:

SEC. 5. That every disbursement made by a committee exceeding $10 in amount shall be evidenced by a receipted bill stating the particulars of expense, and every such record, voucher, receipt, or account shall be preserved for 15 months after the election to which it relates and be open to public inspection.

Mr. HOPWOOD. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WALSH. Mr. Chairman, I move to amend the section by striking out, in line 15, the words "exceeding $10 in amount."

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Massachusetts.

The Clerk read as follows:

Amend, on page 5, line 15, by striking out the words "exceeding $10 in amount."

Mr. COX. Mr. Chairman, I would like to be heard upon that amendment. The gentleman from Massachusetts offers the identical amendment that I had in mind to offer, and I am going to support it for the purpose of making the bill more effective, making it a real bill, a bill in earnest, a measure that will amount to something. In other words, as some gentlemen on the other side of the Chamber have well said, I desire to make it a bill, if possible, that "has teeth in it." This bill has been characterized as a publicity bill. It is more—much more—than an ordinary publicity bill It has two or three new features in it which, in my opinion, are of extreme importance and make it a valuable measure. Heretofore I do not think the law has been complied with by candidates for Congress, as a rule, and there has been no way of compelling the defeated opponent to comply with the law.

Under the terms of the bill each successful candidate for Congress is required to give the name of his opponent and his address and the name of his judicial district, and in addition to that the Clerk of the House is required to report to Congress the names of all candidates for Congress who have failed to comply with the provisions of the law. These two provisions in the bill will make it a real, live, active measure, but I am unable to understand or conceive of the reason why, when disbursements are made, it shall only include amounts in excess of $10

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. COX. Yes.

Mr. RUCKER. I will state to the gentleman the reason. It is simply this: We apply the same practical knowledge that we have of our own personal affairs to the activities of a great committee. It is conceivable that a committee expends a great many items, in the course of months, that are very small. For instance, a dollar or two for postage stamps, $2.50 for stationery, and $2.50 for postal cards and things of that kind, trivial expenses that go to the maintenance of the office of the committee, and we make this provision in order not to put an unnecessary burden on any committee. For instance, a committee might hire a messenger boy to run an errand, and I will submit to the gentleman whether he thinks those items ought to be reported?

Mr. COX. I do.

Mr. GORDON. Suppose they hire fellows to vote at $5 apiece, how do you catch them—these blocks of five?

Mr. RUCKER. The gentleman will now bear in mind that we are now dealing with the committee.

Mr. GORDON. Yes; and they are the fellows that distribute the money.

Mr. RUCKER. I know, but the purpose is to ascertain to whom that goes. The committee distributes the money in bulk and the other man does it in blocks of five. We are now dealing with the committee headquarters.

Mr. COX. Mr. Chairman, there are two theories in this bill; first, the publicity theory, and I believe that is a more effective way of bringing about purity in elections than the other way contained in the bill. I think conditions have improved and improved wonderfully all over the United States in the last 20 years. I think every Member of this House will agree with me, at least those of us who were in politics 20 years ago, that never again do we want this country to return to the condition that existed then. I do not refer to any political party; I do not refer solely and alone to the Republican Party; oh, no. The party with which I am affiliated has many motes in its eye, and I am one of those men who believe that a man should always pull the mote out of his own eye before he undertakes to pull it out of some one else's eye. This bill has two theories; first, publicity. I believe that that is the most powerful weapon to be used in order to purify elections in this country. An ordinary thief can not ply his trade when his rendezvous is found out.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. COX. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COX. When the limelight of publicity is thrown on contributions for campaign purposes, unless the money is contributed for a legal and lawful purpose no man can individually stand up under the light of criticism. Mr. Chairman, I know there is no intentional joker in this bill; none whatever.

But right here in section 5 of this bill is the dangerous feature in it. If we want to purify elections, if we want to uphold the sovereignty of the people of the United States, here is the chance to do it.

Mr. RUCKER. Will the gentleman yield further?

Mr. COX. Yes; for a question.

Mr. RUCKER. Just for a statement of one sentence. I say to the gentleman in good faith——

Mr. COX. I am satisfied of it.

Mr. RUCKER. I stated the only reason we fixed this limit, and I want to say I have no earthly objection to the amendment suggested.

Mr. COX. I thank the gentleman.

Mr. RUCKER. None at all, if the House thinks it wise to do so. I thought it was unwise.

Mr. COX. I know that the argument is used that it would take some time to distribute all these various amounts of money; but let us see, Mr. Chairman, to whom the money is going. Let us see what is to be bought with it. Let us see exactly who is getting the money and what he is receiving for it. Why, under this provision, Mr. Chairman, if I was disposed to do it, I could hire on election day 100 men to distribute my cards at every voting place in my district and pay them $2 a day. They would be the class of men who heretofore have been fellows who sold their votes.

Mr. BENNET. Will the gentleman yield?

Mr. COX. In a moment. Under this provision, Mr. Chairman, I could hire 100 men, if there were that many, to stay away from the voting places on election day.

Here is where the real devilment is going to be done. If I am disposed to hire men to distribute my cards on election day, let us see whether that is the purpose or not. Let us follow

that up. Why, under the anticorrupt-practices act of the State of Indiana, I think the only time it has ever been construed by our Supreme Court, men undertook to get men out by hiring a large number of men on election day to distribute their cards at the rate of $2 a day. They happened to be the fellows, however, who heretofore, before we had the anticorrupt-practices act, were willing to take $2 a day to vote, or were willing to take $2 a day to stay away from the polls. Undertaking to avoid the anticorrupt-practices act of the State of Indiana, men who were candidates sought to hire men to distribute their cards, and the lower court quashed the indictment and the supreme court held the indictment good; in other words, holding that they could not violate the law indirectly in a way that they could not do directly.

Now, the only way, in my judgment, we are going to purify elections in this country—and I have offered motions on the floor of this House aimed to get right at that point—is, first, to have the fullest glare of publicity; second, to remove the temptation to expend a large amount of money in little sums. Now, it will cost some—there is no doubt about that—to keep an extra clerk in the committee room to give out receipts, but that will cost a mere bagatelle as compared with the benefits the public will receive through publicity. Why, you can expend with this provision in the bill, gentlemen, a million dollars in the State of New York; yes, $5,000,000 in the State of New York; you could expend a million dollars in the State of Indiana under this clause, not to be accounted for in excess of $10.

Mr. RUCKER. The gentleman means taking a receipt; the amount had to be accounted for.

Mr. COX. I mean taking a receipt.

The CHAIRMAN. The time of the gentleman has again expired. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was agreed to.

Mr. BENNET. Mr. Chairman, I move to strike out the last word simply for the purpose of asking what sort of a committee it is that is described as "a committee exceeding $10 in amount"? I have heard of committees not exceeding five in number, but this bill says, "a committee exceeding $10 in amount." I would like to ask the gentleman from Missouri if the language ought not to be changed so as to read——

Mr. MONDELL. The language "exceeding $10 in amount" is out.

Mr. BENNET. Then there is no description of the committee.

The Clerk read as follows:

SEC. 6. That whoever, acting under the authority or in behalf of any committee, whether as a member thereof or otherwise, receives any contribution shall, within five days after the receipt of such contribution, render to the treasurer of such committee a detailed account of the same, together with the name and address from whom received, and said treasurer shall forthwith enter the same in a ledger or record to be kept by him for that purpose, which ledger or record shall plainly show the items or sums contributed by citizens of each State separate and apart from contributions made by citizens of other States and shall be open to public inspection.

Mr. WALSH. Mr. Chairman, I move to strike out the last word. Mr. Chairman, under the general debate yesterday I called the attention of the chairman of the committee to the fact that these accounts had to be kept in a ledger or record, and I asked him if he did not think it was better that they should be kept upon forms to be furnished by the Clerk of the House, and I want to renew my query and ask him if he does not think that the records which are to be kept by the treasurer of a committee in order to promote uniformity of accounting should not be kept upon a form furnished by the Clerk of the House? This is a record which is to be open to the public inspection, as I understand it, and the treasurer of any committee keeping the accounts of these items is obliged to show that record or ledger for these accounts to anybody who desires to inspect them.

The question I again ask the chairman, because, I take it, since the query was propounded yesterday he may have given further deliberation to the matter, is, Does not he think it better to provide that the Clerk of the House shall furnish these committees with ruled forms so they should be all uniform, and that the treasurers be required to keep these accounts on those forms?

Mr. RUCKER. Mr. Chairman, I will answer the gentleman as I answered him yesterday. I do not think so. There is no necessity whatever for the uniformity of those records. Anything that meets the requirement, a record or ledger, will be sufficient.

Mr. WALSH. Mr. Chairman, I suppose if they entered the records in the Greek language upon the ledger, it would plainly show the items of the sums contributed—to somebody that could read Greek?

Mr. RUCKER. I think the gentleman is right.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 7. That the treasurer of every such committee shall, not more than 15 days and not less than 10 days next before an election at which Senators or Representatives in Congress are to be elected in two or more States, and not more than 15 days and not less than 10 days next before any general or special election for Senator or Representative in Congress in a single State or district, if such committee shall attempt to influence the result of an election held in a single State or district or in any manner participate therein, file in the office of the Clerk of the House of Representatives, at Washington, D. C., with said Clerk, an itemized detailed statement of all money or things of value received and disbursed by such committee; and on each sixth day thereafter, until such election, said treasurer shall file with said Clerk a supplemental itemized detailed statement. Each of said statements shall conform to the requirements of the following section of this act, except that the supplemental statements herein required need not contain any item of which publicity is given in a previous statement. Each of said statements shall be full and complete, and shall be signed and sworn to by said treasurer.

It shall also be the duty of said treasurer to file a similar statement with said Clerk within 30 days after such election, such final statement also to be signed and sworn to by said treasurer and to conform to the requirements of the following section of this act. The statements so filed with the Clerk of the House shall be preserved by him for 15 months and shall be a part of the records of his office and shall be open to public inspection.

Mr. WALSH. Mr. Chairman, I move to strike out, on page 6, line 18, the words "with said Clerk."

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 6, in line 18, by striking out the words "with said Clerk."

Mr. WALSH. Mr. Chairman, it seems to me, if you require the statement to be filed in the office of the Clerk of the House here in Washington that that is sufficiently explicit. You might send somebody down here to file a statement and the Clerk might not be here. I think he should be allowed to file it with whomsoever is in charge.

Mr. MANN. Will the gentleman yield?

Mr. WALSH. Yes.

Mr. MANN. I think the purpose of that language was to permit anyone to mail a statement addressed to the Clerk of the House. That would be held as a sufficient compliance.

Mr. WALSH. Does the gentleman think that with the language left out the statements mailed and addressed to South Trimble, Clerk of the House of Representatives, at Washington, and a return registry card signed by Mr. Jerry South, Chief Clerk, showing that he received that, would not be a sufficient compliance with the law?

Mr. MANN. I have no doubt it would be a sufficient compliance. If it was filed there at all it would be a sufficient compliance.

Mr. WALSH. I submit taken in connection with the other language which this specifies it must not only be filed in the office of the Clerk but filed with the Clerk.

Mr. MANN. The purpose of putting it in was to avoid saying "to file in the office of the Clerk." They said, "Clerk." Now, if they mail it to the Clerk, that is an assumption that it is filed in the office of the Clerk. It probably would be sufficient, but might not.

Mr. WALSH. I would like to ask the chairman of the committee what the purpose was.

Mr. MANN. I just told you.

Mr. WALSH. I would like to know what the purpose was in phrasing the language in that way. The gentleman from Illinois told me what he thought, but I want to know what the chairman of the committee thinks.

Mr. RUCKER. I think the gentleman's question has been answered, and if I answered it I would answer it in that way.

Mr. WALSH. I understand the gentleman is in accord with the gentleman from Illinois?

Mr. RUCKER. On this one question.

The CHAIRMAN. The question is on the amendment of the gentleman from Massachusetts [Mr. WALSH].

The question was taken, and the amendment was rejected.

Mr. KELLEY. Mr. Chairman, I would like to call the attention of the chairman to the language in lines 15 and 16 on page 6, where it places a prohibition upon the committee in attempting to influence the election or participate in the election in any way. Might not that prohibit them even from voting at the election?

Mr. RUCKER. I think not. I think the gentleman misunderstands it.

Mr. KELLEY. They might be inspectors of the election and also be members of a committee.

Mr. RUCKER. Let me answer the gentleman, if I catch his thought. It excepts and exempts the committee from making a report in individual districts unless they indulge in some political activity in that State or district.

Mr. KELLEY. It says they must make this report if they attempt to influence the election.

Mr. RUCKER. Or in any manner participate therein.

Mr. KELLEY. Or participate in the election. I think that would prohibit them from voting.

Mr. RUCKER. I take it that if it so happened that the entire committee would live in the congressional district it might do that.

Mr. BENNET. Mr. Chairman, I move to strike out the last word.

I have made a little computation of the number of reports that will have to be filed from my congressional district under this section 7. On page 2, line 22, the term "election" is defined to include nomination by primaries. We have 142 election districts in my congressional district. We have five political parties. Each one of those parties must make a report not more than 15 days nor less than 10 days before the primaries. They must make a report after the primaries. They must make a report not more than 15 nor less than 10 days prior to the election and every 6 days thereafter, which is at least twice more, and they must make a final report after the election.

Mr. RUCKER. Not necessarily twice more.

Mr. BENNET. It might be only once.

Mr. RUCKER. Ten days.

Mr. BENNET. Well, once more. We will cut out one. So each committee must make five reports.

Mr. MAPES. Will the gentleman yield?

Mr. BENNET. Not until I get through with this calculation. There are five reports to be made by each committee. There are five parties, and that means 25 reports for each election district. One hundred and forty-two districts multiplied by 25 makes 3,550 reports from one congressional district in one State.

Mr. RUCKER. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. RUCKER. If we could ever get 3,550 reports from that one district, we would get a lot of publicity.

Mr. BENNET. We would not get any publicity at all. If 3,550 committees would report from each congressional district, no living human being would take the time to look them up.

Mr. MAPES. I desired to ask the gentleman if the State law of New York does not require his committee to file a report now?

Mr. BENNET. The State law of our State requires our committee to report once after the primaries and once after the election. So we are now making from my district under our State law 284 largely unnecessary reports, and this House proposes to add to that somewhere between 3,000 and 4,000 reports from my congressional district.

Mr. MAPES. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. MAPES. There are States where no statement is required. There are other States where they are required to file a statement. In Michigan I do not think the committees would have to do anything more, if this bill is enacted into law, than to make a duplicate report. That is true in a great many of the States. The committee feels that in States where there is no publicity and no reporting required they should be made to account.

Mr. BENNET. And therefore, because Michigan is not up to date enough to have a proper election law——

Mr. MAPES. Oh, Mr. Chairman, the Michigan law is up to date.

Mr. BENNET. It is not, because otherwise they would require more reports. Because Michigan is not up to date, therefore the State of New York is to be penalized by being compelled to file, if we have 4,000 election districts in the States, 100,000 reports with the Clerk of the House. Why, the proposition is so ridiculous that it startles me to think that this bill is permitted to progress at all in this House in the face of these undisputed figures.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. MADDEN. The gentleman from New York, in including the number of reports to be made in his district, has overlooked the medical associations, and the social clubs, and the churches, and the Anti-Saloon League, and the little breweries, and everything that could be organized for the purpose of filching a dollar out of the pocket of the candidate.

Mr. BENNET. Yes; and everybody who can organize a chowder party or a picnic. It will be a picnic, literally, before they get the reports down here. I am referring only to the reports of the regular committees in my congressional district.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. COX. The gentleman is willing to handle all those reports in his district?

Mr. BENNET. I do not have to handle them.

Mr. COX. But the gentleman is willing to see to it?

Mr. BENNET. If I do not see to it, or if anybody does not look to it, the seat of the man elected might be vacated.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 8. That the statements required by the preceding section of this act shall show:

First. The name and address of each person, firm, association, or committee that has contributed to such committee, or any officer, member, or agent thereof, either in one or more items, money, or other things of value of the aggregate amount or value of $100 or more, and the amount or sum contributed by each.

Second. The aggregate sum contributed to such committee, or to any officer, member, or agent thereof, in amounts of less than $100.

Third. The aggregate amount contributed by citizens of each State, respectively, together with the total sum contributed to said committee or any officer, member, or agent thereof by citizens of the several States.

Fourth. The name and address of each person, firm, association, or committee to whom such committee, or any officer, member, or agent thereof, has distributed any sum of money or thing of value of the amount or value of $10 or more, stating the amount or sum distributed to each, the date and purpose thereof, together with a true and accurate statement of the items or sums distributed to persons, firms, associations, or committees in each State separate from other States.

Fifth. The aggregate sum distributed by such committee, or any officer, member, or agent thereof, where the amount or value of the sum distributed to any one person, firm, association, or committee, in one or more items, is less than $10.

Sixth. The total sum disbursed by such committee, or any officer, member, or agent thereof.

Mr. COX. Mr. Chairman, I move to strike out the language, "of the amount or value of $10 or more," in lines 6 and 7, page 8, so as to correspond with the amendment to which the committee agreed on page 7.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana [Mr. Cox].

The Clerk read as follows:

Amend, on page 8, lines 6 and 7, by striking out "of the amount or value of $10 or more."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. COX. Let us have a division on that, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 12, noes 27.

So the amendment was rejected.

Mr. DYER. Mr. Chairman, I move to strike out on page 7, line 17, after the word "value," the words "of the aggregate amount or value of $100 or more."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. DYER].

The Clerk read as follows:

Page 7, lines 17 and 18, strike out the words "of the aggregate amount or value of $100 or more."

Mr. DYER. Mr. Chairman, I offer that amendment for the reason that I take it, of course, that the committee that reported this bill is anxious to get a bill really adapted to the purpose for which it has been introduced. We all know that if some one were to contribute a large sum of money to a committee and chop it up and have it put in in the name of a dozen or more persons, whereas he might contribute $1,000 or more, the names of none of them would have to appear in the report. I think that has been done many times in the past, and it is a dangerous proposition to leave in the bill. I think my colleague, the chairman of this committee, will recognize the danger of it.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. DYER. Yes.

Mr. RUCKER. Do I understand the gentleman to say that under this section a person contributing $10,000 or $5,000 would not have to be named?

Mr. DYER. It is provided that the person who contributes $100 or more must be reported.

Mr. RUCKER. $100 or more?

Mr. DYER. Yes. Suppose a man wants to contribute $1,000. He covers it up. It is put in under fictitious names of employees or anybody, in sums of $90 or so, and the necessity of publishing the names is avoided. That has been done in the past.

Mr. RUCKER. The amendment of the gentleman from Missouri, if adopted, would change the existing law and also the provisions of this bill so as to make it unnecessary for the committee to preserve the names of the contributors.

Mr. DYER. No; I would have the names of everybody who contributed put upon the books, whether it be a dollar or a hundred dollars or a thousand dollars.

Mr. RUCKER. Let me suggest this to the gentleman and see if the gentleman wants to do that: A few years ago it became popular, and I think wisely so, for the great political committees to solicit what were called "dollar campaign contributions," and I have learned from the press that many hundreds of thousands of people gave a dollar contribution. It was patriotic and proper, and certainly it was free from any proper criticism. And yet, if the gentleman's idea should prevail, if I understand him correctly, it would require a committee to keep the name and address of each and every dollar contributor in the United States, and then certify all those names to the Clerk of the House of Representatives.

Mr. DYER. I think that is an extreme assumption.

Mr. RUCKER. But is not that true?

Mr. DYER. If that has ever been done, it has been in only one or two instances.

Mr. RUCKER. But is it not true that so far as numbers are concerned, the contributors of small sums vastly exceed the contributors of large sums?

Mr. DYER. I come from a city, and it has been charged and I believe it is a fact that sometimes in a city a man goes out and solicits money and raises a large sum for a political committee or a candidate, and he puts it in under 100 names, in such a way as to shield entirely the real contributor. This is a dangerous proposition.

Mr. RUCKER. Even if that is true, what change does the gentleman suggest?

Mr. DYER. I suggest that the amendment I have offered should be agreed to. If we are going to have a law, let us do as the gentleman from Indiana [Mr. Cox] suggests, take care of every instance. If a man contributes a dollar, he probably contributes as much in proportion to his means as another man who contributes a thousand dollars.

Mr. RUCKER. I will tell the gentleman frankly that I should believe I was defeating the purposes of the bill rather than advancing them if I should vote for the amendment. Therefore, I hope the amendment will not be agreed to.

Mr. KING. Mr. Chairman, I hope this amendment will be voted down. There seems to be an attempt here to emasculate the bill. The first step was taken by the gentleman from Indiana [Mr. Cox] in order to make it an inoperative act and next by the gentleman from Missouri [Mr. DYER], who has just spoken. The honorable chairman of this committee [Mr. RUCKER] has made a long and careful study not only of this bill but of the law as it stands, and it is his opinion that this section ought not to be stricken out, that the law ought not to be changed, and I hope he will receive the support of the Members of the House. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. DYER].

The question being taken, on a division (demanded by Mr. DYER) there were—ayes 8, noes 36.

Accordingly the amendment was rejected.

The Clerk read as follows:

SEC. 9. That every person, firm, association, or organization that shall expend or promise any sum of money or other thing of value amounting to $50 or more for the purpose of influencing the nomination or election of a candidate for President, Vice President, Senator, or Representative in Congress, unless he or it shall contribute the same to one of the committees hereinbefore referred to, shall file statements of the same under oath in the office of the Clerk of the House of Representatives at Washington, D. C., as required of the treasurer of a committee by section 7 of this act, which statements shall be held by said Clerk in all respects as required by said section.

Mr. PLATT. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

On pages 8 and 9, strike out section 9.

Mr. PLATT. Mr. Chairman, under this section if a friend of mine takes me around in his automobile for three days he has got to file a statement in Washington. The use of his automobile is worth at least $20 a day. It is a thing of value, and it is perfectly absurd to have such a section as this in the bill. It does not say either that he can contribute it to the person who is a candidate. It says unless he shall contribute to some one of the committees hereinbefore referred to he shall file a statement of the same under oath with the Clerk of the House of Representatives. Now, why he could not contribute it to the candidate and let the candidate file the statement I do not know, but that is what it says here. You will make thousands of criminals in the United States if you leave this section in the bill. There is no sense in it at all.

Mr. RUCKER. Will the gentleman yield?

Mr. PLATT. I yield.

Mr. RUCKER. In view of the language in the section I think the gentleman can hardly sustain the contention he makes. It says—

Shall expend or promise any sum of money or thing of value.

I do not think that would mean that some gentleman in your district who takes you automobile riding would have to file a statement of it.

Mr. PLATT. Are not service and gasoline things of value?

Mr. KELLEY. Gasoline has a cash value these days.

Mr. LANGLEY. And a high cash value.

Mr. MANN. I should like to know what gentleman here has a friend who takes him around in his automobile for three days.

Mr. PLATT. I have had such a friend.

Mr. MANN. Then you ought to report it.

Mr. PLATT. I think there is no sense in the section, and it ought either to be amended or come out.

Mr. RAKER. Mr. Chairman, I oppose the motion to strike out the section. This section intends to cover the expenditure of money by any individual, and so forth. The whole argument to-day by some of the Members is that we are trying to make criminals by endeavoring to comply with what the people of this country have desired for the last 15 years—in providing honest elections and straightforward returns.

Mr. WALSH. Will the gentleman yield?

Mr. RAKER. I can not yield at the present time. They are afraid to file an honest account. There can be no objection on earth to a man putting a statement on record when he contributes to the election of a candidate, in order that the public may know what he is contributing for, why he is contributing, and why he is so much interested in that particular candidate, and how much. It is but right that the public should know. If he is furnishing automobiles, if he is furnishing dinners, if he is furnishing railroad passes, the public ought to know it; and that has been the very object of the demand of the American people for the last 10 years. The people of all parties have stated that they are in favor of enacting laws for the purpose of securing publicity of campaign expenses. Most of the States have these laws; and it sounds peculiar to me to hear men on the floor of the House to-day ridicule the bill on account of the number of affidavits and statements to be filed. If the public desire to elect a man, they ought to have the opportunity to vote for him, and not permit Tom, Dick, and Harry, who have a personal interest in the matter, to slip around and buy votes galore, to pay all the bills, or go to a hack driver and have their work done, and pay him $5 for the same when it is worth but 50 cents, or have a man at every turn at the polls. If you expend that money, you ought to put it on record. The public ought to know who is behind the candidate; it is their business, and they should know all the facts. The man without means, who has struggled along, who has the ability and experience to represent a constituency in this House or in the Chamber at the other end of the Capitol, ought to have an equal chance with the man who has a million or half a million dollars to expend on an election. The way it is to-day, if every individual could contribute what he desires, if firms and associations could contribute, ought not the people of that district to know that this man or this association is behind the candidate, and know, when he comes to Congress, whether or not the great body of the citizenship of that district are going to be represented, or whether some particular interest or firm or manufacturing establishment is going to be represented?

No man who is in favor of giving his constituents and the people of this country what they are entitled to can have an objection to the man who contributes to the individual's expenses. If the man contributes to the campaign expenses of an individual, if he is giving the money for an honest and legitimate purpose, if he believes the man is able and competent to represent the district in Congress, ought he to be ashamed or ought he to be afraid for his name to go on record and the amount he contributes. He ought to be glad to publish to the district that he contributed $100 to John Smith, he being an able and competent man, and one that would represent the district well in Congress, and also the fact that there was no great interest or great concern that would control his vote or action when elected, and that he would give every man a fair and square deal.

That is what this legislation is for. The States have demanded it and most of them have got it. The people of this country ask that this Congress give them the same kind of legislation. Let me tell you that the man who votes against this legislation will hear from home, and he ought to, because everywhere, no matter how humble he may be, no matter whether he is a farmer or a blacksmith in the shop, he ought

to have the same consideration for Congress or for the legislature that any other man has. There is not a piece of legislation in relation to land, not a piece of legislation with reference to water power, but that you will find the interests all ready and plenty of men representing the large concerns on hand to represent those interests, but who sees the man here representing the farmer or the blacksmith or the ordinary consumer. We are entitled to know who is behind the candidate, if anyone. That is what the people want.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. Mr. Chairman, I ask for two minutes more.

Mr. RUCKER. Mr. Chairman, I would like to see if we can not get an agreement to close debate.

Mr. MANN. If gentlemen are going to talk—and I have no objection—we can not finish this bill to-night.

Mr. RUCKER. There seems to be no great desire to talk on this section, and I ask unanimous consent that all debate on the section and amendments thereto close in nine minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that all debate on this section and amendments thereto close in nine minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from California asks unanimous consent for two minutes more. Is there objection?

There was no objection.

Mr. RAKER. Mr. Chairman, in addition to the provisions provided for in this section, the other provision that has been passed in regard to publishing the name of the person or the committee on posters or handbills, found in section 4 and kindred provisions put this bill upon a plane where the public knows who is behind the literature and the money that is expended. If a man has anything to say, he ought to be ready and willing to attach his signature to it whether it is a poster or a circular or a publication in a newspaper. If he contributes the money he ought to be more willing to make the same statement and to give the amount of money received, the person from whom it was received, and a full statement. If these individuals desire to assist a candidate why doesn't he pay his money to the committee?

Mr. PLATT. Why should not he pay it to the candidate?

Mr. RAKER. That is not the purpose of this section. Every person, firm, association, or organization—

that shall expend or promise any sum of money or other thing of value amounting to $50 or more for the purpose of influencing the nomination or election of a candidate for President, Vice President, Senator or Representative in Congress, unless he or it shall contribute the same to one of the committees hereinbefore referred to, shall file statements—

And so forth.

If he wants to contribute the money let him contribute it to the committee, where a record will be kept. If he does not want to go on this list, but wants to go and expend the money without any string to it or any limit to the expenditure——

Mr. PLATT. Let him contribute it to the candidate directly.

Mr. RAKER. I am for this legislation. It is what the country wants.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. MANN. Mr. Chairman, I have listened with great interest to the eloquent, able, and learned speech of our distinguished friend from California [Mr. RAKER]. He will have it printed at Government expense as far as the typesetting is concerned; he will pay for the paper on which it is printed, have it folded and sealed at Government expense, put into an envelope which the Government pays for, and send it to his district at the expense of the Government of the United States for the purpose of demonstrating to his constituents why he is a very learned and able man and ought to be returned to Congress.

But the man who runs against him will have to pay for all the things that he sends out out of his own pocket, and in both cases will have to make an expense account to the Government, while all the work which may be done in connection with this speech is either paid for by the Government directly or done by clerks paid for by the Government.

Mr. WALSH. Mr. Chairman, I have listened to the remarks of the gentleman from California [Mr. RAKER] with a great deal of interest, and I agree with considerable that he has said, that the people of the country want publicity with reference to campaign contributions and expenses. I do not agree, however, with the deduction he evidently draws in support of this section, that every firm, corporation, or association contributing $49.50 is honest, and that therefore they need not account for such a contribution, whereas the man or association who contributes $51, if it be not accounted for, stamps such contributors as crooks. I can not support that view. I submit that if we are going to write a law it should apply with at least a semblance of uniformity, whether they contribute 10 cents or $100—put them all on the same plane and make them all report.

And if you enforce it you will find that half the friends of each Congressman—that is of all the successful candidates for Congress, and of the unsuccessful ones, too, for that matter—will be filling your jails throughout the country before the Congressmen take their seats, because you are making this law so stringent, you are making it so much without any regard for rhyme or reason in the fixing of restrictions and regulations which you are putting upon the candidates and the various political committees, that something like that must inevitably result. You are writing this law predicated upon the assumption that every committee and every man favoring a candidate is a lawbreaker and crook and is bent on no other purpose than that of breaking the law, and I resent that assumption being placed upon any supporter individually or collectively of any candidate upon either side of the House. [Applause on the Republican side.] I say we ought to write a law here that has some reason in it, and a law which, if you are going to require accounts and affidavits, will require them from the man who gives $40 as well as from the man who gives $51. If you are going to require affidavits and sworn statements from committees, I think you should require them from committees that have to do with the expenditure of small sums of money just the same as you require them from committees that expend larger amounts, and not seek to set up a privileged class here that can draw its garments about itself, as the gentleman from Alabama said the other day, and say "I am holier than thou; I only gave $49.99 and therefore I am pure and honest, while John Smith gave $52, and forgot to account for it, and he is a crook and liable to serve a term in the penitentiary or pay a fine of $10,000." You are holding out the opportunity for evasion and subterfuge. That is the difficulty with this section as I see it, and with several other sections in the bill. I offered an amendment which struck out one of the limitations, which was accepted and voted favorably upon by the House, and I submit that if this section remains in the bill we ought to strike out that limitation of $50 and make it so that it will read "anything of value," and require a statement and account of it whether they pay it to the candidate himself or an individual or some committee or organization representing the candidate.

This bill, covering several pages, might well have been condensed so that it would occupy not more than three pages, and there would be no need of eliminating its teeth either.

You are attempting to go so much into detail that it will only encourage all sorts of schemes and plans which will fall just outside the law.

I say a broad, general law, plain and emphatic, requiring publicity, irrespective of State laws, applicable to all alike, would be a better way to legislate on this important subject.

The CHAIRMAN. All debate on this section and amendments thereto has expired.

Mr. TINKHAM. Mr. Chairman, I ask unanimous consent to offer an amendment.

The CHAIRMAN. That is in order. The question first is on the amendment offered by the gentleman from New York [Mr. PLATT] striking out the section.

Mr. STAFFORD. Mr. Chairman, if the amendment of the gentleman from Massachusetts [Mr. TINKHAM] is to perfect the text, it would come first.

Mr. TINKHAM. Mr. Chairman, I have an amendment which I desire to offer, and which I believe will be accepted, to add in line 25, after the word "to," the words "or to the candidate."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 8, line 25, after the word "to" insert the words "or to the candidate."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Massachusetts.

The amendment was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The Clerk read as follows:

SEC. 10. That every person who shall be a candidate for nomination or for election to the office of President or Vice President of the United States, and every person who shall be a candidate for nomination or for election at any general or special election for Senator or Representative in the Congress of the United States shall, before the nominating convention or primary election, and again before the general or special election, make and file a full, correct, and itemized statement of all moneys and things of value received by him, or by anyone for him with his knowledge and consent, from any source, in aid or support of his candidacy for nomination or election, together with the names of all those who have furnished the same, in whole or in part. Such state-

ment shall contain a true and itemized account of all moneys and things of value contributed, disbursed, or expended by such candidate, or by his agent, representative, or other person for and in his behalf, with his knowledge and consent, together with the names of all those to whom any and all such contributions, disbursements, or expenditures were made for the purpose of procuring his nomination or election.

The statements herein required to be made by candidates for President or Vice President of the United States before nomination and election, respectively, shall be made, executed, and filed not less than 15 nor more than 20 days before the date of the nominating convention and not less than 15 nor more than 20 days before the date of the election at which presidential electors are to be elected; and the statements herein required to be made by candidates for Senator or Representative before nomination and election, respectively, shall be made, executed, and filed not less than 10 nor more than 15 days before the holding of the primary election or nominating convention, and not less than 10 nor more than 15 days before the general or special election at which Senators or Representatives are to be elected.

Every person who shall be a candidate for nomination or for election to the office of President or Vice President of the United States, and every person who shall be a candidate for nomination or for election at any general or special election for Senator or Representative in the Congress of the United States, shall, after the nominating convention or primary election, and again after the general or special election, make and file a full, correct, and itemized statement all moneys and things of value received by him, or by anyone for him with his knowledge and consent, from any source, in aid or support of his candidacy for nomination or election, together with the names of all those who have furnished the same, in whole or in part; and such statement shall contain a true and itemized account of all moneys and things of value contributed, disbursed, or expended by such candidate, or by his agent, representative, or other person for and in his behalf with his knowledge and consent, up to, on, and after the day of such primary election, nominating convention, or general or special election, together with the names of all those to whom any and all such contributions, disbursements, or expenditures were made for the purpose of procuring his nomination or election.

The statements herein required to be made by candidates for President or Vice President of the United States, after nomination and election, respectively, shall be made, executed, and filed within 15 days after such nominating convention and within 30 days after the election at which presidential electors were elected; and the statements herein required to be made by candidates for Senator or Representative, after nomination and election, respectively, shall be made, executed, and filed within 15 days after the primary election or nominating convention and within 30 days after such general or special election at which Senators or Representatives were elected.

No statement herein required to be made need contain the items of which publicity is given in a previous statement but the statement required to be made and filed after a general or special election, in addition to an itemized statement of all contributions, disbursements, or expenditures not theretofore given publicity, shall contain a summary of all preceding statements: *Provided*, That the foregoing provisions in relation to nominations shall not apply to candidates who are declared nominated by a committee, acting under authority of law or party usage, where no convention or primary is held to make such nomination.

All statements herein required to be made and filed by a candidate for President or Vice President or for Senator shall be filed with the Secretary of the Senate of the United States, and all statements herein required to be made and filed by a candidate for Representative shall be filed with the Clerk of the House of Representatives at Washington, D. C. The statements required by this section to be filed with the Secretary of the Senate or the Clerk of the House of Representatives shall, when filed, become a part of the records of the office in which they are filed, shall be open to public inspection, and be preserved for at least two years.

Every candidate for Senator or Representative shall, within the time herein required, in addition to the statements required to be filed with the Secretary of the Senate and the Clerk of the House, as the case may be, file a copy of the statements required in this section, under oath or affirmation, with the clerk of the United States district court having jurisdiction over the Federal judicial district in which he resides. The statements required by this section to be filed with the clerk of the United States district court shall, when filed, become a part of the records of his office, be open to public inspection, and be preserved for at least two years.

No candidate for President, Vice President, Senator, or Representative in Congress shall promise any office or position to any person, or to use his influence or to give his support to any person for any office or position for the purpose of procuring the support of such person or of any person in his candidacy; but such candidate may within the limitations and restrictions and subject to the requirements of this act contribute to committees having charge of the disbursement of campaign funds.

No candidate for President of the United States shall contribute, disburse, or expend, or cause to be contributed, disbursed, or expended, in procuring his nomination and election any sum in the aggregate in excess of $50,000; no candidate for Vice President shall contribute, disburse, or expend, or cause to be contributed, disbursed, or expended, in procuring his nomination and election any sum in the aggregate in excess of $25,000; and no candidate for Senator or Representative in Congress shall contribute, disburse, or expend, or cause to be contributed, disbursed, or expended in procuring his nomination and election any sum in the aggregate in excess of the amount which he may lawfully contribute, disburse, or expend under the laws of the State in which he resides: *Provided*, That no candidate for Senator shall contribute, disburse, or expend any sum in the aggregate exceeding $5,000 in any campaign for his nomination and election; and no candidate for Representative shall contribute, disburse, or expend any sum in the aggregate exceeding $2,500 in any campaign for his nomination and election: *Provided further*, That money expended by any such candidate to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of the State in which he resides, or for his necessary personal expenses, incurred for himself alone, for travel and subsistence, stationery and postage, writing, or printing (other than in newspapers), and for telegraph and telephone service, shall not be regarded as an expenditure within the meaning of this section, and shall not be considered any part of the sum herein fixed as the limit of expense and need not be shown in the statements herein required to be filed.

Mr. BARKLEY. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. On page 12, line 11, the proviso reads:

Provided, That the foregoing provisions in relation to nominations shall not apply to candidates who are declared nominated by a committee acting under authority of law or party usage where no convention or primary is held to make such nomination.

In the State of Kentucky under the primary law where only one candidate files his papers for nomination within 40 days of the primary election the primary is declared to be off, and the man who is the only candidate is nominated by operation of law, and the secretary of state is required to give him his certificate of nomination. In that case would the language of this proviso be broad enough to cover it?

Mr. RUCKER. Mr. Chairman, I will say to the gentleman that I drew this with especial reference to the States of Kentucky and Tennessee.

Mr. BARKLEY. The language is "who are declared nominated by a committee." The nomination is not declared by a committee but by the secretary of state acting under the law.

Mr. RUCKER. I will say to the gentleman that since reporting the bill it has occurred to me that the language ought to be amended. I had in mind an amendment to the language in line 10, to strike out the words "in relation to" and insert "requiring statements to be made before and after," so that it will read, "That the foregoing provisions requiring statements to be made before and after nominations," and so forth.

Mr. BARKLEY. But the language is "shall not apply to candidates who are declared nominated by a committee."

Mr. RUCKER. I desire to make the bill clear. I will say to the gentleman that I thought when this provision was drawn that the laws of Kentucky were similar to those of Tennessee, but I now know that in the gentleman's State the secretary of state declares the nomination.

Mr. BARKLEY. I am in a quandary about making my report. The 26th day of June was the last day for filing papers for nomination. Having no opposition, the secretary of state sent me my certificate of nomination. Of course, I have not filed a report prior to June 26, because I did not know whether there was going to be anybody running, and there being no primary or a convention I did not know how to interpret this law.

Mr. RUCKER. I will fix it so that it will be satisfactory.

Mr. SMITH of Michigan. This law is not yet in effect.

Mr. DUPRÉ. How would the gentleman interpret the present law in regard to the case suggested by the gentleman from Kentucky? It applies to some of us in Louisiana.

Mr. RUCKER. I will say to the gentleman from Louisiana that the law, of course, is the general law of the United States. There are some State or local conditions that were not in the minds of those who framed the bill.

Mr. DUPRÉ. I see the gentleman did not catch the import of my question as to what is necessary to do under the present statute.

Mr. RUCKER. The gentleman has not allowed me to finish answering his question. I say these conditions, discovered after the enactment of the law, caused some confusion, and I am frank to say I do not know how to tell the gentleman what to do, because I do not know, except I have advised some gentlemen, in my opinion, just in a tentative way, and I will say to the gentleman, that 10 days before his committee meets or before the secretary of state acts the candidate ought to file a statement of his expenses.

Mr. BARKLEY. That could not be done, because no candidate could anticipate within 10 days of the expiration of the time whether anybody else would file.

Mr. RUCKER. I would then anticipate that condition which could not be anticipated by stating that I did this merely for the purpose of complying with law as nearly as possible.

Mr. BARKLEY. Does not the gentleman think under the present law it would be a sufficient compliance if the report was made within 15 days after he was nominated, whether by a committee or otherwise?

Mr. RUCKER. I would say to the gentleman this: The present law must be complied with, literally complied with, so far as the provision of the preelection nomination statement is concerned.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DUPRÉ. Mr. Chairman, I ask unanimous consent that the time of the gentleman may be extended five minutes.

Mr. RUCKER. I have not the floor now.

Mr. MANN. Mr. Chairman, I move to strike out the proviso, page 12, beginning line 9——

Mr. RUCKER. Before the motion is put to the House I want to offer an amendment to perfect the text.

Mr. MANN. Let the amendment be reported; I have no objection to the gentleman offering an amendment to perfect the text.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, line 9, after the word "statements," strike out the proviso down to and including the word "nomination" in line 15.

Mr. MANN. The gentleman from Missouri wants to offer an amendment to perfect the text.

Mr. RUCKER. Mr. Chairman, I want to offer an amendment perfecting the text of the language which the gentleman from Illinois moves to strike out. Amend page 12, line 10, by striking out the words "in relation to" and inserting "requiring statements to be made before and after"; and in line 11, after the word "committee," insert the words "or officers."

Mr. MANN. Mr. Chairman, I have no objection to this amendment being agreed to.

Mr. RUCKER. Mr. Chairman, I do not care to discuss the amendment; it has been discussed somewhat.

The CHAIRMAN. The Clerk will first report the amendment.

The Clerk read as follows:

Page 12, line 10, strike out the words "in relation to" and insert "requiring statements to be made before and after"; and after the word "committee," in line 11, insert the words "or officer."

The question was taken, and the amendment was agreed to.

Mr. MANN. Now, Mr. Chairman, I think the proviso should be stricken out of the bill. I know of no reason why if a candidate for Congress buys off an opposition candidate he should not make a report of it. I know of no reason why if a candidate for Congress, where the original candidate has resigned, goes to a considerable expense to get a committee to nominate him, he should not make a report on it. In every State in the Union, I guess, if a man who is nominated at a primary dies or resigns the vacancy is filled by the committee. The man may have spent a considerable amount of money. Why should he be exempt from making a report of his expenditures? Why should any Member from Kentucky or Tennessee—the gentleman said it was particularly for those States—if he has expended money for the purpose of getting the nomination, be relieved from making a statement in regard to it because he did not have to go to the expense of the primary?

He is lucky enough to get off without the expense of the primary and he ought not to be permitted to get off further without making any statement. Of course, he can not make a statement before he gets the nomination—that is, I take it, an impossibility. He does not know when he has got the nomination until he has it, but he can make a statement after the nomination as to any expense he has had. Now, of course, I do not assume, as some gentlemen seem to, that everybody connected with politics is crooked. I have no doubt that all men who get elected to Congress are honest.

Mr. BARKLEY. If the gentleman will yield——

Mr. MANN. And while there are some who do not get elected who are not honest, to place everybody above suspicion, if he is elected he ought to make a statement so as to make the other fellow make a statement.

Mr. BARKLEY. I just want to put right in the gentleman's remarks here that I have decided to do that very thing. Under the law as it now exists it does not seem to cover that particular case, but I expect to file my report since receiving the nomination in that way. I agree with the gentleman from Illinois that possibly there ought to be just as much moral obligation or legal obligation on the men to file a statement showing the expenditure of money.

Mr. MANN. I do not see why, and I do not see any reason for this proviso.

Mr. DUPRÉ. The only difficulty arising is that the law states that the statement must be filed after the primary. If there was no primary, it is a question what one should do, and in my case two years ago I filed an affidavit within two or three days after receiving the nomination stating what the law of my State was as to the expenditure and what I had expended, and that I made that return in order to comply with the law. That is all I can see one can do.

Mr. MANN. If that difficulty was one which was sought to be met, and I take it that was the difficulty, it seems to me it would be wiser if this provision is to remain in the bill to say "the foregoing provision, requiring filing of statement after nomination, shall apply to candidates who are nominated by the committee."

Mr. BARKLEY. Would it be better to state that the provisions as to the filing before nomination should not apply?

Mr. MANN. But the gentlemen both say there is a question about the existing law. There would be no question if you say, "*Provided*, That the foregoing provision requiring statements to be filed after nomination shall apply to candidates who are declared nominated by the committee or an officer acting under authority of law."

Mr. RUCKER. Will the gentleman yield?

Mr. MANN. Certainly.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RUCKER. Mr. Chairman, I take the floor in opposition to the amendment.

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. RUCKER. I would like to ask the gentleman this question, after stating frankly that some suggestions have been made here that I know nothing about. I have never assumed, because I knew nothing about it, that in cases of the kind I referred to a while ago, that any expense whatever had been incurred. If incurred it ought to be accounted for. Now, what would the gentleman say to an amendment like this, following the language now in the bill, at the end of line 13:

But in such instances the statement required after nomination shall contain a detailed statement of every item of expense incurred by such candidate before nomination.

Mr. MANN. Let them do it. What is the harm?

Mr. RUCKER. He is bound to do it now.

Mr. MANN. They say they are not.

Mr. RUCKER. After the nomination?

Mr. MANN. Yes. One gentleman said that he did not file the statement, because he did not think the law required him to do it; and one did file a statement because he thought the law required him to do it.

Mr. DUPRÉ. It applies to a primary. None is held in such a case.

Mr. MANN. It seems it would be wise to say that the provision in regard to filing, or the language the gentleman has in the bill, that the statements after nomination should apply, that being a specific provision.

Mr. RUCKER. That exactly meets the view I have. I concur in what the gentleman says. I think I understand the proposition.

Mr. MANN. Why not change this proviso by leaving out the word "not" and say "The foregoing provision requiring "——

Mr. MAPES. Would not the purpose be covered by leaving out of the gentleman's amendment the words "and after," so that it would read——

Mr. MANN. Let us make it clear, so that is applies after nomination.

Mr. MAPES. There is none now, but I think if we put in the express provision that it would apply to statements made before nomination, there would not be any question about it.

Mr. MANN. I have always learned that when you have got a question between a positive and a negative, to take the positive.

Mr. RUCKER. The language as suggested by the gentleman from Illinois, as I understand it, is that the foregoing provision requiring statements to be made shall apply to candidates after nomination?

Mr. MANN. Read the language of the amendment that is agreed to there, and we will get it quickly enough. The language of the last amendment that was agreed to, in line 10, page 12, striking out in line 2 and inserting.

Mr. RUCKER. That puts it in worse shape.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, line 10, strike out the words "in relation to" and insert "requiring statements to be made before and after."

Mr. MANN. Now, if you leave out "before and," making it read "the foregoing provisions requiring statements to be made after nomination shall apply to candidates," you have got it in perfect form.

Mr. RUCKER. I gladly make that change, because I think it is right, and that is exactly what we are trying to do.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Page 12, line 10, strike out the words "in relation to" and insert the words "requiring statements to be made after nomination."

Mr. MANN. And strike out the word "not."

Mr. RUCKER. And strike out the word "not" in line 10.

The Clerk read as follows:

And strike out the word "not" following the word "shall," so that as amended it will read: "*Provided*, That the foregoing provisions requiring statements to be made after nominations shall apply to candidates who are declared nominated by a committee or officers acting under authority of law," etc.

Mr. MANN. The word "officers" ought to be singular instead of plural.

Mr. KINCHELOE. Mr. Chairman, referring to the situation in Kentucky, my colleague [Mr. BARKLEY] said we did not know—that we did not know we were going to have opposition until the 26th of the month. Is there any provision here providing that we must make these statements before the primary?

Mr. MANN. There is no provision here at all, except by inference, requiring you to make statements in the situation you are in. Now, if we put in a positive provision that you must make statements after nomination, that would exclude the necessity of making them before nomination.

Mr. KINCHELOE. That would preclude our making statements before?

Mr. MANN. Yes. You might pass 40 laws, but they would not be effective.

Mr. RUCKER. I move, Mr. Chairman, to modify the amendment voted on a few minutes ago by striking out the words "before and."

Mr. MANN. Make that singular instead of plural in "nominations."

The CHAIRMAN. The gentleman from Missouri asks leave to modify his amendment by striking out the words "before and" and also by striking out the word "not," in line 10, and the letter "s" in the word "nominations."

Mr. MANN. Let the gentleman ask unanimous consent to have the paragraph modified as the Clerk reports it.

The CHAIRMAN. The Clerk will report the amendment as it will read when amended.

The Clerk read as follows:

Amend, page 12, line 9, so that it will read, "That the foregoing provisions requiring statements to be made after nomination shall apply to candidates who are declared nominated by a committee or officer acting under authority of law," etc.

Mr. MANN. Mr. Chairman, I ask unanimous consent to withdraw my amendment to strike out.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. MAPES. Mr. Chairman, may I ask the chairman of the committee a question?

Mr. RUCKER. Yes.

Mr. MAPES. Does the chairman hold that under the law as it is now the men who are nominated by these committees and by State officers do not have to file a statement?

Mr. RUCKER. We hold that it is impossible for them to comply with the provisions of the law as it exists.

Mr. MAPES. This is an additional declaration that they shall file after the nomination?

Mr. RUCKER. Yes. That includes all the expenses. The only thing it does not do is it does not give publicity before nomination.

The CHAIRMAN. The question is on agreeing to the modified amendment offered by the gentleman from Missouri [Mr. RUCKER].

The amendment was agreed to.

Mr. TINKHAM. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM].

The Clerk read as follows:

Amendment offered by Mr. TINKHAM: Page 14, line 22, after the word "newspapers" insert the words "and distributing letters, circulars, and posters."

Mr. TINKHAM. Mr. Chairman, the amendment is offered in order that this section may conform with the present law. If the amendment which I have offered is adopted, then the section will read as the present law reads. I think the omission of those words was an unconscious mistake by the committee, because the committee in their report in relation to section 10—and that is the section we are discussing and the section that I am offering an amendment to—says:

This is one paragraph of section 8 of the existing law, as amended August 19, 1912, which in the opinion of your committee ought to be carried in a separate section.

It does not change the present law except to prescribe the manner in which the duplicate statement may be delivered to the opponents, as required by section 9 herein.

Mr. RUCKER. What report is the gentleman reading from?

Mr. TINKHAM. I am reading from report No. 88, "Publicity Campaign Contributions."

Mr. RUCKER. Printed when?

Mr. TINKHAM. September 20, 1914.

Mr. RUCKER. The gentleman has an old report.

Mr. TINKHAM. I believe the honorable Representative from Missouri [Mr. RUCKER] is right, upon looking at the report; it is my mistake.

Mr. RUCKER. I hope the gentleman's amendment will not be adopted. I think it is wrong.

Mr. TINKHAM. Mr. Chairman, as I understand the purpose of this bill, it is this: That no attempt shall be made in any part of the bill to limit any expenditure of money used in an effort to reach the electorate by appeals to the mind and judgment of men by political parties and candidates for political office which are commendable. Now, why is not an expenditure for the distribution of letters, of circulars, and of posters in conformity with the principle upon which this bill is founded? Should the right of the candidate be limited as to how his letters or communications should be sent?

Mr. RUCKER. Does the gentleman desire me to answer his question?

Mr. TINKHAM. I do.

Mr. RUCKER. The reason the committee struck out the language which the gentleman now seeks to reinsert in the bill was this: It is so apparent that the logical, usual, ordinary, almost invariable way of distributing or circulating letters is through the mails, that we thought a practice might grow up, which I hope never will grow up, by which candidates would hire a hundred or perhaps a thousand men to distribute letters which ought to go through the post office, with the ostensible purpose of distributing literature, but with the actual purpose of putting these men under some obligation by reason of a financial consideration.

Mr. TINKHAM. Mr. Chairman, on page 5 of this bill, as drawn and approved by the chairman of the committee, it says that the committee may expend money for headquarters and the expense of printing literature and distributing it through the mails. Now I want to know why there is any more liability of corruption in allowing for the expense of distributing literature by a candidate than there is by a committee? On page 5 you specifically allow the expense of printing literature and distributing it through the mail, and the cost of newspaper advertisements plainly marked as such, when ordered by such committee.

Mr. RUCKER. The gentleman will notice that we expressly state in the language just read by the gentleman, "through the mail," and that was done to preclude the idea that it was the intention of the committee to sanction the distribution by messenger or by hand, for the very reason that we thought it might lead to corruption.

Mr. MANN. Mr. Chairman, I should like to ask the gentleman from Missouri a question in this connection. This language in the bill does not include stationery and postage, or writing and printing other than in newspapers, in the amount that is to be accounted for.

Mr. RUCKER. What page is the gentleman reading from?

Mr. MANN. The gentleman certainly must be familiar with the language.

Mr. RUCKER. I am familiar with it.

Mr. MANN. I do not remember the page.

Mr. SANFORD. Page 14.

Mr. MANN. I have noticed recently in the CONGRESSIONAL RECORD quite a large bunch of speeches, not upon any public question, but stating how the Members of Congress who made these speeches got this legislation and got that, or have been in favor of this or in favor of that, speeches which are just as purely advertisements of Members for political purposes as though they were printed on a big poster. Can a Member conscientiously refuse to include in his statement the cost to which he goes in having those speeches addressed, the one thing that he has to expend money for in the whole connection, to put the names of his constituents on the envelopes?

The envelopes are furnished free by the Government. Is the cost of putting the name of the recipient on the envelope chargeable as a part of the campaign expenses? It does not seem to be eliminated in this provision. I want the gentleman's opinion as to whether the gentlemen who are doing this thing very extensively—a good many of them now having from 2 to 10 clerks each at work doing that sort of thing—should be exempted from including the cost in their statements of expenses? They want to restrict me, in a large city, to the expenditure of $2,500 for proper campaign expenses, but they want to sneak in under the tent and spend a good deal more than that and call it public business, when it has no more relation to public business than a cow has to heaven.

Mr. RUCKER. Do I understand that the gentleman wants me to answer his question?

Mr. MANN. Yes.

Mr. RUCKER. If I understand the gentleman's question, I shall answer it. The query, as I understood the gentleman, is, The expense of stationery and postage, writing, and printing being exempted, is the expense of addressing envelopes to the parties to whom the Member sends them also exempted? Is that the idea?

Mr. MANN. Yes.
Mr. RUCKER. I think it clearly does——
Mr. MANN. Include it?
Mr. RUCKER. I do not think we have to render an account, under Federal law, of the expenses we incur in addressing 20,000 envelopes, for instance.
Mr. MANN. Why not? It is not excluded here?
Mr. RUCKER. I think when we exclude stationery, postage, and writing we necessarily exclude in these words the things necessary to complete the writing of a letter and its mailing. We exclude stationery, stamps, and writing.
Mr. MANN. Then if I should employ every man who is purchasable in my district to write his name on election day and pay him $2 I would not have to account for it. If course that would be crooked under the law of my State, but it would not come under the terms of this bill.
Mr. RUCKER. I think that would be a subterfuge and the expense incurred would not be excluded under this bill, but would have to be accounted for.
Mr. MANN. I suppose some hypocritical Members of Congress would favor keeping out all campaign expenses, using the money themselves in sending out literature and keeping their opponents from doing the same thing.
The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM].
Mr. KING. Mr. Chairman, I move to strike out the last word. It would be unprofessional for me to state that I labored long with the committee to get it to retain the provision, and, of course, I will not make that statement to the House. Under the theory upon which the bill was drafted, which is that every avenue ought to be left open to appeal to the mentality and intelligence of the voter, how better can you appeal to them than through literature? I know it was suggested by some members of the committee and some Members of the House that this might be used for the purpose of covering up expenditures of a dollar or two by some candidate in employing men to go to the polls and labor on election day. I know that no Member of the House of Representatives ever resorted to a practice of that kind with a view of defeating the law. It has been pointed out by the distinguished gentleman from Illinois [Mr. MANN] that we who are already here are permitted to send out all kinds of literature, and why not then be fair and square with our opponents and give them the right to circulate literature in opposition. I trust that the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM] will be adopted and that the clause will be put back in the law.
Mr. TINKHAM. Mr. Chairman, I desire to ask the honorable Representative from Missouri [Mr. RUCKER] how he would interpret such an expenditure as we have to make in the East? We have large mailing concerns, and if we want a circular sent in our district we turn the circular over to them and they then mail it, making a charge for addressing, which clearly would be writing, also making a charge for folding, for inserting it in the envelope, and for sealing the envelope. It would seem that a strict construction of the word "writing" could not include all these expenditures which are necessarily incidental to the sending of a circular.
Mr. RUCKER. I think it would necessarily include all those things. We exempt the expense of writing, and undoubtedly it includes the cost of folding, stamping, and so forth.
Mr. TINKHAM. Why not use words in a criminal statute, which are plain and unmistakable?
Mr. RUCKER. I have no objection. I am desirous of making this so plain that no man can misconstrue it and so fair that every man will obey it.
Mr. TINKHAM. I think the chairman of the committee should accept the amendment.
The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.
The question was taken; and on a division (demanded by Mr. RUCKER) there were 36 ayes and 33 noes.
So the amendment was agreed to.
Mr. RUCKER. Mr. Chairman, I move that the committee do now rise.
The motion was agreed to.
Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15842) relating to campaign expenditures and had come to no resolution thereon.

HOUR OF MEETING TO-MORROW.

Mr. RUCKER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.
The SPEAKER. The gentleman from Missouri asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?
Mr. MANN. Reserving the right to object, which I shall not do, I take it that this is with the hope that we may get through with this bill and possibly another matter and adjourn early to-morrow.
Mr. RUCKER. Yes.
Mr. KITCHIN. We will try to do that.
The SPEAKER. Is there objection to the request of the gentleman from Missouri?
There was no objection.

ENROLLED BILLS SIGNED.

Mr. LAZARO from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:
H. R. 12193. An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.
The Speaker announced his signature to enrolled bill of the following title:
S. 2845. An act authorizing the sale of the marine hospital reservation in Cleveland, Ohio.

SPEECHES OF THE PRESIDENT OF THE UNITED STATES.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing two speeches made by the President on his trip to Detroit, Mich., recently.
Mr. MANN. Mr. Speaker, have not those already been printed?
Mr. FOSTER. Not these. One of them was made at a luncheon given by the salesman in the city of Detroit.
Mr. MANN. I shall not object, though it is a mystery to me how the President has force enough to write all of these speeches.
The SPEAKER. The gentleman from Illinois asks unanimous consent to print in the RECORD two speeches made by the President of the United States recently. Is there objection?
There was no objection.

CONSTRUCTION OF COLLIER "NO. 1."

Mr. GREENE of Massachusetts. Mr. Speaker, I present the following privileged resolution, which I send to the desk and ask to have read.
The Clerk read as follows:

House resolution 275.

Resolved, That the Secretary of War be, and he is hereby, directed to transmit to the House of Representatives detailed information in the War Department concerning the contract with the Shanghai Dock & Engineering Co. (Ltd.), of Shanghai, China, for the construction of the single-screw steel collier *No. 1*, for the use of the United States Army.

Mr. GREENE of Massachusetts. Mr. Speaker, I move that the committee be discharged from further consideration of the resolution, and that the resolution do pass.
Mr. MANN. Mr. Speaker, I desire to state that the gentleman from Virginia [Mr. HAY] saw me this afternoon and stated that he had no objection to the passage of this resolution, and that if his attention had been called to it he would have reported it.
The SPEAKER. The question is on agreeing to the resolution.
The resolution was agreed to.

CHANGE OF REFERENCE.

The SPEAKER. The Chair calls the attention of the House to the fact that House resolution 209, directing the Secretary of the Treasury to report to Congress the advisability of establishing free ports, and so forth, and the bill (H. R. 16873) to authorize the adoption of a national trade-mark for manufactures of the United States, particularly for export duties, and to authorize the Secretary of Commerce to license manufacturers to use the same, and for other purposes, were in some way referred to the Committee on Appropriations. They should, in the judgment of the Chair, be referred to the Committee on Ways and Means, and without objection the rereference will be made.
Mr. MANN. I am not so sure about the trade-mark bill, though I have no objection.
Mr. ALEXANDER. Ought it not to be referred to the Committee on Patents?
The SPEAKER. It is not an ordinary trade-mark.
Mr. MANN. I know what the bill is. I have read it. I have no objection to its being referred to the Committee on Ways and Means, and if the Committee on Patents desires it, they can get it from the Committee on Ways and Means.
The SPEAKER. Without objection, the rereference will be made.
There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 1 minute p. m.), in accordance with the order heretofore made, the House adjourned until to-morrow, Saturday, July 15, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting an estimate of appropriation required for the Internal-Revenue Service for fiscal year ending June 30, 1917 (H. Doc. No. 1287); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting additional estimates of appropriation required for the Internal-Revenue Service for fiscal year 1917 (H. Doc. No. 1288); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. BARKLEY, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 455) to define the rights and privileges of municipally owned interstate railways and construing the act to regulate commerce with reference thereto, reported the same with amendment, accompanied by a report (No. 973), which said bill and report were referred to the House Calendar.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 16396) to authorize the Secretary of the Interior to lease, for production of oil and gas, ceded lands of the Shoshone or Wind River Indian Reservation in the State of Wyoming, reported the same with amendment, accompanied by a report (No. 975), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the Committee on Irrigation of Arid Lands, to which was referred the bill (H. R. 14825) to provide for an auxiliary reclamation project in connection with the Yuma project, Arizona, reported the same with amendment, accompanied by a report (No. 976), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 13788) for the relief of Joseph A. Prat, reported the same without amendment, accompanied by a report (No. 974), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. OLNEY: A bill (H. R. 16989) authorizing the Secretary of War to issue certain magazine rifles; to the Committee on Military Affairs.

By Mr. WISE: A bill (H. R. 16990) to enlarge and make additions to and further improve the post-office building at Macon, Ga.; to the committee on Public Buildings and Grounds.

By Mr. CALDWELL: A bill (H. R. 16991) authorizing the Secretary of War to deliver to the Borough of Queens, city and State of New York, two condemned cannon, with carriages and balls; to the Committee on Military Affairs.

Also, a bill (H. R. 16992) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

By Mr. SEARS: A bill (H. R. 16993) to validate a patent to certain lands heretofore issued to the State of Florida, to allow said State to claim certain other lands, and for other purposes; to the Committee on the Public Lands.

By Mr. SLOAN: A bill (H. R. 16994) to enable volunteer soldiers during the military affair with Mexico to vote at presidential, senatorial, and congressional elections; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. TRIBBLE: A bill (H. R. 16995) granting the consent of Congress to A. N. Alford to construct a bridge across the Savannah River; to the Committee on Interstate and Foreign Commerce.

By Mr. FINLEY: A bill (H. R. 16996) authorizing the Secretary of War to issue certain magazine rifles; to the Committee on Military Affairs.

By Mr. SMITH of Idaho: A bill (H. R. 16997) to enable volunteer soldiers in the service of the United States in the field to vote at congressional elections; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. HAY: Joint resolution (H. J. Res. 265) authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point Mr. J. Ricardo de Borja, a citizen of Ecuador; to the Committee on Military Affairs.

By Mr. CARY: Joint resolution (H. J. Res. 266) directing the Secretary of the Navy to accept a certain proposal of Louis Gathmann; to the Committee on Naval Affairs.

By Mr. HOWARD: Joint resolution (H. J. Res. 267) authorizing the appointment of a special joint commission of the Senate and House of Representatives to investigate the employment of Federal prisoners in industrial occupations for the benefit of the Government of the United States; to the Committee on the Judiciary.

By Mr. BACHARACH: Joint resolution (H. J. Res. 268) authorizing the Department of Commerce to cooperate in the extermination of man-eating sharks along the New Jersey coast of the Atlantic Ocean; to the Committee on the Merchant Marine and Fisheries.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ALLEN: A bill (H. R. 16998) for the relief of The John Douglas Co.; to the Committee on Claims.

By Mr. ASHBROOK: A bill (H. R. 16999) granting a pension to Fletcher Duling; to the Committee on Pensions.

By Mr. BRITT: A bill (H. R. 17000) granting an increase of pension to Robert S. Robertson; to the Committee on Pensions.

Also, a bill (H. R. 17001) for the relief of F. E. A. Roberts, administratrix of G. M. Roberts, deceased; to the Committee on War Claims.

By Mr. DENISON: A bill (H. R. 17002) for the relief of C. D. Pautler; to the Committee on Claims.

By Mr. FORDNEY: A bill (H. R. 17003) granting an increase of pension to Capt. Henry Miller; to the Committee on Invalid Pensions.

By Mr. JACOWAY: A bill (H. R. 17004) for the relief of Stephen W. Bates; to the Committee on Military Affairs.

By Mr. MORGAN of Oklahoma: A bill (H. R. 17005) granting a pension to Ellen Payton; to the Committee on Invalid Pensions.

By Mr. OLNEY: A bill (H. R. 17006) granting an increase of pension to Ira McLaughlin; to the Committee on Invalid Pensions.

By Mr. POWERS: A bill (H. R. 17007) granting a pension to Eli Bowling; to the Committee on Pensions.

By Mr. PRICE: A bill (H. R. 17008) granting a pension to Martin Jackson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17009) granting a pension to Joseph R. Bamberger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17010) granting a pension to Isaac James Riggin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17011) granting an increase of pension to Mary A. Melvin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17012) for the relief of William H. P. Steward and Emma S. Wise, heirs of John T. Steward; to the Committee on War Claims.

By Mr. RUSSELL of Missouri: A bill (H. R. 17013) granting an increase of pension to Francis A. Ashby; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17014) granting an increase of pension to Lemuel C. Kittrell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17015) for the relief of Rufus J. Hoke; to the Committee on Military Affairs.

By Mr. SMITH of Idaho: A bill (H. R. 17016) granting an increase of pension to Henry Cummings; to the Committee on Invalid Pensions.

By Mr. STINESS: A bill (H. R. 17017) granting an increase of pension to Edward Tanner; to the Committee on Invalid Pensions.

By Mr. VAN DYKE: A bill (H. R. 17018) granting a pension to Mary V. Nafey; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of East Side Business Men's Club, of Portland, Oreg., in re Senator LEWIS's bill establishing a West Point of the West; to the Committee on Military Affairs.

Also (by request), memorial of East Side Business Men's Club, of Portland, Oreg., in re proposed Alaska-Portland municipal steamship line; to the Committee on the Merchant Marine and Fisheries.

Also (by request), memorial of Illinois Branch Congressional Union for Woman Suffrage, favoring the Susan B. Anthony amendment; to the Committee on the Judiciary.

By Mr. FULLER: Petition of Retail Merchants' Association of Illinois, favoring 1-cent letter postage; to the Committee on the Post Office and Post Roads.

By Mr. LONDON: Petition of Socialist Party convention of the first congressional district of Kentucky, demanding the withdrawal of United States troops from Mexico and declaring that the "preparedness" agitation is merely an attempt to thwart the struggle of the working class to secure a larger share of the wealth which they produce; to the Committee on Military Affairs.

Also, petition of R. H. Looney, Ennis, Tex., urging that change from horse to motor-vehicle conveyance of the mails on any rural route be made only upon petition of a majority of the patrons of such route; to the Committee on the Post Office and Post Roads.

Also, petition of Bakery and Confectionery Workers' Local Union, No. 78, Detroit, Mich., urging the adoption of the Crosser employers' liability bill applying to industrial workers in the District of Columbia; to the Committee on the District of Columbia.

SENATE.

SATURDAY, *July 15, 1916.*

(Legislative day of Friday, July 14, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

NAVAL APPROPRIATIONS.

The Senate, is in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	Gallinger	Norris	Sterling
Brady	Gronna	Overman	Swanson
Brandegee	Hollis	Penrose	Taggart
Bryan	Johnson, Me.	Pittman	Thomas
Chamberlain	Johnson, S. Dak.	Shafroth	Thompson
Chilton	Jones	Sheppard	Tillman
Clapp	Kenyon	Sherman	Vardaman
Culberson	La Follette	Simmons	Williams
Curtis	Lodge	Smith, Ga.	Works
Dillingham	Martin, Va.	Smith, S. C.	
Fletcher	Nelson	Smoot	

Mr. PITTMAN. I desire to announce the absence on account of illness of the Senator from Montana [Mr. MYERS] and the Senator from Oregon [Mr. LANE].

Mr. JOHNSON of South Dakota. I desire to announce that the Senator from Wisconsin [Mr. HUSTING] is detained on official business.

The VICE PRESIDENT. Forty-two Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. KERN answered to his name when called.

Mr. BORAH, Mr. CUMMINS, Mr. HARDING, Mr. WALSH, and Mr. HARDWICK entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-eight Senators have answered to the roll call. There is a quorum present.

Mr. SWANSON. I ask that the amendment of the committee inserting the matter on page 49, after line 22, under the heading "Naval Dental Corps," may now be laid before the Senate.

Mr. HARDWICK. Mr. President, on that provision I make a point of order that it is general legislation.

Mr. SWANSON. If the Chair has any doubt about it, I should like——

The VICE PRESIDENT. My understanding of this bill is that the House of Representatives started in to revise and alter and amend the laws which had to do with the Naval Establishment of the United States and the personnel of the Naval Establishment. The ruling of the Chair is therefore——

Mr. HARDWICK. Will the Chair hear me briefly on that point? I do not think that the principle which the Chair has in mind covers this question at all. Just because they make one amendment in the House about the personnel of the Navy, it does not throw the whole subject open.

The VICE PRESIDENT. Notwithstanding the rule of the Senate to the effect that general legislation may not be attached to an appropriation bill, still when the House of Representatives opens the door and proceeds to enter upon a field of general legislation which has to do with a subject of this character, the Chair is going to rule, but of course the Senate can reverse the ruling of the Chair, that the House having opened the door the Senate of the United States can walk in through the door and pursue the field.

Mr. HARDWICK. I understand, therefore, that the Vice President overrules the point of order.

The VICE PRESIDENT. The Chair overrules the point of order.

Mr. HARDWICK. From that ruling I respectfully appeal, and on that appeal I wish to be heard. I think I am entitled to be heard.

The VICE PRESIDENT. The question is, Shall the ruling of the Chair stand as the ruling of the Senate?

Mr. HARDWICK. Mr. President——

The VICE PRESIDENT. The point of order is not debatable.

Mr. HARDWICK. The appeal is not debatable?

The VICE PRESIDENT. The appeal is not debatable under the rule of the Senate, the Chair thinks.

Mr. HARDWICK. I think the appeal is debatable, Mr. President.

The VICE PRESIDENT. Let us see:

A question of order may be raised at any stage of the proceeding, except when the Senate is dividing, and, unless submitted to the Senate, shall be decided by the Presiding Officer without debate——

Mr. HARDWICK. But this is not decided by the Presiding Officer.

The VICE PRESIDENT (reading)—

subject to an appeal to the Senate.

Mr. HARDWICK. An appeal is debatable, all right, of course. The question is submitted to the Senate now, and under general parliamentary law and all practice it is debatable.

The VICE PRESIDENT. It is not submitted to the Senate. The Chair has ruled on the question.

Mr. HARDWICK. I understand, and I am appealing from the ruling of the Chair, and that is debatable.

The VICE PRESIDENT. Let us see if there are any precedents on the subject. [After a pause.] There is not any doubt about it. It is debatable.

Mr. HARDWICK. There is no doubt about it; it is debatable.

Mr. President and Senators, I quite agree with the general statement of the Chair that where the House of Representatives undertakes to legislate on a given matter, and I have urged that view on this floor myself very recently, the Senate has a full right of amendment in respect to that particular matter, but the limit ought to be very narrow about the extent to which the Senate can amend the legislative proposition of the House. But the ruling of the Vice President now is utterly abhorrent to every principle of reason, with all deference to the Vice President and all personal respect to him. Here is the proposition which the Chair lays down, that, because the House of Representatives undertakes to legislate at all in connection with the personnel of the Navy, therefore the Senate can legislate not only with respect to the matters on which the House legislated, but also with respect to every matter relating to the personnel of the Navy. Why, Senators, we had just as well not have any rule at all as to give it that construction. There is not a Senator, I think, on either side of the Chamber——

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Nebraska?

Mr. HARDWICK. I yield to the Senator.

Mr. NORRIS. I should like to state to the Senator from Georgia that there probably never was a bill that came over from the other House but had some word or clause of legislation in it.

Mr. HARDWICK. Exactly, and the Vice President's present construction——

Mr. NORRIS. And if the present ruling of the Vice President is right, there never would be a case——

Mr. HARDWICK. We should just wipe out Rule XVI forever, and there would be no need of having it on the books.

With all personal deference to the Vice President, a more extreme ruling I have never known or heard of.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from Georgia yield to the Senator from Idaho?

Mr. HARDWICK. I yield.

Mr. BORAH. Had we not just as well wipe out the rule at once and be done with it?

Mr. HARDWICK. I do not think so.

Mr. BORAH. We have practically abrogated and annulled the rule. I agree with the Senator from Georgia that the ruling does have that effect; but we have from time to time here, whenever we wanted to put a proposition on an appropriation bill, notwithstanding the fact that it was in violation of Rule XVI, put it on by vote of the Senate.

Mr. HARDWICK. Mr. President, I do not like to take issue with the Senator from Idaho on a statement of fact, but I do not think the Senate does that as a matter of habit and generally. As a usual thing we stand by our rules. We ought to do so always, and without exceptions.

Mr. LODGE. Mr. President, if the Senator from Georgia will allow me, I desire to say that I have been here a great many years, and I have seen the Senate put general legislation on appropriation bills time after time. When the Chair has submitted the question to the Senate, the Senate has voted on the merits of the proposition without the slightest regard to the rule.

Mr. HARDWICK. Undoubtedly.

Mr. LODGE. But this is not covered by that; this is a much stronger case.

Mr. HARDWICK. This is a much stronger case, but an entirely different case.

Mr. LODGE. And this is a sound ruling of the Chair; in my opinion it is entirely sound.

Mr. HARDWICK. Does the Senator from Massachusetts contend that the ruling of the Chair is sound in this case?

Mr. LODGE. It is absolutely so, and I shall try to show that it is in a moment.

Mr. HARDWICK. With all due respect to the distinguished Senator from Massachusetts, it is impossible for me to see how he arrives at any such conclusion as that.

Mr. LODGE. When the Senator from Georgia shall have concluded, I shall try to show him how I do so.

Mr. HARDWICK. I hope the Senator will.

Here is the proposition which I want to lay before the Senate, and then I want to challenge any Senator on either side to show any reason whatever for this ruling: The Chair says that because the House of Representatives has legislated in any respect about any portion of the personnel of the Navy, therefore the Senate can legislate not only with respect to that, not only as to the particular thing as to which the House has legislated, not only with respect to all the particular things which the legislation of the House has covered and touched, but with respect to everything connected with the personnel of the Navy. I say that, if that is sound, there is no reason whatever for clause 3 of Rule XVI; it has no sense, no meaning, and no place in this Book of Rules, if that ruling is sound, if it is common sense.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. HARDWICK. I yield; yes.

Mr. BRANDEGEE. Does it follow, in the opinion of the Senator from Georgia, from what the Chair said, that because the House of Representatives has submitted a certain piece of legislation the Senate, when it enters upon that subject, can put on general legislation of all kinds?

Mr. LODGE. Mr. President, if the Senator from Georgia will allow me, that is not the contention.

Mr. BRANDEGEE. I assumed it was not; and the reason I asked the question of the Senator from Georgia was to state that the Senator from Georgia was perhaps stretching the ruling of the Chair——

Mr. HARDWICK. I did not intend to do so.

Mr. BRANDEGEE. What the Chair said, as I understood the Chair, was that when the House of Representatives had opened the door on a particular subject, the Senate could enter that field.

Mr. HARDWICK. But the Chair said more than that, with deference to the Senator from Connecticut and also to the Senator from Massachusetts. The Chair said—and I hope the Chair will correct me if I am not right—that when the House of Representatives undertook to legislate on any subject connected with the personnel of the Navy that opened up the whole question about legislation on the Navy personnel. That is exactly what I understood the ruling of the Chair to be.

Mr. LODGE. If the Senator from Georgia will allow me at this point, it is just as well to state exactly what the Chair did say. The Chair said that he believed when the House entered into that field the Senate had a right to pursue that field; that in the particular line of general legislation the Senate had the right to pursue it. As I say, I think the ruling of the Chair is absolutely sound.

Mr. HARDWICK. That is not all the Chair said. The Chair said just what I stated before, and if the Senator were here at the time I think he would recall it.

The Chair did say—and I hope the Chair will correct me if I am wrong—that the House of Representatives having undertaken to legislate in connection with the personnel of the Navy that threw open that entire subject, to wit, the personnel of the Navy; and I utterly dispute that contention.

There has been no legislation by the House of Representatives with respect to the Dental Corps, a particular, definite, and separate part of the Naval Establishment.

Mr. LODGE. If the Senator will allow me, the House of Representatives sent over this bill loaded with personnel legislation.

Mr. HARDWICK. In connection with the Dental Corps?

Mr. LODGE. One moment. The House of Representatives entirely reorganized the Hospital Corps; they entirely reorganized the Marine Corps; they entirely reorganized the pharmacists. Now, if they can deal with a part of the personnel of the Navy, the Senate is permitted, within its right to deal with the personnel question generally.

Mr. HARDWICK. Of course, that is exactly the statement the Chair made, and is exactly the statement with which I take issue. I say that the Senate can deal as fully and completely as the House did with any branch and every division of the personnel on which the House legislated, and thus opened the door for the Senate to that extent, and no more. Why? Because, if that position is sound, if the position occupied by the Senator from Massachusetts is sound on this proposition, then if the House legislated with respect to enlisted men in the Navy, it would open up legislation as to all the rest of the personnel of the Navy. That is what it means; that if the House legislated with respect to only one branch of the service, it would open up all personnel legislation and would warrant legislation on every other branch of the service. I utterly dispute that contention. It does not seem to be sound to me, and I do not believe the Senate will take any such view as that.

The Senator stated just now that we could do what we pleased with regard to the merits, and we have done so sometimes, I reckon; but usually only by unanimous consent have such questions been submitted to the Senate. There has been in this case, however, no unanimous consent.

The merits behind this proposition appeal to me. The Dental Corps is an important part of the naval personnel. It has a status fixed by law that is fair and just, or moderately so, and it is completely changed, and changed to the injury of these dentists, by this legislation. I do not think the question ought to be disposed of in any such way as this. We ought to have an issue, and of course we shall get it, on this appeal, between the merits of the committee's proposition and the merits of the existing law.

Mr. President, I have said about all I care to say. If the contention advanced by the Senator from Massachusetts has one atom of soundness in it, there is no reason, there is no excuse, and there is no pretext for keeping clause 3 of Rule XVI in our Book of Rules at all. If the Senate is prepared to say that when the House of Representatives legislates upon any question about any branch of the personnel of the Navy, therefore the Senate is at liberty to put on any legislation that it pleases without regard to Rule XVI about every other branch and division of the personnel, then the ruling of the Chair is undoubtedly sound and my appeal ought to be lost; otherwise——

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. HARDWICK. I will yield to the Senator as soon as I finish this sentence. Otherwise my contention is absolutely sound and ought to be sustained by the Senate. Now, I yield to the Senator from Connecticut.

Mr. BRANDEGEE. In order to clarify my own mind about this matter, I wanted to ask the Senator from Georgia if the question does not depend upon the definition as to what the subject of legislation is with which the House attempted to treat. For instance, if the personnel—and "personnel" is a large word; it covers, I suppose, all the persons on a ship——

Mr. HARDWICK. Yes; and in any branch of the naval service.

Mr. BRANDEGEE. Yes. But suppose the House had attempted to deal with that portion of the personnel of a battleship which operated guns, to wit, gunners. Then the question would be, it seems to me, Would that open up the door for the Senate to deal with the question of how many lieutenants or captains or cooks would be necessary?

Mr. HARDWICK. Precisely; and that is exactly the idea I have tried to convey to the Senate; because the House of Representatives should undertake, for instance, to open up the question of personnel legislation as to the men who operate the guns would be no reason why the Senate would have a right to turn around and say "We will open up legislation as to all other branches of the service." If the House of Representatives had undertaken to deal at all in any legislative way with the Dental Corps, then the contention would be sound; but the House not having undertaken to deal in any way whatsoever with the Dental Corps, there is no excuse whatever for the Senate not living up to its own rule and enforcing it.

Mr. CLAPP. The Senator from Georgia says that the appeal will raise the question of the merits of the proposed amendment.

Mr. HARDWICK. Let me interject there that if the Senate follows the course that the Senator from Massachusetts suggests it often does, it will.

Mr. CLAPP. I do not think so at all. I am, I think, opposed to the amendment; but on the question of the Senate having a right to deal with a subject that the House has dealt with in an appropriation bill, I am quite in accord with the ruling of the Chair.

Mr. HARDWICK. Let me ask the Senator a question in my own time. I have the floor, and I want the Senator to answer it in my time. Has the House undertaken to deal in any way whatsoever with the Dental Corps of the Navy?

Mr. CLAPP. The Dental Corps is a mere incident.

Mr. HARDWICK. It is one branch of the personnel; it is a distinct, separate branch of the naval personnel. Now, has there been any legislative action of the House with respect to the Dental Corps?

Mr. CLAPP. Yes.

Mr. HARDWICK. In this bill?

Mr. CLAPP. Yes.

Mr. HARDWICK. I should like to have the Senator point it out.

Mr. CLAPP. The enlargement of the personnel of the Navy affects the necessity of a similar enlargement, perhaps, of the Dental Corps.

Mr. HARDWICK. But the Senator is wandering from the question. I asked him if the House had legislated in any way with respect to the Dental Corps—not merely as to making appropriations for the corps under existing law, but so as to change their status?

Mr. CLAPP. Yes.

Mr. HARDWICK. Well, where?

Mr. CLAPP. I say, if the House increases the personnel of the Navy, that necessarily involves an increase in the Dental Corps.

Mr. HARDWICK. This is an appropriation bill which contains items of appropriation, and it is utterly impossible for me to argue with a Senator who occupies that ground, because——

Mr. CLAPP. Well, that is the contention.

Mr. HARDWICK. I know it is the contention. It is courtesy to call it that, because every item of appropriation, then, that involves an increase in expenditure and provides more places would be legislation according to that view. General legislation is a very different proposition, according to my understanding of what general legislation in connection with an appropriation bill means, as it is used in the rule.

The House has not legislated in one single respect in connection with this particular branch of the service. Therefore the rule of the Senate against such legislation in connection with this appropriation bill applies in full force and vigor, and, without repeating—I do not care to do that—it looks to me like it is utterly unreasonable to say that because the House has perhaps legislated as to the personnel of gun crews, for example, therefore the Senate can legislate about everything connected with this bill, or at least everything connected with any branch or division of the personnel of the Navy.

Mr. CLAPP. Mr. President, I simply desire to say that when the House enters the door of legislation outside of mere appropriations in reference to the naval appropriation bill, that legislation, while it may not name a particular corps, may make it very necessary that there be legislation in regard to that corps, and, that being the case, it has entered the domain of legislation. It is true they have not mentioned the Dental Corps in their legislation, but they may have put in many provisions of additional and new legislation which render additional legislation as to the Dental Corps necessary. That is a question for the Senate to settle when the time comes to pass upon whether or not we will adopt the amendment, the only question now being whether, the House having entered upon general legislation which may involve additional general legislation, we are bound to keep out of that field simply because of the existence of our rules, when the other body may have made it absolutely necessary in the development of the Navy that that field be further occupied by legislation.

Mr. SWANSON. It seems to me that the ruling of the Chair is clearly right and, if not sustained, will embarrass greatly the legislative powers of this body. Now, let us see whether there is personnel legislation in this bill as it came from the House. On page 6 there is personnel legislation in connection with the Chief of Naval Operations. On page 47 the entire Hospital Corps of the Navy is reorganized. That is personnel legislation. As the Senator from Minnesota [Mr. CLAPP] has well said, if the House increases the number of enlisted men, that necessarily requires an increase in the Dental Corps. After the House has increased the personnel in other corps and branches of the Navy, does the Senator from Georgia contend that the Senate can not pass any legislation involving an increase in the number of the Dental Corps?

Mr. HARDWICK. Undoubtedly; the House did not change the law governing the corps.

Mr. SWANSON. They have not changed the specific law, perhaps, but they have increased the number of the personnel in other branches of the service, and have enacted legislation affecting the personnel of the Navy in that respect. Now, let us go through the bill and see. The House has enacted legislation affecting engineers in the Navy. That is personnel legislation, and will be found on page 63. The House bill contained legislation affecting the personnel in connection with the flying corps, making an entire change, as will be found by reading the provision at the bottom of page 75. On page 86 the House bill contains legislation affecting the personnel by completely changing the provisions in regard to the Naval Reserve.

Mr. JONES. Mr. President, will the Senator permit me to ask him a question?

Mr. SWANSON. I will when I get through.

Mr. JONES. The question I desire to ask is right in connection with that very matter. Suppose that the House had merely reorganized the Aviation Corps, does the Senator contend that the Senate could then have gone over every department of the personnel of the Navy?

Mr. SWANSON. So far as the aviation feature affected other branches of the personnel, the Senate could go into it.

Mr. JONES. It would affect, according to the contention of the Senator, all the other branches of the Navy?

Mr. SWANSON. I will say that the provisions of the House bill are general legislation and affect the entire organization of the Navy. Almost the entire personnel of the Navy is involved in the House legislation, and we would have an imperfect and absolutely disarranged system unless provision were made affecting the entire personnel. The House bill contains legislation, although it is an appropriation bill, in respect to the Marine Corps and affecting its personnel very materially.

Mr. HARDING. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Ohio?

Mr. SWANSON. In a moment. The Marine Corps personnel legislation fixes the status of various commissioned officers, prescribes how they shall be appointed, and so forth. The Dental Corps is a part of the Medical Corps, and consequently the Dental Corps is affected by an increase in the personnel of the Marine Corps under the legislation contained in the House bill.

Mr. HARDWICK. The Senator does not make that contention seriously, does he?

Mr. SWANSON. I do.

Mr. HARDWICK. I merely wanted to know that.

Mr. SWANSON. Has not the Senator judgment enough to see that? I hope he has.

Mr. HARDWICK. I certainly have not.

Mr. SWANSON. I regret it.

Mr. HARDWICK. I did not know that the Senator was really in earnest about that.

Mr. SWANSON. I did not think the Senator was in earnest about the proposition that the House can enact legislation as to the size of the Marine Corps, for instance, which is a part of the Navy, and the method of the appointment of officers, and so forth, and the Senate must either adopt or reject the method prescribed.

This bill has come here loaded with personnel legislation. Does the Senator from Georgia contend that the House can

select the subjects of personnel legislation which affect the entire Navy, and that the Senate can not enter that field?

Mr. HARDWICK. Will the Senator yield to me right there?

Mr. SWANSON. Does he contend that we must either reject the subject matter acted upon by the House or accept it, and can not enter the field of general legislation of that character?

Mr. HARDWICK. The Senator, of course, is wrong. If he will allow me, in the House of Representatives they have just the same kind of rules, but they have certain ways of getting around them.

Mr. SWANSON. Wait a moment; I am not talking about the rules.

Mr. HARDWICK. I am.

Mr. SWANSON. What I contend is, that when legislation comes here affecting a subject, the Senate has the right to perfect it, even if it be related to another subject.

Mr. HARDWICK. Undoubtedly.

Mr. SWANSON. We have a right to pursue, as the Vice President has well said, the field selected by the House of Representatives.

Mr. HARDWICK. But the trouble is, if the Senator will pardon me, you have taken an entirely different field.

Mr. SWANSON. No.

Mr. HARDWICK. Now, just a moment.

Mr. SWANSON. Our contention is that the personnel legislation is so interwoven with the Hospital Corps, so interwoven with the Marine Corps—they are appointed in the same way, the Dental Reserve being a part of the Medical Corps, which furnishes one corps both for the Navy and the Marine Corps—that consequently, having entered that field, having changed the law in connection with the Marine Corps, of which the dental surgeons are a part, the Senate is entitled to enter that field.

Mr. HARDWICK. Does the Senator yield? I should like to ask him a question.

Mr. SWANSON. I will yield later.

Mr. HARDWICK. If the Senator does not want to yield, I will not ask him the question. I will take the floor myself later.

Mr. SWANSON. My contention is that, having entered this field in a dozen or more cases, the Senate is entitled to enter the field into which the House invited it. If it does not do so, it means what? They might come here with personnel legislation in connection with the officers, and do you tell me that we can not affect the men in relation to the officers, when the two are closely connected?

Mr. HARDING. Mr. President——

Mr. SWANSON. I yield now to the Senator from Ohio.

Mr. HARDING. I want to ask the Senator from Virginia why the reorganization legislation is not taken up as a separate and distinct measure?

Mr. SWANSON. We have had the matter here, and it is utterly impossible to get consideration of it. It was put in this bill for the reason that it ought to go in with the personnel of the entire reorganization of the Navy and Marine Corps. That is the only way in which it can be done consistently. It is the only way in which it can be done scientifically. I should like to say in reference to this matter that, as I understand, the dentists of America favor this legislation and have so indorsed it. The Navy Department favors it and has so indorsed it.

Mr. HARDWICK. Mr. President, does the Senator want to yield now?

Mr. SWANSON. I shall be glad to yield.

Mr. HARDWICK. Does the Senator mean the legislation in this bill?

Mr. SWANSON. The legislation in this bill, as I understand.

Mr. HARDWICK. Oh, I have a telegram from the president of the national association now protesting against it.

Mr. SWANSON. I understood exactly the reverse.

Mr. HARDWICK. The Senator is wrong, dead wrong.

Mr. SWANSON. I understood from the Senator from Massachusetts——

Mr. HARDWICK. I am making this point of order at his request and because I agree with him.

Mr. SWANSON. I understood from the Senator from Massachusetts that the information had come to him that the bill was satisfactory to the dentists of America.

Mr. LODGE. I ask to have read the telegram which I send to the desk.

Mr. SWANSON. That is my source of information; and it is utterly impossible to organize this Dental Corps except with the other legislation that we have here.

Mr. BORAH. We are getting at the merits of the case, anyway.

Mr. LODGE. No; this has nothing to do with the merits of the case.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

ATLANTA, GA., *July 13, 1916.*

Senator LODGE, *Washington, D. C.:*

As president of the National Dental Association, I wish to urge that you give your support to the Navy Dental Corps amendment as reported to the Senate. I believe if this amendment is passed it will be the most satisfactory solution of the Army and Navy dental problems.

THOMAS P. HINMAN, *President.*

Mr. HARDING. Mr. President, perhaps I shall not be able to speak directly to the merits of the ruling of the Chair, but while I am on my feet I want to say that, as a relatively new Member of this body, I am going to begin now to do the utmost in my power to stop this system of legislation in appropriation bills, and with that thought in mind I am going to vote on this occasion to reverse the ruling of the Chair.

I think I have discovered no greater menace in handling the affairs of the Republic than this persistent legislation in appropriation bills and the passing upon matters that will not stand before this body on their own merits.

It occurs to me that the reorganization legislation relating to the Navy ought to be here as a separate measure and ought to be considered on the distinct merits of the case.

Mr. LODGE. Mr. President, what the Senator from Ohio [Mr. HARDING] has said leads me to make, at the outset, a few observations on general legislation on appropriation bills.

I am as much opposed to general legislation on appropriation bills as he is. I do not think it is a wise way to legislate; but Congress has been driven to it by the difficulty of getting through these bills as separate measures.

Both Houses have taken the utmost care to shut out general legislation on appropriation bills. Our rule says that no general legislation shall be in order on an appropriation bill, and a point of order, if sustained, carries it out. The House rule is even more drastic. The House rule provides that there shall be no legislation upon an appropriation bill which changes existing law. That is even more drastic.

Now, this is the situation that is created: The House has a system of special rules, which are unknown to the Senate. Under a special rule, which is prepared and brought in by the Committee on Rules in this and in other bills, the House allowed the Committee on Naval Affairs to put a mass of general legislation on this bill. They put it on the Post Office bill, too. It comes over to the Senate a mass of general legislation affecting many subjects, and are we to be told that we are to be deprived of our power of general legislation when the House can engage in it to any extent they please—that our rule is to hold in the minutest way——

Mr. CURTIS and Mr. HARDWICK addressed the Chair.

Mr. LODGE. One moment. Mr. President, I should like to finish this point—that our rule is to hold and that we are to be cut off from general legislation by action taken in the House, which we can not imitate because we do not have the system of special rules?

Mr. HARDWICK. Mr. President, will the Senator now yield?

Mr. LODGE. I yield.

Mr. HARDWICK. That is not the situation, is it? Is it not true that the Senate itself——

Mr. LODGE. I think it is the situation, or I should not have stated it so.

Mr. HARDWICK. I am going to try to show the Senator why it is not the situation. There is a provision in our rules, in Rule XL, that the Senate can suspend the rules just like the House of Representatives does. The Senate is not helpless. The rules can be suspended.

Mr. LODGE. It is not done in the House under suspension of the rules.

Mr. HARDWICK. I understand; it is done in another way, but it can be done here and it is done there, too, under the rules.

Mr. LODGE. It is done in the House by a majority vote, adopting a rule reported from the Committee on Rules.

Mr. HARDWICK. That is the only difference, of course.

Mr. LODGE. And we have to have, rightly, two-thirds to suspend the rules.

Mr. HARDWICK. That is right.

Mr. LODGE. The House has a power that we have not.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. LODGE. I do.

Mr. CURTIS. I should like to ask the Senator from Massachusetts if this abuse could not be corrected if the Senate committees would strike out all legislation in appropriation bills and instruct their conferees to insist that nothing but

appropriations should be contained in the bills, and that no legislation should be consented to?

Mr. LODGE. The powers of conferees are considerable, but they do not go to the extent of making the House abandon legislation it has put on. Now, the House general legislation comes over here, and is not subject to a point of order.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. LODGE. I do.

Mr. THOMAS. I want to ask the Senator, before he takes his seat——

Mr. LODGE. I am not going to take my seat just yet, but I shall be glad to have the Senator put the question.

Mr. THOMAS. I just want to ask him to explain to the Senate what the position of this corps will be in the event that some legislation is not enacted concerning it?

Mr. LODGE. I will touch on that in a moment.

In this bill, Mr. President, the House began by increasing the number of enlisted men. That they have a prescriptive right to do without regard to a special rule, as we have. But by increasing the number of enlisted men they necessitated changes affecting the entire personnel of the Navy. If you increase the number of enlisted men you are obliged to have more flag officers and more captains and more of the different grades. You have got to keep your officers in proportion to the enlisted men. The House did nothing on that point. It is absolutely essential that it should be done—absolutely essential in order to have the Navy in a workable condition. The Senate thereupon has put in the legislation increasing the grades, increasing the number of officers in each grade. That is made absolutely necessary by the legislation of the House. The House went much further than that. They entered into the whole field of personnel. They added to the personnel. They permitted men to be appointed from civil life to the engineers only, and those men were to come into the line, and, by so doing, change the whole arrangement of the line. They brought in the Naval Reserve; they brought in the Aviation Corps—all new legislation of the most extensive kind, all affecting the personnel of the Navy, because they introduced in the Aviation Corps, as among the engineers, officers from civil life who can be subsequently placed in the line, affecting the whole ranking of the line.

The Senator from Georgia has attempted to narrow it down to the proposition that this is a separate corps, and that therefore, unless the House has legislated specifically on the Dental Corps, the Senate has no right to touch it. The Dental Corps is not a separate and independent corps. It is under the Surgeon General. It is part of the Medical Corps of the Navy, and under the command of the Surgeon General. The House, in dealing with the Medical Corps, reorganized the pharmacist service. They reorganized the Hospital Corps throughout, the Hospital Corps being part of the Medical Corps, exactly like the Dental Corps. They put in, on page 49, a hospital and ambulance service provision, and they provided that officers and enlisted men of the Medical Department of the Navy serving with a body of marines detached for service with the Army shall be subject to the Rules and Articles of War, and that includes the Dental Corps; and they put in new legislation, in that clause, covering the Dental Corps.

Mr. HARDWICK. Mr. President, if the Senator will pardon me, if it does not bother him, does not his own bill call this the Dental Reserve Corps, and make it a separate corps?

Mr. LODGE. Why, they called it the Hospital Corps——

Mr. HARDWICK. I know; but does not your bill, the one that we have under consideration, call this the Dental Reserve Corps?

Mr. LODGE. Certainly. That is a mere subheading. I am speaking of the law.

Mr. HARDWICK. I am speaking of the law, too.

Mr. LODGE. Those heads are not law.

Mr. HARDWICK. I know, but the bill says "a Navy Dental Reserve Corps is hereby authorized."

Mr. LODGE. Yes.

Mr. HARDWICK. That is part of the language of the bill—not a subhead.

Mr. LODGE. It does not make any difference. The Hospital Corps is under it. You can not detach the Hospital Corps. You can not detach the pharmacists. They all come under the Medical Corps, under the Surgeon General, under one command.

Mr. HARDWICK. They all come under the Secretary of the Navy, too. The whole business does.

Mr. LODGE. Now, Mr. President, if we are going to be technical, on page 49, in the provision about officers and enlisted men of the Medical Department, the House has covered the Dental Corps, and it is open to us to amend and extend. I put it, however, on the broad ground on which the Chair put it. The House entered into the great field of naval personnel, which covers every corps in the Navy and every officer in the line. They entered into it largely. They entirely reorganized the Marine Corps. I need not rehearse them. They filled the bill with personnel legislation. Now, the Dental Corps at this moment rests on two provisions, both in appropriation bills, both put in in the Senate, both general legislation; and those two provisions of 1912 and 1913 conflict. The result of the conflict, and of the points raised against the rulings of the department, is that the assistant dental surgeons who come into the corps, who pass examinations and serve their probationary period, have been hung up here all winter on the Executive Calendar. It needs legislation.

This legislation was prepared in the department. Not a line was written by any member of the committee. The amendment about the Dental Reserve Corps was brought to me by Dr. Brown, of Columbus, who is chairman of the legislative committee of the National Dental Association. The department made no objection to it, and it was put in exactly as it was handed to me by Dr. Brown, who told me it was satisfactory to all the members of the Dental Reserve Corps.

That is the origin of the legislation. The object is to put the Dental Corps of the Navy on a working basis. It is treated exactly as the Army is. The legislation is based on the Army legislation, and it is put in as a necessary addition to the wide-sweeping personnel legislation of the House.

Mr. President, I think it is properly there. I am in full accord with the ruling. I was in full accord with the ruling when the Chair made it on June 20, in which he said, as I have already cited it—

> The Chair has no doubt that Rule XVI, with reference to general legislation upon an appropriation bill, does not apply where the House puts general legislation in the bill. The Chair believes that when the House enters into that field the Senate has a right to pursue the field.

Now, the House has entered into this field in every direction.

Mr. BORAH. Mr. President, as a future guide, does the Senator go any further than to say that when the general legislation of the House relates to a particular field we may enter that particular field, and no more? Or may we enter into the entire field of general legislation?

Mr. LODGE. Oh, I do not say for a moment, because the House has put in general legislation, that we can enter on any other general legislation.

Mr. BORAH. Then it all revolves around the proposition of what is the particular subject upon which the House has entered?

Mr. LODGE. Certainly.

Mr. BORAH. And we must confine ourselves to that particular subject.

Mr. LODGE. I think so. Now, the House has entered very largely into the field of personnel legislation, affecting the personnel of the Navy throughout. It has even put in general legislation affecting this precise Dental Corps.

Mr. HARDWICK. Mr. President, will the Senator yield for a question?

Mr. LODGE. Yes.

Mr. HARDWICK. If the House entered at all into the field of personnel legislation, according to the theory of the Senator, could the Senate pursue it as far as it pleased?

Mr. LODGE. Personnel legislation?

Mr. HARDWICK. Yes.

Mr. LODGE. Absolutely.

Mr. HARDWICK. In other words—I am just trying to get the Senator's view—if the House enacted legislation relating to gunners in the Navy, then the Senate could take the whole field, from admirals down to gunners, everything, according to the Senator's view?

Mr. LODGE. I do not think that the organization of a gun crew would ever be classified by anybody as personnel legislation.

Mr. HARDWICK. I say, if we did have it presented.

Mr. LODGE. It is not a matter of law, to begin with; it is not a matter of regulation here. The Senate never regulated a gun crew, and never will.

Mr. HARDWICK. I do not want the Senator to get away from the question.

Mr. LODGE. I do not get away from the question at all. I am talking about personnel legislation—not about something that is not personnel legislation.

Mr. HARDWICK. Suppose the House of Representatives enacted legislation affecting the personnel of enlisted men in the Navy, would that authorize the Senate to start out with admirals and go clear through and cover the whole field?

Mr. LODGE. That is precisely what has been done. It has been rendered necessary by the increase of enlisted men.

Mr. BRANDEGEE. I wish to ask the Senator in relation to the statement he has just made, as I understood him, that the House had entered into some legislation in this bill in relation to the naval Dental Corps.

Mr. LODGE. On page 49, "officers and enlisted men of the Medical Department of the Navy," of which the Dental Corps is a part, "serving with a body of marines if detached for service with the Army"—Hospital Corps, doctors, everybody—it puts them all while serving with the marines detached for service with the Army under the Rules and Articles of War. It affects them directly.

Mr. BRANDEGEE. Does the Senator claim that, under the language on page 49, line 15, where the House treats the Medical Department of the Navy, that that is the same sort of legislation as the amendment on page 52, which creates a Dental Reserve Corps?

Mr. LODGE. There is a Dental Reserve Corps now. It does not create it.

Mr. BRANDEGEE. Well, it says it is authorized to be organized and operated.

Mr. LODGE. No; it exists. It is simply to put it on a proper footing.

Mr. BRANDEGEE. It revises the present legislation in relation to that subject.

Mr. LODGE. That is all. Now, the Senate committee is endeavoring to make the personnel legislation coherent, standing on the broad ground that, as the House under its special rule has entered widely into the field of personnel, it seemed to the Senate committee not only to be the duty but the absolute right to go on and perfect that personnel legislation.

It was on that basis that the committee acted, and the decision of the Chair, that the House having largely entered in the field of personnel—that is, affecting the rank of officers and the organization of the staff—the Senate has a right to pursue it, I fully believe is right, because if we submit to this thing we remain bound by our rules while the House can enter the whole field of general legislation and the Senate is cut off from its constitutional rights in that respect.

Mr. WORKS. Mr. President, I have come to have very little confidence in any decision of the Senate upon a point of order. We are so prone to be influenced by our views of the merits of the question before the Senate that I think decisions of the Senate are very rarely based upon the pure and simple question as to whether the ruling of the Chair is right or wrong.

I suppose that nobody is more strongly opposed to the pending bill than I am. I may be too strongly opposed to it. It rather horrifies me to think of the extent to which we are going in the enlargement of the Navy by this proposed legislation. I am opposed to this particular provision, but not more so than I am to other provisions of the bill and to the bill as a whole. But notwithstanding my conviction as to the merits of the bill I am perfectly satisfied that the ruling of the Chair on the point of order is correct and should be sustained, and for this reason: The House has made the subject matter of this legislation the complete reorganization and enlargement of the Navy. That is the form in which it is presented to the Senate. If the Senate shall conclude that in order to make that reorganization and enlargement perfect something else should be added, it seems to me that it is perfectly legitimate and not in any sense in violation of the rules of the Senate for it to make this addition.

So, Mr. President, notwithstanding my views upon the merits of this legislation I shall vote to sustain the ruling of the Chair. I agree with other Senators that we have gone to great lengths in violation of the rules of the Senate by including general legislation in appropriation bills. I think the Senator from Ohio feels just as every other new Senator does, that this is a great evil and should be prevented. I know how strongly I felt that way myself when I came into the Senate. I have in the nearly six years I have been here become accustomed to the continuous violation of the rules by the insertion in appropriation bills of new or general legislation.

The insertion in appropriation bills of general legislation is generally attempted to be justified on the ground, just as has been done here, that legislation of that kind can not be enacted in any other way; but that is the very reason why it should be excluded from appropriation bills. If they can not be passed upon their merits, then they ought not to be passed at all. But in this instance I do not believe that we are violating the rules of the Senate, and for that reason I agree with the Chair.

The Chair is not a part of the legislative body. The Chair is not supposed to have any views upon the merits of this proposed legislation. We may expect from the Chair a perfectly fair and unbiased ruling upon any question that comes before the Senate, and we do expect it and are not disappointed. The Chair, like all the balance of us, may be mistaken, but I think the Senate accepts the ruling of the Chair as being perfectly fair and just to all parties concerned, and in this instance I am perfectly satisfied that the Chair is right in the ruling which has been made.

Mr. CUMMINS. Mr. President, fortunately I am in a position to reach a conclusion upon the question before the Senate without any prejudice growing out of a positive conviction with respect to the merit of the proposed amendment. I do not know at this moment how I will vote upon the amendment if it is finally submitted to the Senate.

We are constantly between two conflicting rules. The Senate has a constitutional right to amend bills that are sent from the House to the Senate. Under parliamentary law the right of amendment has no limitations with which I am familiar. We have attempted to limit by rule our right of amendment in certain instances. We have provided that upon a general appropriation bill an amendment proposing general legislation shall not be in order.

I should like to ask the Senator from Georgia, however, this question: Suppose the House had legislated upon the Dental Corps, and an amendment to the House bill in that particular were proposed, the amendment offered by the Senator in the Senate would be general legislation. The fact that the House had legislated upon the subject would not change the character of the amendment proposed in the Senate, and it would be prohibited by the strict letter of our rule, no matter if it were the simplest amendment to a House bill which in itself proposed general legislation.

Mr. HARDWICK. If the Senator will pardon me, in connection with the Post Office appropriation bill I had occasion to look into that question very closely, and I think not, because the text of the bill that comes from the House can not be subject to the Senate rule. Any amendment to the House text is therefore in order and germane.

Mr. CUMMINS. The Senate rules make no exception of that kind. I am not suggesting, as you will presently see, that there is not an exception, but I simply say that the rules make no such exception, and if they are literally applied we could not add to a House bill an amendment proposing general legislation, no matter how intimately connected it might be with the House proposal. Therefore we have introduced the exception. We have substantially said that we can propose general legislation upon a House bill if it is germane to the House provision.

So far as I am concerned, I intend to vote upon the question now before the Senate with no reference whatever to the merits of the amendment, but strictly guided by what I believe to be a fair construction of our rules. I believe that inasmuch as the Dental Corps is an integral part of the naval service in a bill which proposes a reorganization of the naval service which radically changes the scope of the duties which are to be performed by the dental surgeons, an amendment respecting the Dental Corps is germane to the House proposal, and if it is germane to the House proposal then we can, without violation of our rules, consider an amendment to it.

I can not see how any other conclusion can be reached and preserve our right of amendment. Any other rule, as it seems to me, must put into operation the second or third section of Rule XVI and excludes all amendments proposed in the Senate which are of a general legislative character.

If the point of order were, Is this amendment germane to the House bill? I would be compelled to vote that the point of order was not well taken, for I think it is germane to the legislation proposed by the House, and therefore is not prohibited by our rules; and my vote will be in support of the ruling of the Chair.

Mr. OVERMAN. Mr. President, the question before the Senate is not the question of germaneness, but we have a rule affecting that question, and that question is submitted to the Senate.

The first question we ought to consider is whether this is new legislation. I was very much impressed by what the Senator from Ohio [Mr. HARDING] said. Though a new Member, he has seen where this thing is leading. I would commend to the Naval Committee what the Military Committee have done. They brought in a separate bill for the reorganization of the personnel of the Army, and it was heard here in the Senate, discussed at length, and passed in the regular way and under the rules as provided.

Mr. LODGE. If the Senator will allow me, the whole dental legislation of the Army is in the Army bill. It is not a separate bill.

Mr. OVERMAN. I understand that we can do anything by unanimous consent.

Mr. LODGE. It was not in the Army appropriation bill; it was in the Army bill.

Mr. OVERMAN. We had an Army personnel bill here and discussed it for weeks and enacted it into law, and that ought to have been done in regard to the Navy. But the House, instead of doing that, has loaded up this bill with new legislation in regard to the personnel of the Navy and has touched upon every point except one, and what is that? That is the Dental Corps.

The Senator says they have legislated in regard to the personnel of the Dental Corps. I deny it. He said that is the case because the Medical Corps is legislated upon, not the personnel of the Medical Corps, but simply because there is some legislation here in regard to the Medical Corps that will make it in order.

Mr. WORKS. I want to say that in what I said about the ruling of the Chair I was not intending in any way to justify the course taken by the House. That is not the question that is presented here, it seems to me.

Mr. OVERMAN. No; I only mentioned that incidentally, because I was impressed with what the Senator from Ohio said as to the danger of this legislation and the reason of the rule.

Mr. WORKS. I agree with the Senator from North Carolina entirely upon that subject.

Mr. OVERMAN. Mr. President, what is the question? What does the rule say? Are we to be bound by the rules?

No amendment which proposes general legislation shall be received to any general appropriation bill.

Is this a general appropriation bill? The title of it shows that it is a general appropriation bill, making appropriations for the Navy. Now, what is the ruling of the Chair? That because the House has violated the rule the Senate can violate the rule.

Mr. President, certainly that position can not be maintained. Then, is this a violation of the rule? The Senator argues that because there is a reorganization of the personnel of the Navy we can legislate with a part of the Navy that is not mentioned in the bill; that has not been legislated on in any respect whatever.

Now, is this in order? The rule says it is not in order. Is it general legislation? That is admitted. If that is admitted, it is out of order, because the rule says it is out of order. Then all this argument is leading us to do it because the House has legislated upon some department and that therefore we can legislate. The House has legislated as to the Hospital Corps. Yes; we can amend that. The House did wrong, but it is here. It legislated about one department and another. We can amend that. Have you amended it? Have you reorganized in any way the Dental Corps? There is not one line of it. Because the House has legislated in regard to the Hospital Corps you claim that you can legislate on the Dental Corps. There are two laws on the subject, I admit.

There is a contention that the law of 1912 is in existence, and there is a contention on the other side that the law of 1913 repealed or modified that. These are the two laws that are attempted to be dealt with here.

So, Mr. President, this is new legislation and against the rules.

Mr. SWANSON. Mr. President——

Mr. OVERMAN. I wish to have read a telegram from Dr. Crenshaw. I send it to the desk.

The VICE PRESIDENT. It will be read.

The Secretary read as follows:

ATLANTA, GA., *July 14, 1916.*

Senator THOMAS W. HARDWICK,
Washington, D. C.:

Let me urge you to make point of order against the dental matter carried in naval appropriation, it destroys the 1913 law.

W. M. CRENSHAW.

Mr. LODGE. Since two telegrams have been read I think it is just as well to have it known just who the signers of the telegrams are.

The Secretary read as follows:

Dr. Crenshaw is president of the Faculty Association, composed of deans of some 35 or 40 dental colleges.

Hinman is president of the National Dental Association, composed of about 20,000 members.

Mr. SWANSON. I move to lay the appeal on the table.

Mr. HARDWICK. On that I demand the yeas and nays.

The yeas and nays were ordered.

The VICE PRESIDENT. On the motion of the Senator from Virginia to lay the appeal from the decision of the Chair upon the table the yeas and nays have been ordered, and the Secretary will call the roll.

Mr. LODGE. A vote to lay on the table sustains the Chair?

The VICE PRESIDENT. A vote to lay on the table sustains the Chair.

The Secretary proceeded to call the roll.

Mr. BECKHAM (when his name was called). I am paired with the Senator from Delaware [Mr. DU PONT] and withhold my vote for the present.

Mr. CATRON (when his name was called). I have a pair with the Senator from Oklahoma [Mr. OWEN]. He does not seem to be present, and I therefore withhold my vote.

Mr. CLAPP (when his name was called). Owing to the absence of my general pair, the senior Senator from North Carolina [Mr. SIMMONS], I am constrained to withhold my vote.

Mr. CLARKE of Arkansas (when his name was called). I observe that the junior Senator from Utah [Mr. SUTHERLAND] is not present. I have a pair with that Senator, and I therefore withhold my vote for the present.

Mr. HARDING (when his name was called). In the absence of my general pair, the junior Senator from Alabama [Mr. UNDERWOOD], I withhold my vote. If I were permitted to vote, I should vote "nay."

Mr. SHERMAN (when his name was called). I have a pair with the senior Senator from New Jersey [Mr. MARTINE] and therefore withhold my vote.

Mr. VARDAMAN (when the name of Mr. SHIELDS was called). I am requested to announce the absence of the junior Senator from Tennessee [Mr. SHIELDS] on important business. I wish this announcement to stand for the day.

Mr. SIMMONS (when his name was called). I wish to inquire whether the Senator from Minnesota [Mr. CLAPP] has voted?

The VICE PRESIDENT. He has not.

Mr. SIMMONS. I have a pair with that Senator, and I therefore withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. VARDAMAN (when his name was called). I have a pair with the junior Senator from New York [Mr. WADSWORTH]. In his absence I withhold my vote. If permitted to vote, I should vote "nay."

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. LIPPITT], but I transfer it to the Senator from New Jersey [Mr. HUGHES] and vote "yea."

The roll call was concluded.

Mr. BECKHAM. I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN]. He is not in the Chamber, and for that reason I withhold my vote.

Mr. DILLINGHAM. I have a general pair with the senior Senator from Maryland [Mr. SMITH]. In his absence I withhold my vote.

Mr. WEEKS (after having voted in the affirmative). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. He is not present, and therefore I wish to withdraw my vote.

Mr. HOLLIS. I announce my pair with the junior Senator from New York [Mr. WADSWORTH]. In his absence I withhold my vote.

Mr. WALSH. I desire to announce that my colleague [Mr. MYERS] is absent on account of illness.

Mr. CATRON. I have previously stated that I am paired with the Senator from Oklahoma [Mr. OWEN], who is not present. I wish further to state that if at liberty to vote I should vote "yea."

Mr. VARDAMAN. There is evidently a misunderstanding somewhere. I notice the Senator from New Hampshire [Mr. HOLLIS] has announced a pair with the junior Senator from New York [Mr. WADSWORTH]. Since that has taken place, I desire to be recorded as voting "nay."

Mr. SMITH of Georgia (after having voted in the affirmative). Mr. President, I was out of the Chamber when the question on which the Senate is now voting was stated. When I voted I did not understand it, and I do not really understand it now. I therefore ask the privilege of withdrawing my vote.

The VICE PRESIDENT. In the absence of objection, permission to do so will be granted.

Mr. CHAMBERLAIN. Though I believe it has been heretofore stated that my colleague [Mr. LANE] is detained from the Senate by illness, I desire to make that announcement for the day, and shall not again make it.

Mr. CHILTON. I desire to announce my pair with the Senator from New Mexico [Mr. FALL], to transfer it to the Senator from California [Mr. PHELAN], and to vote "nay."

Mr. CURTIS. Mr. President, I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. PAGE] with the Senator from Oklahoma [Mr. GORE];

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED]; and

The Senator from Wyoming [Mr. CLARK] with the Senator from Missouri [Mr. STONE].

The result was announced—yeas 37, nays 15, as follows:

YEAS—37.

Ashurst	Johnson, Me.	Penrose	Taggart
Bankhead	Johnson, S. Dak.	Pittman	Thomas
Beckham	Kenyon	Poindexter	Thompson
Brady	Kern	Pomerene	Tillman
Broussard	Lee, Md.	Ransdell	Walsh
Chamberlain	Lodge	Shafroth	Williams
Culberson	McCumber	Sheppard	Works
Cummins	Martin, Va.	Smith, Ariz.	
Fletcher	Nelson	Smith, S. C.	
Husting	Oliver	Swanson	

NAYS—15.

Borah	Curtis	Jones	Smoot
Brandegee	Gronna	La Follette	Sterling
Bryan	Hardwick	Norris	Vardaman
Chilton	Hitchcock	Overman	

NOT VOTING—43.

Catron	Harding	Newlands	Smith, Ga.
Clapp	Hollis	O'Gorman	Smith, Md.
Clark, Wyo.	Hughes	Owen	Smith, Mich.
Clarke, Ark.	James	Page	Stone
Colt	Lane	Phelan	Sutherland
Dillingham	Lea, Tenn.	Reed	Townsend
du Pont	Lewis	Robinson	Underwood
Fall	Lippitt	Saulsbury	Wadsworth
Gallinger	McLean	Sherman	Warren
Goff	Martine, N. J.	Shields	Weeks
Gore	Myers	Simmons	

So the motion to lay on the table the appeal from the decision of the Chair was agreed to.

Mr. SWANSON. I desire to offer an amendment to the pending amendment of the committee. I send the amendment to the desk and ask the Secretary to read it.

The VICE PRESIDENT. Does the Senator desire action upon the amendment beginning on page 49?

Mr. SWANSON. I desire to amend it before it is acted upon.

The VICE PRESIDENT. The Secretary will state the amendment to the committee amendment.

The SECRETARY. On page 51, line 20, after the word "service," it is proposed to insert "and all officers in active service appointed under the provisions of the act of March 4, 1913."

The VICE PRESIDENT. Without objection, the amendment to the amendment is agreed to.

The amendment as amended was agreed to.

Mr. FLETCHER. Mr. President, I ask the indulgence of the chairman of the committee for a moment.

Mr. SWANSON. I yield to the Senator from Florida.

Mr. FLETCHER. A few days ago I presented an amendment intended to take care of the repairs and construction made necessary by reason of the storm which damaged very considerably the aeronautic station at Pensacola, Fla. At that time estimates had not been received as to the extent of the damage. Since then the estimates have come in, and I desire to withdraw the proposed amendment of which I gave notice several days ago, and in lieu of it to offer the amendment which I send to the Secretary's desk. I understand that the Senator in charge of the bill will not object to the amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 34, after line 20, it is proposed to insert:

Navy aeronautic station, Pensacola, Fla.: To repair and reconstruct, where necessary, public works damaged by storm of July, 1916, $420,000.

Mr. SWANSON. Mr. President, it is evident that the amendment ought to be adopted. It provides an appropriation to repair the damage to the aviation station at Pensacola occasioned by the recent hurricane. The station can not be made effective unless the repairs are made, and I accept the amendment on behalf of the committee.

Mr. WEEKS. Mr. President, I will ask the Senator if the amount stated in the amendment is estimated by the department? Do they state that it will require that amount of money?

Mr. SWANSON. I have a letter from the Secretary of the Navy, stating what the amount is to be used for, and saying that it is absolutely necessary.

Mr. FLETCHER. I will say to the Senator from Massachusetts that that is the estimate based on the report made to the department.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FLETCHER. In connection with the amendment, I have the permission of my colleague to insert in the RECORD a letter which he received after taking up the same matter with the department. The letter explains the necessity for the appropriation, and I ask unanimous consent that it may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter referred to is as follows:

NAVY DEPARTMENT,
Washington, July 13, 1916.

Hon. NATHAN P. BRYAN,
United States Senate, Washington, D. C.

MY DEAR SENATOR: With reference to your letter of July 8, 1916, I have just received a detail estimate of the damage incurred at the Navy aeronautic station, Pensacola, Fla., by the very severe storm of July 5, 1916. All of the wharves and piers at the station were practically wrecked and will require almost entire reconstruction. Overhead wiring, sea walls, and roads also suffered severely, and buildings were damaged to a less extent. The station estimates that it will require an expenditure of $133,000 to repair the wharves and piers and $87,000 to repair the other damage. This contemplates the rebuilding of the present wooden piers with creosoted-timber structures and retaining the overhead wiring for electric distribution and telephone systems.
